Subchapter L—Irrigation Projects: Operation and Maintenance

PART 130—OPERATION AND MAINTENANCE CHARGES

FLATHEAD INDIAN IRRIGATION PROJECT, MONTANA

On March 20 there was published in the daily issue of the FEDERAL REGISTER a notice of intention to amend §§ 130.16, 130.17 and 130.18 (12 F. R. 1859) effective for the irrigation season of 1947 and thereafter until further notice. Interested persons were to be given opportunity to participate in preparing the amendments by submitting data or arguments within thirty days from the date of publication of the notice. No comments, oral or written, having been received within the prescribed period the said sections are hereby amended and promulgated as follows:

§ 130.16 *Charge, Jocko Division.* An annual minimum charge of $1.92 per acre shall be made against all lands within the Jocko Division to which water can be delivered, regardless of whether the water is used.

The minimum charge when paid shall be credited on the delivery of water at the following per acre-foot rates:

(a) For lands receiving water from the lower Jocko and Revais Creek laterals, water will be delivered in amounts equal to one acre-foot per acre for the entire irrigable area of the farm unit, allotment, or tract, at the rate of one dollar ($1) per acre-foot, and additional water will be delivered at the rate of fifty cents (50¢) per acre-foot.

(b) For irrigable lands as defined in paragraph (a) of this section receiving water from Finley, East Finley, Agency, and Big Knife Creeks, water will be delivered at the rate of seventy-five cents (75¢) per acre-foot at any time during the irrigation season.

(c) For irrigable lands as defined in paragraph (a) of this section receiving water from Jocko River through the Jocko K Lateral system, at the rate of fifty cents (50¢) per acre-foot at any time during the irrigation season.

§ 130.17 *Charges, Mission Valley and Camas Divisions.* A minimum charge of $2.10 per acre shall be levied against all irrigable land within these divisions as defined in § 130.16 (a) to which water can be delivered, regardless of whether water is used.

This charge shall entitle the farm unit, allotment, or tract of land to receive one and one-half acre-feet of water per irrigable acre or, in case of shortage, the proportionate share of the available supply.

For water delivered in excess of one and one-half acre-feet per irrigable acre there shall be an additional charge of seventy-five cents (75¢) per acre-foot.

§ 130.18 *Lands with secretarial private water rights.* For all areas recognized by the Secretary of the Interior as entitled to so-called private water rights where the water is regulated by the Flathead irrigation project and delivered through any part of the Flathead irrigation project system, a charge equal to fifty percent of the annual operation and maintenance charge for project lands not having such private water rights in the same general area shall be made for water delivered up to two acre-feet per acre or such quantity of water allowed for each acre under the Secretary's private water right findings.

Upon filing a written application on the approved form by the owner of land with a secretarial private water right for a pro rata per acre share of the available water, natural flow and project stored supply, which application shall be a recognition that his land has relative water requirements as the soils of similar character of project lands, then there shall be delivered each irrigation season thereafter to his land the pro rata per acre share of the available water for which shall be paid the annual per acre charge fixed in §§ 130.16 and 130.17. The lands covered by any application filed pursuant to this section shall be treated from the date of the application as a part of the Flathead Indian irrigation project and subject to all the terms and conditions of applicable law and regulations.

[Docket No. G-817]

NEW YORK STATE NATURAL GAS CORP.

NOTICE OF AMENDMENT TO APPLICATION

MAY 1, 1947.

Notice is hereby given that New York State Natural Gas Corporation (Applicant), a New York corporation with its principal office in New York, New York, filed with the Federal Power Commission on April 14, 1947, an amendment to its application filed herein on November 20, 1946, for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended. The amended application is for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, authorizing the construction and operation of the following-described facilities:

1. Facilities to be completed by December 1, 1947:

(a) A continuous pipeline to parallel Applicant's existing lines Nos. 9 and 10 from a point in Burrell Township, Armstrong County, Pennsylvania, to a point in Sergeant Township, McKean County, Pennsylvania, consisting of:

(1) 35 miles of 12¾-inch pipeline paralleling existing line No. 9 southwardly from its northern terminus in Clarion County;

(2) 55 miles of 14-inch pipeline paralleling existing line No. 10 northwardly from its southern terminus in Clarion County.

(b) Installation at Boom Compressor Station in Tioga County, Pennsylvania, of three 300 horsepower and three 600 horsepower gas engine driven compressors together with auxiliary equipment, buildings, coolers, additions, and change piping, fittings and valves in and about the station and the adjacent Boom Storage Pool.

2. Facilities to be completed by December 1, 1948:

(a) A continuation of the pipeline looping described in paragraphs 1. (a) (1) and 1. (a) (2) above to complete the paralleling of Applicant's existing lines Nos. 9 and 10 from a point in Franklin Township, Westmoreland County, Pennsylvania, to a point in Liberty Township, McKean County, Pennsylvania, consisting of:

(1) 24.5 miles of 16-inch pipeline paralleling existing line No. 9 and extending south from the loop line to be installed in 1947 described in paragraph 1. (a) (1) above;

(2) 21 miles of 14-inch pipeline paralleling existing line No. 10 and extending north from the loop line to be installed in 1947 described in paragraph 1. (a) (2) above.

(b) 13.4 miles of 16-inch pipeline to connect the north end of line No. 10 in Hebron Township with the south end of line No. 14 in Genessee Township, Potter County, Pennsylvania, and also with line No. 12 which leads to Applicant's Sabinsville Compressor Station.

It is stated by Applicant that it has become necessary to revise the facilities described in paragraph C, pages 3 and 4 of the original application in several particulars.[1] It is further stated by Applicant that shortly after the original application was filed it became apparent that gas demands of gas consumers would be greater than had been anticipated by the distributing companies or by Applicant which continued throughout the 1946-47 winter, and that curtailments of varying extent and duration have been in effect until April, 1947; that in its efforts to meet the 1947-48 winter demands Applicant must rely more on gas storage than was anticipated when the original application was filed; and that the facilities described herein are proposed by Applicant in its efforts to provide sufficient capacity to meet the anticipated requirements of its customers.

Applicant recites that the pipe lines described above which are to be completed by December 1, 1947, are to enable Applicant to take 90,000 Mcf. of gas per day from the Big Inch and Little Big Inch pipelines (Inch Lines)[2] and Hope Natural Gas Company and that completion of the remainder of the pipeline facilities described above by December 1, 1948, will be necessary if Applicant is to take 110,000 Mcf. of gas per day thereafter from the Inch Lines and Hope Natural Gas Company in order to meet anticipated demands. Applicant further recites that when completed Boom Compressor Station will have a total of 3,200 horsepower which will permit withdrawal from the Boom Storage Pool of 85,000 Mcf. per day at a minimum suction pressure of 170 pounds and a discharge pressure of 300 pounds and that said station could be adapted almost immediately to store gas at suction and discharge pressures necessary to meet any conditions anticipated in the operations of the storage pool.

Applicant estimates the total over-all capital cost of construction of the facilities described herein to be $5,342,366, which Applicant proposes to finance by issuance and sale of capital stock to Consolidated Natural Gas Company.[3]

Any interested State commission is requested to notify the Federal Power Commission whether the application should be considered under the cooperative provisions of the Commission's rules of practice and procedure, and, if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with reasons for such request.

The application of New York State Natural Gas Corporation is on file with the Commission and is open to public inspection. Any person desiring to be heard or to make any protest with reference to the application shall file with the Federal Power Commission, Washington 25, D. C., not later than fifteen days from the date of publication of this notice in the FEDERAL REGISTER, a petition to intervene or protest. Such petition or protest shall conform to the requirements of the rules of practice and procedure (effective September 11, 1946), and shall set out clearly and concisely the facts from which the nature of the petitioner or protestant's alleged right or interest can be determined. Petitions for intervention shall state fully and completely the grounds of the proposed intervention and the contentions of the petitioner in the proceeding so as to advise the parties and the Commission as to the specific issues of fact or law to be raised or controverted, by admitting, denying, or otherwise answering, specifically and in detail, each material allegation of fact or law asserted in the proceeding.

[1] For a description of the facilities as originally proposed, see Notice of Application, 11 F. R. 14331.

[2] Applicant filed an application with the Federal Power Commission on April 14, 1947, in Docket No. G-888 for authorization to construct and operate a compressor station for the purpose of receiving deliveries of gas from the Inch Lines into its main transmission pipeline No. 9.

[3] The over-all capital cost of the facilities as proposed in the original application was estimated to be $5,250,000.

[Docket No. G-888]

YORK STATE NATURAL GAS CORP.

NOTICE OF APPLICATION

APRIL 30, 1947.

Notice is hereby given that on April 14, 1947, an application was filed with the Federal Power Commission by New York State Natural Gas Corporation (Applicant), a New York corporation with its principal office in New York, New York, for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, authorizing the Applicant to construct and operate a compressor station, to be known as Preston Station, in Greene County, Pennsylvania, near the place where Applicant's main transmission pipeline No. 9 crosses the Big Inch and Little Big Inch pipelines (Inch Lines) to enable Applicant to receive gas from such pipelines and discharge it into its pipeline No. 9 against the operating pressures of the latter pipeline, as hereinafter more fully described.

Applicant seeks authorization to construct and operate the following-described facilities:

(a) Preston Station, consisting of five 1200 horsepower gas engines and compressors with auxiliary equipment, tankage and storage, cooling tower, structures for housing the machinery, and appurtenant equipment;

(b) Approximately eight-tenths of a mile of 20-inch pipeline from the Inch Lines to Preston Station and approximately three-tenths of a mile of 20-inch pipeline from Preston Station to Applicant's pipeline No. 9.

Applicant recites that it, together with its affiliates, The East Ohio Gas Company and Peoples Natural Gas Company, entered into an interim contract to run during the period the Inch Lines are operated under lease and also a long term contract with Texas Eastern Transmission Corporation to purchase gas to be delivered from the Inch Lines. Applicant and its affiliates are to receive under the interim agreement up to 125,000 Mcf per day and under the long term contract initially up to 125,000 Mcf per day, with options to receive ultimately 200,000 Mcf per day.

It is stated that upon completion of Preston Station Applicant will be able to receive gas from the Inch Lines at existing pressure, which will likely not exceed 100 p. s. i. until after Texas Eastern Transmission Company puts its proposed compressor stations in operation, and discharge it into Applicant's line No. 9 which has an operating pressure of approximately 1200 p. s. i.

It is further stated that the shortage of gas during the winter of 1946-47 made it impossible for Hope Natural Gas Company to deliver to Applicant sufficient gas to meet the requirements of all its customer companies; that gas must be obtained from the Inch Lines and from Hope Natural Gas Company if Applicant is to meet the anticipated requirements of its customers for 1947 and 1948 which, in addition to the anticipated demands of fourteen wholesale customers to which Applicant now delivers gas, includes the following: Republic Light, Heat & Power Company, Inc., which will distribute the gas purchased; Penn-York Natural Gas Corporation which intends to resell the gas purchased to Dominion Natural Gas Company; Iroquois Gas Corporation; and Pennsylvania Gas Company.

Applicant estimates the total over-all capital cost of construction of the facilities described herein to be approximately $1,215,785, which Applicant proposes to to finance by issuing and selling capital stock to its parent, Consolidated Natural Gas Company, at par for cash.

Any interested State commission is requested to notify the Federal Power Commission whether the application should be considered under the cooperative provisions of the Commission's rules of practice and procedure, and if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with reasons for such request.

The application of New York State Natural Gas Corporation is on file with the Commission and is open to public inspection. Any person desiring to be heard or to make any protest with reference to the application shall file with the Federal Power Commission, Washington 25. D. C., not later than fifteen days from the date of publication of this notice in the FEDERAL REGISTER, a petition to intervene or protest. Such petition or protest shall conform to the requirements of the rules of practice and procedure (effective September 11, 1946) and shall set out clearly and concisely the facts from which the nature of the petitioner or protestant's alleged right or interest can be determined. Petitions for intervention shall state fully and completely the grounds of the proposed intervention and the contentions of the petitioner in the proceeding so as to advise the parties and the Commission as to the specific issues of fact or law to be raised or controverted, by admitting, denying, or otherwise answering, specifically and in detail, each material allegation of fact or law asserted in the proceeding.

After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice, which were submitted by the Control Committee and the Plum Commodity Committee (established pursuant to the amended marketing agreement and order), it is hereby found and determined that:

§ 936.301 *Plums shipped into, in, or through designated regions.* (a) Commencing with the marketing season beginning April 1, 1947, each shipment of plums into, in, or through either of the following regions in the State of California will be regarded as directly burdening, obstructing, or affecting interstate or foreign commerce in plums:

(1) The San Francisco-Sacramento region, consisting of Marin County, Sacramento County, Contra Costa County, Alameda County, San Mateo County, and San Francisco County; and

(2) The Los Angeles region, consisting of Ventura County, Los Angeles County, and Orange County.

(b) As used in this section, "plums" and "marketing season" shall have the same meaning as is given to each such term in the amended marketing agreement and order. (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.; 7 CFR, Cum. Supp., 936.1 et seq.)

PART 936—FRESH BARTLETT PEARS, PLUMS AND ELBERTA PEACHES GROWN IN CALIFORNIA

REGULATION BY GRADES AND SIZES

§ 936.302 *Plum Order 1*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 36, as amended (7 CFR, Cum. Supp., 936.1 et seq.), regulating the handling of fresh Bartlett pears, plums, and Elberta peaches grown in the State of California, issued under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the regulation of shipments of Beauty plums, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that compliance with the notice, public rule making procedure, and effective date requirements of the Administrative Procedure Act (Pub. Law 404, 79th Cong.; 60 Stat. 237) is impracticable and contrary to the public interest in that the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended, is insufficient for such compliance.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., May 10, 1947, and ending 12:01 a. m., P. s. t., August 1, 1947, no shipper shall ship: (i) Any package or container of Beauty plums containing plums which do not meet the requirements of U. S. No. 1 grade (as specified for such grade in the United States Standards for plums and prunes (fresh), 12 F. R. 2305), with a total tolerance of ten (10) percent for defects not considered serious damage, in addition to the usual tolerances permitted in said United States Standards; or (ii) Any package or container of Beauty plums containing plums of a size smaller than the size that will pack a 5 x 5 standard pack, as specified in the aforesaid United States Standards, in a standard basket, as specified in paragraph numbered 1 of section 828.1 of the Agricultural Code of California. The aforesaid 5 x 5 standard pack is defined more specifically in subparagraph (2) of this paragraph.

(2) As used in this section, the aforesaid 5 x 5 standard pack is defined more specifically as follows: (i) At least thirty-five (35) percent, by count, of the total of such plums contained in any such pack measure not less than 1 9/16 inches in diameter, such diameter, as defined in the aforesaid United States Standards, being the shortest distance measured through the center of the plum at right angles to a straight line running from the stem to the blossom end; (ii) at least sixty (60) percent, by count, of the total of such plums contained in any such pack measure, as aforesaid, not less than 1 7/16 inches in diameter; and (iii) no plums contained in any such pack measure, as aforesaid, less than 1 5/16 inches in diameter.

(3) Each shipper, prior to making each shipment of Beauty plums, shall, during the period set forth in subparagraph (1) of this paragraph, have the plums included in each such shipment inspected by a duly authorized representative of the Federal-State Inspection Service, heretofore designated by the Plum Commodity Committee and hereby approved; and each such shipper shall submit promptly, or cause to be submitted promptly, to the Plum Commodity Committee, Federal-State shipping point inspection certificates stating the grades and sizes of the Beauty plum contained in each such lot or shipment: *Provided, however,* That, in case the following conditions exist in connection with any such shipment:

(i) A request for inspection is made to the Federal-State Inspection Service not later than 5:00 p. m. of the day before the fruit will be available for inspection;

(ii) The fruit is available for inspection between the hours of 7:00 a. m. and 8:00 p. m. of the day specified in the request for such inspection; and

(iii) The Federal-State Inspection Service furnishes the shipper with a signed statement that it is not practicable, under such conditions, for the Federal-State Inspection Service to make the inspection within the necessary time;

the shipper, by submitting, or causing to be submitted, such signed statement to the Plum Commodity Committee, may make the particular shipment without such inspection, but such shipper shall still be held responsible for conforming with all grade and size regulations applicable to such shipment.

(4) The determination in § 936.301 with respect to shipments of plums into, in, or through the San Francisco-Sacramento region and the Los Angeles region shall be applicable to this section.

(5) The terms "shipper," "ship," "shipping point," and "shipment" shall have the same meaning as when used in the amended marketing agreement and order. The term "serious damage" shall have the same meaning as set forth in the aforesaid United States Standards.

(6) Nothing contained in this section shall be construed as altering any provision of the aforesaid amended marketing agreement or order, (48 Stat. 31, as amended, 7 U. S. C. 601 et seq.; 7 CFR, Cum. Supp., 936.1 et seq.)

(5) Nothing contained in this section shall be construed (i) as preventing a shipper from shipping Formosa plums of a size larger than the size that will pack a 4 x 4 standard pack, as aforesaid, if said plums meet the grade requirements hereof, (ii) as permitting the shipment of Formosa plums of a size smaller than a size that will pack a 4 x 5 standard pack, as aforesaid, even if the plums do meet said grade requirements, or (iii) as altering any provision of the aforesaid marketing agreement or order.

the shipper, by submitting or causing to be submitted, such signed statement to the Plum Commodity Committee, may make the particular shipment without such inspection, but such shipper shall still be held responsible for conforming with all grade and size regulations applicable to such shipment.

(7) The determination in § 936.301 with respect to shipments of plums into, in, or through the San Francisco-Sacramento region and the Los Angeles region shall be applicable to this section.

(8) The terms "shipper," "ship," "shipping," "shipping point," and "shipment," shall have the same meaning as when used in the amended marketing agreement and order. The term "serious damage" shall have the same meaning as set forth in the aforesaid United States Standards. (48 Stat. 31, as amended, 7 U. S. C. 601 et seq.; 7 CFR, Cum. Supp., 936.1 et seq.)

PART 1596—FOOD IMPORTS

STATEMENT OF POLICY REISSUANCE OF IMPORT AUTHORIZATIONS FOR FLAXSEED AND LINSEED OIL

Pursuant to the authority vested in me under the provisions of War Food Order No. 63, as amended (12 F. R. 459), and in order to assure equitable distribution of available supplies of imported flaxseed and linseed oil through normal trade channels, it is hereby declared to be the policy of the United States Department of Agriculture to issue or deny the issuance of import authorizations required for flaxseed and linseed oil under said War Food Order No. 63 as provided herein.

§ 1596.4 *Statement of policy re issuance of import authorizations for flaxseed and linseed oil under War Food Order No. 63*—(a) *Definitions.* For the purposes of this statement the following terms shall have the meanings hereby assigned to them:

(1) "Eligible prewar crusher" means any person who purchased flaxseed or linseed oil from Commodity Credit Corporation stockpiles during the years 1943 through 1946. (Flaxseed from such stockpiles was sold during such period to crushers who had imported flaxseed during the prewar years (1938 through 1942) in proportion to their prewar imports. During the period from January 1, 1944, through October 15, 1945, linseed oil from such stockpiles was sold to crushers as required by the crushers, and during the period from October 15, 1945, through December 31, 1946, linseed oil from such stockpiles was sold to crushers who had purchased linseed oil from such stockpiles in proportion to their purchases during the earlier period.)

(2) "Commodity Credit Corporation stockpiles" means the stocks of flaxseed and linseed oil acquired and imported by Commodity Credit Corporation, United States Department of Agriculture, under a public purchase program and sold in the form of flaxseed or linseen oil to crushers during the period from January 1, 1943, through December 31, 1946.

(3) Any term not defined in this section shall have the meaning, if any, assigned to it in War Food Order No. 63.

(b) *Individual Import Authorizations.* Import authorizations are not required under War Food Order No. 63 for linseed oil located and produced in Canada, Mexico, Guatemala, or El Salvador and transported therefrom into the continental United States overland, by air, or by inland waterway.

Authorizations to import linseed oil not within the foregoing paragraph, and flaxseed from any country except Mexico, will be issued in a total quantity not in excess of the 1947 allocations to the United States by the International Emergency Food Council. Such authorizations will be issued to any eligible prewar crusher in the percentage which such crusher's purchases of linseed oil and flaxseed from Commodity Credit Corporation stockpiles during the period from January 1, 1943, through December 31, 1946, constituted of the total purchases by all persons of linseed oil and flaxseed from said stockpiles during said period.

Authorizations to import flaxseed from Mexico will be issued, upon request, to any eligible prewar crusher, but the total quantity so authorized shall not exceed the quantity of Mexican flaxseed allocated to the United States for 1947 by the International Emergency Food Council.

(c) *Procedure.* Applications for authorizations for the importation of flaxseed or linseed oil, or both, may be made by properly executing and filing with the Order Administrator, War Food Order No. 63, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., Form WFO 63–2, obtainable from said Order Administrator.

(d) *Petition for relief from hardship.* Any person (including, but not limited to, persons qualifying as eligible prewar crushers as defined in this section) who considers that the policy and procedure set forth in this section work an exceptional or unreasonable hardship on him may file a petition for relief with the Administrator of War Food Order No. 63, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. The Order Administrator may take any action with reference to such petitions which is consistent with the authority delegated to him by the Administrator of the Production and Marketing Administration, United States Department of Agriculture. If the petitioner is dissatisfied with the action taken by the Order Administrator, he may, by request addressed to the Order Administrator, obtain a review of such action by the Administrator of the Production and Marketing Administration. After said review, the Administrator of said Administration may take such action as he deems appropriate, which action shall be final.

(e) *Effective date.* The policy and procedure outlined herein shall be effective upon publication hereof.

SPECIAL RULES OF PRACTICE APPLICABLE AT HEARING

Protestants: Petitions of intervention unnecessary. Persons appearing in opposition to the petition herein will be considered as protestants, and may be heard without the filing of petitions of intervention.

Simplification of presentations. In order to conserve time and avoid expense, it is strongly urged that persons finding themselves with common interests in the proceeding shall, to the greatest extent possible, endeavor to consolidate their presentation of testimony, and arrange for cross-examination by as few counsel as possible. The same course should be followed upon oral argument.

Evidence offered should be carefully prepared with a view to conciseness and clarity, and so as to avoid unnecessary extraneous, immaterial, and irrelevant matter, and undue cumulation of testimony or of witnesses upon any point. It should be factual in character, and argument should be reserved for the oral argument stage, and not be incorporated in the testimony.

Exhibits. In the preparation of exhibits, Rules of Practice 81 to 84 inclusive should be followed. If possible, all documents submitted by a witness should be embraced in a single exhibit, with pages consecutively numbered, suitably bound together. In order to supply the State Commissioners, members of this Commission, and counsel in the proceeding, at least 150 copies of each exhibit should be prepared. So far as possible exhibits should be made self-explanatory in order to minimize the amount of time required for explanation by oral testimony.

Prepared statements. Witnesses who expect in the course of their testimony to read from a written statement should comply with Rule 77 of the rules of practice. They

MAY 13 '47

should have sufficient copies thereof to supply opposing counsel, the Commissioners on the bench, and the official reporter. However, in the interest of conservation of time, it is suggested that such statements be prepared and offered in the manner indicated in the following paragraph, as verified statements, instead of being submitted orally by a witness on the stand.

Verified statements (affidavits). Evidence in the form of verified statements (affidavits) without personal appearance of the affiant as a witness will also be received in the absence of objection, as hereinafter specified. Parties desiring to offer such statements should make available as early as possible during the hearing 15 copies for the Commission and 100 copies for other parties, including the petitioner. Notice of any objection to the receipt of any such statement in evidence should be given to the Commission and to the party submitting the statement promptly following the receipt of such statement. If no such notice is given promptly it will be considered that objection to the receipt of the statement in evidence is waived, but objection to the weight to be accorded the statement of facts is reserved. Such statements should conform to the rules of practice in respect of style, mimeographing, or printing, etc. They should be limited strictly to statements of fact and contain no argument, and if not so limited may be excluded. The Commission on its own motion or on objection may exclude a verified statement or any portion thereof which (a) is not material or relevant to the questions presented in this proceeding, (b) is obviously incompetent, or (c) is argumentative in character. In the absence of objection to introduction of the verified statement it will be unnecessary for the affiant to appear personally at the hearing. All verified statements received in evidence will be part of the record in the proceeding, upon which the Commission will base its decision.

Notice of intention to produce testimony. Persons who desire to be heard will facilitate the arrangements necessary by sending notice by letter or telegram to the Commission at Washington of their intention, so as to reach the Commission on or before June 3, 1947, which shall state the number of witnesses and the approximate amount of time necessary for presentation of direct testimony. If it is impracticable for other persons desiring to be heard, to attend the hearing at Washington, D. C., they should advise the Commission setting forth the facts, and consideration will be given to additional hearings when necessary.

Correspondence. Correspondence relative to this matter should be addressed to the Commission at Washington, D. C., with a reference to the docket number, Ex Parte No. 163.

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

[Regs., Serial No. 388]

PART 292—EXEMPTIONS AND CLASSIFICATIONS

IRREGULAR AIR CARRIERS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C. on the 5th day of May 1947.

The Civil Aeronautics Board, having held a hearing and issued its opinion in the Investigation of Non-Scheduled Air Service, Docket No. 1501, relating to non-certificated air carriers,[1] having circulated for comment a draft and thereafter a revised draft of proposed regulation relating to non-certificated air carriers, having considered written comments and oral argument thereon in Docket No. 2742, and having also considered other data and information[2] available to the Board, finds as follows:

1. Since 1938 there has been in effect an exemption regulation adopted by the Board which exempts non-certificated air carriers from all provisions of Title IV of the Civil Aeronautics Act (other than section. 401 (l) and 407 (a), and, since June, 1946, section 411) so long as they engage only in irregular services as defined in such regulation. At the time such regulation was originally adopted the Board believed it was undesirable to provide for the detailed economic regulation of the operations of such carriers without further study. Since that time and particularly following the close of the war, the Board has accumulated information and data which indicate that the aggregate operations of such carriers have increased in scope and importance, and that operations by individual carriers are frequently extensive. Some such operations have been conducted with little regard to the responsibility and duty owed to the public by a common carrier with respect to service, and have resulted in numerous complaints to the Board concerning tariff and operating practices, including but not limited to failure of such carriers to perform the service agreed upon, great variations in the fares and rates charged by the same carrier for comparable service, failure to make refunds to passengers and shippers for transportation not performed, misrepresentation of equipment, facilities and services, and use of inadequate and makeshift equipment and facilities. Both the protection of the public from improper practices by such non-certificated air carriers and protection of the certificated carriers against unregulated competition require that additional regulatory provisions of the Civil Aeronautics Act be now made applicable to such non-certificated air carriers.

2. In addition to the public demand and need for air transportation services furnished by the certificated air carriers on regularly scheduled operations, there is public demand and need at the present time for air services on an irregular basis both to certificated and non-certificated points. Such irregular services vary greatly with respect to type of service, and fill a need which, because of fluctuations in the demand and the impossibility of determining where and when the demand will arise, by its very nature cannot be fulfilled economically by carriers operating on regular schedules and routes. Such services can be performed by non-certificated air carriers, and because of their knowledge of local conditions or willingness to perform specialized types of services such services can frequently be performed by them more adequately, economically and quickly than by certificated carriers. To require the certification of such carriers at the present time would be impracticable because it would be necessary to issue a certificate of public convenience and necessity which would either impose no substantial limitations upon operations or which would substantially reduce the flexibility and usefulness of the operations of such carriers. Certification, in the case of many small scale operations, would be uneconomical and would tend to prevent or retard the development of new types of services designed to meet special conditions. Because of the fact that irregular services meet a different need and must be infrequent and irregular, such services, if properly regulated under provisions of the act other than those relating to certificates of public convenience and necessity, will not under present conditions have adverse competitive effect upon the services performed by the certificated air carriers.

3. In view of the considerations mentioned in paragraphs 1 and 2 hereof, and in order to insure the flexibility in the conduct of irregular services which is implicit in exemption of non-certificated air carriers from certification, irregular air carriers, as defined in § 292.1, should continue to be exempted from the requirements of section 401 of the act other than subsection (l). Protection of the public and the orderly development of the air transportation system in accordance with the objectives of section 2 of the act, however, require that certain provisions of the act which are not directly related to the certification provisions of the act should be made applicable to the irregular air carriers utilizing equipment of substantial size. Such carriers are now subject to sections 401 (l), 407 (a) and 411, and these requirements should be continued. In addition, such carriers should now be subject to sections 403, 404 (b), 407 (b), 407 (c), 407 (d), 407 (e), 409 (b), 410, 415 and 416; and to the requirements of section 404 (a) relating to safe service, equipment and facilities. In addition, such carriers should be made subject to the provisions of sections 408, 409 (a), 412, 413 and 414, except to the extent, as more fully set forth in paragraph (c) of § 292.1, that such provisions involve other irregular air carriers.

4. A portion of the irregular air service now being performed is performed by small air carriers operating a limited number of planes of small size. From reports submitted to the Board it appears that non-certificated air carriers operating one or more aircraft having a gross take-off weight in excess of 10,000 pounds constituted less than 20 percent of the total number of non-certificated air carriers, but flew approximately 90 percent of the total revenue passenger miles flown by all such carriers. It would thus appear that irregular air carriers operating aircraft under 10,000 pounds may be subjected to a much lesser degree of economic regulation without materially affecting the over-all air transportation system. Such operations are limited in scope, do not represent a serious threat to certificated operations, and extensive regulation thereof at this time would be unduly burdensome and costly to such carriers, would tend to increase the cost and impair the value of such services to the public, and would impose unnecessary additional administrative burden upon the Board. Accordingly, such irregular air carriers should not be made subject to sections 403, 404 (b), 407 (b), 407 (c), 408, 409 (a), 410 and 412, but should be made subject to all other provisions of the act to which the irregular air carriers utilizing equipment of substantial size are subject.

In drawing the line between the irregular air carriers utilizing equipment of substantial size and the irregular air carriers which utilize only smaller equipment, the Board finds that the use of a single aircraft unit having an allowable gross take-off weight in excess of 10,000 pounds would involve an operation of substantial size in relation to the service offered to the public and the competitive effect upon other air carriers; and that the use of aircraft units having an allowable gross take-off weight between 6,000 and 10,000 pounds and an aggregate gross take-off weight in excess of 25,000 pounds would likewise involve a substantial operation.

5. Section 292.1 of the economic regulations as revised herein, unlike the exemption heretofore in effect, does not provide for exemption from the act with respect to the carriage of persons in foreign air transportation. The Board finds that notwithstanding the findings in paragraphs 2 and 3 hereof the continuation of the exemption with respect to such transportation is no longer justified in view of the recent substantial extension of our international air transportation system, as well as the recent award of foreign air carrier permits, and in view of the smaller traffic potential which the Board finds to exist in the field of international air transportation as compared with interstate and overseas air transportation.

6. As a condition to the grant of the exemptions provided for in § 292.1, such section will provide for letters of registration to be issued to irregular air carriers, for quarterly operation reports, and for special reports on the institution of service with large aircraft by such carriers theretofore utilizing only small aircraft. These requirements are deemed necessary in order that the Board may maintain adequate supervision and obtain information with respect to excepted operations.

7. Unless specific provision were made herein the officers and directors of irregular air carriers otherwise would be subject to the interlocking relationships provisions of section 409 of the act, even though the irregular air carriers in which they hold their positions are wholly or partially exempted from such provisions by the terms of § 292.1. The Board's statutory powers to grant exemptions from provisions of Title IV of the act extend only to air carriers and not to individuals or persons other than air carriers. Certain interlocking relationships as specified in section 409 occupied by such persons are lawful only if approved by the Board upon due showing, in the form and manner prescribed by the Board, that the public interest will not be adversely affected thereby. The Board has determined in this regard that since it is granting exemption to certain irregular air carriers from the requirements of section 409 with respect to certain relationships, a due showing within the meaning of the statute to justify approval of an interlocking relationship, upon application filed by an officer or director of an irregular air carrier, would be made by a showing that such carrier itself had been granted an exemption from the necessity of obtaining approval. To require each such officer or director to file such an application and make such a showing, however, would appear to impose a useless administrative burden upon the Board and would not be conducive to the proper dispatch of business and to the ends of justice. The Board has determined, therefore, that such showing by all such officers and directors individually shall be presumed to have been made, and upon the basis thereof has granted blanket approval of such interlocking relationships in § 292.1.

8. In view of the foregoing considerations, the present enforcement of the provisions of Title IV, except to the extent required in § 292.1, would be an undue burden on irregular air carriers by reason of the limited extent of, and the unusual circumstances affecting the operations of such carriers, and would not be in the public interest.

On the basis of the foregoing findings, and pursuant to the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a) and 416 (b) thereof, and for the purpose of providing for the economic regulation of services conducted on an irregular basis by non-certificated air carriers, the Civil Aeronautics Board hereby amends § 292.1 of the economic regulations in its entirety to read as follows, effective June 10, 1947:

§ 292.1 *Irregular air carriers*—(a) *Applicability.* This section shall not apply to any air carrier authorized by a certificate of public convenience and necessity to engage in air transportation, to Alaskan air carriers, to operations within Alaska, or to any non-certificated air carrier engaged in air transportation pursuant to special or individual exemption by the Board or pursuant to exemption created by any other section of the economic regulations.

(b) *Classification.* There is hereby established a classification of non-certificated air carriers to be designated as "Irregular Air Carriers." An irregular air carrier shall be defined to mean any air carrier (1) which does not hold a certificate of public convenience and necessity under section 401 of the Civil Aeronautics Act of 1938, as amended, (2) which directly engages in interstate or overseas air transportation of persons and property or foreign air transportation of property only, and (3) which does not hold out to the public, expressly or by a course of conduct, that it operates one or more aircraft between designated points, or within a designated point, regularly or with a reasonable degree of regularity upon which aircraft it accepts for transportation, for compensation or hire, such members of the public as apply therefor or such property as the public offers. No air carrier shall be deemed to be an irregular air carrier unless the air transportation services offered and performed by it are of such infrequency as to preclude an implication of a uniform pattern or normal consistency of operation between, or within, such designated points. Within the meaning of this definition a "point" shall mean any airport or place where aircraft may be landed or taken-off, including the area within a 25-mile radius of such airport or place.

(c) *Exemptions*—(1) *General.* Except as otherwise provided in this section, irregular air carriers shall be exempt from all provisions of Title IV of the Civil Aeronautics Act of 1938, as amended, other than the following:

(i) Subsection 401 (l) (Compliance with Labor Legislation);

(ii) Section 403 (Tariffs);

(iii) Subsection 404 (a) (Carrier's Duty to Provide Service, etc.), only in so far as said subsection requires air carriers to provide safe service, equipment, and facilities in connection with air transportation;

(iv) Subsection 404 (b) (Discrimination);

(v) Subsection 407 (a) (Filing of Reports): *Provided,* That no provision of any rule, regulation, term, condition or limitation prescribed pursuant to said subsection 407 (a) shall be applicable to irregular air carriers unless such rule, regulation, term, condition or limitation expressly so provides;

(vi) Subsection 407 (b) (Disclosure of Stock Ownership);

(vii) Subsection 407 (c) (Disclosure of Stock Ownership by Officers or Directors);

(viii) Subsection 407 (d) (Form of Accounts): *Provided,* That no provision of any rule, regulation, term, condition or limitation prescribed pursuant to said subsection 407 (d) shall be applicable to irregular air carriers unless such rule, regulation, term, condition or limitation expressly so provides;

(ix) Subsection 407 (e) (Inspection of Accounts and Property);

(x) Section 408 (Consolidation, Merger, and Acquisition of Control): *Provided,* That irregular air carriers shall be exempt from section 408 in so far as said section would make it unlawful, without prior approval by the Board, (a) for any irregular air carrier or any person controlling any such carrier to purchase, lease, or contract to operate the properties, or any substantial part thereof, of another irregular air carrier, (b) for any irregular air carrier to consolidate or merge with another irregular

[1] As used herein the term "non-certificated air carriers" refers to air carriers engaging in air transportation which do not hold certificates of public convenience and necessity issued by the Board, and the term "certificated air carriers" refers to air carriers which do hold such certificates.

[2] Such data and information include, among other things, the reports heretofore filed with the Board pursuant to § 292.1 of the Economic Regulations, data obtained in investigations made by the enforcement staff of the Board, financial Forms 41, 2380 and 2780, and other reports filed with the Board by the certificated air carriers, informal complaints filed against non-certificated air carriers, and applications for air carrier operating certificates filed with the Civil Aeronautics Administration pursuant to Part 42 of the Civil Air Regulations.

air carrier, and (c) for any irregular air carrier or any person controlling any such air carrier to acquire control of another irregular air carrier: *Provided further*, That any irregular air carrier which consolidates or merges with another irregular air carrier and any irregular air carrier or any person controlling any such carrier that acquires control of, or purchases, leases, or contracts to operate the properties, or any substantial part thereof, of another irregular air carrier pursuant to the exemption granted herein, shall submit to the Board, not more than 30 days following the consummation of the transaction, a report indicating in reasonable detail the nature and result of the transaction.

(xi) Subsection 409 (a) (Interlocking Relationships): *Provided*, That if an application by any irregular air carrier for approval of an interlocking relationship in existence on the effective date of this section is filed with the Board prior to a date 30 days after the effective date of this section, such air carrier may retain the officer, director, member, or stockholder involved in such relationship pending final disposition by the Board of said application: *Provided, further*, That irregular air carriers shall be exempt from subsection 409 (a) in so far as said subsection would make it unlawful, without prior approval by the Board, (a) for any irregular air carrier to have and retain an officer or director who is an officer, director, or member, or who as a stockholder holds a controlling interest, in another irregular air carrier, (b) for any irregular air carrier, knowingly and willfully, to have and retain an officer or director who has a representative or nominee who represents such officer or director as an officer, director, or member, or as a stockholder holding a controlling interest, in another irregular air carrier;

(xii) Subsection 409 (b) (Profit from Transfer of Securities);

(xiii) Section 410 (Loans and Financial Aid);

(xiv) Section 411 (Methods of Competition);

(xv) Section 412 (Pooling and Other Agreements): *Provided*, That irregular air carriers shall be exempt from section 412 until 60 days after the effective date of this section: *Provided further*, That irregular air carriers shall be exempt from section 412 in so far as said section would require any irregular air carrier to file with the Board a copy or a memorandum of certain contracts or agreements (other than contracts or agreements for pooling or apportioning earnings, losses, traffic, service or flying equipment), or of modifications or cancellations thereof, between such carrier and any other irregular air carrier;

(xvi) Section 413 (Form of Control);

(xvii) Section 414 (Legal Restraints);

(xviii) Section 415 (Inquiry into Air-Carrier Management);

(xix) Section 416 (Classification and Exemption of Carriers).

(2) *Additional exemptions for irregular air carriers utilizing small aircraft.* Subdivisions (ii), (iv), (vi), (vii), (x), (xi), (xiii) and (xv) of subparagraph (1) of this paragraph shall not apply to any irregular air carrier which does not utilize in its air transportation services any single aircraft unit having an allowable gross take-off weight in excess of 10,000 pounds, or three or more aircraft units (not including any aircraft unit having an allowable gross take-off weight of less than 6,000 pounds) having an aggregate allowable gross take-off weight in excess of 25,000 pounds.

(3) *Additional temporary exemptions in foreign air transportation.* Notwithstanding any other provisions of this section, irregular air carriers for a period of three months after the effective date of this section, shall, with respect to foreign air transportation of persons, be exempt from all provisions of sections 401 (except subsection 401 (l)) and 403 of the Civil Aeronautics Act of 1938, as amended, only, however, to the extent that such foreign air transportation of persons is confined to operations of the type exempted under this section prior to this revision of such section.

(4) *Approval of certain interlocking relationships.* To the extent that any officer or director of an irregular air carrier would, without prior approval by the Board, be in violation of any provision of subsection 409 (a) (3) of the Civil Aeronautics Act of 1938, as amended, by reason of any interlocking relationship with another irregular air carrier, such relationship is hereby approved.

(5) *Effect on other statutes.* The exemptions hereinabove granted from certain provisions and requirements of sections 408, 409, and 412 shall not constitute an order made under such sections, within the meaning of section 414, and shall not confer any immunity or relief from operation of the "antitrust laws," or any other statute (except the Civil Aeronautics Act of 1938, as amended), with respect to any transaction, interlocking relationship or agreement otherwise within the purview of such section.

(6) *Operational reports by irregular air carriers.* On or before July 20, 1947, and thereafter on or before the 20th day of every October, January, April and July, each irregular air carrier, except those irregular air carriers utilizing only small aircraft, as specified in subparagraph (2) of this paragraph, shall file with the Board a quarterly operational report covering the period of the three preceding calendar months, showing all flights operated in air transportation during such period, and stating, with respect to each such flight, the dates of departures and arrivals and the origin, destinations and intermediate points served. Whenever any irregular air carrier theretofore utilizing only small aircraft, as specified in subparagraph (2) of this paragraph, undertakes to utilize in its air transportation services any single aircraft unit having an allowable gross take-off weight in excess of 10,000 pounds, or three or more airfcraft units (not including any aircraft unit having an allowable gross take-off weight of less than 6,000 pounds) having an aggregate allowable gross take-off weight in excess of 25,000 pounds, such irregular air carrier shall notify the Board in writing within not more than ten days after the actual commencement of such utilization.

(d) *Registration for exemption*—(1) *Letter of registration required.* From and after 60 days after the effective date of this section no irregular air carrier may engage in any form of air transportation unless there is then outstanding and in effect with respect to such air carrier a letter of registration issued by the Board: *Provided*, That if any irregular air carrier, otherwise authorized to engage in air transportation pursuant to this section, shall file with the Board within 60 days after the effective date of this section, an application for a letter of registration, such applicant may engage in such air transportation until such letter has been issued, or such applicant has been notified that it appears to the Board that such applicant is not entitled to the issuance of such letter.

(2) *Issuance of letter of registration.* Upon the filing of proper application therefor, the Board shall issue, to any irregular air carrier, a letter of registration which, unless otherwise sooner rendered ineffective, shall expire and be of no further force and effect, upon a finding by the Board that enforcement of the provisions of section 401 (from which exemption is provided in this section) would be in the public interest and would no longer be an undue burden on such irregular air carrier or class of irregular air carriers. Such application shall be certified to by a responsible official of such carrier as being correct, and shall contain the following information: (i) Date; (ii) name of carrier; (iii) mailing address; (iv) location of principal operating base; (v) if a corporation, the place of incorporation, the name and citizenship of officers and directors and a statement that at least 75 per centum of the voting interest is owned or controlled by persons who are citizens of the United States or of one of its possessions; (vi) if an individual or partnership, the name and citizenship of owners or partners; (vii) the types and numbers of each type of aircraft utilized in air transportation. Such application shall be submitted in duplicate in letter form or on C. A. B. Form No. 2789[1] which is available on request for the convenience of applicants.

(3) *Non-transferability of letter of registration.* A letter of registration shall be non-transferable and shall be effective only with respect to the person named therein.

(4) *Suspension of letter of registration.* Letters of registration shall be subject to immediate suspension when, in the opinion of the Board, such action is required in the public interest.

(5) *Revocation of letter of registration.* Letters of registration shall be subject to revocation, after notice and hearing, for knowing and willful violation of any provision of the Civil Aeronautics Act of 1938, as amended, or of any order, rule or regulation issued under any such provision, or of any term, condition or limitation of any authority issued under said act or regulations.

(e) *Separability.* If any provision of this section or the application thereof to any air transportation, person, class of persons, or circumstance is held invalid, the remainder of the section and the application of such provisions to other air transportation, persons, classes of persons, or circumstances shall not be affected thereby. (52 Stat. 984 and 1004, as amended; 49 U. S. C. 425a and 496b)

PART 292—EXEMPTIONS AND CLASSIFICATIONS

NON-CERTIFICATED CARGO CARRIERS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 5th day of May 1947.

The Civil Aeronautics Board, having held a hearing and issued its opinion in the Investigation of Non-Scheduled Air Service, Docket No. 1501, relating to non-certificated air carriers,[1] having circulated for comment a draft and thereafter a revised draft of proposed regulation relating to non-certificated air carriers, having considered written comments and oral argument thereon in Docket No. 2742, and having also considered other data and information[2] available to the Board, finds as follows:

1. Although the carriage of passengers and parcels (express) has long been performed by the certificated air carriers, the carriage of property in aircraft specially adapted or used solely for that purpose, and by companies devoting all or a major portion of their efforts to the solicitation and carriage of property constitutes a new and developing business. Such carriage of property by air is in the public interest, meets a public need, and although still in its infancy is likely to become an industry utilizing new methods and techniques which will develop only with time, experience and opportunity for experimentation. The need and the opportunity cannot be adequately met by confining such carriers of property, which at the present time do not hold certificates of public convenience and necessity, to the irregular operations which they have heretofore conducted or may hereafter conduct pursuant to § 292.1 of the economic regulations, or which they may continue to conduct on a noncommon carrier basis.

2. Because of the inability of non-certificated air carriers to carry sufficient volume of cargo on an irregular common carrier basis or to build up an economically balanced operation in the case of non-common carrier operations, many of such carriers of property by air, operating in interstate and/or overseas air transportation may be required, for financial reasons, to terminate operations if they are required to continue to operate only upon an irregular or non-common carrier basis.

3. At the present time applications are pending before the Board in which for the first time the Board will be called upon to determine issues of public convenience and necessity relating to authorization to engage in the air transportation of property only in interstate and/or overseas air transportation. Certain of these applications are already consolidated in pending proceedings which are in various stages of adjudication, but it appears that in no case will the Board be able to dispose finally of such issues for some time. During this interim period it would not be in the public interest to terminate or curtail such services and thereby lose the benefit of the experience being obtained in this new field of air cargo; and the probability of dissipation of the operating staff and experience of such carriers, interruption of operations, loss of revenues and probable loss of part of their capital funds during the aforesaid interim period constitute unusual circumstances affecting the operations of such carriers and would impose an undue burden on such carriers.

4. In view of the considerations mentioned above, we find that non-certificated cargo carriers in the class described in paragraph (b) of § 292.5 should be exempted from the requirements of section 401 of the act (other than section 401 (l)) in order that such carriers will be able to engage in scheduled cargo service in interstate and/or overseas air transportation to the extent provided in paragraph (c) of § 292.5. Such carriers will be made subject to all other provisions of Title IV of the act other than provisions, such as sections 405 and 406, which are not applicable to non-certificated cargo only operations.

5. Section 292.5 will not provide for exemption from the act with respect to the carriage of cargo in foreign air transportation. The Board finds that an exemption with respect to such transportation is not justified in view of the recent substantial extension of our international air transportation system, as well as the recent award of foreign air carrier permits, and in view of the smaller traffic potential which the Board finds to exist presently in the field of international air transportation as compared with interstate or overseas air transportation.

6. In view of the foregoing considerations, the present enforcement of the provisions of Title IV, except to the extent required in § 292.5, would be an undue burden on non-certificated cargo carriers by reason of the limited extent of, and the unusual circumstances affecting, the operations of such carriers, and would not be in the public interest.

On the basis of the foregoing findings, and pursuant to the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a) and 416 (b) thereof, and for the purpose of authorizing and regulating limited air transportation of property only by certain applicants for certificates of public convenience and necessity for such service, the Civil Aeronautics Board hereby makes and promulgates the following regulation, effective June 10, 1947:

§ 292.5 *Non-certificated cargo carriers*—(a) *Applicability.* This section shall not apply to any air carrier authorized by a certificate of public convenience and necessity to engage in air transportation, to Alaskan air carriers, to operations within Alaska, or to any non-certificated air carrier engaged in air transportation pursuant to special or individual exemption by the Board or pursuant to exemption created by any other section of the economic regulations.

(b) *Classification.* There is hereby established a classification of non-certificated air carriers to be designated as "non-certificated cargo carriers". A non-certificated cargo carrier shall be defined to mean any air carrier which directly engages in interstate or overseas air transportation of property only and which on May 5, 1947,

(1) Did not hold a certificate of public convenience and necessity under section 401 of the Civil Aeronautics Act of 1938, as amended,

(2) Had on file with the Board an application for a certificate of public convenience and necessity authorizing scheduled interstate or overseas air transportation of property only, and

(3) Was actively engaged in the business of carrying property by air for compensation or hire.

(c) *Scope of operations affected.* Except as otherwise provided in this section, each non-certificated cargo carrier shall be entitled to the exemptions created by this section, only with respect to transportation between such carrier's "established points." For the purpose of this section, the term "established points" shall be defined for any given non-certificated cargo carrier to include any point to or from which such carrier has transported property by air, for compensation or hire, on other than merely a casual, occasional or infrequent basis, at any time during the twelve-month period ending May 5, 1947, *Provided, however*, That such point is a point, or is located in a region, proposed to be served in such carrier's pending application referred to in paragraph (b) of this section. Upon filing written notice with the Board of intention to serve any other point located within the area immediately adjacent to any established point, such carrier also shall be entitled to the exemptions created by this sec-

[1] As used herein the term "non-certificated air carriers" refers to air carriers engaging in air transportation which do not hold certificates of public convenience and necessity issued by the Board, and the term "certificated air carriers" refers to air carriers which do hold such certificates.

[2] Such data and information include, among other things, the record in the Air Freight Case, Docket No. 810 et al., the reports heretofore filed with the Board pursuant to § 292.1 of the Economic Regulations, data obtained in investigations made by the enforcement staff of the Board, financial forms 41, 2380 and 2780, and other reports filed with the Board by the certificated air carriers, informal complaints filed against non-certificated air carriers, and applications for air carrier operating certificates filed with the Civil Aeronautics Administration pursuant to Part 42 of the Civil Air Regulations.

tion, with respect to transportation to or from such other point, unless and until the Board shall advise the carrier that such other point is not deemed, with reference to the purposes of this section, to be located within said immediately adjacent area, or that said transportation to or from such other point is not in the public interest.

(d) *Duration of exemption.* Unless otherwise extended as to any particular carrier by appropriate order of the Board, the exemptions provided in this section shall apply to each non-certificated cargo carrier only until 60 days after the Board shall have made final disposition of any one application, or part thereof, on file with the Board by that carrier on May 5, 1947, for a certificate of public convenience and necessity authorizing the direct scheduled interstate or overseas air transportation of property only.

(e) *Exemptions.* Except as otherwise provided in this section, non-certificated cargo carriers shall be exempt from all provisions of Title IV of the Civil Aeronautics Act of 1938, as amended, other than the following:

(1) Subsection 401 (l) (Compliance with Labor Legislation);

(2) Section 403 (Tariffs);

(3) Subsection 404 (a) (Carrier's Duty to Provide Service, etc.), only in so far as said subsection requires air carriers to provide safe service, equipment, and facilities in connection with air transportation, and to establish, observe and enforce just and reasonable individual and joint rates, fares, and charges, and just, reasonable and equitable divisions thereof, and just, reasonable classifications, rules, regulations, and practices relating to air transportation;

(4) Subsection 404 (b) (Discrimination);

(5) Subsection 407 (a) (Filing of Reports): *Provided,* That no provision of any rule, regulations, term, condition or limitation prescribed pursuant to said subsection 407 (a) shall be applicable to non-certificated cargo carriers unless such rule, regulation, term, condition or limitation expressly so provides;

(6) Subsection 407 (b) (Disclosure of Stock Ownership);

(7) Subsection 407 (c) (Disclosure of Stock Ownership by Officers or Director);

13.3 Delegation of authority for adjudication and settlement of claims.
13.4 Procedure for making claims.
13.5 Adjudication and settlement of claims.
13.6 Payment of claims.

AUTHORITY: §§ 13.1 to 13.7, inclusive, issued under R. S. 161, 60 Stat. 843; 5 U. S. C. 22, 28 U. S. C. 921 et seq.

§ 13.1 *Purpose.* The purpose of this part is to delegate authority to settle claims for personal injury or property damage under the Federal Tort Claims Act (60 Stat. 843; 28 U. S. C. 921) and to establish procedures for the adjudication of such claims.

§ 13.2 *Provisions of law.* The following are the applicable provisions of law:

(a) Section 403 of the Federal Tort Claims Act provides as follows:

(a) Subject to the limitations of this title, authority is hereby conferred upon the head of each Federal agency, or his designee for the purpose, acting on behalf of the United States, to consider, ascertain, adjust, determine, and settle any claim against the United States for money only, accruing on and after January 1, 1945, on account of damage to or loss of property or on account of personal injury or death, where the total amount of the claim does not exceed $1,000 caused by the negligent or wrongful act or omission of any employee of the Government while acting within the scope of his office or employment, under circumstances where the United States, if a private person, would be liable to the claimant for such damage, loss, injury, or death, in accordance with the law of the place where the act or omission occurred.

(b) Subject to the provisions of Part 3 of this title, any such award or determination shall be final and conclusive on all officers of the Government, except when procured by means of fraud, notwithstanding any other provision of law to the contrary.

(c) Any award made to any claimant pursuant to this section, and any award, compromise, or settlement of any claim cognizable under this title made by the Attorney General pursuant to section 413, shall be paid by the head of the Federal agency concerned out of appropriations that may be made therefor, which appropriations are hereby authorized.

(d) The acceptance by the claimant of any such award, compromise, or settlement shall be final and conclusive on the claimant, and shall constitute a complete release by the claimant of any claim against the United States and against the employee of the Government whose act or omission gave rise to the claim, by reason of the same subject matter.

(b) Under section 420 of the act claims must be filed within one year after the claim accrued or within one year of the date of the enactment of the act, whichever is later.

(c) Section 422 of the act provides, in part, that

* * * the head of the Federal Agency or his designee making an award pursuant to Part 2 of this title * * * may, as a part of the judgment, award, or settlement, determine and allow reasonable attorney's fees, which, if the recovery is $500 or more, shall not exceed 10 per centum of the amount recovered under Part 2, * * * to be paid out of but not in addition to the amount of the * * * award, or settlement recovered, to the attorneys representing the claimant.

(d) Section 424 (a) of the act repeals, in respect of claims cognizable under Part 2 of the act, all provisions of law authorizing any Federal agency to consider, ascertain, adjust, or determine claims on account of damage to or loss of property, or on account of personal injury or death, caused by the negligent or wrongful act or omission of any employee of the Government while acting within the scope of his office or employment.

§ 13.3 *Delegation of authority for adjudication and settlement of claims.* The head of each primary organization unit is hereby authorized to exercise with respect to claims arising out of the wrongful acts or omissions of employees of his organization, in accordance with §§ 13.4 and 13.5 all authority vested in the Secretary of Commerce by section 403 (a) of the act. The Solicitor of the Department of Commerce is authorized to exercise such authority with respect to claims arising out of the wrongful acts or omissions of employees of the constituent units of the Office of the Secretary excluding the Office of Technical Services. The approval and acceptance of any claim by the head of the primary organization unit concerned or by the Solicitor constitutes final action in the case insofar as the Department of Commerce is concerned and no further review in the Department may be obtained. For the purposes of this delegation and the settlement of claims, the Office of Technical Services, the Office of International Trade, the Office of Domestic Commerce, the Office of Business Economics, the Office of Small Business, and the Department of Commerce Field Service shall be considered as primary organization units.

§ 13.4 *Procedure for making claims.* The following procedure is established for the filing of claims under the Federal Tort Claims Act:

(a) Claims may be filed with any of the field offices of any primary organization unit of the Department or with the head of any bureau, office, or division of the Department.

A claim may be filed by the individual or firm sustaining injury or damages in his or its own right or by an attorney.

(b) Claims will be made in the form of a detailed statement of the facts in the case and shall include in addition to the information specified in subparagraphs (1) and (2) of this paragraph, such documentary evidence as will be helpful in adjudicating the claim.

(1) In cases of damage to personal property, if the property has been or can be economically repaired, an itemized receipt if payment has been made or an itemized estimate of the cost of repairs. If the property is not economically reparable, a statement as to depreciation in value, or, if the property is lost or destroyed, the value of the property at the time of loss or destruction.

(2) In cases of personal injury, doctors' bills, hospital bills, nursing bills, bills covering dental or optical services, a statement establishing the amount of time and compensation lost by reason of the accident, a statement from the attending physician showing the extent of the injuries and the treatment thereof, and the statements of any available witnesses.

§ 13.5 *Adjudication and settlement of claims.* Claims under the Federal Tort Claims Act will be adjudicated and settled as follows:

(a) Upon receipt of a claim, the receiving officer will record its receipt making the date of receipt a matter of record. After recording, the claim will be forwarded to the person designated by the head of the primary organization unit to initially examine claims. Claims involving unusual or novel questions of law may be submitted to the Solicitor for review and recommendation as to disposition. The Solicitor's recommendation shall include the amount of the award, if an award is to be made, and the amount to be allowed for attorneys' fees. The officer responsible for initial examination, or the Solicitor of the Department, as the case may be, may request such investigation or submission of additional evidence as may appear necessary.

(b) The head of the primary organization unit or the Solicitor, as the case may be, shall make the determination as to whether or not an award shall be made in each case, and, if an award is to be made, the amount of the award, and the amount to be allowed for attorneys' fees.

§ 13.6 *Payment of claims.* When an award is made, the head of the primary organization unit, or the Solicitor, as the case may be, will transmit the file on the case to the appropriate fiscal office for payment out of funds appropriated, or to be appropriated, for the purpose. Prior to the payment of any claim which is administratively settled, there shall be obtained from the claimant or claimants a release stating that the award or settlement is final and conclusive and constitutes a complete release by the claimant of any claim against the United States and against the employee of the Government arising out of the circumstances which resulted in the claim.

§ 13.7 *Effective date.* The provisions of this part are effective on filing with the Division of the Federal Register with the exception of § 13.6 which shall be effective as of such date as funds for the payment of claims under the Federal Tort Claims Act may become available to the Department.

Acting Secretary of Commerce.

Chapter VIII—Office of Housing Expediter

[Priorities Reg. 28, as Amended May 9, 1947]

PART 803—PRIORITIES REGULATIONS UNDER VETERANS' EMERGENCY HOUSING ACT OF 1946

RESTRICTED PRIORITIES ASSISTANCE

Section 803.8 Priorities Regulation 28 is amended to read as follows:

§ 803.8 *Restricted priorities assistance*—(a) *What this section does.* This section describes the conditions under which RR preference ratings may be granted by the Housing Expediter. Before May 9, 1947, this section contained principally the provisions governing filing of applications for RR ratings. This amendment, effective May 9, adds the eligibility provisions which were formerly contained in Supplement 1 to this section which is being revoked simultaneously with the issuance of this amendment. In general, rating assistance will be given under this section only in three classes of cases in support of the objectives of the Veterans' Emergency Housing Program and to aid the Veterans' Administration Construction Program.

(b) *General conditions for issuance of RR ratings.* When effective assistance of other kinds is not practicable (the Housing Expediter may locate sources able to ship without ratings), an RR rating may be granted for specific items and quantities of materials in the limited classes of cases described in paragraph (c) of this section, upon determination in each instance that all of the following general conditions are met:

(1) The use of substitute and less scarce items is not practicable;

(2) Reasonable efforts have been made to get the required item without a rating; and

(3) A rating is required to obtain the item by the latest date and in the minimum quantity practicable after taking into consideration material in inventory and material available without a rating.

(c) *Special conditions for issuance of RR ratings.* If all of the general conditions of paragraph (b) of this section are met, RR ratings may be issued for:

(1) An item needed to maintain or increase the production of a building product which is determined by the Housing Expediter to be in critically short supply (such products and the extent of the rating assistance which may be granted are customarily shown in Table I of this section); or

(2) Capital equipment which is a bottleneck in the production or erection of new housing accommodations, or is a bottleneck in the erection of a Veterans Administration Construction Project; or

(3) An item needed to provide essential utility services to new housing accommodations, or to a Veterans Administration Construction Project.

However, no RR ratings will be issued for specialized machinery or equipment designed and made solely for the production of a critical building product listed in Table I of this section or for site-preparation equipment or for an item (other than processing equipment) to be incorporated in construction at site or for any item listed in paragraph (d) of this section.

(d) *Products for which informal assistance, but not RR ratings, may be given.* No RR ratings will be assigned under this section for steel, pig iron, gypsum liner paper, or phenolic resin molding compounds.

The Housing Expediter may be able to locate sources in a position to ship such products without a rating for any applicant who meets the conditions in paragraphs (b) and (c) of this section.

(e) *Filing of applications.* Applications for an RR rating under this section should be made on Form OHE 14–172 (formerly Form CPA–541A), addressed to the Housing Expediter, Washington 25, D. C., Ref.: PR–28. Until copies of Form OHE 14–172 are available, applications may be made on Form CPA–541A.

Since ratings are no longer given to support a minimum economic rate of production or to give special help to small business or the business needs of veterans, no questions on Form CPA–541A need be answered which were designed for such cases. For example, Questions 7b, 13 and 16 on Form CPA–514A (as revised 4–23–46) may be left unanswered. On the other hand, supporting data required by Item 14 is of major importance and should clearly show how the application qualifies under paragraphs (b) and (c) of this section.

(f) *Existing ratings.* Nothing in this section affects the validity or duration of ratings granted before April 1, 1947. Rules concerning the termination of certain ratings at the end of March 1947 are stated in Priorities Regulation 35.

(g) *Reports.* The reporting requirements of this section have been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(h) *Effective date.* This section, as amended, shall become effective on May 9, 1947.

PART 807—SUSPENSION ORDERS

GROVER D. KING

Grover D. King, 1821 West Whittier Boulevard, Whittier, California, engaged in the construction of several housing projects in Southern California, was suspended on February 8, 1947 by Suspension Order No. S–1077. He appealed from the provisions of the suspension order and, pending determination of the appeal, the order was partially stayed by the Chief Compliance Commissioner on February 17, 1947. The appeal has been considered by the Chief Compliance Commissioner who has denied the appeal and directed that the suspension order be reinstated and amended. In view of the foregoing:

It is hereby ordered, That: Whereas, it appears that the Stay of Execution on February 17 was only effective as to certain veterans' housing enterprises, the Chief Compliance Commissioner has directed that the Suspension Order as amended April 28, 1947, be further amended by substituting the following paragraphs (a) and (f) for the present paragraphs (a) and (f):

(a) For a period beginning February 8, 1947 and extending to and including June 7, 1947, no authorization shall be granted to Grover D. King to construct, nor shall he during such period apply or extend any preference ratings regardless of the delivery date named in any purchase order to which such ratings may be applied or extended, except the following enterprises:

§ 1208.5 *Necessary evidence of intervenor's interest in a representation dispute.* In any representation dispute under the provisions of section 2, Ninth, of the Railway Labor Act, an intervening individual or organization must produce proved authorizations from at least thirty-five (35) percent of the craft or class of employees involved to warrant placing the name of the intervenor on the ballot.

§ 1208.6 *Eligibility of dismissed employees to vote.* Dismissed employees whose requests for reinstatement account of wrongful dismissal are pending before proper authorities, which includes the National Railroad Adjustment Board or other appropriate adjustment board, are eligible to participate in elections among the craft or class of employees in which they are employed at time of dismissal. (c) Upon the filing of such petition, the Board shall consider the same, and may thereupon either grant or deny the petition in whole or in part, conduct an appropriate hearing thereon and make other disposition of the petition. Should the petition be denied in whole or in part, prompt notice shall be given of the denial, accompanied by a simple statement of the grounds unless the denial is self explanatory.

(f) *Report.* An institutional user who receives an allotment of sugar under this section must fill out the report as required on SRA Form R–1340 (Rev.). This report must be filed with the Sugar Branch Office not later than ten days after the expiration of the allotment period in which the sugar is used. If a full report is not made of his use of sugar obtained under this section within the required time, all home canning sugar for which he has not accounted shall be charged as excess inventory. If the number of units actually processed during the period for which the report is filed, multiplied by the quantity of sugar per unit permitted under paragraph (d), is less than the quantity of sugar obtained, for that period, the difference shall be charged as excess inventory.

This amendment shall become effective as of May 9, 1947.

NOTE: The reporting and record-keeping requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 1st day of May 1947.

CLINTON P. ANDERSON,
Secretary of Agriculture.

Rationale Accompanying Amendment No. 43 to Third Revised Ration Order 3 and Amendment No. 21 to Revised General Ration Order 5

Proposed amendments. The amendment to Revised General Ration Order 5 permits institutional users (other than Group 1 users) to apply for sugar for canning fruits and fruit juices and for preserving in 1947. Application must be made on SRA Form R–1340 (Revised) to the Sugar Branch Office on or before October 31, 1947. The amendment to Revised General Ration Order 5 also deletes section 26.1.

The amendment to Third Revised Ration Order 3 provides that a consumer may apply to the Sugar Branch Office for sugar for home canning and preserving for sale. Application must be made on SRA Form R–371 (Revised) on or before October 31, 1947.

Reasons for amendments. Home canning by institutional users is an established operation and this amendment, therefore, incorporates a home canning program for institutional users for 1947. The total quantity of sugar issued to an institutional user under this program may not exceed fifteen pounds for each 1,000 meals served in 1946, which approximates the amount issued to consumers for canning for home use. Institutional users may apply for home canning in 1947 even though they did no home canning in 1946.

Since no specific consumer sugar stamps are now designated for home canning, section 26.1 of Revised General Ration Order 5 is now obsolete and is being deleted.

Consumers who do home canning and preserving for sale are again permitted to apply for sugar for such purpose. Even though a person did not receive sugar for home canning for sale in 1946, such person may be eligible for sugar for this purpose in 1947. This will permit persons who recently acquired farms or orchards, and persons who have been discharged from the armed services and were unable to qualify for sugar in prior years, to apply for sugar for home canning and preserving for sale in 1947.

[3d Rev. RO 3,[1] Amdt. 43]

PART 707—RATIONING OF SUGAR

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

Third Revised Ration Order 3 issued by the Office of Price Administration and amended by the Office of Temporary Controls under § 1407.1 of Title 32, Chapter XI is designated Third Revised Ration Order 3 issued under § 707.1, Title 32, Chapter VII pursuant to the authority vested in the Secretary of Agriculture by the "Sugar Control Extension Act of 1947" and is amended in the following respect:

1. Section 1.10 is added to read as follows:

SEC. 1.10 *Home canning for sale*—(a) *General.* A consumer may prior to November 1, 1947, apply for an allotment of sugar to be used for canning fruits and fruit juices for sale and for producing jams, jellies, preserves, marmalades or fruit butters for sale if the finished product is to be produced in a "kitchen".

(b) *Explanation of terms.* "Kitchen" is a place principally used for the preparation of meals for home consumption. It includes a place used principally to teach consumers how to prepare and cook for home consumption. (A place other than a kitchen and approved by the Sugar Branch Office in prior years as a kitchen shall be considered a "kitchen" for the purposes of this section.)

(c) *Application.* Application must be made on SRA Form R–371 (Rev.) to the Sugar Branch Office for the place where the consumer lives. The applicant must give all of the information required by the form. It must be signed by an adult member of the family unit.

(d) *Issuance.* If the Sugar Branch Office finds the facts stated in the application are true, it may grant the application in an amount not exceeding:

(1) One (1) pound of sugar for each four (4) quarts of finished canned fruit or fruit juices;

(2) One (1) pound of sugar for each pound of prepared fruit for making jams, preserves and marmalades;

(3) One (1) pound of sugar for each two (2) pounds of prepared fruit (or one pint of fruit juice) used for making jelly;

(4) One (1) pound of sugar for each two (2) pounds of prepared fruit (pulp) used for making fruit butters.

However, the total amount of sugar which may be obtained by a family unit under this section shall not exceed the amount requested or two hundred fifty (250) pounds, whichever is smaller. The Sugar Branch Office shall authorize the issuance of ration evidences for the amount of sugar granted under this section minus the amount of any sugar which the applicant and his family unit still have which was obtained for these purposes in prior years.

(e) *Records and reports.* The applicant must keep a record of the amount of products, as specified in paragraph (d), produced by him, the amount of sugar used in such products and the dates such products were sold. The applicant may be required to report such sales to the Sugar Branch Office.

(f) *Restriction on use.* Sugar obtained under this section may be used only for the purposes for which it was granted and at a rate no higher than that permitted by paragraph (d).

This amendment shall become effective as of May 9, 1947.

NOTE: The reporting and record-keeping requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 1st day of May 1947.

Secretary of Agriculture.

Unless otherwise specifically provided, bonds prepared on the forms mentioned above, and all agreements of extension of liability relating thereto, shall be retained at the ports, stations, or districts where they are approved. Bonds prepared on any form other than one of those mentioned above, or bonds prepared on any of the named forms in which the conditions have been materially altered, as well as any agreements of extension of liability relating therto, shall be referred to the Commissioner of Immigration and Naturalization for approval. Regardless of the form on which the bond is prepared, any power of attorney or assignment, purporting to authorize the delivery after its release of any deposit of collateral security to some person or concern other than the depositor thereof, shall be forwarded, together with the bond and all appurtenant documents, to the Commissioner for approval. Except as otherwise specifically provided in this chapter, if all the conditions of a bond executed in connection with the administration of the immigration laws are complied with, the district director shall cancel the bond by issuing Form I–391. Such authority to cancel shall include any case in which none of the conditions of the bond had been violated and all of the conditions ceased to have effect because:

(a) The alien departed, or was deported, from the United States;

(b) The warrant for the arrest or deportation of the alien was canceled;

(c) The alien complied with an order suspending his deportation;

(d) The alien died;

(e) The alien was imprisoned;

(f) The alien was naturalized as a citizen of the United States; or

Notice is hereby given that after inquiry and after consideration of all relevant matter presented pursuant to the notice of proposed posting and rule-making published in the FEDERAL REGISTER on April 2, 1947 (12 F. R. 2172), it has been ascertained by me, pursuant to section 302 of the Packers and Stockyards Act, 1921 (7 U. S. C. 202), that the stockyard known as Houston Auction Company, Houston, Texas, is a stockyard within the definition of a stockyard contained in section 302 of said act and is, therefore, subject to the provisions of said act.

The attention of the stockyard owner, market agencies, dealers, and other persons concerned is directed to sections 303 and 306 (7 U. S. C. 203 and 207), and other pertinent provisions of said act, and the rules and regulations issued thereunder by the Secretary of Agriculture.

NOTE: The Packers and Stockyards Act allows thirty (30) days, after the posting of notice at the stockyard, for market agencies, dealers, and stockyard owners to register and qualify for the operation of their businesses under that act. FEDERAL POWER COMMISSION

[Docket No. G–796]

SOUTHERN NATURAL GAS CO.

NOTICE OF AMENDMENT TO APPLICATION

MAY 6, 1947.

Notice is hereby given that on May 1, 1947, Southern Natural Gas Company (Applicant), a Delaware corporation, having its principal place of business in Birmingham, Alabama, and authorized to do business in the States of Alabama, Georgia, Louisiana, Mississippi, and Texas, filed a second amendment to its application filed on October 7, 1946, as amended on March 18, 1947, striking out of its application Items (C), (E) (2), (F), (G) (1), and (J), and Exhibits C, G–1, G–4, and G–6, and substituting in lieu thereof amended Items (c), (E) (2), (F), (G) (1), and (J), and amended Exhibits C, G–1, G–4, and G–6, and filing Exhibit G. The application, as amended, is for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, authorizing Applicant to construct and operate the following-described facilities.

A. *1947 Construction program.* (1) Main line compressor station additions:

(a) 2,000 H. P. in two units at the Louisville station.
(b) 2,000 H. P. in two units at the Reform station.
(c) 2,000 H. P. in two units at the Tarrant station.
(d) 2,000 H. P. in two units at the DeArmanville station.
8,000—Total H. P.

(2) Main line loop lines:

(a) 3.5 miles of 20-inch line between Reform and Tarrant compressor stations.
(b) 1.5 miles of 22-inch line between the Reform and Tarrant compressor stations.
(c) 11.0 miles of 22-inch line extending eastward from the Tarrant station.
(d) 2.5 miles of 20-inch line between the DaArmanville station and Atlanta.
18.5 miles—Total main line loops.

(3) Facilities to increase operating pressures:

Applicant states that it has made engineering studies which indicate the feasibility and safety of increasing operating pressures in certain sections of the main line from the present pressure of 450 p. s. i. to as much as 500 p. s. i. In the event tests confirm such studies, Applicant intends to install during 1947, the facilities required for operation at such higher pressure. According to the application, the above compressor station additions and loop lines will increase the delivery capacity of Applicant's system by approximately 13,000 Mcf per day; if operating pressures are increased from 450 p. s. i. to 500 p. s. i., there will be a further increase in delivery capacity of approximately 20,000 Mcf per day; and if operating pressures are increased to only 475 p. s. i., the increase in delivery capacity will be 9,000 Mcf per day instead of 20,000.

(4) Branch line loop lines:

(a) Meridian (Mississippi) branch line—9 miles of 6⅝-inch loop line.

Applicant recites that the above loop lines will increase daily delivery capacity as follows:

Meridian line from 9,000 to 10,000 Mcf.
Columbus line from 12,000 to 14,000 Mcf.

B. *1947–48 construction program.* (1) Main line compressor station additions:

(a) 10,000 H. P. in ten units, at a new station (Station A) to be located approximately midway between present Pickens and Louisville stations.

(b) 10,000 H. P. in ten units, at a new station (Station B) to be located approximately midway between the present Louisville and Reform stations.

(c) 8,000 H. P. in eight units, at a new station (Station C) to be located approximately midway between the present Reform and Tarrant Stations.

(d) 6,000 H. P. in six units, at a new station (Station D) to be located approximately

midway between the present Tarrant and DeArmanville stations.

(e) 3,000 H. P. in three units, at a new station (Station E) to be located approximately thirty-two miles East of the present DeArmanville station.

37,000—Total H. P.

(2) Main line loop lines:

(a) 5.0 miles of 20-inch line between new Station A and the Louisville station.

(b) 3.5 miles of 20-inch line between new Station B and the Reform station.

(c) 5.5 miles of 20-inch line between new Station E and Atlanta.

14.0—Total miles.

Applicant states that the facilities set forth in Parts (1) and (2) of paragraph B above will increase delivery capacity of the main line by approximately 96,000 Mcf per day.

(3) Branch line compressor station:

2,000 H. P. in two units at a new station (McConnell's Station) to be located at the point where the Montgomery-Columbus branch line takes off from the main line.

(4) Gadsden branch line loop:

33 miles of 12¾-inch pipe parallel to the present branch line.

It is stated that the installation of facilities set forth in Parts (3) and (4) above will increase delivery capacity of the branch lines affected as follows:

Montgomery-Columbus branch—from 50,000 Mcf to 60,000 Mcf per day.

Gadsden branch—from 30,000 Mcf to 60,000 Mcf per day.

(5) Facilities to extend Applicant's system to new markets.

(a) *An extension to Chattanooga, Tennessee.* This will comprise approximately 44 miles of 8⅝-inch line extending from a point on Applicant's existing Cedartown-Calhoun, Georgia branch line (at the end of the 6⅝-inch section of said line in Gordon County, Georgia) to a point of delivery in Catoosa County, Georgia, at or near the Georgia-Tennessee state line near Chattanooga. A new compressor station of 1,600 H. P. is to be installed at the end of the 12¾-inch sections of the Cedartown-Calhoun branch line, near Rockmart, Georgia, together with a meter station and dwelling houses at said point of delivery and appurtenant facilities. In the event Applicant makes contracts for delivery of gas for distribution in Rossville, Dalton and other communities along the route of the Chattanooga extension, such facilities will also include lateral lines and measuring facilities, or such portions thereof as Applicant may agree to construct, of appropriate sizes to supply such communities.

Applicant recites that this new line will be designed to operate at pressures up to 1,200 p. s. i. The line will have a capacity of about 2,000 Mcf per day without compression at Rockmart. With compression at Rockmart the line will have a capacity of 20,000 Mcf per day when operated at 1,200 p. s. i.

(b) *An extension to Lexington, Mississippi.* This will comprise approximately 11 miles of 4½-inch line extending from a point north of Goodman, Mississippi, on the Goodman-Durant branch line in Holmes County, Mississippi, to the town of Lexington, Mississippi, together with a meter station and appurtenant facilities. This line will have a daily delivery capacity of approximately 2,000 Mcf.

(c) *An extension to various cities and towns in north Alabama, including Athens, Decatur, Florence, Hartselle, Huntsville, Sheffield, and Tuscumbia.* This extension will comprise approximately 97 miles of 10¾-inch line commencing at a point on Applicant's main line east of its Reform compressor station and extending northward to Sheffield, and lateral lines comprising approximately 39 miles of 8⅝-inch line, 23 miles of 6⅝-inch line and 28 miles of 4½-inch line extending to the other cities mentioned above.

This project also includes the installation of 1,000 H. P. of additional compressing facilities at Applicant's Reform compressor station, a river crossing consisting of two 6⅝-inch lines across the Tennessee River, meter stations at various points of delivery and appurtenant facilities.

In the event Applicant makes contracts for the delivery of gas for distribution in other communities along the route of this extension, the facilities will also include lateral lines and measuring facilities, or such portions thereof as Applicant may agree to construct, of appropriate sizes to supply such communities. Such communities include Fayette, Winfield, Hamilton, Haleyville, Russellville, Town Creek, Leighton, Courtland, Wheeler, Hillsboro and Trinity.

This proposed extension is designed to operate at a pressure of 1,000 p. s. i. and will have a capacity of 25,000 Mcf per day.

(d) *An extension to White Plains, Alabama.* This extension will comprise approximately 7.5 miles of 4½-inch line commencing at a point on Applicant's main line east of its DeArmanville compressor station and extending northward to a point in Calhoun County known as White Plains, where said line will connect with lines extending to the towns of Jacksonville and Piedmont, Alabama (which latter lines will be constructed and owned by the respective towns), together with a meter station and appurtenant facilities.

This line will have a daily delivery capacity of approximately 2,000 Mcf.

(e) *A connection at Tallassee, Alabama.* This will consist of a tap and meter station at a point on Applicant's Montgomery-Columbus branch line in the town of Tallassee, Alabama.

Applicant states that the estimated total over-all capital cost of the proposed facilities is $17,162,790. The estimated total over-all capital cost of the facilities scheduled for installation under the 1947 construction program is $3,876,200, the major portion of which Applicant states could be financed from its current funds. Information with respect to Applicant's plans for further financing is to be supplied by amendment.

Applicant's system is presently connected to five gas fields; the Gwinville field in Mississippi, the Monroe and Bear Creek fields in Louisiana, the Logansport field in Louisiana and Texas, and the Carthage field in Texas.

It is recited this application is limited to those facilities which are absolutely necessary to meet the rapidly increasing requirements of Applicant's existing markets and to supply the extensions to Lexington, Mississippi; North Alabama; Jacksonville, Piedmont and Tallassee, Alabama; and Chattanooga, Tennessee, all of which have requested natural gas service from Applicant and from all of which there is an urgent demand for natural gas. Applicant states that the facilities covered by this application will increase its delivery capacity to approximately 384,000 Mcf per day and that its estimated peak day requirements for the winter of 1949–50, including the new markets, is 392,085 Mcf. Applicant, in order to meet a portion of the excess of estimated requirements for the winter of 1947–48 over anticipated delivery capacity, proposes to install propane standby plants to be located near its Ben Hill compressor station near Atlanta and its regulator station near Phoenix City on the Montgomery-Columbus branch line, and which will be capable of delivering 7,500 Mcf per day and 6,000 per day of equivalent natural gas, respectively.

Any interested State commission is requested to notify the Federal Power Commission whether the application, as amended, should be considered under the cooperative provisions of the Commission's rules of practice and procedure, and, if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with reasons for such request.

This application, as amended, of Southern Natural Gas Company is on file with the Commission and is open to public inspection. Any person (unless permission to intervene in the original application has already been granted by the Commission) desiring to be heard or to make any protest with reference to the application, as amended, shall file with the Federal Power Commission, Washington 25, D. C., not later than May 21, 1947, a petition to intervene or protest. Such petition or protest shall conform to the requirements of the rules of practice and procedure (effective September 11, 1946) and shall set out clearly and concisely the facts from which the nature of the petitioner or protestant's alleged right or interest can be determined. Petitions for intervention shall state fully and completely the grounds of the proposed intervention and the contentions of the petitioner in the proceeding so as to advise the parties and the Commission as to the specific issues of fact or law to be raised or controverted, by admitting, denying, or otherwise answering, specifically and in detail, each material allegation of fact or law asserted in the proceeding.

[Docket No. G-889]

EAST TENNESSEE NATURAL GAS CO.

NOTICE OF APPLICATION

MAY 5, 1947.

Notice is hereby given that on April 17, 1947, an application was filed with the Federal Power Commission by East Tennessee Natural Gas Company (Applicant), a Tennessee corporation with its principal place of business of Chattanooga, Tennessee, and authorized to do business in the State of Tennessee, for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, authorizing Applicant to construct and operate natural-gas pipe-line facilities, all of which are to be located in the State of Tennessee, and are more particularly described as follows:

(a) Approximately 186.5 miles of 16-inch O. D. transmission pipe line extending from a point of take-off from the line of Tennessee Gas & Transmission Company at a point of interconnection approximately 5 miles northeast of that company's compressor station No. 10, in an easterly or slightly southeasterly direction to a point near Chickamauga Dam in the immediate vicinity of Chattanooga, Tennessee.

(b) Approximately 112.4 miles of 12¾-inch O. D. transmission pipe line extending from the point last mentioned in paragraph (a) above in a northeasterly direction to a point southeast of Knoxville, Tennessee, and in the immediate vicinity of the corporate limits of that city.

(c) Approximately 32.4 miles of 6-inch O. D. pipe line, 143.1 miles of 4-inch O. D. pipe line, and 70.9 miles of 3½-inch O. D. pipe line, all of which will serve as lateral lines and will extend from the pipe lines described in paragraphs (a) and (b) above.

The application recites that Applicant has recently been incorporated and is organized for the purpose of constructing and operating the proposed facilities, and that with respect to such facilities it is the successor in interest to Tennessee Natural Gas Lines, Inc., which company heretofore, on January 9, 1947, filed an application with the Federal Power Commission for a certificate of public convenience and necessity authorizing it to construct and operate facilities similar to those proposed and described above.[1]

The application further recites that Tennessee Natural Gas Lines, Inc. has transferred and assigned to Applicant all of its rights in the proposed facilities, including all preliminary engineering, market surveys and studies, and the gas supply contract dated September 6, 1946, entered into between Tennessee Gas & Transmission Company and Tennessee Natural Gas Lines, Inc., whereby Tennessee Gas & Transmission Company agreed to furnish an adequate supply of natural gas for the proposed facilities and operation thereof. It is stated, however, that Tennessee Natural Gas Lines, Inc. continues to be interested in the construction and operation of the proposed facilities in that it is a minority stockholder of Applicant.

Applicant purposes to supply natural gas from the above-described facilities to the following cities and towns in the State of Tennessee, which do not now have natural gas service; Centerville, Mt. Pleasant, Columbia, Lawrenceburg, Pulaski, Waynesboro, Lewisburg, Shelbyville, Murfreesboro, Fayetteville, Lynchburg, Mulberry, Tullahoma, Manchester, Winchester, Decherd, Cowan, Sewanee, Monteagle, Tracy City, South Pittsburgh, Richard City, Jasper, Whitwell, Chattanooga, Ooltewah, Cleveland, Charleston, Benton, Calhoun, Riceville, Etowah, Englewood, Athens, Madisonville, Sweetwater, Philadelphia, Loudon, Alcoa, Maryville, Lenoir City and Knoxville.

Applicant states that under its present plans it will sell natural gas for the above-mentioned cities and towns at wholesale city gate rates, and will make direct pipeline sales for industrial use to a limited number of large industrial users, and that no construction or acquisition of resale distribution systems by Applicant is presently contemplated. Applicant recites that the proposed rates for the gas service will be supplied when

[1] Docket No. G-847; see notice of application published February 6, 1947, 12 F. R. 870, 871. On April 23, 1947, Tennessee Natural Gas Lines, Inc. filed with the Federal Power Commission a motion to dismiss its application filed on January 9, 1947.

it completes its market studies and surveys.

Applicant states that it is filing this application on the assumption that Chattanooga Gas Company will become a city gate customer of Applicant, notwithstanding the fact that Chattanooga Gas Company is a wholly owned subsidiary of Southern Natural Gas Company, which last mentioned company now has on file with the Federal Power Commission an application[2] for the construction and operation of facilities to serve the Chattanooga market and area.

Applicant further states that the Knoxville market and area is now inadequately served with manufactured or artificial gas, and that the Knoxville Utilities Board is anxious that natural gas service be made available in the Knoxville area.

Applicant states that natural gas will enter the proposed pipe line at a pressure of approximately 700 psig which will provide a delivery pressure of approximately 387 psig at Chattanooga and approximately 200 psig at Knoxville; that the proposed facilities will have a capacity of approximately 62,325,000 cubic feet per day at the point of interconnection with Tennessee Gas & Transmission Company, and that this capacity will be sufficient to serve the aforesaid markets and areas for approximately five years without compression.

Applicant makes no statement as to the cost of the proposed facilities or the method of financing the cost of construction.

Any interested State commission is requested to notify the Federal Power Commission whether the application should be considered under the cooperative provisions of the Commission's rules of practice and procedure, and, if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with the reasons for such request.

The application of East Tennessee Natural Gas Company is on file with the Commission and is open to public inspection. Any person desiring to be heard or to make any protest with reference to the application shall file with the Federal Power Commission, Washington 25, D. C., not later than fifteen days from the date of publication of this notice in the FEDERAL REGISTER, a petition to intervene or protest. Such petition or protest shall conform to the requirements of the rules of practice and procedure (effective September 11, 1946), and shall set out clearly and concisely the facts from which the nature of the petitioner's or protestant's alleged right or interest can be determined. Petitions for intervention shall state fully and completely the grounds of the proposed intervention and the contentions of the petitioner in the proceeding so as to advise the parties and the Commission as to the specific issues of fact or law to be raised or controverted, by admitting, denying, or otherwise answering, specifically and in detail, each material allegation of fact or law asserted in the proceeding.

[Docket No. G-891]

UNITED NATURAL GAS CO.

NOTICE OF APPLICATION

MAY 5, 1947.

Notice is hereby given that on April 18, 1947, United Natural Gas Company (Applicant), a Pennsylvania corporation having its principal office in Oil City, Pennsylvania, filed an application with the Federal Power Commission for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, authorizing Applicant to construct and operate certain natural gas facilities, subject to the jurisdiction of the Commission, described as follows:

Approximately seventy-one (71) miles of 20-inch O. D. welded pipe line extending from the south end of United Natural Gas Company's 12-inch line in Franklin Township, Beaver County, Pennsylvania, in a southerly direction to connect with the Big Inch and Little Big Inch pipe lines in Rich Hill Township, Greene County, Pennsylvania.

Applicant states in its application that it is critically in need of additional supplies of natural gas in order to meet its present and future requirements as well as the normal growth requirements of its domestic, commercial and industrial consumers. Applicant states that the purpose of the proposed line is to connect with the Big Inch lines and obtain an additional supply of natural gas therefrom; and it is hoped that the proposed facilities will permit Applicant to meet its requirements during the winter of 1947-1948.

Applicant estimates that the total over-all cost of the proposed facilities will be $3,737,718, which will be paid partly by outside financing and partly from Applicant's own cash resources; and that there will be no fixed charges incident to the cost of the proposed line.

Any interested State commission is requested to notify the Federal Power Commission whether the application should be considered under the cooperative provisions of the Commission's rules of practice and procedure, and if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with the reasons for such request.

The application of United Natural Gas Company is on file with the Commission and is open to public inspection. Any person desiring to be heard or to make any protest with reference to the application shall file with the Federal Power Commission, Washington 25, D. C., not later than fifteen days from the date of publication of this notice in the FEDERAL REGISTER, a petition to intervene or protest. Such petition or protest shall conform to the requirements of the rules of practice and procedure (effective September 11, 1946), and shall set out clearly and concisely the facts from which the nature of the petitioner's or protestant's alleged right or interest can be determined.

Petitions for intervention shall state fully and completely the grounds of the proposed intervention and the contentions of the petitioner in the proceeding, so as to advise the parties and the Commission as to the specific issues of fact or law to be raised or controverted, by admitting, denying, or otherwise answering specifically and in detail, each material allegation of fact or law asserted in the proceeding.

[Docket No. G-894]

UNITED GAS PIPE LINE CO.

NOTICE OF APPLICATION

MAY 5, 1947.

Notice is hereby given that on April 24, 1947, United Gas Pipe Line Company (Applicant), a Delaware corporation with its principal place of business in Shreveport, Louisiana, and authorized to do business in the States of Alabama, Louisiana, Mississippi, and Texas, filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, authorizing Applicant to construct and operate the following facilities:

A tap and meter station in Township 2 South, Range 3 East, Baldwin County, Alabama, on Applicant's Mobile-Pensacola natural gas transmission line.

Applicant states that the proposed facilities are for the purpose of supplying the requirements of natural gas for resale through distribution systems in the following named towns and their environs in Baldwin County, Alabama: Elberta, Fairhope, Foley, Loxley, Magnolia Springs, Point Clear, Robertsdale, Silverhill, Stapleton, Steelwood.

Applicant states that it has entered into an appropriate contractual arrangement with the towns of Foley and Fairhope under which natural gas will be sold to said municipalities for resale in all of the towns named above. It is stated that service through the proposed facilities will be from gas reserves which Applicant has under contract in the Baxterville Field and which it proposes to connect to its present system at a point near Mobile, Alabama.

The estimated maximum daily demand for all of the above named customers for the year 1948 is 900 Mcf, and the estimated daily minimum demand for the same period is 100 Mcf. The estimated daily delivery capacity of the proposed facilities is 7,000 Mcf.

Estimated overall capital cost of the proposed facilities is stated to be approximately $5,300, which Applicant proposes to finance out of cash on hand.

Applicant states that since the communities named in the application are not now being served with natural gas, the residents therein are most anxious that the natural gas service to be rendered by means of the proposed facilities be made available to them.

The application of United Gas Pipe Line Company is on file with the Commission and is open to public inspection. Any person desiring to be heard or to make any protest with reference to the application shall file with the Federal Power Commission, Washington 25, D. PRUDENTIAL INVESTING CORP.

NOTICE OF APPLICATION STATEMENT OF ISSUES ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 2d day of May A. D. 1947.

Notice is hereby given that Prudential Investing Corporation ("Prudential") has filed an application pursuant to section 8 (f) of the Investment Company Act of 1940 for an order of the Commission declaring that Prudential has ceased to be an investment company within the meaning of the act.

Prudential alleges that it has sold its assets amounting to $1,680,943.99 to Axe-Houghton Fund, Inc. ("Axe-Houghton") for 213,829 shares of the latter's stock, and that it has distributed pro rata the Axe-Houghton shares so received to its stockholders except those remaining in the custody of The First National Bank of Jersey City against the unexchanged 85,987 shares of Prudential stock. Prudential also alleges that cash of $5,938.82 was reserved by Prudential to make cash payments for fractional shares. Prudential also alleges that it has paid to Leffler Corporation ("Leffler") $34,426.18 or 2% of its assets prior to such payment for services in negotiating and effecting the transaction between Axe-Houghton and Prudential, and that out of this fee Leffler has agreed to pay all expenses of the acquisition, of the distribution of the Axe-Houghton shares of stock and cash (for fractional shares) to stockholders of Prudential and of the dissolution of Prudential. Prudential further alleges that there are no known liabilities except for amounts assumed by Leffler and that it was dissolved on March 6, 1947.

For a more detailed statement of the matters of fact and law asserted, persons are referred to said application which is on file in the offices of the Commission in Philadelphia, Pennsylvania.

The Corporation Finance Division has advised the Commission that upon a preliminary examination of the application, it deems the following issues to be raised:

(1) Whether applicant has ceased to be an investment company within the meaning of the act, and

(2) Whether it is necessary for the protection of investors to condition any order terminating the registration of applicant under the act.

It appearing to the Commission that a hearing upon the application is necessary and appropriate,

It is ordered, Pursuant to section 40 (a) of said act, that a public hearing on the aforesaid application be held on May 21, 1947, at 9:30 a. m., eastern daylight saving time, in Room 318 of the offices

of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania.

It is further ordered, That William W. Swift, or any officer or officers of the Commission designated by it for that purpose shall preside at the hearing and any officer or officers so designated to preside at any such hearing are hereby authorized to exercise all of the powers granted to the Commission under sections 41 and 42 (b) of the Investment Company Act of 1940 and to hearing officers under the Commission's rules of practice.

Notice of such hearing is given to Prudential Investing Corporation, Axe-Houghton Fund, Inc. and Leffler Corporation and to any person or persons whose participation in such proceedings may be necessary or appropriate in the public interest or for the protection of investors. Persons desiring to be heard or otherwise wishing to participate in said proceeding should file with the Secretary of the Commission, on or before May 19, 1947, an application therefor in accordance with the provisions of Rule XVII of the rules of practice of the Commission, setting forth the matters or issues of law or fact mentioned above which he desires to controvert and any additional issues he deems raised by the aforesaid application.

PART 360—ORGANIZATION, FUNCTIONS AND PROCEDURE OF THE OFFICE OF INTERNATIONAL TRADE

BRITISH TOKEN IMPORT PLAN

The following paragraph is deleted from § 360.15:

The Office of International Trade also serves as the certifying agency for manufacturers who wish to establish their eligibility to participate in the "British Token Import Plan." Under this plan, the United Kingdom permits importation from the United States of certain branded products in yearly amounts not exceeding 20% of the average annual shipments of each producer during the years 1936, 1937 and 1938. Applications may be submitted in triplicate on Form IT–558, furnishing data as to pre-war exports to the United Kingdom of applicants' branded products which are subject to the plan, on the basis of which the applications will be certified and returned to the applicants, together with token scrip in an amount proportional to the pre-war exports so certified. This scrip may be forwarded to the British importer and used by him to secure an import license from the British Board of Trade.

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Federal Security Agency

[Docket No. FDC–44]

PART 15—CEREAL FLOURS AND RELATED PRODUCTS; DEFINITIONS AND STANDARDS OF IDENTITY [1]

SUBPART B—CORN FLOUR AND RELATED PRODUCTS

In the matter of fixing and establishing definitions and standards of identity for white corn meal, yellow corn meal, bolted white corn meal, bolted yellow corn meal, degerminated white corn meal, degermed white corn meal, degerminated yellow corn meal, degermed yellow corn meal, self-rising white corn meal, self-rising yellow corn meal, white corn flour, yellow corn flour, grits, corn grits, hominy grits, yellow grits, yellow corn grits, yellow hominy grits, quick grits, quick cooking grits, enriched corn meals, and enriched corn grits.

Final order. By virtue of the authority vested in the Federal Security Administrator by the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055; 21 U. S. C. 341, 371); and upon the basis of substantial evidence of record at the public hearing held pursuant to the notice issued on February 11, 1946 (11 F. R. 1600), and upon consideration of the exceptions filed to the tentative order issued by the Federal Security Administrator on December 30, 1946, the following order is hereby promulgated:

Findings of fact. 1. The corn used in making corn meals, grits, and corn flours is either of the white or the yellow variety. The corn kernel of each variety consists of (1) the endosperm which is starchy, (2) the germ which is rich in fatty oil, and (3) the bran coat which contains a high percentage of crude fiber. There is no essential difference in the chemical composition of white and yellow corn except for the presence in yellow corn of yellow coloring matter which has some Vitamin A activity. The quantity of fat and crude fiber in products made by grinding white or yellow corn is a measure of the germ and bran present.

2. In preparing corn meals, grits, and corn flours, the corn is first cleaned to remove foreign grains and other extraneous matter.

3. Corn meals, grits, and corn flours are prepared by grinding corn to a desired degree of fineness, and it is the degree of fineness together with the extent of the removal of the bran coat and germ that provide the prime characteristics of identity to these several foods. Grits are the coarsest ground, corn meals are the next in fineness, and corn flours are the most finely ground.

4. When the entire corn kernel is ground to the fineness of meal, a food is produced which long has been known as "corn meal" with the descriptive words "white" or "yellow" according to the variety of corn used. This corn meal sometimes is called "old fashioned," "stone ground," "water ground," but the significance of these modifying designations is not generally understood.

5. When a substantial portion of the bran is removed, but only a small portion of the germ is taken away, the resultant corn meal is commonly known as "bolted white corn meal" or "bolted yellow corn meal," according to the variety of corn used.

6. When most of the bran and germ are removed, and the remainder of the corn kernel reduced to meal fineness, the resultant food is common known as "degerminated white corn meal" or "degerminated yellow corn meal" according to the variety of corn used, although a more accurate general designation is "degermed corn meal." This food sometimes is called "cream meal," "pearl meal" or "granulated meal," but these terms are applicable only to special types of degerminated corn meal.

7. Though the three types of meal, viz., corn meal, bolted corn meal, and degerminated corn meal, are well recognized in the trade, the names "corn meal," "bolted corn meal" and "degerminated corn meal" are often applied interchangeably on retail packages, degerminated products being called "corn meal" or "bolted corn meal," bolted products being called "corn meal," or "degerminated corn meal" and "corn meal" being called "bolted corn meal." The three types differ in cooking and eating qualities and in their content of certain nutrients.

8. In grinding the cort. kernel to produce a corn meal of the whole grain type, many mills remove from such meal small amounts of coarse material consisting of large flakes of bran and pieces of corn, particularly the tip of the kernel, which have not been finely ground. Some mills separate and grind separately different parts of the corn kernel and then recombine the ground materials to make this type of meal. Excessive removal of the bran coat or germ will change the food to a different type of corn meal. Mixtures containing abnormally high proportions of bran or germ or both do not have the characteristics of corn meal. Such mixtures are not desired by consumers and their sale is likely to result in consumer deception.

9. Corn meals made by simply grinding cleaned corn have the same proportions of bran and germ, and so of crude fiber and fat, as has the cleaned corn from which they are made. As bran is removed the percentage of crude fiber decreases. A reasonabl dividing line between corn meals and bolted corn meals based on crude fiber content is 1.2 percent of crude fiber on the moisture free basis. The germ content, and so the fat content, of corn meals made by recombining ingredients may differ slightly from that of the cleaned corn from which they are made, but reasonable variations in germ content will not cause a change in fat content of more than 0.3 percent. The removal of particles of corn which, escape grinding, together with flattened pieces of bran, cause a slight lowering of the crude fiber content, but have little effect on fat content. Unless there is a deliberate addition of excess bran the crude fiber content of corn meals will not exceed that of the cleaned corn from which the meals are made.

10. Bolted corn meals may be prepared either by bolting whole grain corn meals to remove bran particles; or by grinding and separating the corn into portions which are then ground separately and combined so as to include appropriate portions of ground endosperm and germ. As a result of the removal of bran, bolted corn meals contain, on the moisture free basis, less than 1.2 percent crude fiber. Small amounts of germ may be lost when the bran particles are sifted out, and the amount of germ returned in recombining ground portions may differ somewhat from the amount of germ in the cleaned corn from which ground, but the fat content, on the moisture free basis, does not exceed by more than 0.3 percent the fat content of such corn, nor is such fat content less than 2.25 percent.

11. Degerminated corn meals are distinguished from corn meals and bolted corn meals by the removal of both bran and germ in the process of manufacture. This results in low fat and low crude fiber content. Properly made, degerminated corn meals contain, on the moisture free basis, less than 1.2 percent crude fiber and less than 2.25 percent fat.

12. Grits are made by coarsely grinding the endosperm of white or yellow corn from which most of the bran and germ have been separated, and screening out meal and flour. Most grits are milled from white corn and the unqualified name "grits" means white grits. The names "hominy grits" and "corn grits" are synonymous with grits. The common name of the corresponding food made from yellow corn is "yellow grits" or "yellow hominy grits" or "yellow corn grits". The removal of bran and germ is such that, on the moisture free basis, the crude fiber content is less than 1.2 percent and the fat content is less than 2.25 percent. The significant difference between grits and degermed corn meals is the particle size.

13. A food known as "Quick grits" or "Quick cooking grits" has been developed recently, but as yet has not been sold widely. The food has the appearance of ordinary grits. The time required for cooking is reduced. It is made by lightly steaming grits or yellow grits and passing between rolls set close enough to compress slightly and to fracture the grit particles. It is cooked in five minutes or less. It has been offered to consumers with special labeling to characterize it as a quick cooking product.

[1] The headnote for Part 15 is amended to read as set forth above. The text of §§ 15.00 to 15.150, inclusive (21 CFR, Cum. Supp.), is designated "Subpart A—Wheat Flour and Related Products".

14. Corn flours are the foods prepared by grinding and bolting white or yellow corn to a fineness which approximates that of wheat flour. They may be made from the entire corn kernel or proportions of bran and germ may be removed in milling. Corn flours are seldom sold for household use but are used mainly as one of the ingredients of such foods as waffle, pancake and muffin mixes, and some types of breakfast foods. It is not now customary to distinguish between corn flours of varying bran and germ content so long as their bran and germ content, and therefore their fat and crude fiber content, do not exceed the fat and crude fiber content of the cleaned corn from which made. The comparison is made on the moisture free basis.

15. The moisture content of corn meals, grits, and corn flours, affects the properties and value to consumers of these foods. Excessive moisture renders these foods susceptible to early spoilage, this being particularly true of products containing all the corn germ, and is of no value to consumers. The sale of corn meals, grits, and corn flours of higher than normal moisture content amounts to sale of water at corn product prices and is an economic cheat.

16. In the manufacture of grits and degerminated corn meals, it is customary to soften the corn by tempering with hot water, but to remove the excess moisture by drying at a later stage in the milling process. The moisture content of these foods after such drying does not exceed 15 percent. When corn meals are made by grinding whole corn, it is customary to use reasonably dry corn. As a result, the moisture content of corn meals, and also of bolted corn meals prepared by bolting to remove the bran, can be kept below 15 percent.

17. Accurate methods of analysis in general use for the determination of moisture, fat, and crude fiber in corn meals, bolted corn meals, degerminated corn meals, grits, quick cooking grits and corn flours, are those of the Association of Official Agricultural Chemists, published in the sixth edition, "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists." The method for moisture appears on page 259 under §§ 20.70 and 20.71, for fat on pages 259 and 260 under §§ 20.70 and 20.73, for crude fiber on pages 259 and 260 under §§ 20.70 and 20.74.

18. A simple method for determining the relative size of the particles of corn meals, bolted corn meals, degerminated corn meals, grits, and quick cooking grits is to separate them by means of sieves with openings of appropriate size.

19. Particles of grits are of such size that not less than 95 percent will pass through a No. 10 standard sieve[1] and most of those passing the No. 10 sieve will be retained on a No. 25 standard sieve. Particles passing through the No. 25 sieve are of the fineness of meal, but their complete exclusion from grits is impracticable. A limit on the amount of particles of meal size is necessary to maintain the identity of grits as differentiated from a corn meal. A reasonable limit on the proportion of particles in grits which will pass through a No. 25 sieve is 20 percent.

20. Corn meals, bolted corn meals, degerminated corn meals, and self-rising corn meals are composed of particles most of which are smaller than the particles of grits, that is, they will pass through a No. 25 standard sieve. Because the process of grinding is inexact insofar as the size of particles resulting therefrom is concerned, corn meals of all types may, and usually do, contain some particles of somewhat larger size, comparable to grits, and also some quite small particles, comparable to flour. This is particularly true of corn meals ground between stones. Where 45 percent or more by weight of corn meals, bolted corn meals, or degerminated corn meals, passes through a No. 25 standard sieve, the food has a characterizing mealy consistency. An excessive amount of corn flour in any type of corn meal makes it unsatisfactory for meal uses. Particles which pass through a No. 72 XXX grits gauze are of the fineness of corn flour. The openings in a No. 72 grits gauze are of essentially the same size as those of a No. 70 woven wire cloth as defined by the U. S. Bureau of Standards in L. C. 584. Reasonable limits on the amounts of material in corn meals, bolted corn meals and degerminated corn meals, which will pass through a No. 72 XXX grits gauze are 35, 25, and 25 percent, respectively.

21. Corn meals of the whole grain type often contain quantities of particles, particularly of bran, somewhat larger than those forming bolted and degerminated meals. Not less than 95 percent by weight of bolted corn meals and degerminated corn meals will pass through a No. 20 standard sieve; but in the case of corn meals of the whole grain type not less than 95 percent by weight will pass through a No. 12 standard sieve.

22. For the purpose of testing corn meals, bolted corn meals, degerminated corn meals, self-rising corn meals, grits, and quick cooking grits for particle size, reasonably accurate results are obtained by the following procedure which may be applied easily. Fit the sieves to be used into one another, placing the sieve with the largest openings on top, the one with the next largest openings following, and attaching a bottom pan to the last sieve. All sieves should be 8 inches in diameter with full height frames and comply with specifications for sieves of the designated size in "Standard Specifications for Sieves," published March 1, 1940, in L. C. 584, of the Bureau of Standards, U. S. Department of Commerce. Place a sample of 100 grams of corn meal, bolted corn meal, degerminated corn meal, self-rising corn meal, grits, or quick cooking grits to be tested on the top sieve, attach a cover, hold the assembly of sieves in a slightly inclined position, and shake by striking the sides against one hand with an upward stroke, at the rate of about 150 times per minute, turning the assembly of sieves about ⅙ of a revolution, each time in the same direction, after each 25 strokes. Continue shaking for two minutes. Remove the material remaining on the sieves and in the pan, weigh separately, and make the calculations. Sometimes when meals are tested fine particles clog the sieve openings. If any sieve is clogged by fine material smaller than its openings, empty the contents onto a piece of paper. Remove the entrapped material on the bottom of the sieve by a hair brush and add to the sieve below. In like manner, clean the adhering material from inside the sieve and add to the material on the paper. Return mixture to the sieve, reassemble the sieves, and shake in the same manner as before for 1 minute. Repeat cleaning procedure if necessary until a 5 gram or less weight loss occurs in any sieve during a 1 minute shaking.

23. The particles of corn flours are of such fineness that at least 50 percent by weight will pass through No. 70 woven wire cloth, having openings of the size prescribed for such cloth by the Bureau of Standards, U. S. Department of Commerce, in L. C. 584. Many corn flours also contain particles of somewhat larger size but at least 98 percent by weight of any properly milled corn flour will pass through a No. 50 sieve. Corn flours give trouble when tested by the method described in finding 22 and a change in procedure is necessary. The following method is easily applied and gives reasonably accurate results. Weigh 5 grams of sample into a tared truncated metal cone (top diameter 5 centimeters, bottom diameter 2 centimeters, height 4 centimeters), fitted at bottom with 70-mesh wire cloth complying with the specifications for No. 70 wire cloth in "Standard Specifications for Sieves," published March 1, 1940 in L. C. 584 of the Bureau of Standards, U. S. Department of Commerce. Attach cone to a suction flask. Wash with 150 ml of petroleum ether applied in a small stream without suction, while gently stirring the sample with a small glass rod. Apply suction for 2 minutes after washing is completed, then shake the cone for 2 minutes with a vigorous horizontal motion, striking the side against the hand, and then weigh. The decrease in weight of sample, calculated as percent by weight of sample shall be considered the percent passing through No. 70 wire cloth. Transfer the residue from cone to a No. 50 sieve having a standard 8-inch diameter full height frame, complying with the specifications for wire cloth and sieve frame in said "Standard Specifications for Sieves." Shake for 2 minutes with a vigorous horizontal motion, striking the side against the hand; remove and weigh the residue; calculate the weight of residue as percent by weight of sample, and subtract from 100 percent to obtain the percent of sample passing through the No. 50 sieve.

24. A number of manufacturers of corn meals, grits, and corn flours offered affidavits which were similar and in some instances identical in language and form stating that in order to be sure that their products would comply with the standards suggested in the notice of hearing, it would be necessary for them to take elaborate precautions to test each lot before shipment necessitating considerable additional expenditures. No recommendations for changes in the suggested standards were made. This general apprehension was inspired by representations made by some members of the American Corn Millers Federation at meetings of corn millers called for the purpose of discussing the suggested standards. Witnesses presented by the Federation failed to supply substantial evidence that compliance with the proposed standards would necessitate elaborate precaution or would impose any unreasonable burden.

25. While it is true that small mills do not maintain chemical laboratories for the determination of moisture, fat and crude fiber, the many analyses reported of products of small mills demonstrate that the limits proposed are almost universally met in present practice. No showing was made that the conditions revealed by such analyses were at all unusual.

26. The advisory standards and other specifications for various corn meals have contained for many years moisture limits as low as, and in some cases lower than, 15 percent. Other industries have had little trouble complying with limits on food constituents similar in kind to those involved in this order. The requirements for particle size have been tested on many samples and are reasonable. Though given ample opportunity to subject the limits to tests, the interested industry presented no data to indicate that the limits were unreasonable.

27. In order to improve the general nutritive properties of the diets of their citizens, the States of North Carolina, South Carolina, Georgia, Alabama, and Mississippi have within the last few years adopted laws requiring that corn meals and grits from which a certain part of the germ of the corn has been removed, be enriched with certain vitamins and iron before sale in those States. The requirements of these States as to the minimum and maximum quantities of vitamins and iron required in such corn meals and grits after enrichment are shown in tabular form as follows:

State	Thiamine		Niacin	
	Not less than—	Not more than—	Not less than—	Not more than—
	Mg/lb.	*Mg/lb.*	*Mg/lb.*	*Mg/lb.*
Alabama	1.5	3.0	16	32
Georgia	2.0	------	16	------
Mississippi	2.0	------	16	------
North Carolina:				
Law	2.0	2.5	16	20
Regulation	1.5	3.0	16	32
South Carolina	1.5	3.0	16	32

State	Riboflavin		Iron	
	Not less than—	Not more than—	Not less than—	Not more than—
	Mg/lb.	*Mg/lb.*	*Mg/lb.*	*Mg/lb.*
Alabama	------	------	13	26
Georgia	1.2	------	13	------
Mississippi	1.2	------	13	------
North Carolina:				
Law	1.2	1.5	13	16.5
Regulation	0	0	13	26
South Carolina	------	------	13	26

28. Pending the promulgation of standards for such enriched foods under the Federal Food, Drug, and Cosmetic Act, the requirements of which will become also the state requirements under provisions of the several laws, Georgia, Mississippi, and North Carolina have tolerated the lower requirements of the standards of South Carolina and Alabama. Following the promulgation of federal standards, all of these states will have uniform requirements.

29. Corn meals of various kinds, supplemented by grits, together with wheat flour constitute the main source of energy foods for large numbers of consumers in those states now having compulsory enrichment laws for corn meals and grits, and in adjacent states in the southeastern part of the United States. The corn meals, grits and wheat flour are used to supply essentially the same nutrients, and to a large extent are used interchangeably.

30. Recent dietary surveys in states where large amounts of corn meals of various types are consumed have uniformly shown that the diets of persons in the low income brackets are often deficient in thiamine, riboflavin, niacin, and iron. Pellagra, a dietary deficiency disease that can be prevented by a sufficient intake of niacin, was common in many such areas. Clinical evidences of riboflavin deficiencies have also been reported frequently. Dietary deficiencies do not often occur singly, but persons deficient in one of the nutrients are likely to be deficient also in the other three.

31. Due to the similarity in the dietary use of flour, corn meals of various types, and grits, and also in view of the understanding consumers have acquired with respect to the term "enriched" by reason of the program of consumer education carried out in connection with enriched flour and enriched bread, enriched corn meals and enriched grits should supply the amounts of thiamine, niacin, riboflavin, and iron now furnished by enriched flour; that is, thiamine not less than 2.0 mg. per pound, riboflavin, not less than 1.2 mg. per pound, niacin, not less than 16.0 mg. per pound, and iron, not less than 13.0 mg. per pound. If some of these nutrients are not included in enriched corn meals and enriched grits, or if they are added in lesser amounts than prescribed by the definition and standard of identity for enriched flour, consumers are likely to be confused and deceived as to the nutritive value of the enriched corn products. Maximum limits are also needed to prevent unreasonably large additions of these nutrients which may give rise to confusion as to the relative value of different "enriched" corn products and may result in merchandising claims that are not warranted by the facts. Maximum limits 50 percent more than the minimum will accomplish this and are reasonable for this purpose, except in the case of iron. Here the maximum should be twice the minimum.

32. In enriching corn meals and grits it is customary to add the enriching ingredients to each of the different types of corn meals and grits described in findings 4, 5, 6, 12, 13 and 37. The enriched foods vary from each other in their physical character and in eating quality in the same way as do the basic foods before enrichment. To distinguish properly between the different types each should be designated by its common name to which is added the word "Enriched."

33. Grits are often washed before cooking and the wash water discarded, thus causing a substantial loss of water-soluble substances present. If the water-soluble vitamins and water-soluble salts of iron are added only in amounts necessary to meet the minimum requirement of the standard for enriched grits, without precautions against loss in rinsing, the food will lose a considerable portion of these nutrients before consumption. It is possible to add the required nutrients in ways that will partially project them from loss by solution in rinsing water. Loss to the consumer can be prevented by the addition of the water-soluble nutrients in excess of the minimum requirements or by use of assimilable water-insoluble forms of the nutrients. For consumer protection it is reasonable to require that enriched grits contain after washing in a prescribed manner, which simulates the washing practiced in the home, not less than 85 percent of the minimum amounts of thiamine, riboflavin, niacin and iron prescribed by the standard for enriched grits. The 15 percent loss is the approximate loss of niacin, the vitamin most susceptible to rinsing loss, from unenriched grits upon washing.

34. A satisfactory method for testing grits and quick cooking grits after a preliminary washing, which simulates household washing, is as follows:

Transfer 100 grams of enriched grits or enriched quick cooking grits to a 2 liter Erlenmeyer flask containing 1 liter of water at 25° C. Stopper the flask and rotate it for ½ minute so that the grits are kept in motion. Allow the grits to settle for ½ minute, then pour off 850 cc. of the water along with any floating or suspended matter. Determine thiamine, riboflavin, niacin and iron in the wet grits and water remaining in the flask. Calculate as mg. per pound of the grits before rising.

35. The bulk of the vitamins and iron added to corn meals, bolted corn meals, degerminated corn meals, self-rising corn meals, grits, and quick cooking grits is so small that it is necessary to use a carrier to insure their intimate and uniform distribution. The vitamins are added in pure synthetic form. Iron is added as metallic iron reduced to a fine powder or as assimilable salts of iron. Many harmless substances which will not impair these foods are available for use as carriers. The amount of carrier added should not be more than necessary to insure a uniform distribution of the vitamins and iron. Dried yeast in amounts not exceeding 1.5 percent is suitable for the purpose and it also imparts small amounts of additional nutrients.

36. Vitamin D and harmless compounds of calcium are optional ingredients of enriched flour. Due to the similarity in dietary use between enriched flour and the various enriched corn meals and enriched grits, it is reasonable to include vitamin D and calcium as op-

[1] All sieves mentioned in these findings, unless otherwise noted, are 8 inches in diameter with full height frames and comply with specifications for sieve of the number indicated, published by the National Bureau of Standards, U. S. Department of Commerce, in L. C. 584.

tional ingredients in enriched corn meals, enriched bolted corn meals, enriched degerminated corn meals, enriched self-rising corn meals, enriched grits, and enriched quick cooking grits under the same conditions prescribed for optional use of these ingredients in the definition and standard of identity for enriched flour.

37. The food known as "self-rising white corn meal" or "self-rising yellow corn meal" is prepared by intimately mixing "corn meal" either white or yellow, a leavening agent, and salt for seasoning.

38. The leavening agent consists of a mixture of sodium bicarbonate and monocalcium phosphate.

39. When self-rising corn meal is used in baking, carbon dioxide gas is evolved through the chemical reaction of the sodium bicarbonate and the acid leavening ingredient. The gas so evolved leavens the mixture, giving the baked product one of its characteristic qualities. To accomplish this satisfactorily a certain minimum amount of carbon dioxide must be evolved. The amount of carbon dioxide gas which will be effective for the purpose of proper leavening is not less than 0.5 percent of the weight of the self-rising corn meal.

40. To avoid undesired characteristics in the baked product, the amounts of sodium bicarbonate and acid leavening ingredient must be so proportioned that no sodium bicarbonate remains unacted upon in the baked product. Unnecessarily large amounts of the leavening substances leave objectionable quantities of residues in the baked product. A reasonable maximum limit for the leavening agents in self-rising corn meal is four and one-half parts to each hundred parts of corn meal.

41. A satisfactory and reasonable accurate method for determining the amount of carbon dioxide evolved from self-rising corn meal is the method prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists", 6th edition beginning on page 208 under "Gasometric Method (2) with Chittick's Apparatus—Official", except that the following procedure is substituted for the procedure specified therein under "17.6—Determination":

Weigh 17 grams of the official sample into flash A, add 15–20 glass beads (4–6 mm. diameter) and connect this flash with the apparatus (fig. 25). Open stock-cock C and by means of the leveling bulb E bring the displacement solution to the 25 ccs. graduation above the zero mark. (This 25 ccs. is a partial allowance for the volume of acid to be used in the decomposition). Allow the apparatus to stand 1–2 minutes to insure that the temperature and pressure within the apparatus are the same as those of the room. Close the stop-cock, lower the leveling bulb somewhat to reduce the pressure within the apparatus, and slowly run into the decomposition flash from burette F 45 ccs. of sulfuric acid (1+5). To prevent the liberated carbon dioxide from escaping through the acid burette into the air, keep the displacement solution in the leveling bulb at all times during the decomposition at a lower level than that in the gas-measuring tube. Rotate and then vigorously agitate the decomposition flash for three minutes to mix the contents intimately. Allow to stand for ten minutes to bring to equilibrium. Equalize the pressure in the measuring tube by means of the leveling bulb and read the volume of gas from the zero point on the tube. Deduct 20 ccs. from this reading (this 20 cc. together with previous allowance of 25 cc. compensates for the 45 ccs. acid used in the decomposition). Observe the temperature of the air surrounding the apparatus and also the barometric pressure and multiply the number of cc. of gas evolved by the factor given in Table 44.30—Reference Tables for the temperature and pressure observed. Divide the corrected reading by 100 to obtain the apparent percent by weight of carbon dioxide in the official sample.

Correct the apparent percent of carbon dioxide to compensate for varying atmospheric conditions by immediately assaying a synthetic sample by the same method in the same apparatus.

Prepare the synthetic sample with 16.2 grams of corn meal, 0.30 gram of monocalcium phosphate, 0.30 gram of salt, and a sufficient quantity of sodium bicarbonate U. S. P. (dried over sulfuric acid) to yield the amount of carbon dioxide recovered in assay of official sample. Determine this quantity by multiplying weight of carbon dioxide recovered in assay of official sample by 1.91.

Divide the weight of carbon dioxide recovered from synthetic sample by weight of carbon dioxide contained in sodium bicarbonate used.

Divide the quotient into the apparent percent of carbon dioxide in official sample to obtain percent carbon dioxide evolved from the official sample.

Conclusion. On the basis of the evidence of record and the foregoing findings of fact, it is concluded that the following sections fixing and establishing reasonable definitions and standards of identity for white corn meal, yellow corn meal, bolted white corn meal, bolted yellow corn meal, degerminated white corn meal, degermed white corn meal, degerminated yellow corn meal, degermed yellow corn meal, self-rising white corn meal, self-rising yellow corn meal, white corn flour, yellow corn flour, grits, corn grits, hominy grits, yellow grits, yellow corn grits, yellow hominy grits, quick grits, quick cooking grits, enriched corn meals, and enriched corn grits will promote honesty and fair dealing in the interest of consumers.

AUTHORITY: §§ 15.500 to 15.514, inclusive, issued under secs. 401, 701, 52 Stat. 1046, 1055; 21 U. S. C. 341, 371.

§ 15.500 *White corn meal; identity.* (a) White corn meal is the food prepared by so grinding cleaned white corn that when tested by the method prescribed in paragraph (b) (2) of this section not less than 35 percent passes through a No. 12 sieve, not less than 45 percent through a No. 25 sieve, but not more than 35 percent through a No. 72 grits gauze. Its moisture content is not more than 15 percent. In its preparation coarse particles of the ground corn may be separated and discarded, or reground and recombined with all or part of the material from which they were separated, but in any such case the crude fiber content of the finished corn meal is not less than 1.2 percent and not more than that of the cleaned corn from which it was ground, and its fat content does not differ more than 0.3 percent from that of such corn. The contents of crude fiber and fat in all the foregoing provisions relating thereto are on a moisture free basis.

(b) (1) For the purposes of this section moisture is determined by the method prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," 6th edition, page 259, §§ 20.70 and 20.71; fat is determined by the method prescribed on pages 259 and 260, §§ 20.70 and 20.73; and crude fiber determined by the method prescribed on pages 259 and 260, §§ 20.70 and 20.74.

(2) The method referred to in paragraph (a) of this section is as follows:

Use No. 12 and No. 25 sieves, having standard 8-inch diameter, full height frames, complying with the specifications for wire cloth and sieve frames in "Standard Specifications for Sieves," published March 1, 1940, in L. C. 584 of the Bureau of Standards, U. S. Department of Commerce. A sieve with frame of the same dimensions as the Nos. 12 and 25 and fitted with 72 XXX grits gauze is used as the third sieve. It is referred to hereafter as the No. 72 sieve. The 72 XXX grits gauze has openings equivalent in size with those of No. 70 woven wire cloth, complying with specifications for such cloth contained in such "Standard Specifications for Sieves." Attach bottom pan to No. 72 sieve. Fit the No. 25 sieve into the No. 72 sieve and the No. 12 sieve into the No. 25 sieve. Pour 100 grams of sample into the No. 12 sieve, attach cover and hold the assembly in a slightly inclined position and shake the assembly of sieves by striking the sides against one hand with an upward stroke, at the rate of about 150 times per minute. Turn the assembly of sieves about ⅙ of a revolution, each time in the same direction, after each 25 strokes. Continue shaking for 2 minutes. Weigh separately the material remaining on each sieve and in the pan, and calculate each weight as percent of sample. Sometimes when meals are tested, fine particles clog the sieve openings. If any sieve is clogged by fine material smaller than its openings, empty the contents onto a piece of paper. Remove the entrapped material on the bottom of the sieve by a hair brush and add to the sieve below. In like manner, clean the adhering material from inside the sieve and add to the material on the paper. Return mixture on the paper to the sieve, reassemble the sieves, and shake in the same manner as before for 1 minute. Repeat cleaning procedure if necessary until a 5 gram or less loss in weight occurs in any sieve during a 1 minute shaking. The percent of sample passing through No. 12 sieve shall be determined by subtracting from 100 percent, the percent of material remaining on the No. 12 sieve. The percent passing through a No. 25 sieve shall be determined by adding the percents remaining on the No. 72 sieve and the percent in pan. The percent in the pan shall be considered as the percent passing through a No. 72 XXX grits gauze.

§ 15.501 *Yellow corn meal; identity.* Yellow corn meal conforms to the definition and standard of identity prescribed by § 15.500 for white corn meal except that cleaned yellow corn is used instead of cleaned white corn.

§ 15.502 *Bolted white corn meal; identity.* (a) Bolted white corn meal is the food prepared by so grinding and sifting cleaned white corn that:

(1) Its crude fiber content is less than 1.2 percent but its fat content is not less than 2.25 percent, and

(2) When tested by the method prescribed in § 15.500 (b) (2), except that a No. 20 standard sieve is used instead of the No. 12 sieve, not less than 95 percent passes through a No. 20 sieve, not less than 45 percent through a No. 25 sieve, but not more than 25 percent through No. 72 XXX grits gauze. Its moisture content is not more than 15 percent. In its preparation particles of ground corn which contain germ may be separated, reground, and recombined with all or part of the material from which it was separated, but in any such case the fat content of the finished bolted white corn meal does not exceed by more than 0.3 percent the fat content of the cleaned corn from which it was ground. The contents of crude fiber and fat in all the foregoing provisions relating thereto are on a moisture free basis.

(b) For the purposes of this section, moisture, fat and crude fiber are determined by the methods therefor referred to in § 15.500 (b) (1).

§ 15.503 *Bolted yellow corn meal; identity.* Bolted yellow corn meal conforms to the definition and standard of identity prescribed by § 15.502 for bolted white corn meal except that cleaned yellow corn is used instead of cleaned white corn.

§ 15.504 *Degerminated white corn meal, degermed white corn meal; identity.* (a) Degerminated white corn meal, degermed white corn meal, is the food prepared by grinding cleaned white corn and removing bran and germ so that:

(1) On a moisture free basis, its crude fiber content is less than 1.2 percent and its fat content is less than 2.25 percent; and

(2) When tested by the method prescribed in § 15.500 (b) (2), except that a No. 20 standard sieve is used instead of a No. 12 sieve, not less than 95 percent passes through a No. 20 sieve, not less than 45 percent through a No. 25 sieve, but not more than 25 percent through No. 72 XXX grits gauze. Its moisture content is not more than 15 percent.

(b) For the purpose of this section, moisture, fat and crude fiber are determined by methods therefor referred to in § 15.500 (b) (1).

§ 15.505 *Degerminated yellow corn meal, degermed yellow corn meal; identity.* Degerminated yellow corn meal conforms to the definition and standard of identity prescribed by § 15.504 for degerminated white corn meal except that cleaned yellow corn is used instead of cleaned white corn.

§ 15.506 *Self-rising white corn meal; identity.* (a) Self-rising white corn meal is an intimate mixture of white corn meal, sodium bicarbonate, and the acid-reacting substance monocalcium phosphate. It is seasoned with salt. When it is tested by the method prescribed in paragraph (b) of this section, not less than 0.5 percent of carbon dioxide is evolved. The acid-reacting substance is added in sufficient quantity to neutralize the sodium bicarbonate. The combined weight of such acid-reacting substance and sodium bicarbonate is not more than 4.5 parts to each 100 parts of white corn meal used.

(b) The method referred to in paragraph (a) of this section is the method prescribed in "Official and Tentative Methods of Analysis of the Association of Official Agricultural Chemists," 6th Edition, beginning on page 208 under "Gasometric Method (2) with Chittick's Apparatus—Official", except that the following procedure is substituted for the procedure specified therein under "17.6—Determination":

Weigh 17 grams of the official sample into flask *A*, add 15–20 glass beads (4–6 mm. diameter), and connect this flask with the apparatus (fig. 25). Open stopcock *C* and by means of the leveling bulb *E* bring the displacement solution to the 25 cc. graduation above the zero mark. (This 25 cc. is a partial allowance for the volume of acid to be used in the decomposition.) Allow the apparatus to stand 1–2 minutes to insure that the temperature and pressure within the apparatus are the same as those of the room. Close the stopcock, lower the leveling bulb somewhat to reduce the pressure within the apparatus, and slowly run into the decomposition flask from burette *F* 45 cc. of sulfuric acid (1+5). To prevent the liberated carbon dioxide from escaping through the acid burette into the air, keep the displacement solution in the leveling bulb at all times during the decomposition at a lower level than that in the gas-measuring tube. Rotate and then vigorously agitate the decomposition flask for three minutes to mix the contents intimately. Allow to stand for 10 minutes to bring to equilibrium. Equalize the pressure in the measuring tube by means of the leveling bulb and read the volume of gas from the zero point on the tube. Deduct 20 cc. from this reading (this 20 cc. together with previous allowance of 25 cc. compensates for the 45 cc. acid used in the decomposition). Observe the temperature of the air surrounding the apparatus and also the barometric pressure and multiply the number of cc. of gas evolved by the factor given in Table 44.30—Reference Tables for the temperature and pressure observed. Divide the corrected reading by 100 to obtain the apparent percent by weight of carbon dioxide in the official sample.

Correct the apparent percent of carbon dioxide to compensate for varying atmospheric conditions by immediately assaying a synthetic sample by the same method in the same apparatus.

Prepare the synthetic sample with 16.2 grams of corn meal, 0.30 gram of monocalcium phosphate, 0.30 gram of salt, and a sufficient quantity of sodium bicarbonate U. S. P. (dried over sulfuric acid) to yield the amount of carbon dioxide recovered in assay of official sample. Determine this quantity by multiplying weight of carbon dioxide recovered in assay of official sample by 1.91.

Divide the weight of carbon dioxide recovered from synthetic sample by weight of carbon dioxide contained in sodium bicarbonate used.

Divide the quotient into the apparent percent of carbon dioxide in official sample to obtain percent of carbon dioxide evolved from the official sample.

§ 15.507 *Self-rising yellow corn meal; identity.* Self-rising yellow corn meal conforms to the definition and standard of identity prescribed by § 15.506 for self-rising white corn meal except that yellow corn meal is used instead of white corn meal.

§ 15.508 *White corn flour; identity.* (a) White corn flour is the food prepared by so grinding and bolting cleaned white corn that when tested by the method prescribed in paragraph (b) (2) of this section, not less than 98 percent passes through a No. 50 sieve and not less than 50 percent passes through No. 70 woven wire cloth. Its moisture content is not more than 15 percent. In its preparation part of the ground corn may be removed, but in any such case, the content (on a moisture free basis) of neither the crude fiber nor fat in the finished white corn flour exceeds the content (on a moisture free basis) of such substance in the cleaned corn from which it was ground.

(b) (1) For the purpose of this section, moisture, fat and crude fiber are determined by methods therefor referred to in § 15.500 (b) (1).

(2) The method referred to in paragraph (a) of this section is as follows:

Weigh 5 grams of sample into a tared truncated metal cone (top diameter 5 centimeters, bottom diameter 2 centimeters, height 4 centimeters), fitted at bottom with 70-mesh wire cloth complying with the specifications for No. 70 wire cloth in "Standard Specifications for Sieves", published March 1, 1940 in L. C. 584 of the Bureau of Standards, U. S.

Department of Commerce. Attach cone to a suction flask. Wash with 150 ml. of petroleum ether applied in a small stream without suction, while gently stirring the sample with a small glass rod. Apply suction for 2 minutes after washing is completed, then shake the cone for 2 minutes with a vigorous horizontal motion, striking the side against the hand, and then weigh. The decrease in weight of sample, calculated as percent by weight of sample shall be considered the percent passing through No. 70 wire cloth. Transfer the residue from cone to a No. 50 sieve having a standard 8-inch diameter full height frame, complying with the specifications for wire cloth and sieve frame in said "Standard Specifications for Sieves." Shake for 2 minutes with a vigorous horizontal motion, striking the side against the hand; remove and weigh the residue; calculate the weight of residue as percent by weight of sample, and subtract from 100 percent to obtain the percent of sample passing through the No. 50 sieve.

§ 15.509 *Yellow corn flour; identity.* Yellow corn flour conforms to the definition and standard of identity prescribed by § 15.508 for white corn flour except that cleaned yellow corn is used instead of cleaned white corn.

§ 15.510 *Grits, corn grits, hominy grits; identity.* (a) Grits, corn grits, hominy grits, is the food prepared by so grinding and sifting cleaned white corn, with removal of corn bran and germ, that:

(1) On a moisture free basis its crude fiber content is not more than 1.2 percent and its fat content is not more than 2.25 percent; and

(2) When tested by the method prescribed in paragraph (b) (2) of this section not less than 95 percent passes through a No. 10 sieve but not more than 20 percent through a No. 25 sieve.

(b) (1) For the purposes of this section moisture, fat and crude fiber are determined by methods therefor referred to in § 15.500 (b) (1).

(2) The method referred to in paragraph (a) of this section is as follows:

Use No. 10 and No. 25 sieves, having standard 8-inch diameter full height frames, complying with the specifications for wire cloth and sieve frames in "Standard Specifications for Sieves", published March 1, 1940, in L. C. 584 of the Bureau of Standards, U. S. Department of Commerce. Attach bottom pan to No. 25 sieve. Fit the No. 10 sieve into the No. 25 sieve. Pour 100 grams of sample into the No. 10 sieve, attach cover and hold assembly in a slightly inclined position, shake the sieves by striking the sides against one hand with an upward stroke, at the rate of about 150 times per minute. Turn the sieves about ⅙ of a revolution each time in the same direction after each 25 strokes. Continue shaking for 2 minutes. Weigh separately the material remaining on the No. 10 sieve and in the pan, and calculate each weight as percent of sample. The percent of sample passing through a No. 10 sieve shall be determined by subtracting from 100 percent, the percent remaining on the No. 10 sieve. The percent of material in the pan shall be considered as the percent passing through a No. 25 sieve.

§ 15.511 *Yellow grits, yellow corn grits, yellow hominy grits; identity.* Yellow grits, yellow corn grits, yellow hominy grits, conforms to the definition and standard of identity prescribed by § 15.510 for grits except that cleaned yellow corn is used instead of cleaned white corn.

§ 15.512 *Quick grits, quick cooking grits; identity.* (a) Quick grits, quick cooking grits are the foods, each of which conforms to the definition and standard prescribed for a kind of grits by §§ 15.510 or 15.511, except that in process of preparation the grits are lightly steamed and slightly compressed so as to fracture the particles.

(b) The name of each kind of grits is "Quick" or "Quick cooking" followed by the name of the kind of grits used which is prescribed in the definition and standard of identity therefor.

§ 15.513 *Enriched corn meals; identity.* (a) Enriched corn meals are the foods, each of which conforms to the definition and standard prescribed for a kind of corn meal by §§ 15.500 to 15.507, inclusive, except that:

(1) It contains in each pound not less than 2.0 mg. and not more than 3.0 mg. of thiamine, not less than 1.2 mg. and not more than 1.8 mg. of riboflavin, not less than 16 mg. and not more than 24 mg. of niacin or niacin amide, and not less than 13 mg. and not more than 26 mg. of iron (Fe):

(3) It may contain in each pound not less than 500 mg. and not more than 750 mg. of calcium (Ca). Iron and calcium may be added only in forms which are harmless and assimilable. The substances referred to in subparagraphs (1), (2) and (3) of this paragraph may be added in a harmless carrier which does not impair the enriched corn meal; such carrier is used only in the quantity necessary to effect an intimate and uniform admixture of such substances with the kind of corn meal used. Dried yeast in quantities not exceeding 1.5 percent by weight of the finished food may be used.

(b) The name of each kind of enriched corn meal is the word "Enriched" followed by the name of the kind of corn meal used which is prescribed in the definition and standard of identity therefor.

§ 15.514 *Enriched corn grits; identity.* (a) Enriched corn grits are the foods, each of which conforms to the definition and standard of identity prescribed for grits, yellow grits, or quick cooking grits by §§ 15.510 to 15.512, inclusive, except that:

(1) It contains in each pound not less than 2.0 mg. and not more than 3.0 mg. of thiamine, not less than 1.2 mg. and not more than 1.8 mg. of riboflavin, not less than 16 mg. and not more than 24 mg. of niacin or niacin amide, not less than 13 mg. and not more than 26 mg. of iron (Fe);

The vitamins referred to in subparagraph (1) of this paragraph may be combined with harmless substances to render them insoluble in water if the water-insoluble products are assimilable. The substances referred to in subparagraphs (1), (2), and (3) of this paragraph may be added in a harmless carrier; such carrier is used only in the quantity necessary to effect an intimate and uniform admixture of such substances with the kind of corn grits used. Dried yeast in quantities not exceeding 1.5 percent by weight of the finished food may be used. When the finished food is tested by the method prescribed in paragraph (c) of this section it complies with the requirements set forth therein.

(b) The name of each kind of enriched corn grits is the word "Enriched" followed by the name of the kind of corn grits used which is prescribed in the definition and standard therefor.

(c) The method referred to in paragraph (a) of this section is as follows:

Transfer 100 grams of enriched grits to a 2-liter Erlemeyer flask containing 1 liter of water at 25° C. Stopper the flask and rotate it for exactly ½ minute so that the grits are kept in motion. Allow the grits to settle for ½ minute, then pour off 850 cc. of the water along with any floating or suspended matter. Determine thiamine, riboflavin, niacin and iron in the wet grits and water remaining in the flask. Calculate as mg. per pound of the grits before rinsing. The amounts found by this procedure are not less than 85 percent of the minimum amounts of thiamine, riboflavin, niacin and iron prescribed by the standard for enriched grits.

§ 3.2 *Action by claimant—(a) Claims for damage, loss or destruction of property, personal injury or death.* Claims for damage to, or loss or destruction of, property or personal injury or death may be presented by the owner of the property or the injured person or his duly authorized agent or legal representative. The claim, if filed by an agent or legal representative, must show the title or capacity of the person presenting the claim and must be accompanied by evidence of the appointment of such person as agent, executor, administrator, guardian, or other fiduciary.

(b) *Form of claim.* Claims should be submitted by presenting in triplicate a statement in writing setting forth the claimant's name and address, the amount of the claim, the detailed facts and circumstances surrounding the accident or incident, indicating the date and place, the property and persons involved, the nature and extent of the damage, loss, destruction or injury, and the bureau, division or office which was the cause or occasion thereof, if known. The claimant may, if he desires, file a brief with his claim setting forth the law or other arguments in support of his claim.

(c) *Place of filing claim.* Claims should be submitted directly or through the local field headquarters to the head of the bureau, division or office of the Department out of whose activities the accident arose or incident occurred, if known; or if not known, to the General Counsel, Treasury Department, Washington 25, D. (d) *Evidence to be submitted by claimant—(1) General.* The amount claimed for damage to, or loss or destruction of, property or for personal injury or death should be substantiated by competent evidence. All statements or estimates required to be submitted by the following subparagraphs should, if possible, be by disinterested competent witnesses, preferably reputable dealers or persons familiar with the type of property damaged. Such statements and estimates should be certified as just and correct and if payment has been made, itemized receipts evidencing such payment should be included.

(2) *Damage to personal property.* In support of claims for damage to personal property which has been or can be economically repaired, the claimant should submit an itemized receipt if payment has been made or an itemized estimate of the cost of repairs. If the property is not economically reparable a statement as to depreciation in value should be included, or if the property is lost or destroyed, the value of the property at the time of loss or destruction should be stated.

If the damages to improvements can be readily and fairly valued apart from the damge to the land, the damage to such improvements should be stated separately from the damage to the land.

(5) *Damage to crops.* In support of claims for damage to crops, the claimant should submit an itemized signed statement showing the number of acres, or other unit measure, of the crops damaged, the normal yield per unit, the gross amount which would have been realized from such normal yield and an estimate of the costs of cultivating, harvesting and marketing such crops. If the crop is one which need not be planted each year, the diminution in value of the land beyond the damage to the current year's crop should also be stated.

(6) *Damage to registered or insured mail.* In the case of claims for damage to, or loss or destruction of, registered or insured mail, the claimant should submit, where possible, the registration or insurance receipt, or an attested copy thereof, showing the amount of fee and postage paid.

(7) *Marine casualty damage.* In support of claims for damage to, or destruction of, marine property which has been

or can be repaired or replaced, the claimant must submit an itemized statement or estimate of the cost of repairs or replacement, supported by an appraisal or survey report of disinterested, competent persons familiar with the subject matter.

If the property is so severely damaged that it is not susceptible of being repaired, its value before and after the time of the accident must be stated and established by competent evidence. Whenever a claim includes a charge for detention or loss of earnings during repairs of damage to a vessel, the claimant must support such item with a statement as to:

(i) The date when the vessel was disabled.

(ii) The name and location of the repair yard.

(iii) The date when repairs were commenced.

(iv) The date when repairs were completed.

(v) Whether or not while undergoing collision repairs, any other work for the owner's account was performed and, if so, the cost and character thereof and the time required for performance.

(vi) The date on which the vessel was returned to service after completion of repairs.

(vii) Place where the vessel was put into service after completion of repairs.

(viii) An explanation of any delay between the date repairs were completed and the date the vessel was returned to service.

(ix) Whether or not during the course of undergoing collision repairs the vessel could have been employed, and an explanation submitted showing the identity of the person who offered to give such employment; the terms of the offer; time of prospective service and rate of compensation.

(x) If the vessel was under charter at the time of collision or was otherwise employed, the claimant should state each of the details set forth last above, and as well submit a statement of operating expenses which were, or would have been, incurred to earn such hire, specifically stating wages and bonuses which would have been paid during the period of employment (including the master's), the value of fuel which would have been consumed during the period of employment, the value of consumable stores which would have been used during the period of employment, port charges which would have been incurred during the period of employment and which would have included such items as harbor fees, wharfage, dockage, sheddage, stevedoring, towage, pilotage, inspection, tollage, lockage, anchorage and moorage, grain elevation, storage, and customs fees. All such statements or estimates should be supported by statements or reports of disinterested, competent witnesses, preferably marine surveyors, familiar with the type of property damaged or destroyed.

(8) *Signatures.* The claim and all other papers requiring the signature of the claimant should be signed by the claimant personally or by a duly authorized agent or legal representative. Section 35 (A) of the Criminal Code (18 U. S. C. 80) imposes a fine of not more than $10,000 and imprisonment for not more than 10 years, or both, for presenting false claims or making false or fraudulent statements or representations in connection with making claims against the Government.

§ 3.3 *Approval of claim.* Claims for less than $500 submitted under this part except claims under the Coast Guard Claims Act are approved or disapproved by the head of the bureau, division or office out of whose activities the accident or incident arose, upon the recommendation of the Chief Counsel or other legal officer in immediate charge of the legal affairs of the bureau, division, or office: *Provided,* That claims which in the judgment of the head of the bureau, division or office involve novel or unusual questions of law are approved or disapproved by the General Counsel of the Department. Claims for $500 or more submitted under this part except claims under the Coast Guard Claims Act, are approved or disapproved by the General Counsel. Claims under the Coast Guard Claims Act are approved or disapproved by the Commandant, Assistant Commandant or the Chief Counsel of the Coast Guard.

§ 3.4 *Acceptance of settlement by claimant.* The acceptance by the claimant of the settlement shall be final and conclusive on the claimant, and shall constitute a complete release by the claimant of any claim against the Government and against the employee of the Government whose act or omission gave rise to the claim, by reason of the same subject matter.

§ 3.5 *Coast Guard Boards of Investigation.* Coast Guard Boards of Inquiry and Investigation may be convened in accordance with Coast Guard Courts and Boards, 1935, as amended, to inquire into the facts and circumstances surrounding accidents involving Coast Guard activities.

SUBPART B—FEDERAL TORT CLAIMS ACT

§ 3.20 *General.* The Federal Tort Claims Act (Title IV, Pub. Law 601, 79th Cong., 60 Stat. 842) conferred upon the head of each Federal agency, or his designee, acting on behalf of the United States, authority to ascertain, adjust, and settle certain claims against the United States for money only, accruing on and after January 1, 1945.

§ 3.21 *Allowable claims.* Claims are payable by the Department under the Federal Tort Claims Act and this subpart on account of damage to, or loss of, property or on account of personal injury or death, where the total amount of the claim does not exceed $1,000, caused by the negligent or wrongful act or omission of any employee of the Department, while acting within the scope of his office or employment, under circumstances where the United States, if a private person, would be liable to the claimant for such damage, loss, injury or death, in accordance with the law of the place where the act or omission occurred.

§ 3.22 *Exclusions.* As provided in section 421 of the Federal Tort Claims Act, claims not payable under that act and this subpart include:

(a) Any claim based upon an act or omission of an employee of the Government, exercising due care, in the execution of a statute or regulation, whether or not such statute or regulation be valid, or based upon the exercise or performance or the failure to exercise or perform a discretionary function or duty on the part of a Federal agency or an employee of the Government, whether or not the discretion involved be abused.

(b) Any claim arising out of the loss, miscarriage, or negligent transmission of letters or postal matter. See § 3.41 (a) (3).

(c) Claims for which a remedy is provided by the act of March 9, 1920 (46 U. S. C. secs. 741–752), or the act of March 3, 1925 (46 U. S. C., secs. 781–790), relating to claims or suits in admiralty against the United States.

(d) Any claim arising in respect of the assessment or collection of any tax or customs duty, or the detention of any goods or merchandise by any officer of customs or excise or any other law-enforcement officer. See § 3.60.

(e) Any claim arising out of an act or omission of any employee of the Government in administering the provisions of the Trading with the Enemy Act, as amended.

(f) Any claim arising out of assault, battery, false imprisonment, false arrest, malicious prosecution, abuse of process, libel, slander, misrepresentation, deceit, or interference with contract rights.

(g) Any claim for damages caused by the fiscal operations of the Treasury or by the regulation of the monetary system.

(h) Any claim arising out of the combatant activities of the military or naval forces, or the Coast Guard, during time of war.

(i) Any claim arising in a foreign country.

(j) Claims arising from injury to vessels, or to the cargo, crew, or passengers of vessels while passing through the locks of the Panama Canal or while in Canal Zone waters.

§ 3.23 *Application to claims not previously adjusted.* The provisions of this subpart shall apply to all claims otherwise within its scope, not heretofore adjusted, including claims formerly payable under provisions of law and regulations now superseded, arising out of accidents or incidents occurring on or after January 1, 1945. Claims arising out of accidents or incidents occurring prior to January 1, 1945, or claims not cognizable under this subpart will be settled under the provisions of the act of December 28, 1922, 42 Stat. 1066 (31 U. S. C. 215), or in the case of the Coast Guard, under the provisions of the act of July 3, 1943, 57 Stat. 372, as amended (31 U. S. C., Supp. V, 223b–d) as extended to the Coast Guard by the act of March 26, 1946, 60 Stat. 56 (Public 327, 79th Cong.). See Subparts C and D of this part.

§ 3.24 *Statute of limitations.* Claims under this subpart must be presented in writing to the Department within one year after the claim accrued, or by August 2, 1947, whichever is later.

§ 3.25 *Payment of claim.* Upon the approval of a claim cognizable under this subpart, the Treasury Department will draw a check in payment of the claim and mail it to the claimant, subject to the Congress having made appropriations available for that purpose.

§ 3.26 *Withdrawal of claim from Department.* A claimant may, in accordance with the provisions of section 410 (b) of the Federal Tort Claims Act, withdraw his claim from consideration by the Department upon fifteen days' notice in writing to the head of the bureau, office or division concerned, or if not known, to the General Counsel.

§ 3.27 *Attorneys' fees.* In accordance with section 422 of the Federal Tort Claims Act, reasonable attorneys' fees may be paid under this subpart out of, but not in addition to, the amount of the award or settlement. If the award or settlement is $500 or less, reasonable attorneys' fees, but not in excess of $50, may be allowed. If the award is $500 or more, reasonable attorneys' fees, but not in excess of 10 percent of the amount of the award or settlement, may be allowed.

§ 3.28 *Contributory negligence, subrogation, and pain and suffering.* Questions of contributory negligence, subrogation, the allowance of damages for pain and suffering and other questions of law, will be determined by the law of the place where the accident occurred.

SUBPART C—COAST GUARD CLAIMS

§ 3.40 *General.* The act of July 3, 1943, 57 Stat. 372, as amended (31 U. S. C., Supp. V, 223b-d) as extended to the Coast Guard by the act of March 20, 1946, 60 Stat. 56 (Pub. Law 327, 79th Cong.) authorizes the Secretary of the Treasury to consider, ascertain, adjust, determine, settle, and pay certain claims caused by military or civilian employees of the Coast Guard arising on or after May 27, 1941, in an amount not in excess of $1,000. The Federal Tort Claims Act has superseded that authority as to claims cognizable under it. However, the act of July 3, 1943, as amended, *supra*, is considered as otherwise being in effect.

§ 3.41 *Allowable claims.* (a) The following claims are cognizable under the act of July 3, 1943, 57 Stat. 372, as amended (31 U. S. C., Supp. V, 223b–d) and as extended to the Coast Guard by the act of March 20, 1946, 60 Stat. 56 (Pub. Law 327, 79th Cong.) and this subpart:

(1) Claims arising on or after May 27, 1941, and prior to January 1, 1945, for damage to, or loss of destruction of, real or personal property, or for reasonable medical, hospital, or burial expenses, actually incurred on account of personal injury or death, caused by the wrongful act or omission of military personnel or civilian employees of the Coast Guard while acting within the scope of their employment;

(2) Claims arising on or after May 27, 1941, for damage to, or loss of, real or personal property, or for reasonable medical, hospital, or burial expenses, actually incurred on account of personal injury or death, caused without wrongful act or omission by military personnel or civilian employees of the Coast Guard while acting within the scope of their employment or otherwise incident to the non-combatant activities of the Coast Guard;

(3) Claims arising on or after May 27, 1941, for damage to, or loss or destruction of, registered or insured mail while in the possession of Coast Guard authorities, even though resulting from criminal acts;

(4) Claims arising on or after May 27, 1941, for damage to, loss or destruction of, personal property bailed to the Government;

(5) Claims arising on or after May 27, 1941, for damage to real property incident to the use and occupancy thereof under a lease, express or implied.

§ 3.42 *Exclusions.* (a) The following claims are not cognizable under the act of July 3, 1943, 57 Stat. 372, as amended (31 U. S. C., Supp. V, 223b–d), as extended to the Coast Guard by the act of March 20, 1946, 60 Stat. 56 (Pub. Law 327, 79th Cong.) and this subpart:

(1) Claims which are cognizable under the Federal Tort Claims Act;

(2) Foreign claims which arose while the Coast Guard was operating as a part of the Navy, and which are administered under the act of January 2, 1942, 55 Stat. 880, as amended by the act of April 22, 1943, 57 Stat. 66 (31 U. S. C., Supp. V, 224d–i);

(3) Admiralty claims for damages caused by a Coast Guard vessel which arose while the Coast Guard was operating as a part of the Navy, which are administered under the act of July 3, 1944, 58 Stat. 726 (46 U. S. C., Supp. V, 797) and the act of December 5, 1945, 59 Stat. 596 (34 U. S. C., Supp. V, 600a–b);

(4) Personnel claims of either military or civilian personnel of the Coast Guard for damages to, or loss, destruction, capture, or abandonment of, personal property which occurred as an incident to their service and which are administered under Coast Guard Personnel Claims Regulations under the act of May 29, 1945, 59 Stat. 225, as amended (31 U. S. C., Supp. V, 222c-f) as extended to the Coast Guard by the Act of March 20, 1946, 60 Stat. 56 (Pub. Law 327, 79th Cong.);

(5) Claims for rent of real or personal property.

§ 3.43 *Contributory negligence.* Except with respect to cases within the admiralty and maritime jurisdiction, negligence or wrongful act of the claimant, or his agent or employee acting within the scope of his employment, in whole or in part the proximate cause of the accident or incident, bars a claim under this subpart. The doctrine of comparative negligence will not be applied. The law of the jurisdiction in which the accident or incident occurred will normally be followed in determining whether contributory negligence is present.

§ 3.44 *Statute of limitations.* Claims under this subpart must be presented in writing within one year after the occurrence of the accident or incident out of which the claim arises, except that if the accident or incident occurs in time of war, or if war intervenes within one year after its occurrence, a claim may, if good cause for the delay is shown, be presented within one year after peace is established.

§ 3.45 *Payment of claims—*(a) *Claims under $1,000.* Upon approval of claims not in excess of $1,000 cognizable under this subpart, the Treasury Department draws a check in payment thereof and mails it to the claimant, subject to the Congress having made appropriations available for that purpose.

(b) *Claims over $1,000.* Upon the approval of claims in excess of $1,000 they are forwarded to the Budget Division of the Department. Pursuant to call by the Bureau of the Budget, the Budget Division transmits the claim to that Bureau for inclusion in a deficiency appropriation bill. After the enactment of the bill by the Congress, it will be the duty of the claimant to contact the General Accounting Office, which will require the claimant to execute a claim. After receipt of the certificate of settlement issued by the General Accounting Office, the Treasury Department draws a check and mails it to the claimant.

§ 3.46 *Registered and insured mail.* As provided in § 3.41 (a) (3), claims for damage to, or destruction of, registered or insured mail while in the possession of the military authorities are within the scope of this subpart, if caused by military personnel or civilian employees of the Coast Guard even though resulting from criminal acts, or if otherwise incident to activities of the Coast Guard. Claims for damage, loss or destruction occurring prior to delivery by the Post Office Department (for distribution to the addressee) to authorized military personnel or civilian employees, are not payable under the provisions of this subpart, nor are claims for damage, loss or destruction occurring due to the fault of or while in the hands of bonded personnel; nor are claims arising after resumption of possession by the Post Office Department (e. g., for the purpose of forwarding to the addressee at a different address) and prior to redelivery to authorized military personnel or civilian employees of the Coast Guard charged with distribution to the addressee. "Minimum fee" insured mail carrying no insurance number and not requiring hand-to-hand receipts is not within the scope of this subpart.

§ 3.47 *Bailed personal property.* As provided in § 3.41 (a) (4), claims for damage to, or loss or destruction of, personal property loaned, rented, or otherwise bailed to the Government under an agreement, express or implied, are payable under the provisions of this subpart even though legally enforceable against the Government as contract claims. By express agreement a bailor may assume the risk of damage, loss or destruction, or otherwise modify the liability of the bailee. Claims payable under this section may, if deemed in the best interests of the Government, be processed as contract claims through the General Accounting Office. Claims for rent of personal property are not payable under this part.

§ 3.48 *Use and occupancy of real property.* As provided in § 3.41 (a) (5), claims for damage to real property, incident to the use and occupancy thereof by the Government under a lease, express or implied, or otherwise, are payable under the provisions of this subpart, even though legally enforceable against the Government as contract claims. Claims payable under this section may, if deemed in the best interests of the Government be processed as contract claims through the General Accounting Office. As provided in § 3.42 (a) (5), claims for rent of real property are not payable under this subpart.

§ 3.49 *Contract claims.* Claims for damage to, or loss or destruction of, property founded in contract, express or implied, except those under §§ 3.47 and 3.48 are normally not payable under the provisions of this subpart. Any claim which is apparently within the provisions of the act of July 3, 1943, 57 Stat. 342, as amended (31 U. S. C., Supp. V, 223b–d) as extended to the Coast Guard by the act of March 20, 1946, but appears to be founded in contract, express or implied, will be forwarded with related files and recommendations by or through the Commander of the cognizant Coast Guard district or activity to the Commandant for appropriate administrative action.

§ 3.50 *Other non-combat activities.* As provided in § 3.41 (a) (2) claims for damage to, or loss or destruction of, property, or for personal injury or death, although not caused by wrongful acts or omissions of military personnel or civilian employees of the Coast Guard are payable under the provisions of this subpart if otherwise incident to the activities of the Coast Guard. In general, claims within the above category are those arising out of authorized activities which are peculiarly Coast Guard activities having little parallel in civilian pursuits and out of situations which historically have been considered as furnishing a proper basis for the payment of claims, such as claims for damage or injury arising out of, and which are natural or probable results or incidents of, maneuvers and special exercises, practice firing, operation of aircraft, use of instrumentalities having latent mechanical defects not traceable to negligent acts or omissions, explosions of ammunition, movement of vehicles designed especially for military use, and use and occupancy of real estate.

§ 3.51 *Foreign claims.* Claims for damage to, or loss or destruction of, property, or for personal injury or death, arising out of accidents or incidents occurring in foreign countries when the Coast Guard was not operating as a part of the Navy, are within the provisions of this subpart.

§ 3.52 *Appeals.* Any claimant may appeal to the Secretary of the Treasury for a review of the adjustment or determination of his claim cognizable under this subpart. Such appeal shall be made in writing and shall be addressed to the Secretary of the Treasury, Washington 25, D. C.

SUBPART D—SMALL CLAIMS ACT

§ 3.60 *General.* The act of December 28, 1922, 42 Stat. 1060 (31 U. S. C., 215–217), the so-called Small Claims Act, authorized the head of each department and establishment to consider, ascertain, adjust, and determine claims of $1,000 or less for damage to, or loss of, privately owned property caused by the negligence of any officer or employee of the Government acting within the scope of his employment. The Federal Tort Claims Act superseded the Small Claims Act with respect to claims that are allowable under the former act. However, with respect to claims that are not allowable under the Federal Tort Claims Act, for example, claims for damage to goods in customs custody due to the negligence of customs employees were allowed under the Small Claims Act. The Federal Tort Claims Act specifically exempts from its provisions claims arising in respect of the detention of any goods or merchandise by any officer of customs. Hence, since exempted under the Federal Tort Claims Act, those claims are considered as still allowable under the Small Claims Act.

§ 3.61 *Exclusions.* The following claims are not cognizable under the Small Claims Act and this subpart:

(a) Claims which are cognizable under the Federal Tort Claims Act.

(b) Claims arising out of the activities of the Coast Guard.

§ 3.62 *Statute of limitations.* No claim will be considered by the Department under this subpart unless presented to it within one year from the date of the accrual of said claim.

§ 3.63 *Payment of claim.* Claims cognizable under this subpart, upon approval are forwarded to the Budget Division of the Department. Pursuant to call by the Bureau of the Budget, the Budget Division transmits the claim to that Bureau for inclusion in a deficiency appropriation bill. After the enactment of the bill by the Congress, it will be the duty of the claimant to contact the General Accounting Office, which will require the claimant to execute a claim. After receipt of the certificate of settlement issued by the General Accounting Office, the Treasury Department draws a check and mails it to the claimant.

Acting Secretary of the Treasury.

Chapter VII—Sugar Rationing Administration, Department of Agriculture

[3d Rev. RO 3,[1] Amdt. 44]

PART 707—RATIONING OF SUGAR

SUGAR

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

Third Revised Ration Order 3 is amended in the following respects:

1. Section 7.3 (a) is amended to read as follows:

(a) Except as provided herein, application for a sugar ration book shall be made on SRA Form R–218 to the Regional Office having jurisdiction over the place where the applicant lives or at any other place designated by the Sugar Rationing Administration. However, if application is being made for a sugar ration book for an infant or for a person discharged from the armed services, SRA Form R–218 need not be filed but a written request for a Sugar Ration Book may be made to the Regional Office. The written request must state:

1. The applicant's name and address;
2. That the application is for an infant or a person discharged from the armed services.

2. Section 7.8 (a) is amended to read as follows:

(a) An application for replacement of a ration book shall be made to the Regional Office having jurisdiction to act upon an original application for the issuance of the book sought to be replaced. Application shall be made on SRA Form R–218 by the person in whose name the book was issued or by his agent. The applicant must give all of the information required by the form. However, a written request for the replacement of a mutilated ration book may be filed instead of SRA Form R–218.

3. Section 7.9 (c) is amended to read as follows:

(c) If the ration book is being replaced because of mutilation, before the new book is issued, all expired stamps and all valid stamps except the last sugar stamp which became valid on or before the date the book is issued shall be removed. However, if the applicant states that the book did not contain the currently valid sugar stamp at the time of mutilation of such book, the last sugar stamp which became valid on or before the date the book is issued shall also be removed.

[1] 11 F. R. 177, 14281.

4. Section 7.10 (a) is amended to read as follows:

(a) An applicant seeking to replace a lost, destroyed, or stolen ration book shall make application on SRA Form R–218. The Regional Office may require the applicant to report the theft of a book to the police before considering his application.

5. Section 7.11 (a) and (b) is amended to read as follows:

(a) If a person claims that his ration book is being wrongfully withheld from him by another person, he shall make application on SRA Form R–218. Upon receipt of such application the Regional Office shall direct the Sugar Branch Office to hold a hearing. The Sugar Branch Office shall give notice of the time and place to the applicant. Furthermore, the Sugar Branch Office shall give three (3) days notice by mail to the alleged wrongful holder to appear at the hearing and to bring the applicant's book with him.

(b) If the Sugar Branch Office finds at the hearing that the book sought to be replaced is being wrongfully held by a person, it shall order the wrongful holder to surrender it to the applicant. If the wrongful holder fails to appear at the hearing or refuses to surrender the book, a new book shall be issued to the applicant and the Enforcement Office for the area notified of the wrongful holder's action.

6. Section 7.12 (a) is amended to read as follows:

(a) If the ration book is being replaced because of loss, theft, destruction or wrongful withholding, before the new ration book is issued all expired stamps and all valid stamps except the last sugar stamp which became valid on or before the date the book is issued shall be removed. However, if the applicant states that the ration book did not contain the currently valid sugar stamp at the time of the loss, theft, destruction or wrongful withholding, the last sugar stamp which became valid on or before the date the book is issued shall also be removed.

7. Section 9.2 (b) (3) is amended to read as follows:

(3) That the applicant has not received ration evidences under this section for any of the days covered by this application. The application may be filed at any Sugar Branch Office.

8. The first sentence of section 9.2 (c) is amended to read as follows: "If the Sugar Branch Office finds the facts stated in the application to be true it shall authorize the Regional Office to issue coupons."

9. Section 14.1 (c) is amended to read as follows:

(c) A registering unit may apply at the Sugar Branch Office for a check in exchange for such statement. It must attach to the statement a signed receipt, invoice, bill of lading, or such other evidence as substantiates the delivery of the sugar. If the Sugar Branch Office is satisfied that the sugar was delivered for ships' or planes' stores it shall authorize the Regional Office to issue a check to the registering unit covering the amount of sugar so delivered. However, if the sugar was delivered to a ship operating under the control, direction, or designation of the Maritime Commission, the registering unit may not apply to the Sugar Branch Office but may instead exchange such statement for a check at an appropriate office of the Maritime Commission.

10. Section 14.1 (d) is amended to read as follows:

(d) An aeroplane operator who has been allowed an operating inventory under Revised General Ration Order 5 may apply for evidences in exchange for a statement issued by a Collector of Customs (or military officer) under the provisions of Revised General Ration Order 5 at a Sugar Branch Office having jurisdiction over any area where the operator maintains an office.

11. Section 14.4 (d) is amended to read as follows:

(d) Any person to whom a check is issued under this section may give up such check to the Sugar Branch Office and that office may authorize the Regional Office to issue checks in exchange therefor in such denominations as the applicant may request, the total amount of which shall not exceed the amount of the check surrendered.

This amendment shall become effective May 12, 1947.

NOTE: The reporting and record-keeping requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 6th day of May 1947.

[SEAL] CLINTON P. ANDERSON,
Secretary of Agriculture.

Rationale Accompanying Amendment No. 44 to Third Revised Ration Order 3

Present regulations. Under existing regulations an application for a sugar ration book must be made on OPA Form R–146 and an application for replacement of a mutilated, lost, stolen, destroyed or wrongfully withheld ration book must be made on OPA Form R–194.

Proposed amendment. This amendment provides that an application for a sugar ration book and an application for replacement of a mutilated, lost, stolen, destroyed or wrongfully withheld ration book may be made on a new combined form SRA Form R–218.

This amendment also provides that an application for a sugar ration book for an infant and for persons discharged from the armed services and applications for replacement of mutilated ration books may be made by sending a written request to the Regional Office instead of filing SRA Form R–218.

This amendment also substitutes the words "Sugar Branch Office" for "Regional Office" in sections 9.2, 14.1 (c) and (d), and 14.4 (d).

Reasons for amendment. By combining forms R–146 (application for sugar ration book) and R–194 (consumer replacement application) the number of forms to be handled by the Branch Offices and the number of incorrect forms being filed by consumers will be materially reduced.

Many written requests for issuance of new ration books and for replacement of mutilated ration books are received by the field offices. Most of these letters contain sufficient information in order to issue the new or replacement books without requiring the applicant to file specified application forms. This amendment will not only reduce the workload in the field offices but will also materially reduce the delay which now occurs in processing such applications.

This amendment also provides that applications for temporary sugar rations for consumers other than servicemen be filed at the Sugar Branch Office rather than at the Regional Office, as the Sugar Branch Office is in a better position to process such applications than the Regional Office. Under the provisions of section 14.1 a registering unit may exchange a statement issued by a Collector of Customs for a check at the Sugar Branch Office instead of the Regional Office, since the Collector of Customs' statement is part of the registering unit's file which is maintained at the Branch Office. A person to whom a check is issued by the Extension Service of the Department of Agriculture may exchange such check for more than one ration check at the Sugar Branch Office, since exchange at a Sugar Branch Office is more convenient.

[Docket No. G-884]

SOUTHERN NATURAL GAS CO.

NOTICE OF AMENDMENT TO APPLICATION

MAY 6, 1947.

Notice is hereby given that on May 1, 1947, Southern Natural Gas Company (Applicant), a Delaware corporation having its principal place of business in Birmingham, Alabama, and authorized to do business in the States of Alabama, Georgia, Louisiana, Mississippi, and Texas, filed an amendment to its application filed on March 31, 1947, striking out of its application Items (C), (D), (E), (F), (G) (1), (G) (4), and (J), and Exhibits C, C-1, E, and G-4 and substituting in lieu thereof amended Items (C), (D), (E), (F), (G) (1), (G) (4), and (J), and amended Exhibits C, E, and G-4. The application, as amended, is for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, authorizing Applicant to construct and operate the following-described facilities:

I. *New line from the Gwinville gas field, Jefferson County, Mississippi, to Atlanta, Georgia.* This will comprise approximately 375 miles of 24-inch line and stream crossings, cross connections with Applicant's Montgomery branch, measuring facilities and appurtenances.

The application recites that when operated at an initial pressure of 1,000 p. s. i. this line will have, without installation of compressing facilities, a daily delivery capacity of 215,000 Mcf at Atlanta, in addition to contemplated daily deliveries at periods of peak demand of 10,000 Mcf at intervening points, and that the delivery capacity of the present system to Atlanta is 106,000 Mcf per day which would then become available for delivery at other points on the present system.

II. *Extensions to LaGrange, Georgia and adjacent communities.* This will comprise approximately 6 miles of 4½-inch lateral lines and 6 miles of 6⅝-inch lateral lines extending from the new line described in paragraph I above to LaGrange and West Point, Georgia, and Lanett, Shawmut, Langdale, Fairfax and Riverview, Alabama. In the event Applicant makes contracts for delivery of gas for distribution in other communities adjacent to the new line, this extension will also include lateral lines and measuring equipment, or such portions thereof as Applicant may agree to construct, of appropriate sizes to supply such communities.

III. *Trunk line.* A 16-inch line extending approximately 225 miles due east to the vicinity of Colfax, Georgia, from the point on the proposed 24-inch Gwinville-Atlanta line where said line bends northeasterly towards Atlanta, Georgia. The capacity of this line is 203,900 Mcf.

IV. *Extensions from 16-inch line.*—(a) *Tallahassee Line.* An 8⅝-inch line, having a daily delivery capacity of 27,500 Mcf, extending 56.4 miles south from Compressor Station B on the 16-inch line to Albany, Georgia, reduced to 6⅝-inch pipe for 53.0 miles from Albany to Thomasville, Georgia, with 4½-inch laterals to Cordele, Moultrie, and Cairo, Georgia, and Tallahassee, Florida, and with a 4½-inch lateral through Quitman to Valdosta, Georgia.

(b) *Jacksonville Line.* A 10¾-inch line, having a daily capacity of 47,500 Mcf, extending southeasterly 147.5 miles from the vicinity of Covena, Georgia to the junction with the Fernandina branch, and continuing as an 8⅝-inch line 18 miles long to Jacksonville, Florida. Extending 59 miles southeasterly from the junction at Compressor Station E is a 6⅝-inch lateral to Brunswick. The Fernandina-St. Marys lateral is an 8⅝-inch line extending 15.3 miles to the point where 6⅝-inch branch lines extend respectively 10 miles to Fernandina and 21 miles to St. Marys. There is also a 12.2 mile lateral of 4½-inch pipe to Waycross, Georgia.

(c) *Savannah Line.* A 10¾-inch line, having a daily delivery capacity of 45,000 Mcf extending 54.2 miles from the Colfax terminus of the 16-inch line to Savannah, Georgia.

(d) *Georgetown Extension.* A 14-inch line, having a daily delivery capacity of 78,500 Mcf, extending 54.4 miles from the Colfax terminus of the 16-inch line to Compressor Station D, located at the junction of the Augusta Line. From this point to the junction of the Charleston Line, the line is reduced to a 12¾-inch line, where it is further reduced to a 8⅝-inch line extending to the easterly terminus at Georgetown, South Carolina. This extension will supply the following branch lines.

(1) *Augusta Line.* An 8⅝-inch line extending 46.7 miles from Compressor Station D in the vicinity of Allendale, South Carolina to the Aiken, South Carolina junction with 6⅝-inch branches to Augusta (4.8 miles) and Aiken (18.3 miles). The daily delivery capacity of the Augusta Line is 21,750 Mcf.

(2) *Columbia Line.* An 8⅝-inch line, having a daily delivery capacity of 14,000 Mcf, extending 55.6 miles north from the vicinity of Branchville, South Carolina.

(3) *Charleston Line.* An 8⅝-inch line, having a daily capacity of 20,200 Mcf, extending 46 miles from the Georgetown line to Charleston, South Carolina.

V. The location, rated horsepower and capacity of proposed compressor stations are as follows:

Compressor Station A of 9,000 installed horsepower (8,720 active H. P.) with a delivery capacity of 203,900 Mcf, will be located on the 16-inch line 21 miles west of its junction with the Gwinville-Atlanta 24-inch line.

Compressor Station B of 9,000 installed horsepower (8,660 active H. P.), with a delivery capacity of 201,400 Mcf, will be located on the 16-inch line 56 miles east of Compressor Station A, at its junction with the Tallahassee line.

Compressor Station C of 8,000 installed horsepower (7,420 active H. P.), with a delivery capacity of 171,100 Mcf, will be located on the 16-inch line 69 miles east of Compressor Station B.

Compressor Station D of 4,000 installed horsepower, with a delivery capacity of 78,300 Mcf will be located on the Georgetown Extension at its junction with the Augusta Branch.

Compressor Station E of 1,600 installed horsepower, having a delivery capacity of 47,000 Mcf will be located on the Jacksonville Line at its junction with the Brunswick lateral.

The pipelines will include multiple line crossings at 27 major streams, and the compressor stations will include coolers, water systems and other appurtenances.

Meter and regulator stations of appropriate capacities will be located at all city and town gates and industrial delivery points. All facilities will be operated as an integral part of Applicant's system.

All lines will be operated at maximum pressures of 1080 p. s. i. with delivery pressures of not less than 50 p. s. i. The maximum day demand on this system is estimated to be 203,925 Mcf.

Applicant states that the Gwinville-Atlanta line has been designed to provide additional capacity for the markets served by the eastern portion of Applicant's system and to serve as a base for supplying the new markets herein mentioned; that the facilities proposed in Docket No. G-796 will probably prove adequate to supply the requirements of Applicant's present markets and the territory embraced within the extensions contemplated therein for only a few years but thereafter at least a portion of the capacity of the Gwinville-Atlanta line will be needed for the purpose of supplying such markets; and that the Gwinville-Atlanta line will provide sufficient excess capacity to cover not only requirements of present markets but also to supply the South Georgia-North Florida-South Carolina territory, the communities and industries of which have requested and need natural gas service. Applicant further states that this 24-inch Gwinville-Atlanta line, when operated with compressors at 1,000 pounds pressure, will have a capacity of 540,000 Mcf per day.

Applicant estimates the total over-all capital cost of the proposed facilities to be approximately $43,625,895. Information with respect to Applicant's plans for financing the project is to be supplied by amendment.

Applicant states that the rates to be charged for gas sold from the proposed Gwinville-Atlanta line and the extensions therefrom to La Grange, Georgia and adjacent communities are those specified in Applicant's present rate schedules applicable in the respective area as filed with the Federal Power Commission, except that sales in West Point, Georgia would be made under Applicant's rate schedules applicable in the State of Alabama.

Applicant further states it proposes to sell natural gas from the other facilities proposed herein at rates comparable with the present rate schedules, with appropriate allowances for the greater distances involved in supplying the markets to be supplied by such facilities, possible increases in cost of natural gas and other factors which may affect to some extent both capital cost and operating expenses.

Any interested State commission is requested to notify the Federal Power Commission whether the application, as amended, should be considered under the cooperative provisions of the Commission's rules of practice and procedure, and, if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with reasons for such request.

The application, as amended, of Southern Natural Gas Company is on file with the Commission and is open to public inspection. Any person (unless permission to intervene in the original application has already been granted by the Commission) desiring to be heard or to make any protest with reference to the application, as amended, shall file with the Federal Power Commission, Washington 25, D. C., not later than fifteen days from the date of publication of this notice in the FEDERAL REGISTER, a petition to intervene or protest. Such petition or protest shall conform to the requirements of the rules of practice and procedure (effective September 11, 1946), and shall set out clearly and concisely the facts from which the nature of the petitioner or protestant's alleged right or interest can be determined. Petitions for intervention shall state fully and completely the grounds of the proposed intervention and the contentions of the petitioner in the proceeding so as to advise the parties and the Commission as to the specific issues of fact or law to be raised or controverted, by admitting, denying, or otherwise answering, specifically and in detail, each material allegation of fact or law asserted in the proceeding.

It is further stated that on the basis of information furnished by Cincinnati to Applicant, the estimated peak day requirements of Cincinnati and Union from Applicant, during the winter of 1947-48, with restrictions by said companies on the sale of gas for house heating which were placed in effect on March 17, 1947, is estimated at 123,200 Mcf. Without such restrictions the peak day requirements from Applicant are estimated to be 154,600 Mcf. It is stated that the estimated peak day gas requirements of Cincinnati and Union from Applicant for the winter season of 1947-48 to 1950-51, inclusive, are such that the proposed facilities are necessary to supply the additional requirements, and that the construction of these facilities is necessary in order for Applicant to maintain and provide adequate and continued service to its present markets and are not being constructed by Applicant to serve additional markets.

Applicant states that it is a part of the Charleston Group of Columbia Gas & Electric Corporation System and that the statement of gas reserves, as of December 31, 1946, of the Columbia Gas

System was filed as Exhibit "F" in Docket G–849 [1] and is incorporated in this proceeding by reference.

The estimated total over-all capital cost of the proposed facilities is $1,933,000. Columbia Gas & Electric Corporation will either itself provide or cause to be provided from other sources such funds as may be required for the construction of the proposed facilities.

Any interested State commission is requested to notify the Federal Power Commission whether the application should be considered under the cooperative provisions of the Commission's rules of practice and procedure, and, if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with reasons for such request.

The application of Central Kentucky Natural Gas Company is on file with the Commission and is open to public inspection. Any person desiring to be heard or to make any protest with reference to the application shall file with the Federal Power Commission, Washington 25, D. C., not later than fifteen days from the date of publication of this notice in the FEDERAL REGISTER, a petition to intervene or protest. Such petition or protest shall conform to the requirements of the rules of practice and procedure (effective September 11, 1946), and shall set out clearly and concisely the facts from which the nature of the petitioner's or protestant's alleged right or interest can be determined. Petitions for intervention shall state fully and completely the grounds of the proposed intervention and the contentions of the petitioner in the proceeding so as to advise the parties and the Commission as to the specific issues of fact or law to be raised or controverted, by admitting, denying, or otherwise answering, specifically and in detail, each material allegation of fact or law asserted in the proceeding.

NORTH AMERICAN CO.

NOTICE OF FILING AND NOTICE OF AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa., on the 7th day of May 1947.

Notice is hereby given that The North American Company ("North American"), a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("act"). North American designates sections 12 (c) and 12 (d) of the act and Rules U-44 and U-46 of the general rules and regulations promulgated thereunder as being applicable to the transactions proposed.

All interested persons are referred to the declaration which is on file in the office of this Commission for a statement of the transactions proposed, which are summarized as follows:

North American, which presently owns 2,493,710 shares of Common Stock, $10 par value, of Wisconsin Electric Power Company ("Wisconsin Electric"), proposes to distribute certain of those holdings in partial liquidation to the stockholders of North American as follows: 2½ shares of Wisconsin Electric Common Stock for each 100 shares of North American Common Stock held of record on June 12, 1947, will be distributed on July 15, 1947; and 5 shares of Wisconsin Electric Common Stock for each 100 shares of North American Common Stock will be distributed in October 1947. The latter proposed distribution has not yet been specifically authorized by the Board of Directors of North American which, it is stated, is expected to act subsequent to the July 15, 1947 distribution.

No fractional shares of Wisconsin Electric Common Stock will be issued. In lieu thereof, North American proposes to distribute Participating Units of Beneficial Ownership in Deposited Shares of Wisconsin Electric Common Stock. Such Participating Units will be issued by Bankers Trust Company, New York, New York, acting as Depositary under a Deposit Agreement whereby 40 Participating Units will be issued for each share of Wisconsin Electric Common Stock deposited by North American. Certificates for Participating Units will be in transferable registered form and holders may surrender on or before June 30, 1949, Certificates representing an aggregate of 40 Participating Units or any multiple thereof in exchange for full shares of Wisconsin Electric Common Stock together with a pro rata share of any dividends or other distribution received by the Depositary on the Common Stock held, but without interest. As soon as practicable after June 30, 1949, the Depositary will reduce to cash all holdings under the Deposit Agreement and owners of Certificates for Participating Units will be entitled to a pro rata share of such cash upon surrender of such Certificates on or before June 30, 1955. After June 30, 1955, the Certificates for Participating Units will be entirely void and the funds held by the Depositary will be paid to Wisconsin Electric. North American will pay fees and expenses of the Depositary arising on or before June 30, 1949; all other fees and expenses will be paid by holders of the Certificates.

North American proposes to charge to Capital Surplus an amount equal to the carrying value (approximately $7,959,000) of the 642,949 shares proposed to be distributed together with expenses of the distributions, and to transfer to Capital Surplus from its Reserve for Contingencies originally provided from Capital Surplus an amount equal to the proposed charge.

North American represents that the proposed distributions will be steps in compliance with the Commission's order dated April 14, 1942, directing, among other things, that North American divest itself of its interest in Wisconsin Electric, and will be steps in carrying out North American's Amended Plans pursuant to section 11 (e) of the act, filed with the Commission on January 6, 1947. North American requests that any order of the Commission approving the proposed distributions conform to the requirements of Supplement R of Chapter 1 and section 1808 (f) of Chapter 11 of the Internal Revenue Code, as amended.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to said declaration, and that said declaration should not be permitted to become effective except pursuant to further order of this Commission;

It is ordered, That a hearing on said declaration under the applicable provisions of the act and the rules and regulations promulgated thereunder be held at 10:00 a. m., e. d. s. t., on the 22d day of May 1947, at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania. On such date, the hearing room clerk in Room 318 will advise as to the room in which such hearing will be held. At such hearing cause shall be shown why said declaration should be permitted to become effective.

It is further ordered, That Robert P. Reeder or any other officer or officers of the Commission, designated by it for that purpose, shall preside at the hearing in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the act and to a hearing officer under the Commission's rules of practice.

The Public Utilities Division of the Commission having advised the Commission that it has made a preliminary examination of the declaration and that, upon the basis thereof, the following matters and questions are presented for consideration by the Commission without prejudice, however, to the presentation of additional matters and questions upon further examination:

(1) Whether the proposed distributions are detrimental to the carrying out of the provisions of section 11 (b) of the act; and specifically whether the proposed distributions constitute appropriate steps in compliance by North American with the Commission's order, dated April 14, 1942, pursuant to section 11 (b) (1) of the act;

(2) Whether the proposed Deposit Agreement with Bankers Trust Company is necessary and appropriate;

(3) Whether fees and expenses to be paid in connection with the proposed distributions of Common Stock and Participating Units are reasonable and appropriate;

(4) Whether the accounting entries proposed to be made to reflect the proposed distributions are proper and in accordance with sound accounting principles;

(5) What terms and conditions, if any, with respect to the proposed distributions should be prescribed in the public interest or for the protection of investors or consumers;

It is further ordered, That particular attention be directed at said hearing to the foregoing matters and questions.

It is further ordered, That any person desiring to be heard in connection with this proceeding or proposing to intervene herein shall file with the Secretary of the Commission, on or before May 20, 1947, his request or application therefor as provided by Rule XVII of the Commission's rules of practice.

It is further ordered, That the Secretary of the Commission shall serve notice of the aforesaid hearing by mailing a copy of this notice and order by registered mail to The North American Company and that notice of said hearing shall be given to all other persons by general release of this Commission which shall be distributed to the press and mailed to the mailing list for releases issued under the Public Utility Holding Company Act of 1935, and that further notice be given to all persons by publication of this notice and order in the FEDERAL REGISTER.

FARM MARKETING QUOTAS AND MARKETING CARDS

§ 725.334 *Amount of farm marketing quota.* The marketing quota for a farm shall be the actual production of tobacco on the farm acreage allotment, as established for the farm in accordance with §§ 725.311 to 725.326, inclusive (Tobacco 13, Part I, Flue-cured and Burley Tobacco Marketing Quota Regulations, 1947–48, as amended) (11 F. R. 10251; 12 F. R. 61). The actual production of the farm acreage allotment shall be the

average yield per care of the entire acreage of tobacco harvested on the farm in 1947 times the farm acreage allotment. The excess tobacco on any farm shall be (a) that quantity of tobacco which is equal to the average yield per acre of the entire acreage of tobacco harvested on the farm in 1947 times the number of acres harvested in excess of the farm acreage allotment, plus (b) any quantity of tobacco carried over from a prior marketing year which, if marketed during the 1946–47 marketing year, would have been subject to penalty when marketed. The acreage of tobacco determined for a farm for the purpose of issuing the correct marketing card for the farm, as provided in § 725.336, shall be considered the harvested acreage for the farm unless the farm operator furnishes proof satisfactory to the county committee that a portion of the acreage planted will not be harvested or that a representative portion of the production of the acreage harvested will be disposed of other than by marketing.

§ 725.335 *No transfers.* There shall be no transfer of farm marketing quotas.

§ 725.336 *Issuance of marketing cards.* A marketing card shall be issued for every farm having tobacco available for marketing. Subject to the approval of the county committee, two or more marketing cards may be issued for any farm. All entries on each marketing card shall be made in accordance with the instructions for issuing marketing cards. Upon the return to the office of the county committee of the marketing card after all the memoranda of sale have been issued therefrom and before the marketing of tobacco from the farm has been completed, a new marketing card of the same kind, bearing the same name, information and identification as the used card shall be issued for the farm. A new marketing card of the same kind shall be issued to replace a card which has been reported to the county committee as having been lost, destroyed, or stolen.

(a) *Within Quota Marketing Card (Tobacco 20).* A Within Quota Marketing Card authorizing the marketing without penalty of the tobacco available for marketing shall be issued for a farm under the following conditions:

(1) If the harvested acreage of tobacco in 1947 is not in excess of the farm acreage allotment; if any excess tobacco carried over from any prior marketing year can be marketed without penalty under the provisions of § 725.342 (b); and if the operator of the farm does not operate another farm having excess tobacco.

(2) If excess tobacco produced on the farm is disposed of in accordance with § 725.343, or

(3) If the tobacco was grown for experimental purposes on land owned or leased by a publicly-owned agricultural experiment station and is produced at public expense by employees of the experiment station, or if the tobacco was produced by farmers pursuant to an agreement with a publicly-owned experiment station whereby the experiment station bears the costs and risks incident to the production of the tobacco and the proceeds from the crop inure to the benefit of the experiment station; *Provided*, That such agreement is approved by the State Committee prior to the issuance of a marketing card for the farm.

(b) *Excess Marketing Card (Tobacco 21).* An Excess Marketing Card showing the extent to which marketings of tobacco from a farm are subject to penalty shall be issued unless a within quota card is required to be issued for the farm under paragraph (a) of this section, except that if (1) the farm operator fails to disclose or otherwise furnish, or prevents the county committee from obtaining any information necessary to the issuance of the correct marketing card, an excess marketing card shall be issued showing that all tobacco from the farm is subject to the rate of penalty set forth in § 725.345, or (2) the county committee determines that it is necessary to issue a "zero-penalty" excess marketing card in order to protect the interest of the Government and insure proper identification of and accounting for tobacco produced on the farm and the proper use of the marketing card issued for the farm.

§ 725.337 *Person authorized to issue cards.* The county committee shall designate one person to sign marketing cards for farms in the county as issuing officer. The issuing officer may, subject to the approval of the county committee, designate not more than three persons to sign his name in issuing marketing cards: *Provided*, That each such person shall place his initials immediately beneath the name of the issuing officer as written by him on the card.

§ 725.338 *Rights of producers in marketing cards.* Each producer having a share in the tobacco available for marketing from a farm shall be entitled to the use of the marketing card for marketing his proportionate share.

§ 725.339 *Successors in interest.* Any person who succeeds in whole or in part to the share of a producer in the tobacco available for marketing from a farm shall, to the extent of such succession, have the same rights as the producer to the use of the marketing card for the farm.

§ 725.340 *Invalid cards.* A marketing card shall be invalid if:

(a) It is not issued or delivered in the form and manner prescribed;

(b) Entries are omitted or incorrect;

(c) It is lost, destroyed, stolen, or becomes illegible;

(d) Any erasure or alteration has been made, and not properly initialed.

In the event any marketing card becomes invalid (other than by loss, destruction, or theft, or by omission, alteration or incorrect entry which cannot be corrected by a field assistant), the farm operator, or the person having the card in his possession, shall return it to the county office at which it was issued.

If an entry is not made on a marketing card as required, either through omission or incorrect entry, and the proper entry is made and initialed by a field assistant, then such card shall become valid.

§ 725.341 *Report of misuse of marketing card.* Any information which causes a field assistant, a member of a State, county, or community committee, or an employee of a State or county committee, to believe that any tobacco which actually was produced on one farm has been or is being marketed under the marketing card issued for another farm shall be reported immediately by such person to the State Committee.

MARKETING OR OTHER DISPOSITION OF TOBACCO AND PENALTIES

§ 725.342 *Extent to which marketings from a farm are subject to penalty.* (a) Marketings of tobacco from a farm having no "carry-over" tobacco available for marketing shall be subject to penalty by the percent excess determined as follows: divide the acreage of tobacco harvested in excess of the farm acreage allotment and not disposed of under § 725.343 by the total acreage of tobacco harvested from the farm.

(b) Marketings of tobacco from a farm having "carry-over" tobacco available for marketing shall be subject to penalty by the percent excess determined as follows:

(1) Determine the number of "carry-over" acres by dividing the number of pounds of "carry-over" tobacco from the prior years by the normal yield for the farm for that year.

(2) Determine the number of "within quota carry-over" acres by multiplying the "carry-over" acres (subparagraph (1) of this paragraph) by the "percent within quota" (i. e., 100 percent minus the "percent excess") for the year in which the "carry-over" tobacco was produced.

(3) Determine the "total acres" of tobacco by adding the "carry-over" acres (subparagraph (1) of this paragraph) and the acreage of tobacco harvested in the current year.

(4) Determine the "excess acres" by subtracting from the "total acres" (subparagraph (3) of this paragraph) the sum of the 1947 allotment and the "within quota carry-over" acres (subparagraph (2) of this paragraph).

(5) Determine the percentage subject to penalty by dividing the "total acres" into the "excess acres" (subparagraph (4) of this paragraph).

(6) The burden of any penalty with respect to "carry-over" tobacco shall be borne by those persons having an interest in such tobacco.

(c) For the purpose of determining the penalty due on each marketing by a producer of tobacco subject to penalty, the converted rate of penalty per pound shall be determined by multiplying the applicable rate of penalty by the percent excess obtained under paragraph (a) or (b) of this section. The memorandum of sale issued to identify each such marketing shall show the amount of penalty due.

§ 725.343 *Disposition of excess tobacco.* The farm operator may elect to give satisfactory proof of disposition of excess tobacco prior to the marketing of any tobacco from the farm by any of the following methods:

(a) By a declaration of intention to market all tobacco available for marketing and the payment at the office of the county committee by check or draft or, if required by the county committee, by certified check, cashier's check or postal money order drawn payable to the Treasurer of the United States, in an amount equal to the penalty which would be due upon the marketing of all tobacco available for marketing. Any additional amount of penalty due after all marketings of tobacco from the farm have been made shall be paid by the operator not later than 20 days after receipt of notice of such additional penalty. Any amount collected in excess of the penalty due shall be refunded.

(b) By storage of the excess tobacco, the tobacco so stored to be representative of the entire 1947 crop produced on the farm, and posting of a bond approved by the county committee and the State Committee in the penal sum of twice the amount of penalty which will become due upon the marketing of the excess tobacco.

(c) By furnishing to the county committee satisfactory proof that excess tobacco representative of the entire crop will not be marketed.

§ 725.344 *Identification of marketings.* Each marketing of tobacco from a farm shall be identified by an executed memorandum of sale from the marketing card (Tobacco 20 or Tobacco 21) issued for the farm on which the tobacco was produced. In addition, in the case of nonwarehouse sales each marketing shall be identified by an executed bill of nonwarehouse sale (reverse side of memorandum of sale) except that such form is not required to be executed by warehousemen who are authorized on Tobacco 23 to issue memoranda of sale.

(a) *Memorandum of sale.* If a memorandum of sale is not executed to identify a warehouse sale of producer's tobacco by the end of the sale day on which the tobacco was marketed, the marketing shall be a suspended sale, and, unless a memorandum identifying the tobacco so marketed is executed within four weeks after such sale day, the marketing shall be identified by Tobacco 28, Sale Without Marketing Card as a marketing of excess tobacco. The memorandum of sale or Tobacco 28 shall be executed only by a field assistant with the following exceptions.

(1) A warehouseman, or his authorized representative, who has been designated on Tobacco 23 may issue a memorandum of sale to identify a warehouse sale if a field assistant is not available at the warehouse when the marketing card is presented. Each memorandum of sale issued by a warehouseman to cover a warehouse sale shall be presented promptly by him to the field assistant for verification with the warehouse records.

(2) In the case of flue-cured tobacco only, a dealer, or his authorized representative, operating a receiving point for scrap tobacco at a redrying plant (and other regular receiving points operated by such dealer or his agent or employees) or at an auction warehouse, who keeps records showing the information specified in § 725.352, and who has been authorized on Tobacco 23, may issue a memorandum of sale covering a purchase of scrap tobacco only if the bill of nonwarehouse sale has been executed.

The authorization on Tobacco 23 to issue memoranda of sale may be withdrawn by the State Committee from any warehouseman or dealer if such action is determined to be necessary in order to properly enforce the provisions of §§ 725.330 to 725.360, inclusive. The authorization shall terminate upon receipt of written notice setting forth the State Committee's reason therefor.

Each excess memorandum of sale issued by a field assistant shall be verified by the warehouseman or dealer (or his representative) to determine whether the amount of penalty shown to be due has been correctly computed and such warehouseman or dealer shall not be relieved of any liability with respect to the amount of penalty due because of any error which may occur in executing the memorandum of sale.

(b) *Bill of nonwarehouse sale.* Each nonwarehouse sale shall be identified by a bill of nonwarehouse sale completely executed by the buyer and the farm operator, except that if such tobacco is purchased by or for a warehouseman who is authorized on Tobacco 23 to issue memoranda of sale, he or his representative who is also authorized shall issue a memorandum of sale identifying each such purchase, record the purchase in Tobacco 25, Dealer's Record, and attach thereto the county copy of the memorandum of sale.

The word "scrap" shall be plainly written on any bill of nonwarehouse sale or memorandum of sale executed to cover scrap tobacco, and all such bills of nonwarehouse sale shall be delivered to a person at a scrap receiving point who is authorized to issue memoranda of sale.

Each bill of nonwarehouse sale covering any marketing except scrap tobacco shall be presented to a field assistant for the issuance of a memorandum of sale and for recording in Tobacco 25.

§ 725.345 *Rate of penalty.* The penalty per pound upon marketings of excess tobacco subject to marketing quotas shall be nineteen (19) cents per pound in the case of flue-cured tobacco and sixteen (16) cents per pound in the case of Burley tobacco.

With respect to tobacco marketed from farms having excess tobacco available for marketing the penalty shall be paid upon that percentage of each lot of tobacco marketed which the tobacco available for marketing in excess of the farm quota is of the total amount of tobacco available for marketing from the farm.

§ 725.346 *Persons to pay penalty.* The person to pay the penalty due on any marketing of tobacco subject to penalty shall be determined as follows:

(a) *Warehouse sale.* The penalty due on marketings by a producer through a warehouse shall be paid by the warehouseman who may deduct an amount equivalent to the penalty from the price paid to the producer.

(b) *Nonwarehouse sale.* The penalty due on tobacco purchased directly from a producer other than at public auction through a warehouse (nonwarehouse sale) shall be paid by the purchaser of the tobacco who may deduct an amount equivalent to the penalty from the price paid to the producer.

(c) *Marketings through an agent.* The penalty due on marketings by a producer through an agent who is not a warehouseman shall be paid by the agent who may deduct an amount equivalent to the penalty from the price paid to the producer.

(d) *Marketings outside United States.* The penalty due on marketings by a producer directly to any person outside the United States shall be paid by the producer.

§ 725.347 *Marketings deemed to be excess tobacco.* Any marketing of tobacco under any one of the following conditions shall be deemed to be a marketing of excess tobacco.

(a) *Warehouse sale.* Any warehouse sale of tobacco by a producer which is not identified by a valid memorandum of sale within four weeks following the date of marketing shall be identified by a Tobacco 28, and shall be deemed to be a marketing of excess tobacco. The penalty thereon shall be paid by the warehouseman who may deduct an amount equivalent to the penalty from the amount due the producer.

(b) *Nonwarehouse sale.* Any nonwarehouse sale which (1) is not identified by a valid memorandum of sale and (2) is not recorded in Tobacco 25 within one week following the date of purchase, or (3) if purchased prior to the opening of the local auction markets, is not recorded in Tobacco 25 within one week following the first sale day of the local auction markets, shall be deemed to be a marketing of excess tobacco. The penalty thereon shall be paid by the purchaser of such tobacco.

(c) *Leaf account tobacco.* The part or all of any marketing by a warehouseman which such warehouseman represents to be a leaf account resale but which when added to prior leaf account resales, as reported under §§ 725.330 to 725.360, inclusive, is in excess of prior leaf account purchases shall be deemed to be a marketing of excess tobacco unless and until such warehouseman furnishes proof acceptable to the Director, Tobacco Branch, Production and Marketing Administration, showing that such tobacco is not a marketing of excess tobacco. The penalty found to be due thereon shall be paid by the warehouseman.

(d) *Dealer's tobacco.* The part or all of any marketing of tobacco by a dealer which such dealer represents to be a resale but which when added to prior resales by such dealer is in excess of the total of his prior purchases as reported on Tobacco 25 shall be deemed to be a marketing of excess tobacco unless and until such dealer furnishes proof acceptable to the Director, Tobacco Branch, Production and Marketing Administration, showing that such marketing is not a marketing of excess tobacco. The penalty thereon shall be paid by the dealer.

(e) *Marketings not reported.* Any resale of tobacco which under §§ 725.330 to 725.360, inclusive, is required to be reported by a warehouseman or dealer but which is not so reported within the time and in the manner required by §§ 725.330 to 725.360, inclusive, shall be deemed to be a marketing of excess tobacco unless and until such warehouseman or dealer furnishes a report of such resale which is acceptable to the Director, Tobacco Branch, Production and Marketing Administration. The penalty thereon shall be paid by the warehouseman or dealer who fails to make the report as required.

(f) *Producer marketings.* If any producer falsely identifies or fails to account for the disposition of any tobacco produced on a farm, an amount of tobacco equal to the normal yield of the number of acres harvested in 1947 in excess of the farm acreage allotment shall be deemed to have been a marketing of excess tobacco from such farm. The penalty thereon shall be paid by the producer.

§ 725.348 *Payment of penalty.* Penalties shall become due at the time the tobacco is marketed and shall be paid by remitting the amount thereof to the State Committee not later than the end of the calendar week following the week in which the tobacco became subject to penalty. A draft, money order, or check drawn payable to the Treasurer of the United States may be used to pay any penalty, but any such draft or check shall be received subject to payment at par.

If the penalty due on any warehouse sale of tobacco by a producer as determined under §§ 725.330 to 725.360, inclusive, is in excess of the net proceeds of such sale (gross amount for all lots included in the sale less usual warehouse charges), the amount of the net proceeds accompanied by a copy of the warehouse bill covering such sale may be remitted as the full penalty due. Usual warehouse charges shall not include (a) advances to producers, (b) charges for hauling, or (c) any other charges not usually incurred by producers in marketing tobacco through an auction warehouse.

§ 725.349 *Request for return of penalty.* Any producer of tobacco, after the marketing of all tobacco available for marketing from the farm, and any other person who bore the burden of the payment of any penalty may request the return of the amount of such penalty which is in excess of the amount required under §§ 725.330 to 725.360, inclusive, to be paid. Such request shall be filed with the county committee within two (2) years after the payment of the penalty.

RECORDS AND REPORTS

§ 725.350 *Producer's records and reports*—(a) *Report on marketing card.* The operator of each farm on which tobacco is produced in 1947 shall return to the office of the county committee each marketing card issued for the farm whenever marketings from the farm are completed and in no event later than thirty days after the close of the tobacco auction markets for the locality in which the farm is located. Failure to return the marketing card within the time specified (after formal notification) shall constitute failure to account for disposition of tobacco marketed from the farm in the event that a satisfactory account of such disposition is not furnished otherwise and the allotment next established for such farm shall be reduced.

(b) *Additional reports by producers.* In addition to any other reports which may be required under §§ 725.330 to 725.360, inclusive, the operator of each farm or any other person having an interest in the tobacco grown on the farm (even though the harvested acreage does not exceed the acreage allotment and even though no allotment was established for the farm) shall upon written request by registered mail from the State committee and within 10 days after the deposit of such request in the United States mails, addressed to such person at his last known address, furnish the Secretary a written report of the disposition made of all tobacco produced on the farm by sending the same to the State committee showing, as to the farm at the time of filing said report, (1) the number of acres of tobacco harvested, (2) the total production of tobacco, (3) the amount of tobacco on hand and its location, and (4) as to each lot of tobacco marketed, the name and address of the warehouseman, dealer, or other person to or through whom such tobacco was marketed and the number of pounds marketed, the gross price, and the date of the marketing. Failure to file the report as requested or the filing of a report which is found by the State committee to be incomplete or incorrect shall constitute failure of the producer to account for disposition of tobacco produced on the farm and the allotment next established for such farm shall be reduced.

§ 725.351 *Warehouseman's records and reports*—(a) *Record of marketing.* Each warehouseman shall keep such records as will enable him to furnish the Secretary the following information with respect to each sale or resale of tobacco made at his warehouse:

(1) Name of seller (and, in the case of a sale for a producer, the name of the operator of the farm on which the tobacco was produced).
(2) Name of purchaser.
(3) Date of sale.
(4) Number of pounds sold.
(5) Gross sale price.
(6) Amount of any penalty and the amount of any deduction on account of penalty from the price paid the producer.

(ii) Purchases and resales for the warehouse leaf account.
(iii) Resales of floor sweepings.
(iv) Resales of pick-ups.

Any warehouseman who grades tobacco for farmers shall maintain a separate account showing the approximate amount of scrap tobacco obtained from the grading of tobacco from each farm.

In the case of resales for dealers the name of the dealer making each resale shall be shown on the warehouse records so that the individual lots of tobacco sold by the dealer can be identified.

(b) *Identification of sale on check register.* The serial number of the memorandum of sale issued to identify each marketing of tobacco from a farm or the number of the warehouse bill(s) covering each such marketing shall be recorded on the check register or check stub for the check written with respect to such sale of tobacco.

(c) *Memorandum of sale and bill of nonwarehouse sale.* A record in the form of a valid memorandum of sale or a sale without marketing card shall be obtained by a warehouseman to cover each marketing of tobacco from a farm through the warehouse and each nonwarehouse sale of tobacco purchased by the warehouseman. For a nonwarehouse sale of tobacco purchased by or for a warehouseman who is not authorized on Tobacco 23 to issue memoranda of sale, no memorandum of sale shall be issued unless the bill of nonwarehouse sale on the reverse side of the memorandum is executed. Any warehouseman who obtains possession of any scrap tobacco in the course of grading tobacco from any farm shall obtain a memorandum of sale to cover the amount of such scrap.

(d) *Suspended sale record.* Any warehouse bills covering farm tobacco for which memoranda of sale have not been issued at the end of the sale day shall be presented to a field assistant who shall stamp such bills "Suspended", write thereon the serial number of the suspended sale, and record the bills on Tobacco 29, Field Assistant's Report: *Provided*, That if a field assistant is not available, the warehouseman may stamp such bills "Suspended" and deliver them to a field assistant when one is available.

(e) *Warehouse entries on dealer's record.* Each warehouseman shall enter on Tobacco 25 the total purchases and resales made by each dealer or other warehouseman during each sale day at the warehouse. If any tobacco resold by the dealer is tobacco bought by him from a crop produced prior to 1947 the entry on Tobacco 25 shall clearly show such fact.

(f) *Record and report of purchases and resales.* Each warehouseman shall keep a record and make reports on Tobacco 25, Dealer's Record, showing:

(1) All purchases of tobacco directly from producers other than at public auction through a warehouse (nonwarehouse sales).

(2) All purchases and resales of tobacco at public auction through warehouses other than his own.

(3) All purchases of tobacco from dealers other than warehousemen and resales of tobacco to dealers other than warehousemen.

The county copy of each memorandum of sale issued to identify each purchase under subparagraph (1) of this paragraph shall accompany the report on which such purchase is recorded.

(g) *Season report of warehouse business.* Each warehouseman shall furnish the State Committee not later than thirty (30) days following the last sale day of the marketing season a report on Tobacco 26, Auction Warehouse Report, showing for each dealer or buyer (1) the total pounds and gross price of tobacco purchased and resold on the warehouse floor during the 1947–48 marketing year and (2) the total pounds and gross price of tobacco purchased and resold by such warehouseman during the 1947–48 marketing year.

(h) *Report of penalties.* Each warehouseman shall make reports on Tobacco 27, Report of Penalties, showing the information required with respect to each sale subject to penalty. Tobacco 27 shall be prepared for each week and forwarded, together with remittance of the penalties due, as shown thereon, to the State Committee not later than the end of the calendar week following the week in which the tobacco became subject to penalty.

(i) *Report of resales.* Each warehouseman shall make reports on Tobacco 32, Report of Resales, showing the information required with respect to each resale of tobacco at auction on the warehouse floor. Tobacco 32 shall be prepared for each sale day and forwarded to the State Committee not later than the end of the calendar week following the week in which the tobacco was resold.

§ 725.352 *Dealer's records and reports.* Each dealer, except as provided in § 725.353, shall keep the records and make the reports as provided by this section.

(a) *Report of dealer's name, address and registration number.* Each dealer shall properly execute and the field assistant shall detach and forward to the State Committee "Receipts for Dealer's Record" contained in Tobacco 25 which is issued to the dealer.

(b) *Record and report of purchases and resales.* Each dealer shall keep a record and make reports on Tobacco 25, Dealer's Record, showing all purchases and resales of tobacco made by the dealer and, in the event of resale of tobacco bought from a crop produced prior to 1947 the fact that such tobacco was bought by him and carried over from a crop produced prior to 1947.

(c) *Report of penalties.* Each dealer shall make a report on Tobacco 27, Report of Penalties, showing the information with respect to all purchases subject to penalty made by him during each calendar week. The penalties listed on each such report shall be remitted with the report.

(d) *Memorandum of sale and bill of nonwarehouse sale.* A record in the form of a valid memorandum of sale shall be obtained by a dealer to cover each purchase of tobacco directly from a producer other than at auction through a warehouse (nonwarehouse sale). No memorandum of sale shall be issued identifying such purchase unless the bill of nonwarehouse sale, on the reverse side of the memorandum of sale, has been executed.

(e) *Record and report of scrap tobacco.* Each dealer operating a receiving point for scrap tobacco who has been authorized on Tobacco 23 to issue memoranda of sale, shall keep a record and make reports on Tobacco 25 showing all tobacco received. Such reports shall be accompanied by memoranda of sale and bills of nonwarehouse sale with respect to all tobacco covered by the reports.

(f) *Additional records.* Each dealer shall keep such records, in addition to the foregoing, as may be necessary to enable him to furnish the Secretary the following information with respect to each lot of tobacco purchased or sold by him:

(1) Name of the seller, and in the case of a purchase from a producer, the name of the operator of the farm on which the tobacco was produced.
(2) Name of the purchaser.
(3) Date of the transaction.
(4) Number of pounds sold.
(5) Gross purchase or sale price.
(6) Amount of any penalty and the amount of any deduction on account of penalty from the price paid the producer.

All reports shall be forwarded to the State Committee not later than the end of the week following the calendar week covered by the reports.

§ 725.353 *Dealers exempt from regular records and reports.* Any dealer who does not purchase or otherwise acquire tobacco except at a warehouse sale and who does not resell, in the form in which tobacco ordinarily is sold by farmers, more than ten percent of the tobacco purchased by him, shall not be subject to the provisions of § 725.352; but each such dealer shall make such reports to the Secretary as the Director, Tobacco Branch, Production and Marketing Administration, may find necessary to enforce §§ 725.330 to 725.360, inclusive.

§ 725.354 *Records and reports of truckers and persons redrying, prizing or stemming tobacco.* (a) Every person engaged in the business of trucking tobacco for producers shall keep such records as will enable him to furnish the Secretary a report with respect to each lot of tobacco received by him showing (1) the name and address of the farm operator, (2) the date of receipt of the tobacco, (3) the number of pounds received, and (4) the place to which it was delivered.

Each such person shall make such reports to the Secretary as the Director, Tobacco Branch, may find necessary to enforce §§ 725.330 to 725.360, inclusive.

§ 725.355 *Separate records and reports from persons engaged in more than one business.* Any person who is required to keep any record or make any report as a warehouseman, dealer, processor, or as a person engaged in the business of redrying, prizing, or stemming tobacco for producers, and who is engaged in more than one such business, shall keep such records as will enable him to make separate reports for each such business in which he is engaged to the same extent for each such business as if he were engaged in no other business.

PART 605—GENERAL PROCEDURAL PROVISIONS

PART 611—LOW-RENT HOUSING AND SLUM CLEARANCE PROGRAM POLICY

MISCELLANEOUS AMENDMENTS

1. Part 605 (11 F. R. 177A-909) is hereby amended, effective upon publication in the FEDERAL REGISTER, by adding § 605.3 thereto as follows:

§ 605.3 *Claims cognizable under the Federal Tort Claims Act.* (a) Claims of $1,000 or less, arising out of the negligent or wrongful acts or omissions of FPHA employees acting within the scope of their employment, and which are otherwise cognizable under the Federal Tort Claims Act (Public Law 601, 79th Congress), may be filed with the housing manager or project engineer of the project on which the damage, injury, or death occurs, or with the particular regional office in whose region the damage, injury, or death occurs, or directly with the FPHA central office. Such claims must be filed within one year of the date of occurrence of the injury, damage, or death, or date of enactment of the Federal Tort Claims Act, whichever is later. Each regional office and the central office has a committee of three persons responsible for investigating and recommending disposition of claims of this type.

(1) Such claim may be filed by the person sustaining the injury or damage in his own right; or by a person authorized by law to make the claim on behalf of the injured person or his estate; or by an attorney representing the claimant.

Claims filed by a person authorized by law to make the claim on behalf of the injured person or his estate must be accompanied by evidence establishing the claimant's right to make the claim.

Claims filed by an attorney must be accompanied by a duly authenticated power of attorney establishing his right to represent the claimant. In filing such power of attorney the attorney should state whether he claims a fee, the amount of which, however, will be determined by the FPHA under the provisions of section 422 of the Federal Tort Claims Act.

(2) The claim must state the name, age and address of the injured person; all facts relating to the alleged damage, injury or death, including the date, place, circumstances, extent of damage or injury, and the parties involved; the sworn statements of witnesses which the claimant desires to be considered in the adjudication of the claim; the amount of the claim (not exceeding $1,000); and whether the damage is covered in whole or in part by insurance, and if so, the name of the insurance company.

In addition to the foregoing, the claim must be supported by the following evidence and information:

(i) *Property damage claims.* Property damage claims must be supported by an itemized receipted bill or bills covering the repairs or replacement of the property damaged or destroyed or a notarized appraisal of the cost, strictly limited to such items of repair or replacement as were made necessary by the accident giving rise to the claim; and, if the claimant is not the owner of the property, evidence establishing the claimant's right to make the claim. The claimant must also state the place where the damaged property may be inspected.

(ii) *Personal injury claims.* Personal injury claims must be supported by a medical certificate showing the nature and extent of the injury and the treatment thereof; receipted medical bills such as doctor's bills, hospital bills, nursing bills; and a sworn statement from the claimant's employer establishing the amount of time and compensation lost by reason of the injury.

(iii) *Death claims.* Death claims must be supported by a certified copy of the death certificate, and a statement of the basis upon which the amount of the claim was computed, accompanied by supporting evidence.

(3) The claimant will be notified of the action taken in each case. If the FPHA determines that he is entitled to an award he will be required to complete U. S. Standard Form No. 1145, a copy of which will be furnished him. (Secs. 401-424, Public Law 601, 79th Congress, 60 Stat. 842)

2. Part 611 is hereby amended, effective upon publication in the FEDERAL REGISTER, by rescinding and deleting § 611.7 (11 F. R. 177A-911) therefrom.

PART 705—ADMINISTRATION

[Rev. Gen. RO 5,[1] Amdt. 22]

SUGAR RATIONING FOR INSTITUTIONAL USERS

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

Revised General Ration Order 5 is amended in the following respect:

Section 9.3 (b) is amended to read as follows:

(b) All coupons to be issued to institutional users shall be issued in multiples of five. If the amount to be issued is not a multiple of five, such amount shall be raised to the next multiple of five. (Thus, if the allotment for an institutional user who is to receive coupons is for 56 pounds, coupons for 60 pounds shall be issued.)

This amendment shall become effective May 14, 1947.

Issued this 9th day of May 1947.

CLINTON P. ANDERSON,
Secretary of Agriculture.

Rationale Accompanying Amendment No. 22 to Revised General Ration Order 5

Present regulations. At the present time one pound and ten pound sugar ration coupons are issued under the sugar rationing regulations. When the allotment for an institutional user who is authorized to receive ration coupons (other than for an institutional user who applies for his allotment on R–1309) is for an amount which is not a multiple of ten, the Regional Issuance Unit must detach the correct number of one-pound ration coupons from a coupon sheet in order to complete the issuance for the correct amount of the allotment.

Proposed amendment. This amendment provides that coupons to be issued to institutional users shall be multiples of five. If the amount to be issued is not a multiple of five, such amount shall be raised to the next multiple of five.

Reason for amendment. The mechanical operation involved in the issuance of coupons will be simplified and the time necessary for such operation will be reduced by permitting Regional Issuance Units to detach five one-pound ration coupons at a time instead of an odd number of one-pound coupons when coupon issuances are made to institutional users.

[3d Rev. RO 3,[1] Amdt. 45]

PART 707—RATIONING OF SUGAR

SUGAR

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

Third Revised Ration Order 3 is amended in the following respects:

Section 11.5 is added to read as follows:

SEC. 11.5 *Removal of limitations on imported sugar-containing products on and after May 7, 1947* (a) On and after May 7, 1947, the foregoing provisions of this article shall not apply to imported sugar-containing products; *Provided, however*, That the provisions regarding receipt, delivery, or use of imported sugar-containing products shall remain in full force and effect with respect to any such acts occurring prior to May 7, 1947.

This amendment shall become effective May 7, 1947.

Issued this 9th day of May 1947.

CLINTON P. ANDERSON,
Secretary of Agriculture.

Rationale Accompanying Amendment No. 45 to Third Revised Ration Order 3

The limitations contained in the present regulations with respect to imported sugar-containing products were established to prevent an unreasonable diversion of sugar into sugar-containing products as a means of evading the rationing of crystalline and liquid sugar in the United States.

The current increase in rationing levels, reflecting the improved sugar supply situation, coupled with the improved availability of nonrationed sugar substitutes, has reduced this danger of an unreasonable diversion of sugar into sugar-containing products. In addition, the licensing of imports by the Production and Marketing Administration of the Department of Agriculture has also materially limited the diversion of sugar by such means.

In view of these improved conditions, and in accordance with the policy of removing rationing controls as quickly as warranted, this amendment removes the rationing limitations on imported sugar-containing products received, delivered, or used after May 7, 1947. The amendment also continues in effect the provisions in the present regulations with respect to receipt, delivery, or use of imported sugar-containing products occurring prior to May 7, 1947. Thus, persons who failed to comply with the regulations on imported sugar-containing products delivered, received, or used prior to May 7, 1947, are not relieved of their obligation to do so.

176.11 Absorption or advancement of dock charges.

AUTHORITY: §§ 176.9 to 176.11, inclusive, issued under 49 Stat. 547, 558, 560; 49 U. S. C. 304 (c), 316 (e), 317 (a).

§ 176.9 *Liability of carriers*—(a) *Liability restricted.* Common carriers by motor vehicle of household goods shall not assume any liability in excess of that for which they are legally liable under their lawful bills of lading and published tariffs.

(b) *Insurance policy.* Each such common carrier which sells, offers, or procures cargo insurance to or for a shipper of household goods shall deliver to the shipper at or prior to the time of shipment a policy or certificate of insurance which shall show clearly the name and address of the insurance company, the amount of insurance, the premium therefor, and the risks insured against, or the risks excluded, whichever is more appropriate.

(c) *Advertisement of insurance.* Such common carriers or any employee, agent, or representative thereof shall not advertise or represent to the public that insurance is provided against all risks unless such insurance in fact affords protection to the shipper from every peril to which the shipment may be exposed. When all except certain risks are insured against, this fact shall be indicated in any advertisement of and in any representations to shippers regarding the insurance, and such advertising and representations shall not be such as to deceive or mislead the public or any shipper regarding the scope of the exceptions. Policies providing coverage against specific perils only shall be advertised, represented, and designated as "limited-risk policies", or by some other appropriate designation which will indicate clearly to the shipper that not all risks are covered thereby.

(d) *Filing tariffs and evidence of insurance prerequisite to advertising that "all loads are insured."* Such carriers, or any employee, agent, or representative thereof, shall not advertise or represent to the public that "all loads are insured" or other similar wording unless such carrier has filed tariffs with this Commission assuming complete liability and has filed evidence of insurance with this Commission providing protection covering all shipments to their full value without limitation and insuring against every peril to which any shipment may be exposed.

§ 176.10 *Estimates of charges*—(a) *Estimates by carrier.* Wherever any estimate of the charges for a proposed service shall be made or given by such carrier to a proposed shipper of household goods, the estimate shall be in writing and shall contain the following:

(1) The correct name and address of the motor carrier and the name of the authorized agent who prepared the estimate.

(2) A list or other indication of the articles on which the estimate is based.

(3) The origin and destination of the proposed movement.

(4) The estimated weight of the goods to be transported.

(5) The applicable rate.

(6) An itemized statement of all accessorial services and charges.

(7) An estimate of the transportation tax.

(8) An estimate of the total charges, including the transportation tax.

(9) A printed statement on the face thereof, in a prominent position, in not less than eight point bold or full face type, the following:

Important notice. The actual charges which will be collected generally cannot be determined until after the property is loaded on a van and weighed.

The estimate covers only the articles and services indicated. If additional articles are to be shipped or additional services required, a supplemental estimate may be obtained.

The estimate of the charges herein made is not a warranty or guaranty that the actual charges will not exceed the amount estimated.

Carriers are required by law to collect transportation, packing, and other incidental charges computed on rates shown in their lawfully published tariffs regardless of any rate quotation or weight estimate made by the carrier.

(b) *Estimate form for shipper's use.* Carriers may furnish to shippers or prospective shippers an estimate form which may contain statements of the weights of average pieces of furniture and other household articles of various types, for use by the shipper in making his own estimate of the total weight of his goods. Any instructions necessary to enable the shipper to use the estimate form shall be printed in the form. If cubic foot measurements are used in arriving at the weight, the form shall state that a weight factor of seven pounds per cubic foot shall be used.

(c) *Weight of shipment, notification to shipper.* After the shipment has been weighed, the carrier if requested by the shipper, shall immediately notify the shipper of the weight thereof and the charges, by telephone or telegraph if requested. The notice shall be at the carrier's expense unless the carrier provides in its tariff that the actual cost of such notice shall be collected from the shipper.

(d) *Reweighing.* The carrier shall, upon request made by the shipper before delivery and when practicable to do so,

[1] Filed as part of the original document.

reweigh the shipment. A reasonable charge may be established for reweighing only when the difference between the two net scale weights does not exceed (1) 100 pounds on shipments weighing 5,000 pounds or less, and (2) 2 percent of the lower net scale weight on shipments weighing more than 5,000 pounds. The lower of the two net scale weights shall be used for determining the applicable charges.

§ 176.11 *Absorption or advancement of dock charges.* Motor common carriers of household goods shall not absorb any dock or other charge made by any warehouseman, nor shall any such carrier advance any such charge for the account of any shipper, owner, or other person, except upon the authorization of such person. Whenever such charges are advanced on behalf of the shipper, the carrier shall obtain a receipt therefor from the warehouseman and deliver it to the shipper or the person designated by the shipper at the time the advanced charges are paid.

By the Commission, Division 5.

NEW MEXICO LIVESTOCK EXCHANGE STOCKYARDS, ALBUQUERQUE, N. MEX.

NOTICE RELATIVE TO POSTED STOCKYARDS

It has been ascertained that the New Mexico Livestock Exchange Stockyards, at Albuquerque, New Mexico, originally posted as the New Mexico Livestock Exchange Company, Inc., on May 3, 1940, as being subject to the Packers and Stockyards Act, 1921, as amended, no longer comes within the definition of a stockyard under the act. Therefore, notice of such fact is given to the owner of such stockyard and to the public by filing notice with the Division of the Federal Register.

NOTE: Notice of proposed rule-making has not preceded the promulgation of the foregoing order since it is found that so doing would prevent the due and timely administration of the Packers and Stockyards Act and would, therefore, be impracticable. There is no legal warrant or justification for not depositing promptly a stockyard which no longer comes within the definition of a stockyard contained in the Packers and Stockyards Act.

The foregoing rule is in the nature of a rule granting an exemption or relieving a restriction and, therefore, is made effective immediately.

STANDARD GAS AND ELECTRIC CO. AND CALIFORNIA OREGON POWER CO.

ORDER GRANTING APPLICATIONS AND PERMITTING DECLARATIONS TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa., on the 8th day of May 1947.

Standard Gas and Electric Company ("Standard Gas"), a registered holding company, having filed an application and declaration and amendments, thereto pursuant to the Public Utility Holding Company Act of 1935 ("act") and The California Oregon Power Company ("Copco"), a public utility subsidiary of Standard Gas having filed an application and declaration and amendment thereto pursuant to the act (in which applications and declarations, as filed or amended, sections 11 (b), 12 (a), 12 (d), 6 (b) and 9 (a) of the act and rules U-23, U-24, U-42, U-44 and U-50 are designated as applicable), with respect to the following transactions:

Copco proposes to issue and sell at competitive bidding pursuant to the requirements of Rule U-50 promulgated under the act, 60,000 shares of —% Cumulative Preferred Stock, par value

$100 per share ("New Preferred Stock"). The annual dividend rate of the New Preferred Stock (to be a multiple of 1/10 of 1% of the par value) and the price per share to be received by Copco (to be not more than $102.75 per share and not less than $100 per share) will be determined by the competitive bidding. Copco also proposes to issue and sell 18,000 shares of Common Stock, par value $20 per share, at competitive bidding pursuant to the requirements of Rule U-50. The proceeds of the sale of the 60,000 shares of New Preferred Stock and of the 18,000 shares of Common Stock will be used by Copco (1) for the redemption at $110 per share of its outstanding 45,761 shares of Six Per Cent Preferred Stock, Series of 1927 ("Old Preferred Stock"), reduced by such number of shares of Old Preferred Stock as shall have been acquired and donated to Copco by Standard Gas (as more particularly hereinafter set forth), and (2) for reimbursement of its treasury in part for expenditures heretofore made and to be made for additions and betterments to its properties;

Standard Gas proposes to sell 390,000 shares of Common stock of Copco, par value of $20 per share, pursuant to the requirements of Rule U-50, such sale to be made coincidentally with the sale by Copco of 18,000 shares of its Common Stock, par value of $20 per share. The net proceeds of the sale of said 18,000 shares of Common Stock of Copco will be applied by Standard Gas towards the payment of interest and principal on its promissory notes dated April 10, 1946, issued to certain banks under a Bank Loan Agreement dated December 21, 1945, as supplemented by supplemental agreements dated February 15, 1946, April 5, 1946 and April 5, 1947 or any further extensions or supplemental agreements in respect thereto which may have been entered into by Standard Gas and approved by the Commission prior to the time the proceeds are received.

Standard Gas further proposes, prior to the issue and sale of the new securities of Copco, to acquire in the open market certain shares of the Old Preferred Stock of Copco equal in number, as nearly as practicable, to 3,000 shares, and to donate to Copco the shares so acquired as a capital contribution, in the sum of $300,000 (assuming 3,000 shares are so acquired by Standard Gas) against which $13,700 discount and expense applicable to such donated stock will be charged immediately by Copco.

Copco proposes to amend its Amended Articles of Incorporation in order to reclassify its presently outstanding 312,000 no par value shares of Common Stock (having an aggregate stated capital equivalent in value to $25 per share), all of which are owned by Standard Gas, into 390,000 shares of Common Stock of the par value of $20 per share; and also to provide for the authorization of the New Preferred Stock and to set forth the preferences, voting powers, restrictions and qualifications of said New Preferred Stock and the Common Stock, par value $20 per share. Standard Gas undertakes to consent to the proposed amendments to the Amended Articles of Incorporation of Copco.

Copco proposes to charge the total of (a) the amount of capital stock discount and expense relating to the Old Preferred Stock to be redeemed, (b) the redemption premiums on such stock, and (c) the expense of the redemption of such stock, as follows: $286,300 of these items to the capital surplus created by the donation by Standard Gas of shares of Old Preferred Stock (assuming the number of such donated shares will be 3,000), and the balance of the total of these items, being approximately $339,592, to earned surplus. Copco further proposes to charge to earned surplus the following items: (1) Duplicate dividends of $42,761 to be incurred in connection with the redemption of its Old Preferred Stock; and (2) the unamortized balance of $561,442, as of May 1, 1947, of its unamortized debt discount and expense, presently carried in its accounts in respect of redemption premium and expense applicable to its first mortgage bonds redeemed in 1944.

Both Standard Gas and Copco have requested that the ten-day notice for inviting bids as provided for by subsection (b) of Rule U-50 be shortened to six days so as to minimize the possibility of a postponement of the opening of bids due to a change of market conditions between the time the day of opening of bids is designated and such day. In this connection, Standard Gas and Copco have not designated a day certain on which bids are to be opened but they propose to advise the Commission by telegram on the day preceding the publication of a public invitation for bids of their intention so to do and the proposed date of the opening of such bids.

Copco and Standard Gas have requested that the Commission make the specifications and itemizations necessary in order that the provisions of sections 1808 (f), 371 (a), 371 (b) and 371 (f) of the Internal Revenue Code shall be applicable to the proposed transactions.

Copco has applied to the Public Utilities Commission of the State of California, in which State Copco is organized and doing business, and to the Public Utilities Comissioner of Oregon, in which State Copco is also doing business, for their respective orders authorizing the reclassification of the Common Stock of Copco, the issue and sale of 18,000 shares of Common Stock, as reclassified, and 60,000 shares of ____% Cumulative Preferred Stock, and the use of the proceeds of such sale for redemption of such of its outstanding shares of Old Preferred Stock as shall not have been surrendered as a capital contribution, and with respect to other matters, including to the extent required authority to make the accounting entries hereinabove referred to.

Said separate applications and declarations having been filed on March 26, 1947, and Standard Gas having filed an amendment to its application and declaration on April 2, 1947, and both Standard Gas and Copco having requested on April 25, 1947, that the effective date of these filings be postponed to May 5, 1947, and both Standard Gas and Copco having filed amendments to their respective applications and declarations on May 2, 1947, and notice of said filings, as then amended, having been duly given by the Commission on April 3, 1947, in the form and manner prescribed by Rule U-23 promulgated pursuant to said act, and the Commission not having received a request for hearing with respect to said applications and declarations, as filed or amended, within the period specified in said notice or otherwise, and not having ordered a hearing thereon; and

It appearing that the amendments filed May 2, 1947 include certain transactions with respect to which the Commission has deemed it appropriate that further public notice be given so that interested persons may have an opportunity to request a hearing with respect to such transactions, and that accordingly such a public notice has been given by separate notice of filing issued this day (Holding Company Act Release No. 7388), to which reference is hereby made, which notice relates to the acquisition in the open market by Standard Gas of approximately 3,000 shares of Old Preferred Stock of Copco, the contribution of such shares by Standard Gas to Copco, and certain accounting treatment relating thereto; and

The Commission finding with respect to said applications and declarations, as amended, (except as to those transactions heretofore referred to and more fully summarized in the aforesaid notice of filing issued this day), that the requirements of the applicable provisions of the act and rules thereunder are satisfied, that no adverse findings are necessary thereunder, and that it is appropriate in the public interest and in the interests of investors and consumers that said applications and declarations, as amended, (except as to the particular matters specified in the aforesaid notice of filing issued this day), should be granted and permitted to become effective, subject, however, to the terms and conditions hereinafter set forth;

It is hereby ordered, That, pursuant to Rule U-23, said applications and declarations, as amended, (except as to the matters set forth in the notice of filing issued this day hereinabove referred to), be, and the same are hereby granted and permitted to become effective, subject to the terms and conditions prescribed in Rule U-24 and subject to the following further conditions:

1. That Copco obtain authorizations from the Public Utilities Commission of the State of California and the Public Utilities Commissioner of Oregon for the transactions proposed to be done by Copco.

2. That the proposed sale by Copco of 60,000 shares of —% Cumulative Preferred Stock, par value $100 per share and 18,000 shares of its Common Stock, par value $20 per share, and the proposed sale by Standard Gas of 390,000 shares of the Common Stock, par value $20 per share, of Copco shall not be consummated:

(a) Until after the entry of an order approving or making other disposition of those matters contained in said applications and declarations, as amended, which are not granted nor permitted to become effective by the terms of this order (which matters are more specifically set forth in the notice of filing issued this day hereinabove referred to); and

(b) Until the results of the competitive bidding pursuant to Rule U-50 have been made a matter of record herein and a further order shall have been entered with respect thereto, which order may contain such further terms and conditions as may then be deemed appropriate, for which purpose jurisdiction is hereby reserved.

It further appearing that it is appropriate that the Commission at this time reserve for further consideration the requests made by Copco and by Standard Gas for certain findings and other relief pursuant to the provisions of sections 371 (a), 371 (b), 371 (f), and 1808 (f) of the Internal Revenue Code, and that it is appropriate to reserve jurisdiction with respect to such requested order and findings; and it further appearing that it is appropriate that the Commission at this time reserve jurisdiction with respect to all fees and expenses incurred or to be incurred in connection with the proposed transactions:

It is further ordered, That jurisdiction be and the same hereby is reserved with respect to the specifications and itemizations to be made by the Commission in order that the provisions of sections 371 (a), 371 (b), 371 (f), and 1808 (f) of the Internal Revenue Code shall be applicable to the proposed transactions, and with respect to all the fees and expenses incurred or to be incurred in connection with the proposed transactions.

By the Commission.

Maurice J. Dix, for Jules Guggenheim, et al.

James E. Reily, of White & Williams for Protective Committee of Public Holders of No Par Value Common Stock of Philadelphia Company.

Paul S. Davis and Howard S. Guttmann, for the Public Utilities Division of the Commission.

By order dated December 5, 1946,[1] we instituted these proceedings pursuant to section 11 (b) (2) of the Public Utility Holding Company Act of 1935 ("the act"). Our order also consolidated the proceedings with prior proceedings instituted pursuant to section 11 (b) (1) of the act. Hearings are in progress and have been recessed until May 12, 1947.

Philadelphia Company and certain of its subsidiary companies[2] ("respondents") have filed two motions. The first motion requests that we strike the appearances of and evidence introduced by certain persons who appeared at the hearings.[3] The second motion requests relief with respect to a purported plan under section 11 (e) of the act, contained in respondents' answer filed in these proceedings. Respondents have submitted briefs in support of both their motions, and answering briefs in opposition to the first motion were filed by some of the persons to whom the motion is directed. The Public Utilities Division has filed briefs with respect to both motions.

We shall consider each of the motions in turn.

1. *Motion to strike appearances and evidence.* Respondents move to strike from the record the appearances made in these proceedings by Monongahela Street Railway Company ("Monongahela"); Pittsburgh and Birmingham Traction Company ("Birmingham"); the Suburban Rapid Transit Street Railway Company ("Suburban"); Jules Guggenheim, et al.; Christian A. Johnson and Kent Cochran; and Robert M. Saville, Alda Strode and Clara E. DeClerque; and also to strike evidence introduced at the hearings by Monongahela, Birmingham and Suburban. As grounds for this motion, respondents assert that the persons named have not complied with the terms of our order of December 5, 1946, instituting these proceedings. That order provided that any person desiring to be heard shall file an application complying with Rule XVII of our Rules of Practice[4] and stating the applicant's interest, his reasons for requesting to be heard and the allegations and issues set forth in the order which he proposes to controvert, together with a statement of any additional issues he proposes to raise in the proceedings. Respondents have also moved that the above named persons be denied the privilege of being heard until they have exemplified with our order of December 5, 1946.

Monongahela and Birmingham, parties to certain leases guaranteed by the Philadelphia Company, filed applications for leave to be heard, and the trial examiner, exercising the discretion in such matters given to him by Rule XVII of our Rules of Practice, granted their requests. In the course of the hearings, both companies stated on the record that they did not have sufficient knowledge either to controvert any allegations set forth in the order instituting the proceedings or to raise any additional issues, and, consequently at the present stage of the proceedings did not propose to deny any allegations or raise any new issues. Both companies have also introduced certain documentary evidence.

Respondents contend that Monongahela and Birmingham, in failing to state the allegations which they propose to controvert and any new issues which they propose to raise, have not complied with the provision in our order of December 5, 1946. Respondents assert that they are entitled to timely warning as to

[1] Holding Company Act Release No. 7025.

[2] The subsidiary companies referred to are Duquesne Light Company, Equitable Gas Company, Pittsburgh and West Virginia Gas Company, Kentucky West Virginia Gas Company, Allegheny County Steam Heating Company, Cheswick and Hamar Railroad Company, The Consolidated Gas Company of the City of Pittsburgh, Equitable Auto Company, Equitable Real Estate Company, Equitable Sales Company, Finleyville Oil and Gas Company, and Philadelphia Oil Company.

[3] This motion was initially made to the trial examiner with reference to certain of the persons appearing. The examiner denied the motion and certified the question to us for consideration, after the respondents excepted to his ruling.

[4] Rule XVII (b) of our Rules of Practice provides in pertinent part: "Requests for leave to be heard * * * shall set forth the nature and extent of the applicant's interest in the proceeding, * * *"

the persons from whom opposition can be expected, timely notice of new issues which any interested person might care to raise, and a fair and orderly hearing upon such issues with a minimum of surprise.

The provision in our order that applicants for leave to be heard shall state their position was intended to provide for the joinder of issues as soon as possible, thereby facilitating an orderly and expeditious trial of the issues in the proceedings. However, while such provision is intended to simplify and expedite the proceeding to the fullest extent practicable, it does not contemplate or require the impossible. We appreciate that, in some instances, interested persons, either because they lack sufficient information or for some other valid reason, may be unable to present such statement at the outset of the proceedings. Particularly is this true in proceedings of this type where complex factual and legal issues are presented. Under such circumstances, we think it proper that interested persons should be permitted to defer taking an affirmative position until the evidence has been developed to the point where the effect on their interests has become evident. It is only at that time that they may actually be in a position to state what allegations, if any, they wish to controvert or what additional issues, if any, they wish to raise. It may well be that at that time they will decide to do neither. On the other hand, if at any stage of the proceedings the respondents are "surprised" by the controverting of allegations in the order or the injection of new issues, they will, of course, have the right to request, and upon a proper showing will be afforded, a reasonable opportunity to meet such questions.

As we have already pointed out, Monongahela and Birmingham have stated that they do not now have sufficient information either to deny allegations or to raise additional issues. We do not believe they have been captious in this respect and we find that their statement constitutes compliance, to the extent practicable at this time, with our order of December 5, 1946. Accordingly, respondents' motion to strike the appearances of and evidence introduced by these companies is denied.

Suburban, also a party to a lease which the Philadelphia Company has guaranteed, filed an application for leave to be heard, which was granted by the trial examiner, and has introduced certain documentary evidence. Suburban, whose interests appear to be similar to those of Monongahela and Birmingham, made no statement either in its original application or on the record of its position with reference to the issues in these proceedings. However, Suburban on May 2, 1947, filed a supplemental statement to its application, advising that its position is identical with that of Monongahela and Birmingham. For the reasons we have previously set forth, we find that Suburban has complied, to the extent practicable at this time, with our order of December 5, 1946. Accordingly, respondents' motion to strike the appearance of and evidence introduced by Suburban is denied.

Kent Cochran and Christian A. Johnson, owners of $4 Preferred Stock of Standard Gas and Electric Company and directors of that company on behalf of the $4 Preferred Stock, have filed an application for leave to be heard, which was granted by the trial examiner. They have made no statement in the record or in their application of their position as to the issues raised in these proceedings. However, in their briefs opposing respondents' motion, they have stated that they are minority members of Standard's board of directors and have not been kept fully advised of Standard's position in these proceedings and that at the present time they are not able to deny any allegations or raise any additional issues. For the reasons we have previously set forth, we find that the statement contained in the brief constitutes an adequate statement of interest and position and complies with our order of December 5, 1946. Accordingly, respondents' motion as to Cochran and Johnson is denied.

Jules Guggenheim, et al., a group of public security holders, have filed no application for leave to be heard. While this group has not stated whether or not they propose to deny any allegations in the order for hearing, they have filed a document designated as an "answer," which raises additional issues and which does state the nature of their interest in the proceedings. We shall treat this group's "answer" as an application for leave to be heard. However, to clarify its position, the group should state its views on the allegations set forth in the order for hearing. Accordingly, respondents' motion is granted, unless the group, either in writing or on the record within 5 days after the hearing in these proceedings shall be reconvened, makes a statement with respect to existing issues or else presents adequate reasons for its inability to do so at that time.

Counsel for Robert M. Saville, Alda Strode and Clara E. DeClerque, public security holders, stated on the record that he proposed to file an application for leave to be heard on their behalf at a later time. Subsequently, he filed such application on behalf of a "Protective Committee of Public Holders of No Par Value Common Stock of Philadelphia Company" which represents, among others, the above mentioned three persons. Examination of the Committee's application reveals compliance with Rule XVII and the requirements of our order of December 5, 1946. Since it appears that the position of the Committee reflects the views of Saville, Strode and DeClerque, respondents' motion as to these persons is denied.

2. Motion for relief with respect to purported section 11 (e) plan. The order instituting these proceedings required each respondent to file an answer, which might include a statement as to the steps any respondent was prepared to take to comply with section 11 (b) of the act. Respondents, in their answer, in addition to admitting or controverting allegations contained in the order for hearing, set forth what purports to be a plan pursuant to section 11 (e) of the act.

As to the initial hearing in these proceedings, respondents moved to stay the section 11 (b) proceedings pending consideration and disposition of its purported section 11 (e) plan. On February 28, 1947, in a memorandum opinion we denied this motion, stating: "* * * without now deciding whether what is contained in Philadelphia's answer can be properly regarded as a plan filed under section 11 (e) of the act, it is appropriate that the issues raised by such answer be considered in these consolidated proceedings."[5] Respondents now move that the purported plan be set down for hearing after notice to all interested persons, that such hearing be consolidated with the hearings presently being held in the section 11 (b) proceedings, and that the entry of any order under section 11 (b) of the act be deferred until after consideration and determination of the purported plan.

Counsel for the Public Utilities Division contends that the purported plan should not be set down for hearing because, it is asserted, it is incomplete, inadequate and in its present form could not be approved or effectuated.[6] Counsel for the Division maintains that to the extent that the purported plan represents a statement of position by the respondents as to their method of meeting certain of the issues raised in the section 11 (b) proceedings, we can consider such statement under the terms of the order instituting these proceedings.

We do not believe that it is necessary at this time to determine whether what is contained in respondents' answer can be properly regarded as a plan under section 11 (e) of the act. Any section 11 (e) plan, in order to qualify for approval by the Commission, must be found necessary to effectuate the provisions of section 11 (b) of the act. Consideration of the issues raised by a section 11 (e) plan clearly involves, therefore, questions of fact and law similar to those involved in section 11 (b) proceedings. Accordingly, we believe it appropriate and in the interest of orderly administration and expedition to treat the issues raised by the purported section 11 (e) plan including the issue of whether it is in fact a section 11 (e) plan as part of these proceedings and to the extent that additional formal consolidation is necessary, it is hereby ordered.

With respect to the necessity for additional notice, it is our understanding that security holders of respondents have already been furnished with copies of

[5] Philadelphia Company, — S. E. C. —, Holding Company Act Release No. 7239, p. 3.

[6] The Division points out that the purported plan cannot be properly regarded as a plan under section 11 (e) of the act because, inter alia, the plan as submitted is at most a statement of position by the Philadelphia Company that it can retain under its control electric, gas, transportation and other operations and a statement of its intention to eliminate certain companies from its system, without indicating what mechanics are to be employed or the time within which such proposals are to be effectuated, and further because the purported plan makes no proposals as to the disposition or treatment of the interests of security holders of the various companies in the system.

respondents' answer, which contains the purported plan and which, in itself, would put such persons on notice that the purported plan had been filed in the section 11 (b) proceedings and that it raised certain issues therein. Under the circumstances, we think the only additional notice necessary will be given if this opinion is published and served in the same manner as the notice of and order for hearing herein and we so order. We see no reason why the consolidated proceedings should not be resumed on May 12, 1947, the date scheduled, since, at that time or thereafter in the hearings, persons who have not theretofore appeared will, on a proper showing, have an opportunity to explore all issues in the proceedings.

As to respondents' request that entry of an order in the section 11 (b) proceedings be deferred until after consideration and determination of the purported section 11 (e) plan, we think such request is premature and need not be passed on at this time. Accordingly, we are reserving our ruling on such request until the conclusion of the consolidated hearings and at that time will dispose of this part of the motion in connection with our consideration of the entire proceedings.

Respondents have requested oral argument with respect to both of their motions. Since the issues raised were fully explored in the briefs and since it does not appear that oral argument would be of any additional aid in the disposition of the motions, such request is denied.

It is therefore ordered, That respondents' motions are granted to the extent provided for in the foregoing and in all other respects denied.

By the Commission.

§ 1.1579 *Representation before the Department of Agriculture*—(a) *Administrative provisions.* (1) In any proceedings before the Department, the parties may appear in person or by counsel or other representative. Persons who appear as counsel or in a representative capacity at a hearing must conform to the standards of ethical conduct required of practitioners before the courts of the United States. Whenever the Secretary finds, after notice and opportunity for hearing, that a person who is acting or has acted as counsel or representative for another person in any proceeding before the Department is guilty of unethical conduct, he will order that such person be precluded from acting as counsel or representative in any proceeding before the Department.

(2) No former officer or employee of the Department shall be permitted to represent any person before the Department in connection with any particular matter as to which by reason of his employment he acquired personal knowledge of such a nature that it would be improper, unethical, or contrary to the public interest for him so to act.

(3) This paragraph shall not be construed to prevent any former officer or employee of the Department from appearing as a witness in any hearing, investigation, or other proceeding before the Department.

(b) *Statutory provisions.* (1) Officers and employees of the Federal Government are prohibited from:

(i) Prosecuting, or acting as counsel, attorney, or agent for prosecuting, any claim against the United States, or in

any way, otherwise than in the discharge of their official duties, aiding or assisting in the prosecution or support of any such claim, or receiving any gratuity or share in the claim therefor.

(ii) Directly or indirectly receiving or agreeing to receive any compensation whatever for any services rendered or to be rendered to any person, either by themselves or others, in relation to any proceeding, contract, claim, controversy, charge, accusation, arrest, or other matter or thing in which the United States is a party or directly or indirectly interested, before any department, court-martial, bureau, officer, or any civil, military, or naval commission whatever.

(2) Officers and employees engaged in settlement of contracts under the Contract Settlement Act of 1944 may, as part of their official duties, advise and assist war contractors in preparing and presenting termination claims, in obtaining interim financing and in related matters.

(3) Former officers and employees of the Federal Government are prohibited, for a period of two years after termination of employment, from:

(i) Acting as counsel, attorney, or agent for, or in any way aiding in, prosecuting any claim against the United States which was pending in any Federal agency while they were serving as such officers or employees.

(ii) Prosecuting, or acting as counsel, attorney, or agent for prosecuting, any claim against the United States involving any subject matter directly connected with which such person was so employed or performed duty.

(4) No person employed by any Government agency shall, during the period such person is engaged in such employment or service, or for a period of two years after the time when such employment or service has ceased, act as counsel, attorney, or agent, or be employed as representative, in connection with any matter involving the disposition of surplus property by the agency in which such person was employed, if such person during his employment with such agency ratified, approved, or authorized the disposition of any surplus property pursuant to the provisions of the Surplus Property Act of 1944 or recommended any such approval, authorization, or ratification as part of his official duties.

(5) The provisions of this paragraph are taken from statutes which provide for fines up to $10,000 or imprisonment up to two years for violation. Subparagraph (1), (3) (ii), and (4) of this paragraph are specifically applicable to commissioned officers assigned to duty in any Federal agency.

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

[Civil Air Regs., Amdt. 21-4]

PART 21—AIRLINE TRANSPORT PILOT RATING

AIRLINE TRANSPORT PILOT PERIODIC PHYSICAL EXAMINATION

At a session of the Civil Aeronautics Board held at its office in Washington, D. C., on the 6th day of May 1947.

Section 21.400 of the Civil Air Regulations provides that the holder of an airline transport rating shall not pilot aircraft in flight unless he has met the first class physical requirements prescribed by Part 29 within the preceding 6 calendar months.

The Civil Aeronautics Board finds that the existing regulation may be interpreted that the holder of an airline transport rating may not fly any aircraft as a commercial or private pilot unless he has passed the first class physical requirements within the preceding 6 months; that pilots holding transport or commercial pilot ratings should be permitted to fly in operations other than those for which the higher rating is required; and that compliance has been made with the notice and procedures required in paragraphs (a) and (b) of section 4 of the Administrative Procedure Act.

Now, therefore: Effective May 16, 1947, § 21.400 of the Civil Air Regulations is amended to read as follows:

§ 21.400 *Periodic physical examinations.* A certificated airline transport pilot shall not pilot an aircraft in operations for which he is required to possess an airline transport pilot rating unless, within the preceding 6 calendar months, he has met the physical requirements of this part by passing an examination given by an authorized airline medical examiner of the Administrator. PART 43—GENERAL OPERATION RULES

PILOT MEDICAL CERTIFICATE AND RENEWAL

At a session of the Civil Aeronautics Board held at its office in Washington, D. C., on the 6th day of May 1947.

The Civil Air Regulations do not specifically provide that the holder of a higher pilot rating be permitted to fly in operations which require a lower pilot rating and a lower class physical examination.

The Civil Aeronautics Board finds that pilots holding higher pilot ratings should be permitted the privileges of lower pilot ratings which require a lower class physical examination; that holders of medical certificates appropriate to higher pilot ratings should be permitted the privileges of holders of medical certificates appropriate to lower pilot ratings during the period for which the lower class medical certificate is effective; and that compliance has been made with the notice and procedures required in paragraphs (a) and (b) of section 4 of the Administrative Procedure Act.

Now, therefore: Effective May 16, 1947, § 43.402 of the Civil Air Regulations is amended to read as follows:

§ 43.402 *Medical certificate and renewal.* No person shall pilot an aircraft under authority of a pilot certificate issued by the Administrator, unless he has in his personal possession at all times while piloting aircraft a medical certificate or other evidence satisfactory to the Administrator showing that he has met the physical requirements appropriate to his rating within the following time limits:

(a) *Student or private pilot.* 24 calendar months.

(b) *Commercial pilot.* 12 calendar months, or 24 calendar months for operations requiring only a private pilot rating.

(c) *Airline transport pilot.* 6 calendar months, or 12 calendar months for operations requiring only a commercial pilot rating, or 24 calendar months for operations requiring only a private pilot rating. (52 Stat. 984, 1007; 49 U. S. C. 425, 551)

PART 61—SCHEDULED AIR CARRIER RULES

ELIMINATION OF REQUIREMENT THAT PILOTS AND DISPATCHERS BE LISTED IN THE AIR CARRIER OPERATING CERTIFICATE

At a session of the Civil Aeronautics Board held at its office in Washington, D. C., on the 6th day of May 1947.

It appearing that §§ 61.511, 61.513, 61.552, 61.554, 61.7100, and 61.7803 (c) (4) of the Civil Air Regulations either directly or indirectly require that first pilots and dispatchers be listed in the air carrier operating certificate of the air carrier which they serve; it is necessary to amend the air carrier operating certificate almost daily to provide for such listings; the required additions to or deletions from the air carrier operating certificates impose an undue amount of paper work upon the Administrator and the air carriers; it is desirable to amend the Civil Air Regulations so as to eliminate the amount of unnecessary paper work caused by the frequent amending of the air carrier operating certificate;

The Civil Aeronautics Board finds that the provisions of paragraphs (a) and (b) of section 4 of the Administrative Procedure Act have been complied with, that this amendment is a nonrestrictive change in administrative procedure, that, therefore, compliance with paragraph (c) of section 4 of the Administrative Procedure Act is unnecessary, and that this amendment should become effective ten days after adoption.

Now, therefore: Effective May 16, 1947, Part 61 of the Civil Air Regulations is amended as follows:

1. By amending § 61.50, *Airmen utilization and changes*, to read as follows:

§ 61.50 *Airmen utilization.* No scheduled air carrier shall utilize any dispatcher or flight crew member in scheduled air transportation until such airman has met the appropriate qualifications and requirements prescribed by the Civil Air Regulations.

2. By adding a new § 61.500 to read as follows:

§ 61.500 *Airmen records.* Each scheduled air carrier shall maintain such current records of dispatchers and flight crew members utilized by the air carrier in scheduled air transportation at such points on its routes as the Administrator may designate. These records shall contain such information concerning the qualifications of each airman as is necessary to show compliance with the appropriate qualifications and requirements prescribed by the Civil Air Regulations. No scheduled air carrier shall utilize in scheduled air transportation any dispatcher or flight crew member unless records are maintained for such airman as required herein.

3. By amending § 61.511, *Aircraft competency*, to read as follows:

§ 61.511 *Aircraft competency.* The first pilot shall meet the requirements of Parts 40 and 61 with respect to the aircraft to be operated in scheduled air transportation.

4. By amending § 61.513, *Route competency*, to read as follows:

§ 61.513 *Route competency.* No first pilot shall be deemed competent over any route or part thereof unless he has met the appropriate minimum requirements of Part 40 of this chapter and has maintained his route competency as provided in Part 61.

5. By amending § 61.552, *Dispatcher competency certificate*, to read as follows:

§ 61.552 *Dispatcher competency.* Each dispatcher used by a scheduled air carrier to dispatch aircraft in scheduled air transportation shall be possessed of a currently effective dispatcher certificate and shall be qualified over the route or routes over which he dispatches aircraft as provided in Part 61.

6. By amending § 61.554, *Maintenance of qualifications*, to read as follows:

§ 61.554 *Maintenance of qualifications.* Each dispatcher used by a scheduled air carrier to dispatch aircraft in scheduled air transportation shall maintain his familiarity with the route or routes over which he dispatches aircraft in scheduled air transportation and with the items set forth in §§ 61.55301 through 61.55316.

7. By deleting from § 61.7100, *Necessity for dispatching authorization*, the following words: "whose name appears in the air carrier operating certificate as".

8. By amending § 61.7803 (c) (4) to read as follows:

§ 61.7803 *Pilots' compartment.* • • •

(c) • • •

(4) First or second pilots of the air carrier concerned; or first or second pilots of another scheduled air carrier who have been authorized by the air carrier concerned and the Administrator to make the trips over the route being flown for the purpose of route qualification or familiarization;

TITLE 25—INDIANS

Chapter I—Office of Indian Affairs, Department of the Interior

Subchapter I—Irrigation Projects: Operation and Maintenance Charges

PART 130—OPERATION AND MAINTENANCE CHARGES

NAVAJO INDIAN IRRIGATION PROJECT

On April 1 there was published in the daily issue of the FEDERAL REGISTER (12 F. R. 2132) a notice of intention (1) to repeal §§ 130.44 to 130.46 inclusive; (2) to transfer the prescribed annual rate of assessments for the Fruitland Unit of the Navajo Indian irrigation project from §§ 130.105 to 130.41, as shown below in amended § 130.41; and (3) to amend §§ 130.41 to 130.43 inclusive, as set forth in the said notice, effective for the calendar year 1947 and until further notice. Interested persons were given opportunity to participate in preparing the proposed amendments by submitting their views and data or arguments within thirty days from date of the publication of the notice. No communications, written or oral, having been received within the prescribed period, the said sections are hereby amended and promulgated as follows:

§ 130.41 *Charges.* Pursuant to the acts of August 1, 1914 and March 7, 1928 (38 Stat. 583, 45 Stat. 210; 25 U. S. C. 385, 387), a part of the reimbursable cost of operating and maintaining the Navajo irrigation project is apportioned on a per-acre basis against the irrigable lands of the respective units for the calendar year 1947 and for each succeeding calendar year until further order, in the amounts designated below for each unit, and there is assessed against each acre of irrigable land to which water can be delivered through the constructed works of the respective unit.

Navajo project	Agency	Per acre per annum
Fruitland unit	Navajo	$1.00
Cudei unit	do	1.00
Hogback unit	do	1.00
Many Farms unit	do	1.00
Lower Rock Point unit	do	.50

For domestic water delivered through the project canal and lateral system to permittees on the reservation lands, $5.00 for each cistern.

For tribal lands operated by the Shiprock High School, $3.00 per acre.

§ 130.42 *Payment.* The annual charges fixed in § 130.41 shall become due on April 1 of each year; are payable on or before that date, and any charges that remain unpaid after the due date shall stand as a first lien against the land until paid.

The delivery of water shall be refused to all tracts of land for which the charges have not been paid when due, except in instances where the lands are in Indian assignment, and the Indian assignee shall have made the necessary arrangements with the Superintendent as hereafter provided. When any Indian assignee of land is financially unable to pay the operation and maintenance charges on the due date from cash on hand, arrangements may be made by prior agreement with the Superintendent whereby the Indian will perform labor on the project works and pay from the proceeds received from such work at least an amount equal to $1.00 per acre per annum; or the Superintendent may make the necessary arrangements for such Indian assignee to pay the operation and maintenance charges from the proceeds of the crops grown on the land when harvested and marketed within that calendar year, provided written statements to that effect are furnished by the Indian assignee on or before the due date.

In any instance where the Superintendent is convinced that an Indian assignee is financially unable to pay his operation and maintenance charges from proceeds of labor performed on the project works, or from the proceeds of the crops being grown on the land, or from any other source, the delivery of water may be continued if a written certificate is issued by the Superintendent stating that such Indian is not able to pay his charges and copies thereof forwarded to the District Office Director for approval or rejection. In such cases the unpaid charges shall be entered on the accounts and will stand as a first lien against the land until paid but without penalty for delinquency.

§ 130.43 *Water users responsible for water after delivery.* It is the duty of the Indian irrigation service to furnish available water for beneficial irrigation use only. It is the duty of all water users of the project to aid in the prevention of the waste of water and of damage to adjacent lands. The water users are responsible for the water after it has been delivered to their lands, and are required to have their field ditches of proper capacity and in suitable condition for the use of economical heads of water.

§ 130.43a *Repeal.* Sections 130.44 to 130.46, inclusive, approved by the Secretary of the Interior February 7, 1935 are hereby repealed.

These Coast Guard activities are administered directly by the Coast Guard through its own district officers and under its own command, much as in the case of the Marine Corps. The function of these field units are supply, personnel (including the Coast Guard Academy), maintaining operating aids to navigation, light houses, life boat stations, port security, and similar duties.

10. Amend § 26.17 (c) (1) to read as follows:

(c) *Duties and responsibilities*—(1) *Military Command.* The Commandants of the Naval Districts and of the River Commands, the Chief of Naval Air Training and the Commandant of the Marine Corps are the principal officers through whom the Chief of Naval Operations carries out his essential command responsibilities over the shore establishment.

11. Amend § 26.17 (c) (2) to read as follows:

(5) *Control of Naval Reserve Matters.* The Commandant of the District shall administer the program of the Navy Department within the District in all matters affecting the procurement, maintenance, morale, and training of Naval Reserve personnel, except for the training of the Naval Air Reserve, which is administered by the Chief of Naval Air Reserve Training, Glenview, Illinois.

(6) *Naval Material Inspection activities and Navy Department Field Services.* Activities of the Material Inspection Service, U. S. Navy and the Navy Department Field Services and such activities as U. S. Navy Superintending Civil Engineers, Civil Works Engineers, Supervisory Cost Inspectors, Cost Inspectors, U. S. Navy, and Industrial Managers are under the military command of the Commandant of the Naval District and under his coordination control in matters affecting the organization and functions of his District. In view of the fact that areas of operation of these agencies differ in their geographical limits from those of Naval Districts, personnel of these agencies may carry out their technical duties outside of normal Naval District boundaries. Activities in this category are under the management control and technical control of the cognizant bureaus or offices of the Navy Department.

FEDERAL POWER COMMISSION

[Docket No. G-893]

UNITED GAS PIPE LINE CO.

NOTICE OF APPLICATION

MAY 8, 1947.

Notice is hereby given that on April 24, 1947, United Gas Pipe Line Company (Applicant), a Delaware corporation with its principal place of business in Shreveport, Louisiana, and authorized to do business in the States of Alabama, Louisiana, Mississippi, and Texas, filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, authorizing Applicant to construct and operate the following facilities:

A tap and meter station in Township 3 South, Range 4 East, Baldwin County, Alabama, on Applicant's Mobile-Pensacola natural gas transmission line.

Applicant states that the proposed facilities are for the purpose of supplying the requirements of natural gas for resale through municipally owned distribution systems in the following named municipalities and their environs in Escambia County, Alabama: City of Atmore; City of Brewton; Town of Flomaton. Applicant states that it has entered into an appropriate contractual arrangement with the above named municipalities under which natural gas will be sold to said municipalities. It is stated that service through the proposed facilities will be from gas reserves which Applicant has under contract in the Baxterville Field and which it proposes to connect to its present system at a point near Mobile, Alabama.

The estimated maximum daily demand for all of the above named customers, during the 1947-48 season, is 900 Mcf., and the estimated daily minimum demand for the same period is 100 Mcf. The estimated daily delivery capacity of the proposed facilities is 7,000 Mcf.

Estimated overall capital cost of the proposed facilities is stated to be approximately $5,300, which Applicant proposes to finance out of cash on hand.

Applicant states that since the communities named in the application are not now being served with natural gas, the residents therein are most anxious that the natural gas service to be rendered by means of the proposed facilities be made available to them.

Any interested State commission is requested to notify the Federal Power Commission whether the application should be considered under the cooperative provisions of the Commission's rules of practice and procedure and, if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with reasons for such request.

The application of United Gas Pipe Line Company is on file with the Commission and is open to public inspection. Any person desiring to be heard or to make any protest with reference to the application shall file with the Federal Power Commission, Washington 25, D. C., not later than fifteen days from the date of publication of this notice in the FEDERAL REGISTER, a petition to intervene or protest. Such petition or protest shall conform to the requirements of the rules of practice and procedure (effective September 11, 1946), and shall set out clearly and concisely the facts from which the nature of the petitioner's or protestant's alleged right or interest can be determined. Petitions for intervention shall state fully and completely the grounds of the proposed intervention and the contentions of the petitioner in the proceeding so as to advise the parties and the Commission as to the specific issues of fact or law to be raised or controverted, by admitting, denying, or otherwise answering, specifically and in detail, each material allegation of fact or law asserted in the proceeding.

EAST COAST PUBLIC SERVICE CO. ET AL.

ORDER PERMITTING DECLARATION TO BECOME EFFECTIVE AND RESERVING JURISDICTION

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 8th day of May A. D. 1947.

In the matters of East Coast Public Service Company, Virginia East Coast Utilities, Incorporated, Tidewater Electric Service Company, and Floyd W. Woodcock, Applicants, File No. 54-85; East Coast Public Service Company, Virginia East Coast Utilities, Incorporated, and Tidewater Electric Service Company, Respondents, File No. 59-90.

The Commission, in its findings, opinion and order dated April 2, 1947,[1] approved the Plan, as amended, of East Coast Public Service Company ("East Coast"), Virginia East Coast Utilities, Incorporated ("Virginia")[2] and Tidewater Electric Service Company ("Tidewater"), providing for the merger of Tidewater into Virginia, the recapitalization of Virginia and the liquidation and dissolution of East Coast pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935, and applications and declarations pursuant to applicable sections of the act for approval of related transactions. Among other things, we reserved jurisdiction with respect to the proposed issuance and sale by Virginia of $1,300,000 principal amount of its new First Mortgage Bonds, Series A, and 60,000 shares of its new common stock until certain necessary amendments were filed setting forth the terms of such securities. Subsequently, by order dated April 29, 1947, the United States District Court for the District of Delaware approved the Plan, as amended, with respect to East Coast and its subsidiary companies.

In our findings and opinion with respect to the Plan, as amended, we stated, on the basis of the record then before us, that the new bonds and new common stock of Virginia appeared to satisfy the requirements of section 7 of the act. We were not at that time, however, in a position to permit the declaration under section 7 to become effective inasmuch as information concerning the definitive terms and conditions of the new securities had not yet been supplied for the record.

The applicants have now filed an amendment to their application under section 11 (e) of the act containing certain definitive terms and conditions of the new securities to be issued by Virginia, as well as the terms and conditions relating to the sale of such new securities. On the basis of the record now completed, with respect to the issuance of the new bonds and new common stock by Virginia, we find that such securities satisfy the standards of section 7 of the act.

Both the First Mortgage Bonds and new common stock to be issued by Virginia will be sold in accordance with the competitive bidding requirements of Rule U-50. Pursuant to such requirements, East Coast and Virginia jointly will publicly invite proposals for the purchase of the new bonds. The invitation for bids on the bonds provides that the price to be paid to East Coast and Virginia for the bonds shall not be less than 100% nor more than 102¾% of the principal amount thereof. The bidders will also designate the annual interest rate which shall be a multiple of ⅛ of 1%.

As to the common stock, Virginia will deliver 60,000 shares to East Coast after which East Coast will publicly invite proposals for the purchase of such stock simultaneously with the invitation for bids for Virginia's new bonds.

We have examined the terms and conditions of the public sale of the new bonds and new common stock of Virginia, and we observe no basis for adverse findings with respect to them.

East Coast and Virginia have requested that the Commission enter an order pursuant to the provisions of section 1808 (f) of the Internal Revenue Code, and that the order contain the necessary recitals and specifications required therein. In our findings and opinion dated April 2, 1947, we found that the proposed transactions are necessary and appropriate to the simplification of East Coast's holding company system, but jurisdiction was reserved with respect to appropriate recitals and specifications. It now appears proper that Applicants' request be granted and, accordingly, our order herein will contain the necessary recitals and specifications requested.

It is therefore ordered, Pursuant to the applicable provisions of said act, including sections 6 (a) and 7 thereof, that the declaration with respect to the issue and sale by Virginia of $1,300,000 principal amount of First Mortgage Bonds, Series A, due 1977, and to the issue and sale by Virginia of 60,000 shares of its new common stock, and the sale by East Coast of $800,000 principal amount of such bonds and 60,000 shares of such common stock be, and the same hereby is, permitted to become effective forthwith, subject to the terms and conditions set forth in our findings and opinion dated April 2, 1947, and subject to the further condition that the proposed public sales of the First Mortgage Bonds and new common stock of Virginia shall not be consummated until the results of the competitive bidding for such bonds and common stock have been made a matter of record in this proceeding and a further order shall have been entered by this Commission in the light of the record so completed, which order may contain such further terms and conditions as may then be deemed appropriate.

It is further ordered, That jurisdiction be, and the same hereby is, reserved with respect to the price and interest rate of Virginia's new bonds; the price of Virginia's new common stock; the underwriters' spread on both the new bonds and new common stock of Virginia; and the fees and expenses of counsel for the successful bidders for both the new bonds and new common stock of Virginia.

It is further ordered, That as to the amount and allocation of fees and other compensation and expenses in connection with the plan, other appropriate proceedings, findings and further ac-

tion in connection with the plan, as amended, and the section 11 (b) (2) proceedings, over which we reserved jurisdiction in our order dated April 2, 1947, jurisdiction is continued.

It is further ordered and recited, That the following transactions are necessary or appropriate to effectuate the provisions of section 11 (b) of the Public Utility Holding Company Act of 1935;

(1) The issuance and delivery by Virginia to East Coast of $800,000 principal amount of First Mortgage Bonds, Series A, due January 1, 1977, and 60,000 shares of common stock of the par value of $10 per share in exchange for $1,876,745.34 principal amount of First Mortgage 5% Bonds, due August 1, 1948, and 500 shares of common stock of the par value of $100 per share of Virginia now held by East Coast.

(3) The sale by East Coast for its own account of $800,000 principal amount of the First Mortgage Bonds, Series A, due January 1, 1977, issued by Virginia and 60,000 shares of common stock having a par value of $10 per share, also issued by Virginia.

CENTRAL COMMONWEALTH SERVICE CORP.

NOTICE OF MOTION, STATEMENT OF ISSUES AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 9th day of May A. D. 1947.

Notice is hereby given that the Corporation Finance Division of the Commission, having reasonable cause to believe that Central Commonwealth Service Corporation has ceased to do business and does not have any assets, will move pursuant to section 8 (f) of the Investment Company Act of 1940 for an order declaring that Central Commonwealth Service Corporation has ceased to be an investment company and terminating its registration under said act.

It appears that the only assets of Central Commonwealth Service Corporation consist of preferred and common stock of Garland Manufacturing Company, and that in the liquidation of Garland Manufacturing Company pursuant to Chapter X of the Bankruptcy Act no distribution was made on account of its preferred and common stock since there were no assets over and above assets required to pay prior claims. It further appears that Central Commonwealth Service Corporation has ceased to do business.

The Corporation Finance Divison has advised the Commission that upon preliminary examination it deems the following issues to be raised without prejudice to the specification of additional issues upon further examination;

(1) Whether Central Commonwealth Service Company has ceased to be an investment company within the meaning of the act, and

(2) Whether it is necessary for the protection of investors to condition any order terminating its registration under the act.

It appearing to the Commission that a public hearing upon the motion is necessary and appropriate:

It is ordered, Pursuant to section 40 (a) of said act, that a public hearing on the aforesaid motion be held on May 27, 1947, at 9:45 a. m., eastern daylight time, in Room 318 in the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania.

It is further ordered, That William W. Swift, Esquire, or any officer or officers of the Commission designated by it for that purpose shall preside at the hearing and any officer or officers so designated to preside at any such hearing is hereby authorized to exercise all of the powers granted to the Commission under sections 41 and 42 (b) of the Investment Company Act of 1940 and to hearing officers under the Commission's rules of practice.

Notice of such hearing is hereby given to Central Commonwealth Service Corporation and to any other person or persons whose participation in such proceedings may be in the public interest or for the protection of investors. Any person desiring to be heard or otherwise desiring to participate in said proceeding should file with the Secretary of the Commission, on or before May 26, 1947 his application therefor as provided by Rule XVII of the rules of practice of the Commission, setting forth therein any of the above issues of law or fact which he desires to controvert and any additional issues he deems raised by the aforesaid application.

By the Commission.

PART 51—FRUITS, VEGETABLES AND OTHER PRODUCTS (GRADING, CERTIFICATION AND STANDARDS)

UNITED STATES STANDARDS FOR COMMON GREEN ONIONS [1]

Pursuant to the provisions of the Department of Agriculture Appropriation Act, 1947 (Pub. Law 422, 79th Cong., 2d Sess., approved June 22, 1946), the following United States Standards for Common Green Onions are hereby promulgated:

§ 51.289 *Common green onions*—(a) *Grades.* (1) U. S. No. 1 shall consist of green onions which are fairly well-formed, firm, young and tender, fairly clean, free from decay, and from damage caused by seedstems, roots, foreign material, disease, insects, mechanical or other means. The bulbs shall be well trimmed. The tops shall be fresh, of good green color, free from damage caused by broken or bruised leaves, or by clipping. When all the tops of the onions have been evenly clipped back in accordance with good commercial practice, they shall be specified as "Clipped Tops" in connection with the grade.

(i) Unless otherwise specified, the over-all length (roots excepted) of the onions shall be not more than 24 inches nor less than 8 inches and the onions shall be not less than one-fourth of an inch or more than one inch in diameter.

(ii) *Tolerance for defects.* In order to allow for variations, other than size, incident to proper grading and handling, not more than a total of 10 percent, by count, of the onions in any lot may fail to meet the requirements of this grade, but not more than 5 percent shall be allowed for defects causing serious damage, including not more than 2 percent for onions affected by decay.

(iii) *Tolerance for size.* Not more than a total of 10 percent, by count, of the onions in any lot may fail to meet the requirements as to the specified length, minimum diameter or maximum diameter, but not more than 5 percent shall be allowed for any one of the requirements for size.

(2) U. S. No. 2 shall consist of green onions which are not badly misshapen, and which are fairly firm, fairly young and tender, fairly clean, free from decay and from serious damage caused by seedstems, roots, foreign material, disease, insects, mechanical or other means. The bulbs shall be fairly well trimmed. The tops shall be fresh, of fairly good green color, and free from serious damage caused by broken or bruised leaves, or by clipping. When all the tops of the onions have been evenly clipped back in accordance with good commercial practice, they shall be specified as "clipped tops" in connection with the grade.

(i) Unless otherwise specified, the over-all length (roots excepted) of the onions shall be not less than 8 inches and the onions shall be not less than one-fourth of an inch or more than one and one-half inches in diameter.

(ii) *Tolerance for defects.* In order to allow for variations, other than size, incident to proper grading and handling, not more than a total of 10 percent, by count, of the onions in any lot may fail to meet the requirements of this grade, including not more than 2 percent for onions affected by decay.

(iii) *Tolerance for size.* Not more than a total of 10 percent, by count, of the onions in any lot may fail to meet the requirements of the specified length, minimum diameter or maximum diameter, but not more than 5 percent shall be allowed for any one of the requirements for size.

(iv) Unclassified shall consist of onions which are not graded in conformity with either of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

(b) *Size.* The following terms and definitions are provided for describing the diameters of any lot:

"Small" means less than ¼ inch.
"Medium" means ½ to 1 inch, inclusive.
"Large" means over 1 inch.

(c) *Application of tolerances.* The contents of individual containers in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified:

(1) When a tolerance is 10 percent or more, individual containers in any lot shall have not more than one and one-half times the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any container.

(2) When a tolerance is less than 10 percent, individual containers in any lot shall have not more than double the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any container.

(d) *Definitions.* (1) "Fairly well-formed" means that the onion is not more than slightly curved, angular, crooked, lopsided or otherwise slightly misshapen.

(2) "Fairly clean" means that the appearance of the onion is not materially injured by dirt.

(3) "Damage" means any injury or defect which materially affects the appearance, or the edible or shipping quality.

(i) *Seedstems.* An onion with a seedstem shall be considered as damaged if the seedstem has been broken at a point other than at the top, or is coarse, fibrous, hollow or soft, or has separated naturally from the sheath or skin. Onions often show flower buds while the seedstem is still tender. Such onions are not objectionable if the flower buds have been removed, or if present, are not noticeably protruding; however, an onion with a seedstem which, after the flower bud has been removed, exceeds the length of the longest leaves of the plant, shall be considered as damaged.

(ii) *Clipping.* The tops of onions are sometimes clipped or pinched back to remove discolored or otherwise injured leaves. An individual plant shall not be considered as damaged when not more than the tips of all the leaves have been clipped or pinched back; or when not more than half the leaves have been clipped or pinched back to a greater extent but not to the extent that the appearance is materially injured; or when the tops of all the onions have been evenly clipped back in accordance with good commercial practice and the designation "clipped tops" is specified in connection with the grade.

(4) "Well-trimmed" means that the bulb is not broken above the point of root attachment and is practically free from dead, discolored or slick outer skins. Fresh, clean, loose skins which do not materially affect the appearance of the individual onion or the bunch are permitted.

(5) "Fresh" means that the tops are not withered or badly wilted.

(6) "Good green color" means that the tops have a normal green color characteristic of healthy plants. A slight discoloration of the extreme tips and slight scarring caused by thrips are not objectionable.

(7) "Diameter" means the greatest dimension of the onion taken at right angles to the longitudinal axis.

(8) "Not badly misshapen" means that the onion is not badly curved or crooked.

(9) "Fairly young and tender" means that the onion is not tough, stringy, or advanced to the stage where the neck is flabby.

(10) "Serious damage" means any injury or defect which seriously affects the appearance, or the edible or shipping quality.

(i) Seedstems which are excessively coarse or fibrous shall be considered as serious damage.

(ii) Badly broken or badly bruised tops shall be considered as serious damage.

(iii) Clipping. The tops of onions are sometimes clipped or pinched back to remove discolored or otherwise injured leaves. An individual plant shall not be considered as seriously damaged when not more than the tips of all the leaves have been clipped or pinched back; or when not more than half the leaves have been clipped or pinched back to a greater extent but not to the extent that the appearance is seriously injured; or when the tops of all the onions have been evenly clipped back in accordance with good commercial practice and the designation "clipped tops" is specified in connection with the grade.

(11) "Fairly well-trimmed" means that the bulb is not broken above the point of root attachment and is reasonably free from dead, discolored or slick outer skins. Fresh, fairly clean, loose skins which do not seriously affect the appearance of the individual onion or the bunch are permitted.

(12) "Fairly good green color" means that the tops are pale or yellowish green or otherwise slightly discolored.

It is hereby found and determined that compliance with the notice, public rule making procedure, and effective date requirements of the Administrative Procedure Act (60 Stat. 237; Pub. Law 404, 79th Cong., 2d Sess.) in connection with the issuance of these standards, is impracticable, unnecessary, and contrary to the public interests in that: (1) The standards for common green onions have been in the process of investigation since July 1946 and they have been prepared on the basis of suggestions of growers, packers, shippers and others interested in the handling of green onions; (2) the issuance of the standards, effective June 20, 1947 is necessary so that those interested in marketing green onions will have definite official standards to use as a basis of packing and selling this commodity; (3) the issuance of the standards should be accomplished as soon as possible because the seasonal shipments have begun. (Pub. Law 422, 79th Cong., Order Secy. of Agriculture, July 11, 1946, 11 F. R. 7713)

Issued at Washington, D. C., this 13th day of May 1947, to be effective on and after the 20th day of June 1947.

[SEAL] F. R. BURKE,
Acting Assistant Administrator, Production and Marketing Administration.

[F. R. Doc. 47-4620; Filed, May 15, 1947; 8:58 a. m.]

[1] These standards apply only to commonly cultivated green onions (Allium cepa) and not to leeks (Allium porrum), Welch or Japanese multiplier onions (Allium fistulosum), and shallots (Allium ascalonicum).

§ 9.2 *Allotments; extent of health problems.* For the purpose of making allotments to the several States:

(a) *Venereal disease.* The extent of the venereal disease problem shall be determined by the Surgeon General taking into consideration such factors as:

(1) The varying composite and racial prevalence rates for syphilis;

(2) The extent to which treatment facilities have been provided as evidenced by the population under treatment for syphilis;

(3) The total number of syphilis patients brought to treatment in the primary or secondary stages during the previous year;

(4) The varying costs of providing equal services as determined by the inverse function of the syphilitic density, and the direct function of the size of the population of each State;

(5) The need for training centers and demonstrations in selected areas;

(6) The need for facilities for the prevention and control of venereal diseases in localities where there is an unusual concentration of population.

(b) *Tuberculosis.* The extent of the tuberculosis problem shall be determined by the Surgeon General taking into consideration such factors as:

(1) The morbidity of the disease;

(2) The mortality attributed to the disease;

(3) The relative need among the States of facilities for diagnosis and treatment of tuberculous persons.

(c) *Special health problems.* The extent of special health problems shall be determined by the Surgeon General taking into consideration such factors as:

(1) The ratio which the mean annual number of deaths in each State from all causes except cancer, tuberculosis, venereal disease, suicides, homicides, accidents, and maternal and infant deaths, bears to the total mortality in the United States from the same group of causes, as shown by the most recent mortality statistics;

(2) Special conditions which create unequal burdens in the administration of equal public health services among the States indicated by the relative population density as shown by the most recent Bureau of Census population census;

(3) The ratio which the number of persons engaged in hazardous industry in each State bears to the total number of persons engaged in hazardous industry based upon the 1940 labor force as shown by the 1940 Labor Force of the Bureau of the Census.

(d) *Mental health.* The extent of the mental health problem shall be determined by the Surgeon General, taking into consideration such factors as:

(1) The prevalence of emotional and psychiatric disorders affecting mental health;

(2) The relative need among the States for clinics for diagnosis and treatment of mentally ill persons.

§ 9.3 *Basis of allotments.* Of the total sum determined to be available for each fiscal year for allotment to the several States for the purposes of subsections (a), (b), and (c) of section 314 of the act, allotments to the several States shall be made as follows:

(a) *Venereal disease.* Of the amount available for allotment for venereal disease control programs:

From 20 percent to 40 percent, on the basis of population, weighted by financial need.
From 60 percent to 80 percent, on the basis of the extent of the venereal disease problem.

(b) *Tuberculosis.* Of the amount available for allotment for tuberculosis control programs:

From 20 percent to 40 percent, on the basis of population weighted by financial need.
From 60 percent to 80 percent, on the basis of the extent of the tuberculosis problem.

(c) *General health purposes.* Of the amount available for allotment for general health purposes other than for mental health:

From 40 percent to 60 percent, on the basis of population, weighted by financial need.
From 40 percent to 60 percent, on the basis of the extent of special health problems.

(d) *Mental health.* Of the amount available for allotment for mental health programs:

From 20 percent to 40 percent, on the basis of population weighted by financial need.
From 60 percent to 80 percent, on the basis of the extent of the mental health problem.

§ 9.4 *Allotments; estimates; time of making; duration.* (a) For each fiscal year, the Surgeon General shall, with the approval of the Administrator, determine the amount of the appropriation for each program which shall be available for allotment among the several States.

(b) Prior to the beginning of each fiscal year the Surgeon General shall prepare and make available to the States an esti-

mated schedule of the amounts which it is expected will be allotted to each State during the fiscal year from estimated appropriations.

(c) Allotments for each program for the first quarter shall be made prior to the beginning of such quarter or as soon thereafter as practicable, and shall equal not less than 30 percent nor more than 40 percent of the total sum determined to be available for allotment during that fiscal year. At the end of the first quarter, the amounts of such allotments which have not been certified for payment to the respective States pursuant to § 9.8 shall become available for allotment among the States in the same manner as moneys which had not previously been allotted.

(d) Allotments for each program for the remaining nine months shall be made prior to the beginning of the second quarter or as soon thereafter as practicable, and shall equal the total sum remaining unpaid and unallotted from the amount available for allotment during the fiscal year.

(e) The Secretary of the Treasury and the respective State health authorities shall be notified of the amounts of allotments and of the period for which they are made.

§ 9.5 *State plans; submission and amendments.* (a) Each State making application for grants under section 314 of the act shall submit plans through its State health authority for each fiscal year for carrying out the purposes of such section. A State making application for Federal funds for more than one of the purposes authorized by section 314 of the act may consolidate its plan: *Provided*, That the information specifically required for a State plan is distinguished with respect to each purpose.

(b) The State plan and amendments thereto shall be prepared in accordance with official forms supplied by the Public Health Service for the purpose.

(c) The State plan may be amended with the approval of the Surgeon General. Amendments shall state the period they are to be in effect.

§ 9.6 *State plans; contents.* A State plan with respect to any program shall consist of two parts:

(a) Part I shall describe the current organization and functions of health services for the program and the proposals of the State health authority for extending, improving, and otherwise modifying such organization and functions. It shall include a description of the services, and a statement that the plan if approved will be carried out as described and in accordance with the regulations prescribed under section 314 of the act.

(b) Part II shall consist of proposed budgets for carrying out the activities described in Part I, and shall specify the period for which such budgets are submitted.

§ 9.7 *State plans; time of submission and approval.* (a) Parts I and II of a plan (the former in duplicate, the latter in triplicate) shall be submitted at least 45 days prior to the beginning of the Federal fiscal year to which the plan relates.

(b) Review and approval of Part I shall precede review and approval of Part II. Part II of a plan shall not be approved unless each item thereof relates to activities specifically described in Part I.

Part II of a plan shall not be approved for any period antedating receipt of such part by the Public Health Service, except that in the event of epidemics or similar emergency, involving expenditures not capable of prediction, telegraphic requests for approval of emergency expenditures may be tentatively approved pending submission of necessary amendments to Parts I and II (and justification thereof) at a later date prescribed at the time of such tentative approval.

§ 9.8 *Payments to States.* Payments from allotments to a State having an approved plan shall not exceed the allotment to such State or the total estimated expenditure necessary for carrying out the State plan whichever is less.

Subject to the foregoing limitations, payments shall be made as follows:

(a) For the first quarter two payments shall be made from the allotment for such quarter. The first payment shall equal 45 percent of the amount allotted to each State for that quarter. The second payment shall be the amount of the difference between the unpaid balance of the allotment of the respective State and the unencumbered cash balance of the respective fund in the State treasury at the beginning of the first quarter, adjusted for exceptions.

(b) Payment for subsequent quarters from the allotments for the final third quarter period shall be made once in each quarter and shall be based upon an application for funds showing the estimated requirements for such quarter and the estimated unencumbered balance of the respective fund in the State treasury at the beginning of the quarter for which payment is to be made. All such payments shall be in the amount of the difference between the estimated requirement and the estimated unencumbered cash balance adjusted for exceptions, except that the amount paid together with such estimated unencumbered balance shall not exceed 35 percent of the total amount available to the State for the year.

Except with respect to the first payment in the first quarter, payments from allotments shall not be certified unless all reports and documents prescribed by the regulations in this part to be due have been received. Payments subsequent to such first payment shall not be made until an application for the payment has been received.

§ 9.9 *Required expenditure of State and local funds.* (a) Moneys paid to any State pursuant to section 314 of the act shall be paid upon the condition that there be expended in the State, during the fiscal year for which payment is made and for purposes specified in the State plan with respect to which the payment is made, public funds of the State and its political subdivisions (excluding any funds derived by loan or grant from the United States) in amounts determined as follows:

§ 9.12 *Required administrative standards; State plans; personnel administration on a merit basis.* A system of personnel administration on a merit basis shall be established and maintained for personnel employed in programs, the budgets of which provide for the expenditure of Federal funds or of State funds for matching purposes. Standards for evaluating compliance with this requirement shall be contained in "Merit System Policies of the Public Health Service" in effect at the time of the expenditure.

§ 9.13 *Required administrative standards; State plans; training of personnel.* Use of Federal funds for training personnel for State and local health work shall be authorized by the State health authority in accordance with "Minimum Standards for Sponsored Training of the Public Health Service." (1) Sterilization of hair or bristles used in the manufacture of lather brushes shall be accomplished by exposure to steam under pressure at a minimum temperature of 250° F. for 25 minutes provided the length of the bundles is five inches or less, or 250° F. for 30 minutes if the length of the bundles is more than five inches and less than 25 inches. The steam temperature shall be measured at a point in the exhaust line where it leaves the autoclave by both an indicating thermometer and a recording thermometer of design and accuracy approved by the Surgeon General. The temperature shown by the recording thermometer shall be checked by the autoclave operator against the temperature shown by the indicating thermometer, and the reading of the indicating thermometer entered permanently on the recording thermometer chart for each sterilization. The recording thermometer shall be kept adjusted so as at no time to read higher than the indicating thermometer. Hair or bristles during the process of sterilization in the autoclave may be: Tied in unwrapped bundles, the maximum diameter of which does not exceed two and one-half inches; tied in paper-wrapped bundles not exceeding two and one-half inches in diameter provided the ends are left open to permit easy access of steam into the bundles; or placed untied in the autoclave in a manner approved by the Surgeon General. The compactness shall be such as to permit easy access of steam into the bundles. Bundles of hair or bristles shall be placed in racks in the autoclave in single layers, and successive layers shall not be in contact.

(2) In lieu of the procedure given in subparagraph (1) of this paragraph the following sterilization method may be used for badger hair: Boiling in water for three hours, the hair being placed loose in racks or in loosely tied bundles not exceeding two and one-half inches in maximum diameter with an indicating thermometer available for observing the temperature of the water during the sterilization. At the beginning of boiling and at hourly intervals thereafter the temperature of the water shall be taken, and time and temperature shall be noted in a record book for each sterilization.

(3) Sterilized hair and bristles shall be stored in clean containers apart from unsterilized hair and bristles and the lot of hair or bristles from each sterilization labeled with the date, method of sterilization used, and the name and location of the establishment in which sterilized. Permanent records of this information, the recording thermometer charts for each steam sterilization, and the time-temperature record of each boiling sterilization shall be kept.

(4) Mixing machines, equipment, and fixtures used for handling or processing sterilized hair or bristles shall not be used for handling or processing hair or bristles which have not been sterilized.

(5) All shaving or lather brushes shall be marked permanently with the name of the manufacturer or with an identifying mark registered with the Surgeon General.

(b) A person shall not offer for transportation, or transport, in interstate traffic any psittacine bird unless:

(1) The shipment is destined to a zoological park or research institute, and the shipment is accompanied by a permit from the State health department of the State of destination (where required), or

(2) The shipment does not exceed two birds, the birds are accompanied by the owner, have been in his possession for the preceding two years, have not had contact with other psittacine birds during that period, will be transported immediately to the owner's private residence and retained there as household pets, and are accompanied by a permit from the State health department of the State of destination (where required).

§ 12.23 *Garbage.* (a) A person shall not transport, receive, or cause to be transported or received, garbage in interstate traffic and feed such garbage to swine unless, prior to the feeding, such garbage has received minimum heat treatment.

(b) A person transporting garbage in interstate traffic shall not make, or agree to make, delivery thereof to any person with knowledge of the intent or customary practice of such person to feed to swine garbage which has not been subjected to minimum heat treatment.

Such water either shall have been obtained from watering points approved by the Surgeon General, or shall have been subjected to treatment approved by the Surgeon General.

§ 12.102 *Approval of watering points.* (a) The Surgeon General shall approve any watering point if (1) the water supply thereat meets the standards prescribed in the Drinking Water Standards (see Subpart J), and (2) the methods of and facilities for delivery of such water to the conveyance and the sanitary conditions surrounding such delivery prevent the introduction, transmission, or spread of communicable diseases.

(b) The Surgeon General may base his approval or disapproval of a watering point upon investigations made by representatives of State departments of health or of the health authorities of contiguous foreign nations.

(c) If a watering point has not been approved, the Surgeon General may permit its temporary use under such conditions as, in his judgment, are necessary to prevent the introduction, transmission, or spread of communicable diseases.

SUBPART J—DRINKING WATER STANDARDS

§ 12.201 *Definition of terms.* For the purpose of this subpart the terms designated herein below shall be defined as follows:

(a) "Adequate protection by natural agencies" implies various relative degrees of protection against the effects of pollution in surface waters; dilution, storage, sedimentation, the effects of sunlight and aeration, and the associated physical and biological processes which tend to produce natural purification; and, in the case of ground waters, storage in the percolation through the water bearing material.

(b) "Artificial treatment" includes the various processes commonly used in water treatment, both separately and in combination, such as storage, aeration, sedimentation, coagulation, rapid or slow sand filtration, chlorination, and other accepted forms of disinfection. Rapid sand filtration treatment is commonly understood to include those auxiliary measures, notably coagulation and sedimentation, which are essential to its proper operation.

(c) "Adequate protection by artificial treatment" implies that the method and degree of elaboration of treatment are appropriate to the source of supply; that the works are of adequate capacity to support maximum demands, are well located, designed, and constructed, are carefully and skillfully operated and supervised by properly trained and qualified personnel, and are adequately protected against floods and other sources of pollution. The evidence that the protection thus afforded is adequate must be furnished by frequent bacteriological examinations and other appropriate analyses showing that the purified water is of good and reasonably uniform quality, a recognized principle being that irregularity in quality is an indication of potential danger. A minimum specification of good quality would be conformance to the bacteriological and chemical requirements of this subpart, as indicated in §§ 12.203 and 12.204.

(d) "Sanitary defect" means any faulty structural condition, whether of location, design, or construction of collection, treatment, or distribution works which may regularly or occasionally prevent satisfactory purification of the water supply or cause it to be contaminated from extraneous sources. Among the extraneous sources of contamination of water supply are dual supplies, bypasses, cross-connections, interconnections, and back-flow connections.

(e) "Health hazard" means any faulty operating condition including any device or water treatment practice, which, when introduced into the water supply system, creates or may create a danger to the wellbeing of the consumer.

(f) "Water supply system" includes the works and auxiliaries for collection, treatment, and distribution of the water from the source of supply to the free-flowing outlet of the ultimate consumer.

(g) "The coliform group of bacteria" is defined, for the purpose of this subpart, as including all organisms considered in the coli-aerogenes group as set forth in the Standard Methods for the Examination of Water and Sewage, current edition, prepared, approved, and published jointly by the American Public Health Association and the American Water Works Association, New York City. The procedures[3] for the demonstration of bacteria of this group shall be those specified herein, for:

(1) The completed test, or

(2) The confirmed test when the liquid confirmatory medium brilliant green bile lactose broth, 2 percent, is used, providing the formation of gas in any amount in this medium during 48 hours of incubation at 37° C. is considered to constitute a positive confirmed test, or

(3) The confirmed test when one of the following liquid confirmatory media is used: crystal violet lactose broth, fuchsin lactose broth, or formate ricinoleate broth. For the purpose of this test, all are equivalent, but it is recommended that the laboratory worker base his selection of any one of those confirmatory media upon correlation of the confirmed results thus obtained with a series of completed tests, and that he select for use the liquid confirmatory medium yielding results most nearly agreeing with the results of the completed test. The incubation period for the selected liquid confirmatory medium shall be 48 hours at 37° C. and the formation of gas in any amount during this time shall be considered to constitute a positive confirmed test.

(h) "The standard portion of water" for the application of the bacteriological test may be either:

(1) Ten milliliters (10 ml.) or

(2) One hundred milliliters (100 ml.)

(i) "The standard sample" for the bacteriological test shall consist of five (5) standard portions of either:

(1) Ten milliliters (10 ml.) or

(2) One hundred milliliters (100 ml.) each.

In any disinfected supply the sample must be freed of any disinfecting agent within twenty (20) minutes of the time of its collection.[4]

(j) "The certifying authority" is the Surgeon General of the United States Public Health Service or his duly authorized and designated representatives. Reference to the certifying authority shall be applicable only in the cases of those water supplies to be certified for use on carriers subject to the Federal quarantine regulations. "The reporting agency" shall be understood to mean the respective official State health agencies or their designated representatives.

§ 12.202 *As to source and protection.* (a) The water supply shall be:

(1) Obtained from a source free from pollution; or

(2) Obtained from a source adequately purified by natural agencies; or

(3) Adequately protected by artificial treatment.

(b) The water supply system in all its parts should be free from sanitary defects and health hazards, and all known sanitary defects and health hazards shall be systematically removed at a rate satisfactory to the reporting agency and to the certifying authority. Approval of public water supplies by the reporting agency and the certifying authority will be conditioned by the existence of:

(1) Rules and regulations prohibiting connections or arrangements by which liquids or chemicals of unsafe, unknown, or questionable quality may be discharged or drawn into the public water supply;

(2) Provisions to enforce such rules and regulations effectively on all new installations; and

(3) A continuing program to detect health hazards and sanitary defects within the water distribution system.

(c) *Applications.* For the purposes of this subpart, responsibility for conditions in the water supply systems shall be considered to be held by:

(1) The water purveyor from the source of supply to the connection to the customer's service piping, and

(2) The owner of the property served and the municipal, county, or other authority having legal jurisdiction from the point of connection to the customer's service piping to the free-flowing outlet of the ultimate consumer.

§ 12.203 *As to bacteriological quality*—(a) *Sampling.* The bacteriological examination of water considered under this section shall be of samples collected at representative points throughout the distribution system.

The frequency of sampling and the location of sampling points on the distribution system should be such as to determine properly the bacteriological quality of the water supply. The frequency of sampling and the distribution of sampling points shall be regulated jointly by the reporting agency and the certifying authority after investigation by either agency, or both, of the source, method of treatment, and protection of the water concerned.

The minimum number of samples to be collected from the distribution system and examined by the reporting agency or its designated representatives each month should be in accordance with the number as determined from the graph presented in Figure 1 of this subpart[5] which is based upon the relationship of population served and minimum number of samples per month:

Population served:	*Minimum number of samples per month*
2,500 and under	1
10,000	7
25,000	25
100,000	100
1,000,000	300
2,000,000	390
5,000,000	500

In determining the number of samples examined monthly, the following samples may be included, provided all results are assembled and available for inspection and the laboratory methods and technical competence of the personnel are

[2] The Public Health Service issues a list of such dealers biweekly for the information of State health authorities and all others concerned.

[3] This reference shall apply to all details of technique in the bacteriological examination, including the selection and preparation of apparatus and media, the collection and handling of samples, and the intervals and conditions of storage allowable between collection and examination of the water sample.

[4] In freeing samples of chlorine or chloramines, the procedure given in the Standard Methods for the Examination of Water and Sewage, current edition, shall be followed.

[5] For the purpose of uniformity and simplicity in application, the number of samples to be examined each month for any given population served shall be determined from the graph in accordance with the following:

For populations of 25,000 and under to the nearest 1.

For populations of 25,001 to 100,000 to the nearest 5.

For populations of 100,001 to 2,000,000 to the nearest 10.

For populations of over 2,000,000 to the nearest 25.

approved by the reporting and certifying agencies:

(1) Samples examined by the reporting agency.

(2) Samples examined by local health department laboratories.

(3) Samples examined by the water works authority.

(4) Samples examined by commercial laboratories.

Daily samples collected following an unsatisfactory sample as provided in subparagraphs (2) and (4) of paragraph (b) of this section, shall be considered as special samples and shall not be included in the determination of the number of samples examined monthly. Neither shall subsequent unsatisfactory samples in this daily series be used as a basis for prohibiting the supply: *Provided*, That (i) immediate and active efforts are made to locate the cause of such contamination, (ii) immediate action is taken to eliminate such cause, and (iii) samples taken following such remedial action are satisfactory.

The laboratories in which these examinations are made and the methods used in making them shall be subject to inspection at any time by the designated representatives of the certifying authority and reporting agency. Compliance with the specified procedures and the results obtained shall be used as a basis for certification, in accordance with the application given below:

(b) *Application.* Subparagraphs (1) and (2) of this paragraph shall govern when ten milliliter (10 ml.) portions are used and subparagraphs (3) and (4) of this paragraph shall govern when one hundred milliliter (100 ml.) portions are used.[6]

(1) Of all the standard ten milliliter (10 ml.) portions examined per month in accordance with the specified procedure, not more than ten (10) percent shall show the presence of organisms of the coliform group.

(2) Occasionally three (3) or more of the five (5) equal ten milliliter (10 ml.) portions constituting a single standard sample may show the presence of organisms of the coliform group: *Provided*, That this shall not be allowable if it occurs in consecutive samples or in more than:

(i) Five (5) percent of the standard samples when twenty (20) or more samples have been examined per month.

(ii) One (1) standard sample when less than twenty (20) samples have been examined per month.

Provided further, That when three or more of the five equal ten milliliter (10 ml.) portions constituting a single standard sample show the presence of organisms of the coliform group, daily samples from the same sampling point shall be collected promptly and examined until the results obtained from at least two consecutive samples show the water to be of satisfactory quality.[7]

(3) Of all the standard one hundred milliliter (100 ml.) portions examined per month in accordance with the specified procedure, not more than sixty (60) percent shall show the presence of organisms of the coliform group.

(4) Occasionally all of the five (5) equal one hundred milliliter (100 ml.) portions constituting a single standard sample may show the presence of organisms of the coliform group, *Provided*, That this shall not be allowable if it occurs in consecutive samples or in more than:

(i) Twenty (20) percent of the standard samples when five (5) or more samples have been examined per month.

(ii) One (1) standard sample when less than five (5) samples have been examined per month.

Provided further, That when all five of the standard one hundred milliliter (100 ml.) portions constituting a single standard sample show the presence of organisms of the coliform group, daily samples from the same sampling point shall be collected promptly and examined until the results obtained from at least two consecutive samples show the water to be of satisfactory quality.[7]

[6] It is to be understood that in the examination of any water supply the series of samples for any month must conform to both of the requirements of either subparagraphs (1) and (2) or (3) and (4) of paragraph (b), respectively.

[7] When this occurs, and when waters of unknown quality are being examined, simultaneous tests should be made on multiple portions of a geometric series ranging from 10 ml. to 0.1 ml. or less.

two consecutive samples show the water to be of satisfactory quality.[8]

(5) The procedure given, using a standard sample composed of five standard portions, provides for an estimation of the most probable number of coliform bacteria present in the sample as set forth in the following tabulation:

Number of portions		Most probable number of coliform bacteria per 100 ml.	
Negative	Positive	When 5-10 ml. portions are examined	When 5-100 ml. portions are examined
5	0	Less than— 2.2	Less than— 0.22
4	1	2.2	.22
3	2	5.1	.51
2	3	9.2	.92
1	4	16.0	1.60
0	5	More than— 16.0	More than— 1.60

§ 12.204 *As to the physical and chemical characteristics*—(a) *Physical characteristics.*[9] The turbidity of the water shall not exceed 10 p. p. m. (silica scale), nor shall the color exceed 20 (platinum-cobalt scale). The water shall have no objectionable taste or odor.

(b) *Chemical characteristics.* The water shall not contain an excessive amount of soluble mineral substance, nor excessive amounts of any chemicals employed in treatment. Under ordinary circumstances, the analytical evidence that the water satisfies the physical and chemical standards given in paragraph (a) of this section and subparagraph (1) of this paragraph and simple evidence that it is acceptable for taste and odor will be sufficient for certification with respect to physical and chemical characteristics.

(1) The presence of lead (Pb) in excess of 0.1 p. p. m., of fluoride in excess of 1.5 p. p. m., of arsenic in excess of 0.05 p. p. m., of selenium in excess of 0.05 p. p. m., of hexavalent chromium in excess of 0.05 p. p. m., shall constitute grounds for rejection of the supply.

These limits are given in parts per million by weight and a reference to the method of analysis recommended for each determination is given in subparagraph (1) of paragraph (c) of this section. Salts of barium, hexavalent chromium, heavy metal glucosides, or other substances with deleterious physiological effects shall not be added to the system for water treatment purposes.

Ordinarily analysis for these substances need be made only semiannually. If, however, there is some presumption of unfitness because of these elements, periodic determination for the element in question should be made more frequently.

Where experience, examination, and available evidence indicate that such substances are not present or likely to be present in the water supplies involved, semiannual examinations are not necessary, provided such omission is acceptable to the reporting agency and the certifying authority.

(2) The following chemical substances which may be present in natural or treated waters should preferably not occur in excess of the following concentrations where other more suitable supplies are available in the judgment of the certifying authority. Recommended methods of analysis are given in paragraph (c) of this section:

Copper (Cu) should not exceed 3.0 p. p. m.

Iron (Fe) and manganese (Mn) together should not exceed 0.3 p. p. m.

Magnesium (Mg) should not exceed 125 p. p. m.

Zinc (Zn) should not exceed 15 p. p. m.

Chloride (Cl) should not exceed 250 p. p. m.

Sulfate (SO_4) should not exceed 250 p. p. m.

Phenolic compounds should not exceed 0.001 p. p. m. in terms of phenol.

Total solids should not exceed 500 p. p. m. for a water of good chemical quality. However, if such water is not available, a total solids content of 1,000 p. p. m. may be permitted.

For chemically treated waters, i. e., lime softened zeolite or other ion exchange treated waters, or any other chemical treatments, the following three requirements should be met:

(i) The phenolphthalein alkalinity (calculated as $CaCO_3$) should not be greater than 15 p. p. m. plus 0.4 times the total alkalinity. This requirement limits the permissible pH to about 10.6 at 25° C.

(ii) The normal carbonate alkalinity should not exceed 120 p. p. m. Since the normal alkalinity is a function of the hydrogen ion concentration and the total alkalinity, this requirement may be met by keeping the total alkalinity within the limits suggested below when the pH of the water is within range given. These values apply to water at 25° C.

pH range	Limit of total alkalinity (p. p. m. of $CaCO_3$)
8.0 to 9.6	400
9.7	340
9.8	300
9.9	260
10.0	230
10.1	210
10.2	190
10.3	180
10.4	170
10.5 to 10.6	160

(iii) If excess alkalinity is produced by chemical treatment, the total alkalinity should not exceed the hardness by more than 35 p. p. m. (calculated as $CaCO_3$).

PROPOSED RULE MAKING

INTERSTATE COMMERCE COMMISSION

[49 CFR, Part 139]

[No. 10122]

STANDARD TIME ZONE INVESTIGATION

NOTICE OF PROPOSED RULE MAKING

MAY 5, 1947.

At a session of the Interstate Commerce Commission, Division 2, held at its office in Washington, D. C., on the 5th day of May A. D. 1947.

Upon further consideration of the record in the above-entitled proceeding and consideration of the petition of the Knoxville Chamber of Commerce and Knoxville Junior Chamber of Commerce for extension of the eastern standard time zone so as to include additional portions of eastern Tennessee, and good cause appearing therefor:

It is ordered, That the said proceeding be, and it is hereby, reopened for further hearing, on the question of whether the orders of the Commission, dated October 24, 1918, and thereafter, defining the boundary line between the United States standard eastern and central time zones, and restated in the order of the Commission dated May 19, 1928, and further modified by the orders of October 15, and 31, 1941, and February 5, 1943, should be so modified that the City of Knoxville or any of the remainder of the State of Tennessee, or any portion of the States of Kentucky, Virginia, or North Carolina, now in the United States central time zone, be included within the United States eastern time zone.

And it is further ordered, That this proceeding be assigned for further hearing in the United States Court Rooms, Knoxville, Tenn., on June 16, 1947, at 9:30 a. m., United States standard central time, before Examiner Thomas E. Pyne, and at such further places and dates as may be determined by the presiding Examiner; and that copies of this order and the attached notice be served upon the petitioners, the Governors and Public Service Commissions of the States named, and the railroads engaged in interstate commerce, located in whole or in part in the States named; and that notice be given to the general public by depositing a copy of this order and the attached notice in the office of the Secretary of the Commission for public inspection, and by filing copies of the said order and notice with the Director, Division of the Federal Register.

[1] Filed as part of original document.

Pursuant to section 4 (a) of the Administrative Procedure Act (60 Stat. 237), notice is hereby given of the proposed modification of the outstanding orders in the above-entitled proceeding so as to redefine the limits of the United States standard eastern and central time zones, under authority of the Standard Time Act, 40 Stat. 450–451; 41 Stat. 1446; 42 Stat. 1434; 15 U. S. C. 261–265.

By order issued with the original report in this proceeding, 51 I. C. C. 273 (1918); as modified by order issued with the thirteenth supplemental report, 122 I. C. C. 122, (1927); as restated by the order issued with the sixteenth supplemental report, 142 I. C. C. 279, (1928); and as further modified by the orders issued with the twenty-fourth, twenty-fifth, and twenty-sixth supplemental reports, 246 I. C. C. 721, (1941); 248 I. C. C. 15, (1941); and 255 I. C. C. 129, (1943); the boundary between the eastern and central zones was defined so as to run from Cincinnati, Ohio, along the south bank of the Ohio River to Catlettsburg, Ky., southerly through the eastern end of Kentucky, the extreme western end of Virginia, the northeastern tip of Tennessee, the western end of North Carolina, and thence along the northern and western boundary of Georgia. At the time of the last hearings in this proceeding, the City of Knoxville and certain nearby towns were before the Commission urging the westward extension of the limits of the eastern zone so as to include all of Virginia and North Carolina and the eastern portions of Kentucky and Tennessee in that zone. At that time the petitions were denied, because of the vigorous opposition which the proposal met in Knoxville and surrounding communities and because the railroad operating difficulties which would be caused by the proposed change in time-breaking points could not be eliminated without including in the eastern zone many communities which had shown no previous inclination to observe the eastern standard.

A petition has been filed by the Knoxville Chamber of Commerce and Knoxville Junior Chamber of Commerce for an extension of the eastern zone so as to include additional portions of eastern Tennessee. Upon consideration of that petition Division 2 of the Commission has reopened the above-entitled proceeding for further hearing.

The petitioners allege that by city ordinance, passed following a referendum by the people of Knoxville, eastern standard time has been the official time of that city since April 27, 1946, and that since that time the number of cities and towns in eastern Tennessee which observe eastern standard time has increased. They further allege that Chattanooga, Tenn., the next large city to the west of Knoxville, has adopted daylight-saving time during the summer months and that many in that metropolitan area favor the permanent adoption of eastern time.

Based on the averments of the petition considered in the light of the present record, particularly the hearings of 1941, the attached proposed modification of the boundary line between the eastern and central time zones has been prepared. The effect of such a line would be to transfer into the eastern zone the remaining portions of Virginia and North Carolina and the portion of Tennessee east of the line of the Cincinnati, New Orleans & Texas Pacific (Southern System), including all points on that line, Oakdale and south to and including Chattanooga. The present line in Kentucky would not be disturbed. The modification would require some changes in existing railroad operation exceptions.

Anyone wishing to make representations in favor of or against the changes proposed may do so through the submission of written data, views, or arguments. The original and five copies of such a submission should be filed with the Commission on or before June 9, 1947.

The proceeding has been set for hearing in the United States Court Rooms, Knoxville, Tenn., on June 16, 1947, at 9:30 a. m., United States standard central time, before Examiner Thomas E. Pyne. The issue at that hearing is confined to the question of whether the limits of the United States Eastern Time Zone should be moved westward to include Knoxville or any of the remainder of the State of Tennessee or any portion of the States of Kentucky, Virginia, or North Carolina now in the United States Central Time Zone.

Attention is directed to the provisions of the Standard Time Act, which contemplate four time zones for the United States proper and specifically designates the standard of time to be observed within those zones with respect to the matters specified in that act. The authority of this Commission is confined to the determination of the limits of the several zones. Evidence in support of a change in the law cannot be admitted.

It is expected that all interested persons who appear will cooperate so that a fair and complete presentation of the pertinent facts may be made as succinctly and expeditiously as possible. The attached proposed modification of the boundary line has been prepared to save time and assist the parties. This should be understood, however, as not restricting the issues in any way, and any person may propose or support any other change in the line within the scope of the reopened proceeding or may oppose any change in the existing line.

A copy of this notice shall be served upon the petitioners and upon the Governors and Public Service Commissions of the States of Tennessee, Kentucky, Virginia, and North Carolina, and upon the railroads engaged in interstate commerce, located in whole or in part in the States named. Notice to the general public shall be given by depositing a copy in the office of the Secretary of the Commission for public inspection, and by filing a copy with the Director, Division of Federal Register.

Section 139.3 *Boundary line between eastern and central zones* proposed to be amended as follows:

1. Paragraphs (c), (d), and (e) to be consolidated and superseded by the following paragraphs (c) and (d):

(c) *Kentucky-Virginia.* From Catlettsburg south immediately west of and parallel with the Big Sandy division of the Chesapeake & Ohio Railway to the northern boundary of Lawrence County, Kentucky; thence westerly and southerly along the west lines of Lawrence, Johnson, Floyd, and south line of Pike Counties to the boundary line between Kentucky and Virginia; thence southwesterly along that boundary line to the southwestern corner of Virginia.

(d) *Tennessee.* From the southwestern corner of Virginia southwesterly and westerly along the boundary line between Kentucky and Tennessee to the line of the Southern Railway (Cincinnati, New Orleans & Texas Pacific Railway) just north of Isham; thence southerly immediately east of and parallel with that railway to Oakdale, then crossing to the west side of that railway; thence southwesterly immediately north or west of that railway to the northern boundary of Hamilton County; thence westerly and southerly along the northern and western boundaries of that county to the boundary line between Tennessee and Georgia.

2. Paragraphs (f) *Georgia* and (g) *Florida* to be relettered (e) and (f) respectively.

3. Paragraph (h) *Operating exceptions* to be relettered (g) and, so far as providing exceptions for lines of the following railroads, to be amended so as to substitute the following for the present exceptions of those roads:

SECURITIES AND EXCHANGE COMMISSION

[File No. 54-155, 54-9 and 59-2]

AMERICAN GAS AND ELECTRIC CO. ET AL.

ORDER APPROVING SUPPLEMENTAL APPLICATION

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 9th day of May A. D. 1947.

In the Matter of American Gas and Electric Co., File No. 54-155; American Gas and Electric Co., Atlantic City Electric Co., Deepwater Operating Co. and South Pennsgrove Realty Co., File No. 54-9 and 59-2.

The Commission having, on April 7, 1947, issued its order approving a plan filed by American Gas and Electric Company ("American Gas"), a registered holding company, pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935, which plan provides, among other things, for the disposition of the interest of American Gas in Atlantic City Electric Company ("Atlantic City"), through the sale at competitive bidding of 522,416 shares of the common stock of the latter and the disposition of the remaining 627,584 shares of such stock owned by American Gas as dividends to the common stockholders of American Gas commencing with the dividend date June 15, 1948 and terminating with the dividend date December 15, 1948; and

A supplemental application having been filed by American Gas on May 7, 1947, wherein it is stated that on April 8, 1947, applicant made a public invitation for proposals for the purchase from it of the said 522,416 shares of the common stock of Atlantic City, pursuant to which three groups of prospective bidders qualified, and that on April 14, 1947, the day prior to the date set for submission of bids for said stock, American Gas postponed indefinitely the date for submission of such bids because of the market decline of April 14, 1947 and the mechanical obstacles to consummation of the sale by reason of the strike in the telephone industry.

American Gas now proposes to proceed with the sale of the common stock of Atlantic City in following manner: American Gas will publish a notice requesting that any persons interested in such underwriting advise the company in writing before a specified date (which shall not not earlier than the fourth day after publication of the notice). On or after such specified date American Gas will notify by telegram all persons who have so signified their interest that sealed bids should be presented at a designated time and place. The time designated will be not less than 48 hours (exclusive of Sundays and holidays) after the sending by American Gas of such telegraphic notice; and

The Commission having considered the entire record and deeming it appropriate and in the public interest and in the interest of investors and consumers that the request of applicant with respect to the proposed sale of the common stock of Atlantic City be granted:

It is hereby ordered, That the supplemental application be, and the same hereby is, approved, subject to the terms and conditions contained in Rule U-24 and subject to the further condition that the proposed sale of the common stock of Atlantic City shall not be consummated until the results of competitive bidding shall have been made a matter of record in this proceeding and a further order shall have been entered by this Commission in the light of the record so completed, which order may contain such further terms and conditions as may then be deemed appropriate.

By the Commission.

Secretary.

It is further ordered, That the application of American for the exemption of the sale of said note from the competitive bidding requirements of paragraphs (b) and (c) of Rule U-50 be, and the same hereby is, granted.

Loans shall be made simultaneously from the banks on 10 days' notice and may be prepaid on similar notice, such loans and prepayments to be borne or made ratably to all banks. Appalachian may, on 10 days' notice, terminate or reduce pro rata in the aggregate amount of $1,000,000 or multiples thereof, the obligations of the banks to make the loans provided for in the agreement.

The application-declaration, as amended, represents that Appalachian will increase its common stock equity by December 31, 1948, by the amount of $5,000,000 over the amount shown on its books of account as of December 31, 1946, said increase in common stock equity to be achieved by either the sale of additional common stock or the retention of earnings. It is further represented that by December 31, 1950, the ratio of common stock equity to total capitalization will be increased to 25%. In the event that Appalachian's equity is not increased in the manner stated above by December 31, 1948, and/or the ratio of common stock equity to total capitalization will be less than 25% at December 31, 1950, a dividend restriction will become operative whereby not more than 75% of the earnings available to the common stock may be paid out as dividends on common stock when the ratio of common stock equity (including surplus) is between 20% and 25% of total capitalization, and not more than 50% of such earnings may be paid out as dividends when the ratio falls below 20%.

Appalachian states that the proposed loans are necessary to provide funds to enable it to proceed with its construction program, and that any plan for long-term financing will provide for payment of the then outstanding notes issued under the credit agreement.

Appalachian states that the proposed transactions have been submitted for approval to the State Corporation Commission of the State of Virginia, the state in which Appalachian was organized and is doing business and to the Tennessee

Railroad and Public Utilities Commission of the State of Tennessee, wherein Appalachian also does business.

It is requested that the Commission's order granting the application and permitting the declaration herein, as amended, to become effective be issued prior to May 23, 1947 and that it shall be effective forthwith.

By the Commission.

Irving Trust Co.	1,500,000	300,000
Mellon Bank & Trust Co.	1,125,000	225,000

In connection with the execution of the Agreement, American Gas and Kentucky agree to expressly subordinate the $8,499,000 principal amount of such bonds as to payment of the principal of and interest on (but not the lien of) such bonds to the payment of the principal of and interest on the Notes to be issued pursuant to the Agreement.

It is stated that the proposed loans are necessary to provide funds to enable Kentucky to proceed with its construction program, and that any plan for long-term financing will provide for payment of the then outstanding notes issued under the credit agreement. STANDARD GAS AND ELECTRIC CO.

MEMORANDUM OPINION AND ORDER PERMITTING DECLARATION TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa., on the 9th day of May 1947.

Standard Gas and Electric Company ("Standard Gas"), a registered holding company, has filed a declaration pursuant to sections 6 and 7 of the Public Utility Holding Company Act of 1935 ("act"). The declaration proposes the extension of the maturity of certain Bank Loan Notes of the company which now mature on May 10, 1947, aggregating in principal amount $8,010,826.95 from that date until July 10, 1947. These notes are a portion of an issue originally made on April 10, 1946 in the sum of $51,000,000, of which the total amount now outstanding aggregates $33,510,826.95. The notes maturing on May 10, 1947, were by their original terms due on April 10, 1947 and an extension for 30 days was previously authorized (File No. 70-1479, Holding Company Act Release No. 7328). Consent has been obtained from the holders of the outstanding Bank Loan Notes to the proposed extension, subject to approval of this Commission.

The Bank Loans in the amount of $51,000,000 were originally made pursuant to authorization of the District Court of the United States for the District of Delaware, which at that time had before it a reorganization proceeding affecting Standard Gas. Standard Gas had outstanding at that time notes and debentures aggregating $58,601,000 in principal amount, and under its amended plan had proposed a distribution to the holders of these notes and debentures of cash and securities. Pursuant to authority obtained from the Court, Standard Gas was given leave to redeem the notes and debentures; and funds for that purpose in addition to treasury cash were secured by issuance of the bank loan notes in the amount of $51,000,000, issued to the group of eleven participating banks located in New York, Chicago, Pittsburgh, Detroit, and Milwaukee. As originally issued $7,140,000 of the notes matured six months after their issuance (on October 10, 1946); $18,360,000 one year after their issuance (on April 10, 1947); and the remaining $25,500,000 will mature three years after issuance (on April 10, 1949).

The issuance of the bank loan notes was submitted to us and our approval was given on February 26, 1946 (In the matter of Standard Gas and Electric Company, File No. 70-1211, — S. E. C. —, Holding Company Act Release No. 6435).

The facts concerning the proceedings in the District Court and other circumstances surrounding the issuance of the bank loan notes are summarized in our findings and opinion in that case.

At the time the bank loan notes were authorized and issued, Standard Gas represented that prompt steps would be taken to dispose of assets in order to retire these notes. As we pointed out in our opinion (Holding Company Act Release No. 6435, pages 8–9):

> * * * The proposed issuance of bank notes is warranted only as a temporary expedient in order to permit the prompt retirement of presently outstanding debt, and to facilitate the disposition of subsidiary securities required in order to comply with the requirements of Section 11 (b). The program contemplates the expeditious sale of the subsidiary companies' securities, and the proceeds of these sales will be used to retire the bank notes * * *

We permitted the declaration to become effective notwithstanding the maturity of three years for half of the note issue, on the basis of testimony of company officials that this maturity was proposed to provide against contingencies, but that every effort would be made to dispose of assets and liquidate the bank loans as soon as possible.

Since the issuance of the bank loan notes, Standard Gas has disposed of its holdings in Pacific Gas and Electric Company (from which sale there was realized a net amount of approximately $7,600,000), and in Mountain States Power Company (from which was realized the sum of approximately $4,500,000). These sums were applied in reduction of the bank loan notes, and in addition there was applied approximately $5,400,000 out of income and from the disposition of certain other assets. Thus, there has been paid approximately $17,500,000, leaving outstanding approximately $33,500,000, of which $8,010,826.95 matures on May 10 and for which the proposed sixty-day extension has been requested.

Standard Gas proposed to meet the forthcoming maturity by use of the proceeds of the proposed sale of its holdings in The California Oregon Power Company ("Copco"). These holdings were previously offered for sale at competitive bidding during June 1946, but the company was not satisfied with the bids received and rejected them. An application-declaration with respect to the sale of the holdings of Standard Gas in Copco was subsequently filed in March 1947, and has been the subject of successive amendments, the last of which amendments was filed on May 2, 1947. We have issued our order permitting the declaration to become effective as to the proposed disposition, subject to certain conditions (Holding Company Act Release No. 7390). Standard Gas has represented that, barring unforeseen contingencies, it will advertise for bids on or about May 14, and that it will offer the proposed securities on or about May 20. Under this schedule, it would in normal course receive the proceeds of this sale on or about May 27. Standard Gas contemplates that the proceeds from the sale of its holdings in Copco will be more than sufficient to retire the bank loan notes now due May 10, 1947.

Although under the contemplated time schedule, Standard Gas would be in a position to pay these notes within less than three weeks after their present maturity (May 10), officials of the company have urged that the extension be permitted for a sixty-day period. They have urged that, although they fully contemplate a prompt advertising for bids and public offering, an extension for a shorter period might place the company in a disadvantageous position with respect to the securing of favorable bids from underwriters for the common stock of Copco. They also wish to provide for the possibility of presently unforeseeable events, such as sudden market disturbances, which might render inadvisable the offering on the particular days now contemplated.

In the course of the hearing held in this matter, testimony was received from three directors of Standard Gas, including the Chairman of its board. Inquiry was made as to the company's program not only as to the satisfaction of the immediately approaching maturity but also as to the steps proposed toward liquidation of the remainder of the bank loans. It appears from the evidence that the board of directors contemplates the disposition for cash of the company's holdings in Louisville Gas and Electric Company as soon as the recapitalization proceedings for that company now pending under section 11 (e) of the act can be completed. However, the company apparently has at the present time no specific plans for disposition of other major assets with which to satisfy the bank loan notes in the near future. The directors who testified indicated that it was the present view of the board that the remainder of the bank loan would be liquidated as part of or in connection with an allocation plan dealing with the recapitalization or liquidation of the company, and they prefer to take no action with respect to the bank loans until such time as such a plan may be formulated.

We are by no means satisfied that the management of this company has proceeded as diligently as possible toward the liquidation of this bank loan. Had more aggressive steps been taken toward the sale of assets, the proposed extension now sought might well have been unnecessary. However, although as to the proposed sixty-day period no showing of absolute necessity has been made, we will accede to this request on the basis of the representations which have been made that immediate steps are being taken to dispose of the Copco holdings. If this disposition is consummated with dispatch as represented, the immediate maturity may be met within much less than the sixty days provided. It is perhaps unnecessary to state that, in view of the fact that this is the second extension requested, and in view of the circumstances of this case, we will not be disposed to look with favor upon any further request for extension if the present commitments are not carried out.

We consider it appropriate at this time to comment briefly upon the remainder of the company's program. Our order pursuant to section 11 (b) (1) was entered August 8, 1941.[1] In that order we directed the disposition by Standard Gas of various of its properties, including its holdings in Oklahoma Gas and Electric Company, Wisconsin Public Service Company, Copco, and Louisville Gas and Electric Company. At the time the bank loan notes were issued, and indeed as late as the fall of 1946, the company represented that it would make prompt disposition of its holdings in Oklahoma Gas and Electric Company. Testimony of company witnesses at this hearing indicates that Standard Gas does not now propose a public sale of its holdings in Oklahoma Gas and Electric Company.[2] The present program of the Standard Gas management contemplates disposition of the company's holdings in Copco and in Louisville Gas and Electric Company system, to be followed by retirement of the balance of the bank loans in connection with the contemplated allocation plan.

It is apparent that the program as now outlined is not consistent with the company's representations to the Court and to the Commission, at the time the bank loans were approved. In view of the fact that the bank loans were approved by the Commission only upon the basis of very definite representations by the company as to the prompt retirement of those loans, it is our view that if there is to be any change in the company's program as then represented, such a change should be permitted only upon the basis of convincing evidence. However, it is not necessary for us at the present time to reach any decision as to those aspects of the program. We shall expect that expeditious action will be taken by Standard Gas to dispose of its holding in Copco and to consummate the presently pending plan concerning Louisville Gas and Electric Company, to be followed by a disposition of the interests of Standard Gas in that system. We shall assume also that Standard Gas will proceed rapidly in the formulation and presentation of its over-all plans. At the appropriate time we will consider all questions presented by the company's program, including the question of the extent to which the company should be permitted to depart from the program which it previously submitted to the Court and the Commission for the retirement of its bank loans.

The Commission finding with respect to said declaration that the requirements of section 7 of the act and the rules and regulations promulgated thereunder are satisfied, and deeming it appropriate in the public interest and in the interests of investors and consumers that said declaration should be permitted to become effective;

It is ordered, That the said declaration be and is hereby permitted to become effective, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[2] Applications by Standard Gas and Oklahoma Gas and Electric Company to sell shares of the latter company, including a registration statement, were filed in December 1946. TITLE 7—AGRICULTURE

Chapter III—Bureau of Entomology and Plant Quarantine, Department of Agriculture

[Quarantine No. 48]

PART 301—DOMESTIC QUARANTINE NOTICES

SUBPART—JAPANESE BEETLE

Introductory note. This revision of the quarantine regulations is made primarily for the purpose of adding to the lightly infested regulated area the election district of Mechanicsville in St. Marys County, Maryland, the town of Schroeppel in Oswego County, New York, the town of Waterloo in Seneca County, New York, the township of Marietta in Washington County, Ohio, the District of Midlothian in Chesterfield County, Virginia, several districts in Berkeley, Greenbrier, Monroe, Summers, and Wood Counties, West Virginia and the entire county of Morgan, West Virginia, in all of which trap-scouting and other surveys made during 1946 disclosed important infestations of the Japanese beetle. No operational changes are made in the heavily infested regulated areas.

The phraseology of several regulations has been changed to permit the use of treatments other than fumigation as a basis of certification of certain products.

The Secretary of Agriculture has determined that it is necessary further to revise the Japanese beetle quarantine regulations which were last revised February 15, 1945, 7 CFR 1945 Supp. 301.48-1 et seq., as amended, March 13, 1946, 11 F. R. 2628, in order to extend the regulated area and to make other modifications. The quarantine regulations are therefore hereby revised to read as follows:

§ 301.48–4 *Regulated articles*—(a) *Movement from all regulated areas.* Unless exempted by administrative instructions issued by the Chief of the Bureau of Entomology and Plant Quarantine and except as hereinafter otherwise provided, the interstate movement of the following articles from regulated areas to points outside thereof is subject to the regulations in this subpart:

(1) Soil, compost, and decomposed manure of any kind moved independent of or in connection with nursery stock or any other articles or things, except that gravel, sand, greensand, marl, and clay originating from pits, mines, or deposits, and that compost, humus, and decomposed manure when dehydrated, ground, pulverized, or compressed, are exempt from the requirements of these regulations.

(2) Nursery stock.

(b) *Movement from heavily infested areas.* Unless exempted by administrative instructions issued by the Chief of the Bureau of Entomology and Plant Quarantine the interstate movement, either on direct billing, diversion, or reconsignment, from the heavily infested areas to points outside the regulated areas, of the products named in subparagraphs (1) and (2) of this paragraph, is subject to the regulations in this subpart each summer during the period of heavy flight of the beetle, the dates of the beginning and cessation of which shall be based on seasonal observation of the emergence and disappearance of the adult beetles and shall be as designated in administrative instructions by the Chief of the Bureau of Entomology and Plant Quarantine: *Provided*, That identical requirements shall also apply to the interstate movement of the products from the heavily infested areas to such isolated, lightly infested, regulated areas as may be designated from year to year in administrative instructions by the Chief of the Bureau of Entomology and Plant Quarantine when it has been determined by him that such areas should be so protected.

(1) Unprocessed, fresh, cut flowers when moved in bulk direct from the field or greenhouse where grown, or from a distributor.

(2) Fresh fruits and vegetables of all kinds when shipped by refrigerator car or motortruck only.

§ 301.48–5 *Conditions governing interstate movement of regulated articles*—(a) *Certification.* Except as provided herein, or in subsequent administrative instructions issued by the Chief of the Bureau of Entomology and Plant Quarantine, articles designated in § 301.48–4 shall not be moved interstate from the respective areas as specified therein (paragraphs (a) and (b)) to points outside the regulated areas, unless a certificate or permit shall have been issued therefor in compliance with the regulations in this subpart.

(b) *Safeguards against reinfestation.* Subsequent to certification, as provided in paragraph (a) of this section the regulated articles must be loaded, handled, and shipped under such protection and safeguards against reinfestation as are required by the inspector.

(c) *Marking.* Every container of articles, the interstate movement of which is subject to the regulations in this subpart, shall be plainly marked with the name and address of the consignor and the name and address of the consignee, when offered for shipment, and shall have securely attached to the outside thereof a valid certificate or permit issued in compliance with the regulations in this subpart: *Provided*, That (1) in the case of lot freight shipments other than by road vehicle, a certificate attached to one of the containers and another certificate attached to the waybill will be sufficient, and carlot freight or express shipments, either in containers or in bulk, require a certificate attached to the waybill; (2) in the case of shipment by road vehicle, the certificate shall accompany the shipment and shall

be surrendered to the consignee upon delivery of the shipment.

(d) *Articles originating outside the regulated area.* No certificates are required for the interstate movement of regulated articles originating outside the regulated areas and moving through or reshipped from a regulated area, when the point of origin is clearly indicated, when the identity has been maintained, and when the articles are safeguarded against infestation while in the regulated areas.

§ 301.48–6 *Conditions governing the issuance of certificates and permits*—(a) *Certification of soil, compost, and decomposed manure.* Certificates may be issued for the interstate movement of these products under any one of the following conditions:

(1) When they have originated on noninfested premises, establishments, or areas. (See § 301.48–1 *Definitions.*)

(2) When, in the judgment of the inspector, they have been handled or processed in a manner to free them from infestation; or when the soil has been removed, under the observation of the inspector, from a depth of more than 12 inches below the surface of the ground.

(3) When the soil, compost, or decomposed manure has been treated under the observation of an inspector and in accordance with methods selected by him from administratively authorized procedures known to be effective under the conditions applied.

(b) *Certification of nursery stock.* Certificates may be issued for the interstate movement of nursery stock under any one of the following conditions:

(1) When the soil about the roots of the plants has been treated under the observation of an inspector and in accordance with methods selected by him from administratively authorized procedures known to be effective under the conditions applied.

(2) When the plants have been made soil-free.

(3) When the nursery stock originated on noninfested premises, establishments, or areas. (See § 301.48–1 *Definitions.*)

(4) When the nursery stock has been produced under protected conditions in greenhouses, potting beds, heeling-in areas, hotbeds, coldframes, and similar plots, in the infested area, in which the ventilators, doors, and all other openings have been kept screened to the inspector's satisfaction during such periods as he may designate.

However, in order to maintain an infestation-free status under subparagraphs (3) and (4) of this paragraph, the operator of the establishment must restrict all receipts of nursery stock and other regulated articles from points within the regulated areas to articles certified. The operator must report to the inspector the source of all nursery stock and other regulated articles received on such premises and must maintain a record, accessible to the inspector, of all shipments made to points outside the regulated areas. Premises will lose their infestation-free status if there are received thereon regulated articles from the regulated area which are not certified. Infestation-free establishments, together with their environs, will be inspected during the active adult season and their status determined on the basis of such inspections.

(c) *Certification of cut flowers.* Certificates may be issued for the interstate movement of regulated cut flowers from the heavily infested area to points outside the regulated areas, under any one of the following conditions:

(1) When, in the judgment of the inspector, they have not been exposed to adult beetle infestation.

(2) When they have been examined by an inspector and found to be free of infestation.

(3) When they have been treated under the observation of an inspector and in accordance with methods selected by him from administratively authorized procedures known to be effective under the conditions applied.

(d) *Certification of fruits and vegetables.* Certificates may be issued for the interstate movement by refrigerator car or motortruck of fresh fruits and vegetables originating or loaded in or reshipped from the heavily infested area to points outside the regulated areas under any one of the following conditions:

(1) When, in the judgment of the inspector, they have not been exposed to adult beetle infestation.

(2) When they have been examined by an inspector and found to be free of infestation.

(3) When they have been harvested, handled, graded, or processed in a manner, in the judgment of the inspector, to free them from infestation.

(4) When they have been treated under the observation of an inspector and in accordance with methods selected by him from administratively authorized procedures known to be effective under the conditions applied.

However, under subparagraphs (1), (2), and (3) of this paragraph, the refrigerator cars or motortrucks used for transporting such fruits and vegetables shall be thoroughly swept, cleaned, or treated prior to loading.

(e) *Limited permits.* Limited permits may be issued by the inspector for the movement of noncertified regulated articles to specified destinations for processing or other handling. Persons shipping, transporting, or receiving such articles may be required by the inspector to enter into written agreements with the Bureau of Entomology and Plant Quarantine to maintain such sanitation safeguards against the establishment and spread of infestation and to comply with such conditions as to the maintenance of identity, handling, or subsequent movement of regulated products and to the cleaning of cars, trucks, and other vehicles used in the transportation of such articles as may be required by the inspector.

§ 301.48–7 *Assembly of articles for inspection.* Persons intending to move interstate any of the regulated articles shall make application for inspection as far in advance as possible, and will be required to prepare, handle, and safeguard such articles from infestation, and to assemble them at such points as the inspector shall designate, placing them so that inspection may be readily made. All costs, including storage, transportation, and labor incident to inspection, other than the services of the inspector, shall be paid by the shipper.

§ 301.48–8 *Cancellation of certificates or permits.* Certificates or permits issued under these regulations may be withdrawn or canceled by the inspector and further certification refused whenever the further use of such certificates or permits might result in the dissemination of infestation.

§ 301.48–9 *Cleaning or treatment of trucks, wagons, cars, boats, and other vehicles and containers.* When in the judgment of the inspector a hazard of spread of infestation is presented, thorough cleaning or treatment of trucks, wagons, cars, boats, and other vehicles and containers may be required by the inspector before movement interstate to points outside of the regulated areas.

§ 301.48–10 *Inspection in transit.* Any car, vehicle, basket, box, or container moved interstate or offered to a common carrier for shipment interstate, which contains or which the inspector has probable cause to believe contains either infestations, infested articles, or articles the movement of which is controlled by the regulations in this subpart, shall be subject to inspection by an inspector at any time or place, and when actually found to involve danger of dissemination of Japanese beetles to noninfested localities, measures to eliminate infestation may be required by the inspector as a condition of further transportation or delivery.

§ 301.48–11 *Shipments for experimental and scientific purposes.* Articles subject to requirements of these regulations may be moved interstate for experimental or scientific purposes, on such conditions and under such safeguards as may be prescribed by the Chief of the Bureau of Entomology and Plant Quarantine. The container of articles so moved shall bear, securely attached to the outside thereof, an identifying tag from the Bureau of Entomology and Plant Quarantine.

As previously stated, the primary purpose of this revision of the regulations supplemental to the Japanese beetle quarantine is to add new territory to the regulated area. Another purpose is to permit the treatment of regulated articles by additional methods which are much more economical than those currently in use. Moreover, permitting a method to be used which is selected by an inspector on the basis of the special circumstances in each case will result in a more effective quarantine against the spread of the beetle. Prompt action on these changes is essential in order to anticipate the emergence of the beetles this year. Accordingly, it is found that compliance with the notice provisions of section 4 (a) of the Administrative Procedure Act (60 Stat. 238) is impracticable and contrary to the public interest. For the same reasons and for the further reason that the new methods of treatment will permit the relaxation of incidental restrictions heretofore found necessary, good cause is found for making the re-

vised regulations effective immediately upon publication in the FEDERAL REGISTER.

This revision shall be effective upon publication in the FEDERAL REGISTER, and thereupon shall supersede the quarantine regulations promulgated February 15, 1945, 7 CFR 1945 Supp. 301.48–1 et seq., as amended, March 13, 1946, 11 F. R. 2628.

Done at Washington, D. C., this 13th day of May 1947.

Witness my hand and the seal of the United States Department of Agriculture.

[SEAL] N. E. DODD,
Acting Secretary of Agriculture.

3. Wherever in this section (HEPR 5) the words "Area Rent Office of the Office of Temporary Controls (OPA)" or the words "OTC Area Rent Office" are used, they shall hereafter mean "Area Rent Office of the Office of Rent Control, Office of the Housing Expediter".

4. Paragraph (i) (1) is amended to read as follows:

(i) *Maximum sales prices and rents*—(1) *General.* The restrictions on sales prices and rents contained in this paragraph must be observed as long as this section remains in effect. They apply to sales prices and rents for dwellings of the kinds described below when built or converted under this section.

The restrictions on sale prices contained in this section do not apply to property being sold in the course of judicial or statutory proceedings in connection with foreclosures and do not prohibit any subsequent sale of such property at or below the amount of the sale price in such proceedings.

In the case of any dwelling unit provided by converting a structure in a Defense Rental Area established pursuant to the Emergency Price Control Act of 1942, as amended, the maximum rent specified in the application as approved is not the authorized amount at which the dwelling may be rented as the rents for converted units must be determined by the Office of Rent Control of the Office of the Housing Expediter.

Approval of a proposed sales price or rent under this section should be considered merely as a limit upon the price or rent to be charged. It should not be considered as a statement that the sales price or rent represents the value of the dwelling or the apartment for other purposes.

For requirements on filing a rent registration form, see Rent Regulation for Housing (formerly issued by OPA and adopted by the Housing Expediter through the issuance of Rent Control Order 1).

[T. D. 5561]

PART 323—SPECIAL TAXES WITH RESPECT TO COIN-OPERATED AMUSEMENT AND GAMING DEVICES, BOWLING ALLEYS, BILLIARD TABLES, AND POOL TABLES

MISCELLANEOUS AMENDMENTS

In order to conform Regulations 59 (1941 edition) (26 CFR, Part 323), relating to special taxes with respect to coin-operated amusement and gaming devices, bowling alleys, billiard tables and pool tables under the provisions of the Internal Revenue Code, to the Excise Tax Act of 1947 (Public Law 17, 80th Congress, 1st Session), approved March 11, 1947, such regulations are amended as follows:

PARAGRAPH 1. Immediately preceding § 323.10 (26 CFR 323.10) there is inserted the following:

SEC. 3. EXCISE TAX ACT OF 1947.

Sections * * * 1655 (definition of "date of termination of hostilities in the present war") of such Code are hereby repealed.

PAR. 2. Immediately preceding § 323.30 (26 CFR 323.30), there is inserted the following:

[EXCISE TAX ACT OF 1947]

SEC. 2. Section 1650 of the International Revenue Code (war tax rates of certain miscellaneous taxes) is hereby amended by striking out "and ending on the first day of the first month which begins six months or more after the date of the termination of hostilities in the present war."

SEC. 5. Section 302 (b) (2) of the Revenue Act of 1943 (period applicable to increase of tax with respect to billiard and pool tables and bowling alleys) is hereby amended by striking out ", and continuing through June 30 next following the first day of the first month which begins six months or more after the date of the termination of hostilities in the present war (as defined in Chapter 9A of the Internal Revenue Code)".

PAR. 3. Section 323.32, as amended by Treasury Decision 5344, approved March 14, 1944 (26 CFR 323.32), is amended by striking out the first two sentences of the first paragraph and inserting in lieu thereof the following: "The rate of tax is $20 per year for each bowling alley, billiard table, or pool table operated by the taxpayer. Prior to July 1, 1944, the rate of tax was $10 per year for each such alley or table."

Because of the technical nature of the amendments made herein, it is found that it is unnecessary to issue this Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4 (c) of said act.

This Treasury decision shall be effective upon filing with the Division of the Federal Register.

§ 2.1003 *Jurisdiction of adjudication division.* Within the jurisdiction of field adjudication activities, the adjudication division in each regional office or center, under the direction of an adjudication officer, will be responsible for the preparation and adjudication of claims for disability compensation or pension and determining, upon proper request, service connection for the condition or conditions for which out-patient treatment only is requested; for determining whether the character of discharge is a bar to benefits, including benefits under Titles II, III, and V of Public Law 346, 78th Congress, as amended, and hospital treatment, domiciliary care, and outpatient treatment for service-connected disabilities under Public No. 2, 73d Congress, as amended, and in doubtful cases; for the furnishing of technical information, through correspondence or otherwise, to veterans or their representatives in explanation of action taken upon individual claims, and the carrying out of such duties in relation to the foregoing and adjudication matters, general or otherwise, as may be properly assigned by central office or the branch office. (58 Stat. 284, 38 U. S. C. 693)

§ 2.1004 *Jurisdiction of authorization unit.* The authorization unit will have jurisdiction over the determination of basic eligibility for monetary benefits in claims under the jurisdiction of the field office; the development of claims in conformity with established Veterans' Administration policy; the adjudication of all claims upon completion of rating action; the maintenance of such follow-up procedure as may be required (this does not apply to follow-up of requested physical examinations); the development and certification of appeals; the certification, upon proper request, of data for consideration in determining eligibility for domiciliary care or hospital or outpatient treatment; the determination whether the character of discharge is a bar to benefits including benefits under Titles II, III and V of Public Law 346, 78th Congress, as amended, and hospital treatment, domiciliary care, and outpatient treatment for service-connected disabilities, under Public No. 2, 73d Congress, as amended, in doubtful cases; the furnishing of technical information, through correspondence or otherwise, to veterans or their representatives in explanation of action taken upon individual claims, and the carrying out of such duties in relation to the foregoing and adjudication matters, general or otherwise, as may be properly assigned by central office or the branch office. (58 Stat. 284, 38 U. S. C. 693)

§ 2.1005 *Jurisdiction of rating board.* (a) The rating boards are vested with authority to determine questions of service connection of disability flowing from diseases and injuries (including such determinations for purposes of Public Law 346, 78th Congress, as amended), in cases in which the jurisdiction is temporarily or permanently vested in the field office concerned; to determine the necessity for, type of, sufficiency of, and appropriate date of examinations and re-examinations, including hospitalization for observation, for rating purposes; to determine and to evaluate the disability resulting from each and from all such diseases and injuries and to determine whether any such disease or injury is due to the willful misconduct or misconduct of the veteran; to determine the competency or incompetency of claimants in proper cases; to determine whether the veteran was insane at time of commission of offense resulting in discharge otherwise precluding entitlement to benefits; to determine whether children of veterans are insane, idiotic or otherwise helpless by reason of mental or physical condition; to determine entitlement under section 31, Public No. 141, 73d Congress, as amended by section 12, Public No. 866, 76th Congress, and under § 35.017 (d) of this chapter, as amended.

(b) The rating boards will have original jurisdiction to rate claims involving disability compensation or pension under the jurisdiction of the field office.

No change in (c).

(d) In the event of a dissenting opinion by a rating specialist or a member of the central disability board, no payment will be made based upon the decision, until it has been authoritatively determined whether an appeal will be taken. If appeal from any decision is taken by any of the officials designated in § 30.9807 of this chapter, no change in payments, based on the decision appealed from, will be made until a decision is rendered by the board of veterans appeals and the case file is returned to the appropriate activity.

(e) If it is decided that an appeal is to be taken by one of the officials designated in § 30.9807 of this chapter, the claimant or his representative will be promptly informed concerning the question at issue and concerning his right of appearance or representation before the rating board or the board of veterans appeals. As provided by Veterans' Administration adjudication procedure, the formal hearing in the field office will be in lieu of a formal hearing before the board of veterans appeals, except in the unusual case when a special appearance by the veteran or his representative before the board of veterans appeals may be considered necessary. The hearing will not be accepted to serve as a basis for reversal of the majority decision, but such action as may be indicated will be taken where new and material evidence is submitted or where the further development of evidence would appear to be advisable on information submitted by or in behalf of the claimant. A transcribed record of the hearing will be filed. If, upon being informed of the administrative appeal, the claimant or his representative elects to present additional evidence or argument in support of the administrative appeal, such election will be deemed to be an appeal, and the two appeals will be merged and considered in accordance with the provisions of § 3.1328 of this chapter. (58 Stat. 284, 38 U. S. C. 693)

§ 2.1006 *Decisions to conform to existing laws, regulations, and defined policies.* All decisions will conform strictly to the laws, regulations, Administrator's Decisions and defined policies as enunciated by the Administrator. All opinions of the solicitor which constitute a precedent are embodied either in Administrator's Decisions or opinions which are approved by the Administrator. Conclusions reached in individual cases are frequently influenced by peculiar facts or local statutes and, consequently, will not be followed as precedents. However, where it is apparent beyond question that the situation is identical, such conclusions may be followed as a matter of consistency in the adjudication of claims under the law or regulations applicable.

§ 2.1007 *Information on all decisions to be furnished to veterans.* The claimant will, in all cases in which he appears personally before a rating board, be informed by the board of the decision reached and the reason therefor. The claimant will also be advised upon completion of adjudicative action based upon the decision, of the provisions thereof; and his entitlement, or nonentitlement thereunder and of his right of appeal, and of the time within which appeal must be taken. While failure to receive written notice of right to, and time for, appeal will not extend the time for filing appeal, it will not preclude an administrative review in a meritorious case upon a proper authorization. Claims which involve this provision will be forwarded with a summary of the facts and a recommendation by the adjudication officer or assistant adjudication officer, in field cases, to the director, claims service, branch office, or, in central office cases, by the chief or assistant chief of the division concerned to the director, veterans claims service, or the director, dependents and beneficiaries claims service, depending upon the subject matter, for appropriate action.

§ 2.1009 *Revision of rating board decisions.* (a) No rating board will reverse or amend, except upon new and material evidence, a decision rendered by the same or any other rating board, or by any appellate authority, except where such reversal or amendment is clearly warranted by a change in law or by a specific change in interpretation thereof specifically provided for in a Veterans' Administration issue: *Provided*, That a rating board may reverse or amend a decision by the same or any other rating board where such reversal or amendment is obviously warranted by a clear and unmistakable error shown by the evidence in file at the time the prior decision was rendered, but in each such case there shall be attached to each copy of the rating a signed statement by the rating board definitely fixing the responsibility for the erroneous decision. (See also § 3.1201 of this chapter.) Where the severance of service connection is considered warranted on the facts of record, see paragraph (d) of this section.

(b) Whenever a rating board may be of the opinion that a revision or an amendment of a previous decision is warranted on the facts of record in the case at the time the decision in question was rendered, a difference of opinion being involved rather than a finding of clear and unmistakable error, the complete file will be forwarded to the director, claims service, branch office, accompanied by a complete and comprehensive statement of the facts in the case and a detailed explanation of the matters supporting the conclusion that a revision or amendment of the prior decision is in order. All cases in which differences of opinion on the same factual basis involves a rating agency in central office.

or exists between rating agencies in different branch office territories, will be submitted directly by the director, claims service, branch office, to the assistant administrator for claims, attention of the director, veterans claims service. A rating decision will not be effected in any such case pending the return of the case file following branch or central office consideration. The effective date of the rating authorizing benefits in such cases will be the date of administrative determination, except where otherwise provided.

(c) Determinations in effect on March 19, 1933, will not be reversed in those cases comprehended within the provisions of sections 27 and 28, Public No. 141, 73d Congress, except as provided in these sections. These cases, therefore, will not be referred to the branch office, under paragraph (b) of this section upon a difference of opinion. In the event clear and unmistakable error is discovered the rating board will take action as provided in paragraph (a) of this section.

(d) Authority to sever service connection upon the basis of clear and unmistakable error (the burden of proof being upon the Government), even in those instances where veterans are pursuing courses of vocational rehabilitation training under § 35.017 of this chapter, as amended, is vested in regional offices and centers. Service connection will not be severed in any case on a change of diagnosis in the absence of the certification hereinafter provided. Accordingly, in reports of examinations submitted for rating purposes, where a change in diagnosis of a service-connected disability is made, the examining physician or physicians, or other proper medical authority, will be required to certify, in the light of all accumulated medical evidence, that the prior diagnosis on which service connection was predicated, was not correct. This certification will be accompanied by a summary of the facts, findings and reasons supporting the conclusion reached. When the examining physician or physicians, or other proper medical authority, are unable to make the certification provided herein, service connection will be continued by the rating agency. Where this certification is made, the case will be carefully considered by the rating agency and in the event it is determined in consideration of all the accumulated evidence that service connection should be continued, a decision to that effect will be rendered, citing this regulation as authority. If, in the light of all the accumulated evidence, it is determined that service connection may not be maintained, it will be severed. The claimant will be immediately notified in writing of the contemplated action and the detailed reasons therefor and will be given a reasonable period, not to exceed sixty days from the date on which such notice is mailed to his last address of record, for the presentation of additional evidence pertinent to the question. This procedure is for application except (1) in case of fraud; (2) in case of a change in law; (3) in case of a change of interpretation of law specifically provided in a Veterans' Administration issue; or (4) where the evidence establishes the service connection to be clearly illegal. (See Veterans' Administration adjudication procedure.)

No change in (e).

§ 2.1011 *Adjudication of applications of veterans residing without the continental limits of the United States.* Applications for disability compensation or pension received from veterans who reside outside the continental limits of the United States, with the exception of the Territory of Alaska, Hawaii, Puerto Rico, or the Republic of the Philippines, will be adjudicated in the claims division, veterans claims service, central office. Accordingly, these applications will be forwarded to central office. This provision does not apply to transients inasmuch as residence beyond the continental limits of the United States must be satisfactorily established. However, such residence will be presumed if three consecutive monthly checks are received at the same address. (§ 35.10 of this chapter.)

§ 2.1012 *Adjudication of applications of employee-claimants.* Applications for disability compensation or pension, presented by veterans in the employ of the Veterans' Administration will be adjudicated in the claims division, veterans claims service, central office. Accordingly, all such applications will be transferred by field offices to central office when an employee-claimant in either the classified or unclassified service or a member-employee has been continuously employed for ninety days provided that no adjudication is necessary during such period. If any adjudication is necessary in the case of an employee-claimant during the ninety-day period, such claim will be transferred to central office immediately. (See Veterans' Administration general procedure.)

§ 2.1013 *Adjudication of applications of veterans residing in Washington, D. C.* Applications for disability compensation or pension, submitted by veterans residing in Washington, D. C., other than in the United States Soldiers Home, will be adjudicated in the regional office, Washington, D. C.

A new section, § 2.1014, is added, as follows:

§ 2.1014 *Public No. 140, 73d Congress (Aerial transportation of mail).* Compensation at the rates provided by § 35.011 of this chapter is payable to any officer (including warrant and reserve officers), or any enlisted man or his dependents where injury or death occurs while serving pursuant to the provisions of Public No. 140, 73d Congress. In the event of injury of any such officer or enlisted man the degree of disability resulting therefrom will be evaluated in accordance with the applicable Schedule for Rating Disabilities promulgated pursuant to Public No. 2, 73d Congress. The officer or enlisted man may elect to receive either the compensation under § 35.011 of this chapter or the benefits provided by section 5 of Public No. 140, 73d Congress.

§ 2.1023 *Jurisdiction in death cases.* [Canceled April 23, 1947.]

§ 2.1024 *Delegation of authority to certain employees.* (a) All adjudication officers, assistant adjudication officers, authorization officers, employees designated to act as authorization officers, attorney reviewers, employees designated to act as attorney reviewers, and claims reimbursement authorizers, are hereby delegated authority to make findings and decisions thereon under the applicable laws, regulations, precedents and instructions, as to rights of claimants to benefits under all laws administered by the Veterans' Administration governing the payment of monetary benefits to veterans and their dependents.

No change in (b) or (c).

§ 2.1026 *Application for benefits.* (a) A properly completed and executed Form 526, 526a or 526b, upon receipt by the Veterans' Administration, constitutes an application for benefits indicated below and will be adjudicated under the applicable laws:

Form 526. Veteran's Application for Compensation for Disability Resulting from Service in the Active Military or Naval Forces of the United States.

Form 526a. Application for Compensation under section 31, Public No. 141, 73d Congress, section 12, Public No. 866, 76th Congress, and section 2, paragraph 4, Public Law 16, 78th Congress.

Form 526b. Veteran's Application for Pension for Disability not the Result of Service in the Active Military or Naval Forces of the United States.

Under Executive Order No. 6017, February 7, 1933, appearing in Title 22, page 161, Code of Federal Regulations of the United States of America, and section 1500, Public Law 346, 78th Congress, as amended, diplomatic and consular officers of the Department of State are authorized to act as agents of the Veterans' Administration and therefore a formal claim filed in a foreign country will be considered as filed in the Veterans' Administration as of the date of receipt by the State Department representative. (58 Stat. 284; 38 U. S. C. 693)

No change in (b).

(60 Stat. 524) (54 Stat. 1197, 57 Stat. 44, 554–560; 38 U. S. C. 501a)

§ 2.1027 *Informal claims.* Any communication from or action by a claimant or his duly authorized representative, which clearly indicates an intent to apply for disability or death compensation or pension may be considered an informal claim. When an informal claim is received and a formal application is forwarded for execution by the claimant, such application shall be considered as evidence necessary to complete the initial application, and unless a formal application is received within one year from the date it was transmitted for execution by the claimant no award shall be made by virtue of such informal claim. If received within one year in such instances, it will be considered filed as of the date of receipt of the informal claim by the Veterans' Administration. However, a communication received from a service organization, pension attorney, or pension agent may not be accepted as an informal claim, if a power of attorney was not executed at the time the communication was written. In cases not covered by this rule, where the probability of an informal claim appears to be indicated, but the facts are too obscure or complicated for determination, the file will be referred to the director, claims service, branch office concerned for decision upon the facts in the particular case. When benefits are being resumed under § 3.1299 of this chapter, and an informal claim has been filed for a disability incurred or aggravated in the second period of service, the requirements of the second and third sentences of this paragraph are not for application. Under Executive Order No. 6017, February 7, 1933, appearing in Title 22, page 161, Code of Federal Regulations of the United States of America, and section 1500, Public Law 346, 78th Congress, as amended, diplomatic and consular officers of the Department of State are authorized to act as agents of the Veterans' Administration and therefore an informal claim filed in a foreign country will be considered as filed in the Veterans' Administration as of the date of receipt by the State Department representative. (54 Stat. 1196, 1197, 57 Stat. 554–560, 58 Stat. 284; 38 U. S. C. 501a–703b, 38 U. S. C. 693)

§ 2.1032 *Evidence required from a foreign country and release of original documents from files of the Veterans' Administration for authentication.* (a) Where authentication is required or an affidavit or document is executed by or before an official in a foreign country, other than documents submitted through and approved by the Deputy Minister of Veterans' Affairs, Department of Veterans' Affairs, Ottawa, Canada, the signature of that official must be authenticated either (1) by a United States consular officer in that jurisdiction, or (2) by the Department of State. Affidavits or other documents emanating from foreign countries or jurisdictions where the United States has no consular representative may be authenticated in one of the following manners:

(1) *By a consular agent of a friendly government.* The signature and seal of the official of that country may be authenticated by a diplomatic or consular officer of a friendly government stationed in that country, whereupon the signature and seal of the official of the friendly government may be authenticated by the Department of State as provided below.

(2) *By the nearest American consul.* The document may be forwarded to the nearest American consul who will attach a certificate showing the result of his investigation concerning its authenticity, and such certificate, if favorable, will be accepted by the Veterans' Administration; *Provided*, That such authentication shall not be required when: (i) It is indicated that the attesting officer is authorized to administer oaths for general purposes and the paper bears his signature and seal; (ii) the document is executed before a Veterans' Administration employee authorized to administer oaths as provided by § 2.1030 (b), located in a foreign country; (iii) a copy of a public or church record from any foreign country purports to establish birth, marriage, divorce or death; *Provided*, It bears the signature and seal of the custodian of such record and there is no other evidence in the file which would serve to create doubt as to the correctness of the information shown on the record.

(b) When documents received require authentication, they will be forwarded to the Department of State through the head of the activity concerned in central office, and subsequently through the office of foreign relations service, for the purpose of authentication. The Department of State will be informed that any expense which may accrue incident to the authentication must be borne by the claimant. The name and address of the person submitting the document and information as to the purpose for which it is to be used will be furnished. (In compliance with the recommendation of the State Department, the use of the word "visaed" in connection with papers submitted in proof of claims will be avoided as it is often misunderstood by the applicants in whose minds the word is associated with visas granted immigrants.)

When a document which requires authentication is transmitted to the Veterans' Administration by the embassy or legation of a foreign country it will be returned, if not properly authenticated, through the head of the activity concerned in central office, and subsequently through the office of foreign relations service, to such embassy or legation for authentication and for submittal through the Department of State for further authentication. Documents emanating from China or Japan will not be returned direct to the embassies of these countries for authentication. The documents will be forwarded to the Department of State, through the office of foreign relations service, with a request for proper authentication by that Department.

A new paragraph (c) is added as follows:

(c) Where it is indicated that evidence from a foreign country to establish relationship, age or death would not be accessible to the claimant and evidence of record tends to establish the facts in issue, the case file, together with a complete statement of facts, will be submitted to the director of claims in a branch office, or the director, veterans claims service, or director, dependents and beneficiaries claims service, in central office, whichever is appropriate, with a recommendation that a finding of relationship, age, or death be made.

§ 2.1033 *Value of service records for evidence of discharge.* For the purpose of securing authoritative information in regard to discharge, with the view to making pension or compensation payments, if merited, the possession by the Veterans' Administration of any one of the following documents will furnish proof of such discharge and will be accepted by the Veterans' Administration at face value as credible evidence. An actual certificate of discharge; an authoritative notice from the Adjutant General's Office or from the Navy Department as to the facts of such discharge; or lastly, any copy or abstract of the certificate of discharge which has been certified by a notary public or any other person who has the authority under law to administer oaths. In any case in which such evidence or a photostat of the certificate of discharge is received, it will be accepted as authoritative proof of the data shown therein, for the purpose of making awards of disability or death benefits. These data need not be verified where they alone are sufficient to determine entitlement to disability or death compensation or pension benefits, unless there is some reason to question the genuineness of the document or accuracy of the information contained therein. This does not preclude the securing of additional information which may not be disclosed on the certificate of discharge or copy.

§ 2.1046 *Evidence to establish age or relationship.* Age or relationship for the purpose of payment of any benefits under any law administered by the Veterans' Administration should be established by one of the following types of evidence in the following order of preference: *Provided*, That if the name of the person appearing on the copy of a record is not the same as that appearing on the records of the Veterans' Administration, an affidavit will be required identifying the person having the changed name as the person whose name appears in the record:

(a) A certified copy or abstract of the public record of birth or a certified copy of the church record of baptism, the certification to be made by the custodian of such records. A public birth record established more than four years after the birth shall be accepted as proof of age or relationship provided it is not inconsistent with material of record with the Veterans' Administration, or if it shows on its face that it is based upon evidence which would itself be acceptable under any of the other paragraphs of this section. A record of baptism performed more than four years after birth shall not be accepted as proof of age or relationship unless it is consistent with material of record with the Veterans' Administration, which shall include at least one reference to age or relationship made at a time when such reference was not essential to establishing title to the benefit being claimed.

No change in (b) to (f), inclusive.

A new section, 2.1047, is added, as follows:

§ 2.1047 *Claims where age is material.* (a) In claims for pension where the age of the veteran is material and his statements of age agree with that shown at enlistment by official records, such statements may be accepted. If his statements do not agree with the service department report, the youngest age will be accepted, subject to the submission of acceptable evidence as outlined in § 2.1046.

(b) Where it is necessary to disallow an original claim due to lack of attainment of the minimum age, the claimant should be notified of his right to file a supplemental claim after reaching a pensionable age.

A new section, § 2.1056, is added, as follows:

§ 2.1056 *Contact with other Government departments through central office.* Whenever procurement of information involves forwarding a request to another Government department, other than the service departments, State headquarters and draft boards of the Selective Service System of the various States, Railroad Retirement Board and Civil Service Commission, communication will be made through the proper activity in central office. No certification is required for copies of records requested from other Federal agencies. However, copies of official records submitted to the Veterans' Administration as evidence in connection with any claim and obtained from other than the above sources must be duly certified under the official seal of the custodian of the records.

§ 2.1059 *Active service under Public No. 2, 73d Congress.* No change in (a).

(b) Service for ninety days or more, required by § 35.011 (a) (3) of this chapter, and service for six months or more, required by § 35.012 (a) (2) of this chapter, will mean continuous, active service, as defined in paragraph (a) of this section, during one or more enlistment periods. For the purpose of § 35.011 of this chapter such active service must have been during an enlistment or enlistments shown to have begun prior to the termination of a service period specified by § 35.011 of this chapter. The service requirements in claims for pension for disabilities not the result of service are defined in § 35.013 (a) (4) of this chapter and § 35.01 (c) of this chapter, as modified by Public No. 344, 74th Congress. A veteran in active service on April 6, 1917, who was discharged therefrom without serving ninety days during the World War as defined by existing regulations, will be given, if otherwise in order, the benefit of the provisions of § 35.011 (a) (3) of this chapter, if he had ninety days continuous service. (A. D. 247) (57 Stat. 554)

§ 2.1063 *Service connection, sound condition at the time of entrance into service, aggravation and natural progress under Public No. 2, 73d Congress, as amended, §§ 35.011 and 35.012 of this chapter.* No change in (a) to (h), inclusive.

(i) Under § 35.011 (a) (1), (2) and (4) of this chapter, as amended July 13, 1943, injury or disease, apart from misconduct disease, noted prior to service or shown by clear and unmistakable evidence, including medical facts and principles, to have had inception prior to enlistment will be conceded to have been aggravated where such disability underwent an increase in severity during service unless such increase in severity is shown by clear and unmistakable evidence, including medical facts and principles, to have been due to the natural progress of the disease. Aggravation of a disability noted prior to service or shown by clear and unmistakable evidence, including medical facts and principles, to have had inception prior to enlistment may not be conceded where the disability underwent no increase in severity during service on the basis of all the evidence of record pertaining to the manifestations of such disability prior to, during and subsequent to service. (Subject to the limitations of section 105, Public Law 346, 78th Congress, as amended.) Sudden pathological developments involving pre-existing diseases such as hemoptysis, spontaneous pneumothorax perforation of gastro-duodenal ulcer, coronary occulsion or thrombosis, cardiac decompensation, cerebral hemorrhage, and active recurrent rheumatic fever occurring in service establish aggravation unless it is shown by clear and unmistakable evidence that there was no increase in severity during service. Recurrences, acute episodes, symptomatic fluctuations, descriptive variations and diagnostic evaluations of a preservice injury or disease during service or at the time of discharge are not to be construed as establishing increase of disability in the absence of sudden pathological development or advancement of the basic chronic pathology during active service such as to establish increase of pre-existing disability during service. The usual effects of medical and surgical treatment in service, having the effect of ameliorating disease or other conditions incurred before enlistment, including post-operative scars, absent or poorly functioning parts or organs, will not be considered service-connected unless the disease or injury is service-connected, i. e., aggravated by service otherwise than by the usual effects of treatment. In many cases a blind eye has been enucleated during service either for improvement of the veteran's general appearance or to prevent the spread of infection to the other eye. It will be borne in mind that the degree of disability resulting from enucleations may be no greater than that due to undeveloped atrophied, scarred or discolored eyes and eyes affected by active pathology at the time of enlistment. In such cases, keeping in mind section 9 (b), Public Law 144, 78th Congress, service connection for the condition causing the enucleation is not in order unless the eye condition was aggravated by service. Unless in such cases service connection or aggravation for the eye condition is established, there can be no entitlement to the special monthly compensation for the loss of the eye. The mere fact of enucleation will not establish aggravation. Service connection will depend on whether the cause of enucleation is considered as service-incurred or aggravated. In determining aggravation by service due regard will be given the places, types and circumstances of the veteran's service and particular consideration will be accorded combat duty and other hardships of his service. The development of symptomatic manifestations of a pre-existing injury or disease during or proximately following action with the enemy or following a status as a prisoner of war will establish aggravation. (Sec. 1, 48 Stat. 8, 57 Stat. 554–560, 38 U. S. C. 701, chapter 12 note)

No change in (j) or (k).

§ 2.1064 *Character of discharge under Public No. 2, 73d Congress, as amended, and under Public Law 346, 78th Congress.* No change in (a) to (c), inclusive.

(d) An undesirable or blue discharge issued because of homosexual acts or tendencies generally will be considered as under dishonorable conditions and a bar to entitlement under Public No. 2, 73d Congress, as amended, and Public Law 346, 78th Congress, as amended. However, the facts in a particular case may warrant a different conclusion, in which event the case should be submitted to the director, claims service, branch office, for attention and consideration. (As to the effect of alienage see § 2.1001 (j).) (58 Stat. 284, 38 U. S. C. 693)

§ 2.1065 *Wilful misconduct.* No change in (a).

(b) (1) Pension shall not be payable under § 35.013 of this chapter, as amended, for any disability due to the claimant's own wilful misconduct or vicious habits. In the construction of the term "vicious habits" the words "vicious" and "habits" must be taken together and so taken, a corrupt or immoral act is not a vicious habit if it is not repeated to such an extent as to become a regular and fixed mode of action; a single incident, however vicious, is not a vicious habit. (Sec. 4, 48 Stat. 9, 58 Stat 752; 38 U. S. C. 704)

No change in (2).

No change in (c) or (d).

§ 2.1066 *"Line of duty" under §§ 35.011 and 35.012 of this chapter as amended.* (a) Sections 35.011 and 35.012 of this chapter, require that a disabling condition for which compensation is claimed, shall have been incurred in line of duty, except in cases where a right to compensation is preserved by § 35.04 of this chapter. The records of service departments will be accepted in determining line of duty status of diseases and injuries, unless considerations set forth in § 35.10 (h) of this chapter, as amended by Public Law 439, 78th Congress, and the legal presumption of the various laws, may warrant a different finding. Any evidence which is properly admissible or acceptable according to the practice of the Veterans' Administration, and which is of a nature competent to demonstrate that the incurrence of disability was or was not in line of duty, according to conditions specified in § 35.10 (h) of this chapter, as amended by Public Law 439, 78th Congress, may be used as a basis for adjudications, despite any official military or naval record with respect to manner of incurrence. These determinations will be made by the officials of the Veterans' Administration charged with the responsibility of deciding claims for monetary or other benefits in the administration of laws in which line of duty is a factor. For the purpose of ascertaining line of duty status for periods of time prior to June 16, 1938, continuous periods of leave will be considered as one extended leave in determining whether a leave of absence is of such duration as to interfere materially with the routine performance of duty. The provisions of § 35.10 (h) of this chapter, as amended by Public Law 439, 78th Congress, will be observed carefully in effecting all adjudication where a question of incurrence of disease or injury in line of duty is pertinent; *Provided*, That on or after June 16, 1938, the date of approval of Public No. 648, 75th Congress, the fact that the injury was suffered or the disease was contracted while the person on whose account benefits are claimed was on authorized leave (irrespective of the duration of such leave) will not of itself bar a finding that the disability or death resulting therefrom was incurred in line of duty. In cases in which a determination is required as to whether disability was incurred while "avoiding duty by * * * absenting himself without leave materially interfering with the performance of military duties," consideration is to be given to the evidence, including the report of the Service Department, as to the fact and extent of interference with performance of duty. Generally, it is to be concluded that material interference does not result from brief absence for a period during which no specific duty assignment was made or would have been made if the person had not been absent without leave, unless a specific duty assignment was avoided by absence without leave.

(b) Whenever the veterans claims service, the dependents and beneficiaries claims service, or the insurance service has made a determination of the question of line of duty status for the purpose of compensation, pension or insurance, under the provisions of §§ 2.1066 and 4.2046 of this chapter, such determination shall be binding upon any of these services for any of the purposes mentioned, unless it be clearly and unmistakably in error. This determination shall not be subject to question by reason of a difference of opinion, except as to whether such determination is clearly and unmistakably erroneous, in which case such question shall in field cases be referred to the deputy administrator, branch office, and in central office cases, to the executive assistant administrator, for his personal determination. (60 Stat. 524) (Sec. 1, 48 Stat. 8, 58 Stat. 752; 38 U. S. C. 701)

§ 2.1069 *Forfeiture.* No change in (a).

(b) *Prior forfeiture bars payments under Public No. 2 73d Congress, as amended.* By reason of section 11, Public No. 2, 73d Congress, and paragraph 2, section 14, of the Act of August 9, 1921, a claimant whose rights were forfeited under section 504, World War Veterans' Act, is not entitled to benefits under Public No. 2, 73d Congress, as amended. However, when disability compensation based upon service-connected disability has been forfeited by a veteran because of submission of false or fraudulent evidence, compensation payable except for the forfeiture, from and after date of suspension of payments to the veteran, shall be paid to his wife, child or children, and/or dependent parents, such payments not to exceed the amount payable in case such veteran had died from such service-connected disability. Payment in such case may not be made for any period prior to October 17, 1940, as provided in section 9, of Public No. 866, 76th Congress. No compensation shall be paid to any dependent who has participated in the fraud for which the forfeiture was imposed. Where payments were suspended prior to October 17, 1940, because of forfeiture, a claim, which may be informal, for benefits under section 9, Public No. 866, 76th Congress, will be necessary. In those cases where payments are suspended on or subsequent to October 17, 1940, because of forfeiture of rights by a veteran because of submission of false or fraudulent evidence, action to determine the rights of the veteran's dependents of record will be taken without the requirement of an application by the veteran's wife, child or children, and/or dependent parents.

(c) *No forfeiture of pensions for violation of hospital rules.* Pension or compensation benefits are not subject to deductions because of violations of hospital rules. (A. D. 253) (80 Stat. 524)

PART 25—MEDICAL

CLAIMS AND FEES

The following amendments are made to Part 25:

§ 25.6140 *Adjudication of claims.* (a) Claims for reimbursement or payment of expenses of medical services obtained without prior authorization of the Veterans' Administration as hereinafter comprehended, will be adjudicated in the office of the branch medical director except in cases under the jurisdiction of central office which will be adjudicated in the office of the chief medical director.

(b) Chief medical officers of regional offices and centers with regional office activities upon receiving such claims will be required to develop them as hereinafter instructed (§ 25.6148 (a) and (b)), before forwarding them to the office of the branch medical director or the chief medical director, central office. Claims for services rendered in foreign countries will be developed in the out-patient administration division, central office.

A new paragraph (c) is added, and former paragraph (c) is renumbered (d), as follows:

(c) Claims not exceeding $500 in amount will be reviewed and approved or disapproved by the chief or assistant chief of the out-patient division of each branch office or by the chief or assistant chief of the out-patient administration division, office of the chief medical director, central office. If the claim exceeds $500 in amount the recommendation for approval will be submitted by the chief or assistant chief, out-patient division in the branch office, to the branch medical director or by the assistant medical director for auxiliary services, central office, to the chief medical director or his designate.

(d) Appeals-Claims, as defined in § 25.6141 will be subject to one review after an adverse decision, upon appeal to the Administrator. Appeals must be entered within one year from the date of notification to the claimant or his representative of the original adverse decision and the claimant or representative will be so advised. No claim that had been finally denied prior to March 20, 1933, will be reopened or reconsidered. A claim will be deemed to have been finally denied when (1) Original adjudication or appellate action was taken adversely, and proper appeal was not entered prior to March 20, 1933, or within one year from the date on which the claimant was notified of the adverse action, whichever is the later date; or (2) when the claim was finally denied on appeal prior to March 20, 1933 (Pub. Law 307, 74th Cong., 49 Stat. 724).

§ 25.6141 *Classes of claims comprehended.* Claims for reimbursement of or payment for medical treatment (including the necessary travel incidental thereto) obtained without prior authorization from the Veterans' Administration, except as provided in paragraphs (d) and (e) of this section will be considered under the following conditions:

No change in paragraphs (a) and (b).

(c) As to unauthorized treatment rendered subsequent to March 19, 1933, the eligibility criteria defined in paragraphs (b) (1), (2), and (3) of this section will apply; and, in addition, it must be shown by a decision of an adjudicative agency that the disability from the disease or injury for which treatment had been rendered was service-connected, or determined by the medical officers designated in § 25.6140 (c) as aggravating such service-connected disability.

No change in paragraphs (d) and (e).

§ 25.6145 *Statement to support claims*—(a) *Nursing services.* To support a claim for unauthorized medical service when a nurse had been employed, a statement will be required from the attending physician showing necessity for such nurse, and whether she was a registered graduate or a so-called "practical nurse." When for any good reason, it is not practicable to procure such statements and in the judgment of the physician reviewing the claim as prescribed in § 25.6140 (c) the need for a nurse is sufficiently established, the latter may so certify. Payment for service of a "practical nurse" will be allowed only in the exceptional cases wherein a registered graduate nurse could not be engaged.

(b) *Room and board.* Where in claims for services rendered prior to May 15, 1947, the fee charged for room and board exceeds $3 per diem, the excess will not be allowed unless there is submitted a statement from the attending physician or superintendent of the hospital concerned that the veteran's condition demanded the use of a semi-private or private room, or in the judgment of the reviewing physician the necessity therefor is sufficiently established

by the evidence of record, in which event fees of $4.00 and $5.00, respectively, may be allowed. However, this provision will not prohibit approval of a fee exceeding $5.00 in exceptional and meritorious cases.

(c) *Visits made outside of a city or town.* All claims involving additional fees for visits made outside of a town or city limits prior to May 15, 1947, should show the time consumed by the physician in actual travel as required by the Schedule of Fees, Veterans' Administration in effect at the time such services were rendered.

(d) *Prescriptions, drugs and laboratory services.* When reimbursement is claimed for prescriptions, copies of the prescriptions must be supplied, or in lieu thereof, when it is impossible to obtain the prescriptions, an itemized statement from the druggist showing the kind and quantity of medicines furnished may be accepted. All bills for drugs and laboratory services must be fully itemized. No lump sum charges are allowable.

§ 25.6146 *Allowable fees.* (a) In the adjudication of claims for unauthorized medical treatment rendered prior to May 15, 1947, the Schedule of Fees, Veterans Administration, will govern as to allowance for items except as provided in § 25.6141 (e). If the schedule of fees in effect at the time the treatment was rendered did not provide a fee for the particular service, the schedule in effect at the time the claim is being considered will be applied. If the particular service is not covered by the schedule in effect, a fee not in excess of what is reasonable and customarily charged in the community concerned, may be allowed.

(b) In the adjudication of claims for unauthorized medical treatment rendered subsequent to May 15, 1947, fees charged for services may be allowed provided they are considered reasonable and not in excess of those customarily charged the general public for similar services in the locality where rendered. Claims for accommodations in a semi-private or private room must be supported by a statement from the attending physician or superintendent of the hospital concerned that the veteran's condition demanded the use of a private or semi-private room, unless in the judgment of the reviewing physician the necessity therefor is established by the evidence of record.

§ 25.6148 *Development of claims.* (a) Guided by the controlling provisions of §§ 25.6140 to 25.6148, inclusive, the chief, out-patient administration division, central office; the chief medical officer, regional offices and the physician in charge of regional office medical activities at centers or their physician designate will advise claimants whether they have or have not prima facie eligibility to reimbursement or payment of unauthorized medical expenses. If the claim is patently inadmissible (e. g., if made for treatment of a nonservice-connected disability, etc.) the claimant will be so advised and the claim will not be developed. But if the basic facts indicate prima facie eligibility, the employees aforementioned will instruct the claimant as to the submission of VA Form 10–583, if not originally filed and all the supporting exhibits. After these have been checked as satisfactory they will be forwarded with the claimant's files (claims and medical treatment) to the branch office of jurisdiction or to central office if it has been determined that the case is under the jurisdiction of that office, for adjudication. In claims comprehended under § 25.6141 (e) a resume of the pertinent evidence of record will suffice in lieu of the files.

(b) Formal application for reimbursement or payment of unauthorized medical services will be made on VA Form 10–583, Claim for Cost of Unauthorized Medical services. This form will be executed by each creditor who has rendered service for which payment has not been received; or by each person who has paid, from his personal funds, the cost of the unauthorized medical treatment. The claim must be supported by completely itemized bills or statements of account. When a claim is presented by a creditor, it is further required that a statement be supplied, signed by the patient or his representative, certifying to the amounts due and unpaid.

(c) All claims other than those patently inadmissible will be briefed by the claims examiner (medical) in central office and branch offices prior to their submittal, with supporting exhibits and the beneficiaries' files to the employees defined in § 25.6140 (c) for approval or disapproval. The brief will contain a complete description of the claim, all pertinent facts explanatory of the data required in VA Form 10–608, Public Voucher, and an explanation of the audit of the amounts claimed and amounts allowable.

(d) Upon approval of claims an award will be prepared on adjudication VA Form 10–608, Public Voucher, in quadruplicate. The original VA Form 10–608 will be signed in the spaces provided by the claims examiner (medical) as "medical claims adjudicator" and the employee designated in § 25.6140 (c) acting in the capacity of medical claims authorizer. The original (VA Form 10–608) and two copies (VA Form 10–608a) will be forwarded to the branch director of finance service for certification for payment in branch office cases or to the office of the assistant administrator for finance if central office has jurisdiction. In view of such certification surety bonds will not be required for medical claims authorizers. The remaining copy (VA Form 10–608a), VA Form 10–583, the approved brief of facts, all bills, supporting exhibits and correspondence will be filed in the case file. The payee and all interested persons will be fully informed of the action taken.

No change in paragraph (e).

TITLE 49—TRANSPORTATION AND RAILROADS

Chapter I—Interstate Commerce Commission

PART O—ORGANIZATION AND ASSIGNMENT OF WORK

MATTERS RESERVED TO COMMISSION FOR INITIAL DECISION

At a general session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 12th day of May A. D. 1947.

There being under consideration the provisions of the Administrative Procedure Act, approved June 11, 1946 (60 Stat. 237), and particularly sections 2 to 9, inclusive, and sections 11 and 12 thereof; also those provisions of sections 17 and 205 of the Interstate Commerce Act (49 U. S. C. 17, 305), as amended, which require certain types of proceedings to be determined on the record after opportunity for hearing,

The Commission hereby finds and determines that the general rule hereinafter set out concerning the assignment of its work is necessary and proper in order that the Commission shall be enabled to conduct its proceedings, and particularly those that are required to be determined on the record after opportunity for a hearing in such manner as will best conduce to the proper dispatch of business and to the ends of justice; and that such general rule is requisite for the order and regulation of proceedings before the Commission, or assigned or referred to an individual Commissioner, or a board, or an examiner, as authorized by section 17 of the Interstate Commerce Act (49 U. S. C. 17), namely: *It is ordered*, That:

The order of the Commission as to assignment of work, entered June 8, 1942, pursuant to the provisions of section 17 of the Interstate Commerce Act (49 U. S. C. 17), as amended, codified as 49 CFR, Cum. Supp., Part O, is further amended by adding thereto, codified as § 0.4a, the following additional provision namely:

§ 0.4a *Matters reserved to the Commission for initial decision under sections 7 and 8, Administrative Procedure Act.* All proceedings of the character in which, by provisions of the Administrative Procedure Act (60 Stat. 237), a hearing is required to be conducted in conformity with section 7, and a decision to be made as provided in section 8 of that act, shall be and are reserved to the Commission for initial decision, and for such purpose of initial decision may be assigned to a division, individual Commissioner, or board, as provided in section 17 of the Interstate Commerce Act (49 U. S. C. 17), by the general order of the Commission as to assignment of work, business, or functions. The following are excepted from the foregoing reservation: (a) Proceedings required by section 205 of the Interstate Commerce Act (49 U. S. C. 305) to be submitted to joint boards; and (b) specific cases, or classes of cases, as to which the Commission may order exemption from the operation of this general rule. For the purpose of such initial decision, the record in a proceeding so reserved shall be considered as certified to the Commission for initial decision when received by the Secretary of the Commission for filing in the docket. Such certification shall not be construed as relieving the officer from the necessity of submitting such recommended, tentative, or other type of report (consistent with the requirements of the Administrative Procedure Act) as the Commission shall previously have directed him to prepare in the proceeding. In individual proceedings involving rule-making as defined in section 2 (c) of the Administrative Procedure Act, and in determining applications for initial licenses, the Commission, or the division, individual Commissioner, or board, or examiner, to which or whom a particular proceeding may have been assigned under section 17 of the Interstate Commerce Act (49 U. S. C. 17), will, as warranted by the second sentence of section 2 (a) of the Administrative Procedure Act (60 Stat. 237), determine (c) whether there shall be a tentative decision by the Commission, or by a division, individual Commissioner, or board, or examiner, to whom the proceeding may be referred or assigned, or (d) whether there shall be a recommended decision by designated responsible officers of the Commission; and (e) in any case the Commission, or the division, Commissioner, or board, may find upon the record that due and timely execution of the functions of the Commission imperatively and unavoidably requires that a tentative or recommended decision be omitted in that case.

Effective date. The foregoing amendment and general rule shall become effective June 10, 1947, upon publication thereof in the FEDERAL REGISTER, and shall apply to all proceedings, initiated after that date, of a character subject to the application of sections 7, 8, and 11 of the Administrative Procedure Act (60 Stat. 237).

§ 300.17 *Delegation of authority to State Director of the Farmers Home Administration for Washington and Oregon to sell certain lands in Jefferson County, Oregon.* Pursuant to the authority vested in the Administrator of the Farmers Home Administration by the Acting Secretary's Delegation of Authority issued May 2, 1947 (12 F. R. 3047), covering certain therein described lands located in Jefferson County, Oregon, and pursuant to the Order of the Secretary issued October 14, 1946 (11 F. R. 12520), *It is hereby ordered*, That:

(a) Subject to the provisions of this section all of the functions, powers, duties, and responsibilities conferred upon the Administrator of the Farmers Home Administration with respect to said lands and loans for the acquisition and improvement thereof shall be exercised and performed by the State Director of the Farmers Home Administration for the States of Washington and Oregon. In exercise of this authority the State Director shall:

(1) Determine, after certification thereof by the County Committee, which of the lands among those described in the aforesaid delegation of authority by the Secretary are suitable for sale to individual purchasers in furtherance of the purposes of Title 1 of the Bankhead-Jones Farm Tenant Act, as amended.

(2) Subdivide suitable lands into economic family-type farm-management units, which shall have a value, as improved, of not in excess of $13,000, none of which shall contain in excess of 160 acres of irrigable land, with boundaries conforming as nearly as may be practicable to General Land Office survey boundaries.

(3) Select applicants to purchase said farms in accordance with existing authority and procedures under Title 1 of the Bankhead-Jones Farm Tenant Act, as amended.

(4) Sell said farms to approved applicants at prices based upon the earning capacity values of the farm units, taking into consideration the improvements necessary to make the farm an economic family-type farm and reimbursable construction and water charges and other fixed charges against the land.

(5) Execute conveyances of said land on behalf of the United States which shall recite his determination of suitability of the land as required in this section; shall reserve all of the interest of the United States in the fissionable materials and at least three-fourths of the interest of the United States in all other minerals in or under said lands, provided that all such interests shall be reserved if the State Director finds that minerals or mineral rights in the area have a commercial value; and shall preserve the lien of the United States for reclamation and irrigation charges.

(6) Make loans for the purchase price and for the costs of the improvement of farm units sold under this section and take and service security therefor, in accordance with the applicable provisions of the Bankhead-Jones Farm Tenant Act, as amended, and existing procedures and instructions of the Farmers Home Administration as nearly as possible, except that:

(i) An option to purchase will not be executed.

(ii) Loan approval will be by the State Director.

(iii) The loan and the borrower's total investment in his farm may exceed the county loan limit but shall not exceed the average value of efficient family-type farm-management units located in Jefferson County, Oregon, as determined by the Secretary of Agriculture (11 F. R. 13611).

(iv) Title insurance will not be required. Title clearance will be effected in accordance with requirements of the representative of the Office of the Solicitor and will include a judgment and lien search against the prospective purchaser and procurement of an abstract continuation through a date showing conveyance of the property to the applicant and execution of the mortgage in favor of the United States. The cost of title clearance shall be paid by the applicant.

(b) The functions, powers, and duties authorized in this section may be performed and exercised by the Acting State Director during the absence of the State Director.

(c) The provisions of this section shall take effect immediately and shall remain in effect until revoked or superseded by order of the Administrator. (Acting Secretary's delegation of authority, May 2, 1947, 12 F. R. 3047; Secretary's order, Oct. 14, 1946, 11 F. R. 12520)

Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders)

EVAPORATED MILK INDUSTRY

TERMINATION OF MARKETING AGREEMENT AND LICENSE [1]

On March 8, 1947, notice of proposed rule making was published in the FEDERAL REGISTER (12 F. R. 1606) regarding the proposed termination of the marketing agreement (Agreement No. 60) and the license (License No. 100) for the evaporated milk industry, both of which became effective June 1, 1935, pursuant to Public Act No. 10, 73d Congress (48 Stat. 34), as amended, hereinafter referred to as the "act." After consideration of all relevant matters presented and other available data, it is hereby found and determined that the aforesaid marketing agreement and license for the evaporated milk industry will, on and after July 1, 1947, no longer tend to effectuate the declared policy of the act.

[1] The marketing agreement and the license for the evaporated milk industry have not been filed with the Division of the Federal Register.

It is, therefore, ordered, That the aforesaid marketing agreement and license for the evaporated milk industry be, and the same hereby are, terminated effective at 11:59 p. m., e. s. t., June 30, 1947, subject, however, to the following conditions:

(1) That such termination shall not affect or waive any right, obligation, duty or liability under the aforesaid marketing agreement or license, or release or extinguish any violation of the aforesaid marketing agreement or license, or affect or impair any right or remedy of the United States, the Secretary of Agriculture, or any other person with respect to any such violation which has arisen or occurred or which may arise or occur prior to the time that such termination becomes effective; and

(2) That if, upon the termination of the aforesaid marketing agreement and license, there are any obligations arising thereunder, the final accrual or ascertainment of which requires further acts by any party subject thereto or any committee thereunder, the power or duty to perform such further acts shall continue notwithstanding such termination, and any such acts required, under the terms of the aforesaid marketing agreement and license to be performed by any committee thereunder, shall be performed by the members of such committees, or, if the Director of the Dairy Branch, Production and Marketing Administration, shall so direct, by such other person, persons or agency as the said Director of the Dairy Branch may designate.

It is hereby further ordered, That the Director of the Dairy Branch, Production and Marketing Administration, be, and he hereby is, authorized (1) to exercise the powers and to perform the duties of the Secretary of Agriculture under sections 12, 13, and 14 of Articles III and IV of the aforesaid marketing agreement and sections 9, 10, and 11 of Articles III and IV of the aforesaid license, and (2) upon the termination of the aforesaid marketing agreement and license, to take such other and further action as may be necessary or appropriate to liquidate and wind up the affairs of any committee established thereunder.

(48 Stat. 31, as amended; 7 U. S. C. 601 et seq.)

Issued at Washington, D. C., this 14th day of May 1947.

[SEAL] N. E. DODD,
Acting Secretary of Agriculture.

PART 927—MILK IN THE NEW YORK METROPOLITAN MARKETING AREA

MISCELLANEOUS AMENDMENTS TO APPENDIX

Pursuant to the provisions of § 927.4 (b) of Order No. 27, as amended (7 CFR, 1945 Supp., 927.1 et seq.; 11 F. R. 11115), regulating the handling of milk in the New York metropolitan milk marketing area, and of the Administrative Procedure Act (60 Stat. 237), a public meeting was held at New York, N. Y., on February

25, 1947 to consider certain proposals to amend the rules and regulations, as amended (7 CFR, 1945 Supp., 927—Appendix A; 12 F. R. 457) which have been previously issued under said Order No. 27, as amended. Such public meeting was recessed on February 26, 1947 and was reopened and adjourned on March 27, 1947. Following such meeting and on April 16, 1947, the market administrator of said order, as amended, issued the tentative amendment, set forth in Appendix A attached hereto and made a part hereof, to the aforesaid rules and regulations, as amended. Due consideration having been given to the data, views, and arguments presented at said public meeting, the aforesaid tentative amendment to the said rules and regulations, as amended, is hereby approved and shall be effective on and after the 1st day of June 1947.

Order 27, as amended, requires that such rules and regulations, and amendments thereto, shall become effective on the first day of the month following their approval by the Secretary of Agriculture. It further appears that, in accordance with Order 27, the tentative amendment was issued and sent, on or about April 16, 1947, to all handlers operating pool plants. It is therefore found and determined that the effective date fixed herein for the said amendment, namely, June 1, 1947, is reasonable and proper in the circumstances and that to defer the effective date of the said amendment to a date thirty days or more after publication in the FEDERAL REGISTER would be impracticable, unnecessary, and contrary to the public interest.

Copies of the tentative amendment to the rules and regulations may be procured from the Market Administrator, 205 East 42nd Street, New York, N. Y.

(48 Stat. 31, 670, 675; 49 Stat. 750; 50 Stat. 246; 7 U. S. C. 601 et seq.; 7 CFR, 1945 Supp., 927.1 et seq.)

Done at Washington, D. C., this 14th day of May 1947.

[SEAL] N. E. DODD,
Acting Secretary of Agriculture.

C. 228j), § 208.13 and § 237.102 (c) of the Regulations of the Railroad Retirement Board under such act (12 F. R. 859, 2017) are amended by Board Order 47-157 dated April 10, 1947, to read as follows:

§ 208.13 *"Any regular employment" defined.* "Regular employment" as used in this part and Part 237 of this chapter means full or part time service for remuneration by an individual in the employ of another on a continuing or recurring basis. For the purposes of this section, an individual performing service for remuneration, whether or not under a contract, shall be deemed to be in the employ of another unless such service is performed as a part of his independently established trade, business or occupation; and in the absence of evidence to the contrary, an individual shall be presumed to be regularly employed if he has been paid remuneration by one or more employers (other than an employer under the act) of not less than $200 in each of two consecutive calendar quarters. (Secs. 1, 2, 10, 50 Stat. 308, 310, 314; as amended by secs. 203, 205, Pub. Law 572, 79th Cong.; 45 U. S. C. 228a, 228b, 228j)

§ 237.102 *Completely insured status.*

* * *

(c) *Current connection with the railroad industry.* A deceased employee had a current connection with the railroad industry at the time of his death if he had had a period of thirty consecutive calendar months which met certain requirements set out in the act. First of all, that period must have been before any retirement annuity began to accrue to the employee, or before the month in which he died, if that occurred first. Secondly, he must during that period have been in service as an employee in at least twelve calendar months. A third requirement must have been met if there was any interval between the end of the thirty-month period in question and the month in which a retirement annuity began to accrue to the employee, or the month in which he died, if that occurred first. In that interval the employee must not have been engaged in any regular employment other than employment for an employer; as here used, "regular employment" means full or part-time service, for remuneration, by an individual in the employ of another on a continuing or recurring basis. For the purpose of determining the existence of a current connection, an individual performing service for remuneration, whether or not under a contract, is deemed to be in the employ of another unless such service is performed as a part of his independently established trade, business, or occupation; and in the absence of evidence to the contrary, an individual is presumed to be regularly employed if he has been paid remuneration by one or more employers (other than an employer under the act) of not less than $200 in each of two consecutive calendar quarters.

Even though the deceased employee had no period of thirty consecutive calendar months which met the requirements discussed above, he may, nevertheless, have had, at the time of his death, a current connection with the railroad industry for the purposes of this part. This will be true if the employee was not fully insured under the Social Security Act, but met all the requirements (aside from that of current connection with the railroad industry) of a completely insured status under paragraph (d) of this section. It will also be true if the employee was neither fully insured nor currently insured under the Social Security Act, but met all the requirements (aside from that of current connection with the railroad industry) of a partially insured status under § 237.103. Finally, it will be true if the employee had no wage quarters of coverage. (Sec. 10, 50 Stat. 314; 45 U. S. C. 228j; interprets and applies sec. 213, Pub. Law 572, 79th Cong.)

[Reg. 14,[1] Order 7]

PART 8314—DISPOSAL TO NONPROFIT INSTITUTIONS AND DISCOUNTS FOR EDUCATIONAL OR PUBLIC-HEALTH INSTITUTIONS OR INSTRUMENTALITIES

DISPOSAL OF PERSONAL PROPERTY TO EDUCATIONAL AND PUBLIC-HEALTH INSTITUTIONS AND INSTRUMENTALITIES

War Assets Administration Regulation 14, Order 7, (§ 8314.57) March 3, 1947, as amended April 1, 1947, entitled "Disposal of Personal Property to Educational and Public-Health Institutions and Instrumentalities" (12 F. R. 1805, 2384), is hereby revised and amended as herein set forth.

The War Assets Administrator has determined that there is an urgent need by educational and public-health institutions for various types of equipment, which need in the case of educational institutions has become acute because of an abnormal increase in enrollment in the face of an accelerated obsolescence of existing equipment; that in the case of elementary and secondary educational institutions present facilities are wholly inadequate to provide proper instruction, and existing budgets are insufficient to enable said institutions to purchase the needed equipment; that with respect to public-health institutions a similar situation exists because of increased demands for health services, and the need for suitable equipment is acute.

The War Assets Administrator has further determined that the property which is listed in Exhibit A herein is critically needed by such educational and public-health institutions, that such property is suitable for educational and public-health use, and that it would be of great public benefit to make such property available to said institutions at a nominal price.

In view of the foregoing considerations the War Assets Administrator finds that the benefit which will accrue to the United States from the use of such property by educational and public-health institutions justifies disposal to them of such property at a nominal price, approximately sufficient to cover the cost of disposition, and that such nominal price should be five (5) percent of the fair value of the property as established by the disposal agency.

Pursuant to the foregoing, it is hereby ordered that:

§ 8314.57 *Disposal of personal property to educational and public-health institutions and instrumentalities.* (a) Notwithstanding the provisions of § 8314.9 of this part, disposal agencies, after making such provisions as may be necessary for offerings to priority claimants in accordance with the provisions of Part 8302,[2] are hereby authorized to sell property listed in Exhibit A herein to educational and public-health institutions and instrumentalities, as defined in § 8314.1, whose orders have been approved by the War Assets Administration, at a price equivalent to five (5) percent of the fair value thereof, f. o. b. location.

(b) In considering applications or orders of individual educational institutions or instrumentalities for property listed in Exhibit A, special consideration shall be given to the needs of elementary and secondary educational institutions.

(c) When any of the property listed in Exhibit A herein is or shall be in conflict with any list of property set aside for veterans under § 8302.59[3] as now or hereafter in effect, the provisions of § 8302.59 shall be controlling.

(Surplus Property Act of 1944, as amended (58 Stat. 765, as amended; 50 U. S. C. App. Sup. 1611); Public Law 181, 79th Cong. (59 Stat. 533); 50 U. S. C. App. Sup. 1614a, 1614b); and E. O. 9689 (11 F. R. 1265))

This revision of this order shall become effective May 13, 1947.

Administrator.

SUBPART 12.01—GENERAL PROVISIONS

§ 12.01-1 *Basis and purpose.* Pursuant to the authority of section 207 of Pub. Law 601, 79th Cong., 2d Sess., approved August 2, 1946, regulations are hereby prescribed to provide a procedure to correct any military or naval record wherein it appears that such action is necessary to correct an error or to remove an injustice in accordance with the intent of the statute and to obtain its correct and uniform administration.

§ 12.01-5 *Jurisdiction.* (a) By virtue of the authority of said section 207 a Board for the Correction of Military Records of the Coast Guard, hereinafter known as the Board, has been established within the Office of the Secretary of the Treasury to review, upon its own motion, or upon request by or on behalf of any officer, or enlisted man or woman, or former officer, enlisted man or woman of the Coast Guard (including its reserve components), or, if deceased, by the surviving spouse, next of kin or legal representative concerned, or if incompetent, by the guardian, petitions for the correction of the military record of the individual where an error exists or an injustice is claimed.

(b) The Board shall not review any case which would bring it into conflict with the powers and authority of any statutory board, or with the jurisdiction of any other board which has been empowered by the Secretary of the Treasury or the Commandant, U. S. Coast Guard, to take final action in any class of cases. Thus, the jurisdiction will not include review of reports or decisions of:

(1) Boards of Review:

(i) Of Discharges and Dismissals (Sec. 301, Pub. Law 346, 78th Cong.)

(ii) Retirement Boards and Boards of Medical Survey (Sec. 302a, Pub. Law 346, 78th Cong., as amended by section 302a, Pub. Law 268, 79th Cong.)

(2) Boards for Removal of Disability of Desertion (14 U. S. C. 147)

(3) Retiring Boards (14 U. S. C. 170)

(4) Examining Boards (14 U. S. C. 18)

(5) Coast Guard Personnel Boards (officers 14 U. S. C. 175b)

(6) Coast Guard Enlisted Personnel Board (14 U. S. C. 185)

(7) Involuntary Retirement Boards (Sec. 3, Pub. Law 305, 79th Cong.) or

(8) Medical Survey Boards (Article 3005, Coast Guard Regulations 1940).

§ 12.01-10 *Scope of review.* (a) The scope of the review shall be to determine whether an error has been made in the Coast Guard records, or whether, under normal standards of military and naval law, administration and practice, the petitioner has suffered a wrong as the result of an error of omission or commission in his record, or through some manifest injustice in the treatment accorded him, and if so, to correct the record and remove the injustice, subject to the approval of the Secretary of the Treasury.

(b) The Board has no authority to recall any person to active duty or to set aside the findings of a general court-martial or a general court.

(c) It shall be adequate ground for denial of any application that effective relief cannot be granted or that sufficient basis for review has not been established.

§ 12.01-15 *Request for review.* (a) The petitioner should submit a written request for a review to the Board (addressed to the Commandant, U. S. Coast Guard (Legal)), Washington 25, D. C., along with such evidence, statements and affidavits as may be necessary to establish his case.

(b) The request should state in brief:

(1) The full name, rank or rating (if enlisted, the serial number should be given), of the person whose record is involved;

(2) A description of the record sought to be corrected;

(3) A particular description of the alleged error or injustice sought to be corrected or removed;

(4) The reason in support of the relief requested;

(5) What action is desired of the Board;

(6) Whether the petitioner desires the review on the basis of the petition and accompanying papers, or whether he desires to appear in person before the Board and/or be represented by counsel;

(7) If counsel is desired, the petitioner should designate such counsel by name; and

(8) The place to which any notices in connection with the review should be sent.

(c) Where the petition is presented by a surviving spouse, next of kin, legal representative or guardian, satisfactory evidence of the required relationship or status must be submitted.

(d) The application shall be executed under oath or shall contain a signed provision that the statements submitted in the application are made with full knowledge of the penalty provided for the making of a false statement.

(e) No request for review will be considered by the Board until the applicant has exhausted all remedies afforded him by existing law or regulation.

(f) An application for the correction of a military record as provided in said section 207 may be refused by the Board on the ground that there has been undue delay in filing the application. (R. S. 161, 35 Stat. 1095 as amended; 5 U. S. C. 22, 18 U. S. C. 80)

§ 12.01-20 *Review on own motion.* (a) The Board shall not conduct a review on its own motion without first transmitting a written notice to the person concerned or, if such person is deceased, to his surviving spouse, next of kin, legal representative or, if such person is incompetent, to his guardian, by registered mail to the last known address, return receipt requested.

(b) Such notice shall state that a review is to be held by the Board and shall advise the addressees that evidence may be presented to the Board in the manner prescribed in this part.

§ 12.01-25 *Methods of presenting case.* (a) The petitioner shall present his case:

(1) By letter with accompanying evidence and necessary affidavits, or

(2) If a hearing is granted by the Board, by presenting evidence before the Board, either in person or by counsel.

(b) Upon application in person at the office of the Board, the Board may furnish to the petitioner or his counsel such information from the official records pertaining to his petition as may be necessary in order to permit of a fair and impartial review. However, classified matter will not be disclosed or made available to the applicant or his counsel. When it is necessary in the interests of justice to acquaint the applicant with the substance of such matter, the Board will obtain and make available to the petitioner or his counsel such summary of the classified matter as, in the judgment of the Board, may be relevant to the case and as will not be incompatible with the public interest.

§ 12.01-30 *Counsel.* The term "counsel" as used in this part, shall include members of the federal or state bar in good standing, accredited representatives of veterans' organizations, and such other persons who, in the opinion of the Board, are considered to be competent to present equitably and comprehensively the claim of the applicant for review.

§ 12.01-35 *Witnesses.* (a) All testimony shall be given under oath or affirmation administered by the presiding officer.

(b) Witnesses shall be subject to examination and/or cross-examination as appropriate, by the members of the Board, the petitioner, his counsel or by the Government representative.

(c) The testimony of witnesses may be presented either in person or by affidavits. (R. S. 183, 5 U. S. C. 93)

§ 12.01-40 *Expenses.* No expenses of any nature whatsoever incurred by the petitioner, his counsel, his witnesses, or by any other person on his behalf, shall be paid by the Government.

§ 12.01-45 *Notice of hearing.* If a hearing is granted, the Board shall give a petitioner at least thirty days written notice of the time and the place of the hearing. Such time shall be computed from the time of mailing of the notice. The petitioner may waive such time limit and an earlier hearing date may be set by the Board.

§ 12.01-50 *Continuances.* A continuance may be granted by the Board on its own motion, or at the request of the petitioner, his counsel or the Government Representative, when such continuance appears necessary in order to insure a full and fair hearing.

§ 12.01-55 *Withdrawal.* The Board may, at its discretion and for good cause shown, permit a petitioner to withdraw his request for review without prejudice at any time before the Board makes its final recommendation.

§ 12.01-60 *Failure of petitioner to appear.* A petitioner who requests a hearing and who, after being duly notified of the time and place of hearing, fails to appear at the appointed time, either in person or by counsel, thereby waives his right to be present and cannot thereafter take exception to the findings or conclusions arrived at in his absence.

§ 12.01-65 *Evidence.* (a) The Board, in its review, shall consider as evidence all available pertinent records of the Coast Guard, together with such evidence as may be submitted by the petitioner and/or his counsel.

(b) Whenever, during a review, it appears to the Board's satisfaction that the facts have not been fully and fairly disclosed in the records and in the testimony and other evidence before the Board, the Board may obtain such further evidence as it may consider essential to a fair and impartial understanding of the facts.

(c) The Board shall not be restricted by legal rules of evidence.

§ 12.01-70 *Duties of Government Representative.* (a) When a Government Representative acts as such before the Board, he may:

(1) Submit to the Recorder of the Board a written brief, when considered warranted, analyzing the evidence presented; or

(2) In cases where the petitioner is present in person or by counsel, submit pertinent evidence in the Government's behalf in proper documentary form, or through witnesses.

(b) In all cases, when he has knowledge of evidence which would substantiate the petitioner's claim he shall disclose such evidence to the Board.

SUBPART 12.05—THE BOARD

§ 12.05-1 *Members.* The Board shall consist of three members, all of whom shall be civilian officers or employees of the Treasury Department.

§ 12.05-5 *Time and place of meeting.* The Board shall be convened at the call of the Senior Member and shall recess and adjourn at his order. The Board shall sit at a time and place to be fixed by the Senior Member.

§ 12.05-10 *Duties of the Board.* (a) The Board shall review, on its own motion or upon the request of an officer, or enlisted man or woman, or former officer, enlisted man or woman of the Coast Guard Service, or if deceased, by the surviving spouse, next of kin, legal representative or if incompetent, by the guardian, the records in question.

(b) In the event a hearing is granted and the petitioner does not appear in person or by counsel, the Board shall review the case on the basis of documentary or oral evidence presented.

(c) In the event a hearing is granted and the petitioner appears in person or by counsel, the Board shall assemble to hear evidence presented.

(d) After the conclusion of such hearings, the Board shall, as soon as practicable, arrive at their findings, conclusions and decisions. Based thereon, the Board shall prepare such orders as may be indicated.

§ 12.05-15 *Changes in procedures of the Board.* The Board may initiate recommendations for such changes in the procedure as established herein as may be deemed necessary for the proper functioning of the Board. Such changes will be subject to the approval of the Secretary of the Treasury.

§ 12.05-20 *Appointing Government Representative.* The Board may, if it appears necessary to the proper presentation of the case, appoint a Government Representative.

SUBPART 12.10—ACTION BY THE BOARD

§ 12.10-1 *Deliberations.* (a) After a full and fair examination of the evidence, the Board shall deliberate in closed session, and shall be governed in its action by the vote of a majority of the Board.

(b) No persons other than members of the Board shall be present at or participate in its deliberations, except the Recorder may be present.

(c) The findings, conclusions, decisions and orders shall be signed by the Senior Member.

(d) In its deliberations the Board shall be guided by the following principles:

(1) Relevant and material allegations appearing in a specification found proved by a general court-martial (or a general court) and the findings of fact of a court of inquiry, board of investigation, or investigation, where the petitioner was in the status of a defendant or interested party, as approved by the reviewing authorities, shall be presumed by the Board as established facts. This shall not preclude consideration by the Board of evidence appearing in the record of proceedings of such a court-martial (or a general court) or investigative body in determining what correction, if any, should be made in respect to the sentence awarded.

(2) Relevant and material allegations appearing in a specification to which the petitioner pleaded guilty in a general court-martial (or a general court), or upon being confronted with such a specification the petitioner elected to resign for the good of the service or to accept a discharge, to escape trial by a general court-martial (or a general court), shall be presumed by the Board as established facts unless the petitioner shall show to the Board's satisfaction, or it shall otherwise appear, that arbitrary or coercive action was taken against him at that time, which was not apparent to the reviewing authority from the face of the record.

(3) The evidence to be considered will be restricted to that covering relevant and material facts concerning the petitioner's Coast Guard service, or his character, conduct, physical condition, or other material matter at the time of his entry into the Coast Guard, during such service, or at the time of separation therefrom.

(4) In order to warrant a change, correction or modification of an original record, it is incumbent on the petitioner to show to the satisfaction of the Board, or it must otherwise satisfactorily appear, that the entry or omission in the record was improper or inequitable under normal standards of military and naval law, administration, and practice existing at the time, or under such standards differing therefrom in the petitioner's favor which subsequent to his separation were made retroactive.

(5) The normal standards of military and naval law, administration and practice herein contemplated are those standards stated in statutes, regulations, manuals, directives of the Coast Guard and other appropriate authority, together with interpretations thereof by the courts, the Attorney General, the Comptroller General, the Judge Advocate General of the Navy, the General Counsel of the Treasury Department, or the Chief Counsel of the Coast Guard.

§ 12.10-10 *Findings of facts.* The Board shall make findings of facts in each case which shall include the following:

(a) Type and nature of error of record and/or injustice found.

(b) Authority under which such error of record or injustice occurred.

(c) Circumstances surrounding the error of record or injustice as found by the Board to be established from all the evidence considered. This includes material and relevant facts showing in what specific particulars the original error or injustice was or was not proper or equitable under normal standards of military and naval law, administration and practice applicable to the case.

(d) Conduct and character of petitioner during the entire period of his Coast Guard service.

(e) Such other facts as may be disclosed which the Board deems necessary and pertinent to the issue in the particular case under consideration.

§ 12.10-15 *Conclusion.* The Board, on the basis of its findings, shall prepare conclusions which shall state:

(a) Whether or not any change, correction, or modification should be made in the record,

(b) Where pertinent, the particular change, correction or modification that should be made, and

(c) The reasons why a change, correction or modification should or should not be made.

(d) This should not include comments on the actions of others in the Coast Guard Service. Where such comment is warranted, it should be made the subject of an official communication entirely independent of the petitioner's case.

§ 12.10-20 *Decision.* The Board shall next record its decision. The nature of any change, correction or modification of the record shall be specified with particularity, and such other action shall be taken within the Board's authority as may be deemed necessary to correct insofar as practicable the injustice established.

§ 12.10-25 *Minority report.* In case of a disagreement between the members of the Board a minority report may be

submitted, either as to the findings of fact, the conclusion, or the decision. The reasons for the minority report must be clearly stated.

§ 12.10–30 *Orders.* Written orders based on the decision shall be prepared for transmittal to the proper Coast Guard authority.

§ 12.10–35 *Record of proceedings.* (a) When the Board has concluded its proceedings, the Recorder shall prepare a complete original record thereof. Such record shall include:

(1) The petition,

(2) A summary of the hearing, if any,

(3) Affidavits and a list of the papers and documents considered by the Board, and

(4) The findings, conclusions, decisions and orders of the Board.

(b) The record will be authenticated by the Recorder as being true and complete.

(c) The record of proceedings of the Board and the action transmitting the record to the Secretary of the Treasury for action shall not contain recommendations of any character which relate to matters beyond the scope of the Board's authority. To the extent that such recommendations are warranted, they should be made a matter for separate communication with the departmental agency having cognizance of the subject matter but should not be associated with the records of the petitioner before the Board.

§ 12.10–40 *Transmittal of record.* The original record of the proceedings in each case shall be transmitted forthwith by the Senior Member of the Board to the Secretary of the Treasury, via the Commandant, U. S. Coast Guard, for final action.

SUBPART 12.15—THE SECRETARY OF THE TREASURY

§ 12.15–1 *Action by the Secretary of the Treasury.* (a) The Secretary of the Treasury will direct such action in each case as he determines to be appropriate, including the return of the record to the Board for further consideration when deemed necessary.

(b) The procedure of the Board on such further consideration will conform as nearly as practicable to that heretofore prescribed, except that the scope of the action of the Board will be limited to the matters specified by the Secretary of the Treasury in the directive ordering such reconsideration.

(c) The Secretary of the Treasury, after his final action, will return all records to the Board. The Board will notify the petitioner of the action taken in his case, then return all records to the proper Coast Guard authority, for the following administrative acts:

(1) Carry out the orders of the Board in respect to the petition in question.

(2) Place copies of the Board's orders and of the record of proceedings in the service record of the petitioner. A reference shall be made in the copy of the Board's report of all enclosures or exhibits which are to be filed elsewhere.

SUBPART 12.20—THE RECORDER

§ 12.20–1 *Duties of the Recorder.* (a) The Recorder is not a member of the Board. He shall:

(1) Carefully summarize the testimony presented at hearings;

(2) Prepare the findings, conclusions, decisions and orders of the Board; and

(3) Perform such other duties as may be assigned to him by the Senior Member.

(b) In those instances where the petitioner presents his case by letter and affidavits, the Recorder shall act as the petitioner's representative. As such he shall:

(1) Submit pertinent evidence in the petitioner's behalf in proper documentary form, or orally; or

(2) Submit a written brief, when considered warranted, analyzing the evidence presented.

REMOVAL OF TRESPASSING HORSES IN OCHOCO NATIONAL FOREST AND TEMPORARY CLOSURE FROM LIVESTOCK GRAZING

Whereas a number of horses are trespassing and grazing on land in the Silver Creek-Buck Mountain Cattle Allotment, Snow Mountain Ranger District, Ochoco National Forest, in the State of Oregon; and

Whereas these horses are consuming forage needed for permitted livestock, are causing extra expense to established permittees, and are injuring national forest lands;

Now, therefore, by virtue of the authority vested in the Secretary of Agriculture by the act of June 4, 1897 (30 Stat. 35; 16 U. S. C. 551) and the act of February 1, 1905 (33 Stat. 628, 16 U. S. (b) Officers of the United States Forest Service are hereby authorized to dispose of, in the most humane manner, all horses found trespassing or grazing in violation of this order.

(c) Public notices of intention to dispose of such horses shall be given by posting notices in public places or advertising in a newspaper of general circulation in the locality in which the Ochoco National Forest is located.

TITLE 46—SHIPPING

Chapter I—Coast Guard: Inspection and Navigation

[CGFR 47–29]

Appendix A—Waivers of Navigation and Vessel Inspection Laws and Regulations

MERCHANT CARGO AND TANK VESSELS

CONDITIONAL WAIVER OF MANNING REQUIREMENTS

Pursuant to the authority vested in the Commandant, U. S. Coast Guard, by the act of March 31, 1947 (Public Law No. 27, 80th Congress), I hereby find it necessary in the orderly reconversion of the merchant marine from wartime to peacetime operations to cancel, effective June 1, 1947, the order dated April 8, 1943, as amended, (8 F. R. 4736), which conditionally waived certain of the manning requirements with respect to merchant cargo and tank vessels engaged in business connected with the conduct of the war; *Provided*, That nothing herein shall impair the continuing effectiveness of waivers effectuated on or before June 1, 1947 pursuant to said order of April 8, 1943, as amended.

Pursuant to the authority vested in the Commandant, U. S. Coast Guard, by the act of March 31, 1947 (Public Law No. 27, 80th Congress), I find, further, that the waiver of the navigation and vessel inspection laws and regulations administered by the Coast Guard is necessary in the orderly reconversion of the merchant marine from a wartime to normal peacetime basis, to the extent and in the manner and upon the terms and conditions set forth in the succeeding numbered paragraphs.

1. *Purpose of waiver.* It has been determined upon investigation that there is a shortage of experienced and qualified personnel in the merchant marine industry and that as a result of such shortage the masters of merchant cargo vessels and tank vessels engaged in any trade or commerce deemed necessary in the orderly reconversion of the merchant marine from wartime to peacetime operations have been unable to obtain the number of experienced personnel required for their vessels by or pursuant to law or regulation. Therefore, to avoid delays in the sailings of such merchant vessels, to insure that such vessels have on board the best qualified crews available, to provide a simplified and uniform procedure for accomplishing the foregoing and otherwise to further the orderly reconversion of the merchant marine, this Conditional Waiver of Manning Requirements is issued.

2. *Vessels affected.* All merchant cargo and tank vessels registered, or enrolled and licensed under the laws of the United States shall be considered to be engaged in a trade or commerce associated with the reconversion of the merchant marine from wartime to peacetime operations so long as this Conditional Waiver of Manning Requirements remains in effect, or unless a local representative of the United States Maritime Commission informs the appropriate Coast Guard District Commander or Officer in Charge, Marine Inspection, that a particular vessel or vessels in either of such classes should not be so included. This waiver is inapplicable to all ocean and coastwise passenger vessels and vessels carrying troops.

3. *Extent, terms, and conditions of waivers.* The master of any cargo vessel or tank vessel engaged in any trade or commerce associated with the reconversion of the merchant marine from wartime to peacetime operation may if such action is necessary to permit such vessel to sail without delay substitute for any licensed officer required as part of the complement of such vessel by or pursuant to law or regulation, any licensed officer of lower rank who is an American citizen or any certificated seaman who is an American citizen, and, may substitute for any rated seaman required as part of the complement any certificated seaman of lower rating provided that any such substitution is within the citizenship requirements established pursuant to law: *Provided*, That (a) the deficiency in complement is not caused by the consent, fault or collusion of the master, owner or any other person interested in the vessel, (b) the master, over a reasonable period prior to the time fixed for the signing on of his crew, makes every reasonable effort to obtain such required licensed officer or rated seaman, (c) the person substituted for such required licensed officer or rated seaman is, in the opinion of the master, the best qualified substitute therefor that the master could obtain, (d) the master is of the opinion that the vessel is sufficiently manned for the contemplated voyage, and (e) the master, prior to departure prepares, executes, certifies, and files with, or sends to the Shipping Commissioner before whom the crew was signed on or, in cases when the crew is not required to be signed on before a Shipping Commissioner, to the nearest Officer in Charge, Marine Inspection, two copies of a report of each substitution made. One copy of such report shall also be submitted to the Collector of Customs at the time when application for clearance is made. In making such report Coast Guard Form 729 shall be used.

4. *Penalties.* The failure of the master of any vessel departing with a deficiency in the required complement therefor to execute and submit the reports required hereunder, or a false certification in any such report by such master shall be considered misconduct within the meaning of R. S. 4450, as amended, 46 U. S. C. 239, and shall constitute grounds for suspension or revocation of the license of such master; and shall subject him and the owners to all other penalties provided by law. No penalty shall be imposed as a consequence of any substitution made in accordance with this regulation.

5. *Effective date.* This order shall be in effect on and after June 1, 1947. Because of the technical character of this revision of regulations, and because of the urgency of providing waiver authority in order to effectuate the orderly reconversion of the merchant marine to peacetime operations, it is found that compliance with the notice, public rule making procedure, and effective date requirements of the Administrative Procedure Act (Public Law 404, 79th Cong.; 60 Stat. 237) is impracticable and contrary to the public interest.

(Pub. Law 27, 80th Cong.)

Dated: May 14, 1947.

PROCEDURES FOR EFFECTING INDIVIDUAL WAIVERS OF NAVIGATION AND VESSEL INSPECTION LAWS AND REGULATIONS

Pursuant to the authority vested in the Commandant, U. S. Coast Guard, by the act of March 31, 1947 (Public Law No. 27, 80th Congress), I hereby find it necessary in the orderly reconversion of the merchant marine from wartime to peacetime operations to cancel, effective June 1, 1947, the order dated July 1, 1943, as amended (8 F. R. 9164), which, subject to certain conditions, waived compliance with navigation and vessel inspection laws with respect to vessels engaged in business connected with the conduct of the war; provided that nothing herein shall impair the continuing effectiveness of waivers effectuated on or before June 1, 1947, pursuant to said order of July 1, 1943, as amended.

Pursuant to the authority vested in the Commandant, U. S. Coast Guard, by the act of March 31, 1947 (Public Law No. 27, 80th Congress), I find, further, that the waiver of compliance with the navigation and vessel inspection laws administered by the Coast Guard is necessary in the orderly reconversion of the merchant marine from a wartime to normal peacetime basis, to the extent and in the manner and upon the terms and conditions set forth in the succeeding numbered paragraphs:

1. An application requesting that a waiver be made effective with respect to a particular vessel may be made by any authorized representative of an agency of the United States Government or any other interested person (including the master, agent, or owner of the vessel involved). Except as provided in paragraph 3, the application shall be in writing. The application shall be delivered to the Coast Guard District Commander or to his designated representative at the port or place where the vessel is located. In the case of vessels in any port or place of the Canal Zone or in any foreign port or place, the application shall be made to the designated representative of the Commandant at such port or place or if the Coast Guard has not established facilities in such port or place to the nearest designated representative of the Commandant at a port or place where such facilities have been established. Every application shall contain a statement of the particular provisions of law with respect to which waiver of compliance is requested, a certification that the waiver of compliance with such laws with respect to the vessel involved is necessary in the orderly reconversion of the merchant marine, and an outline of the facts upon which such certification is based. The Coast Guard District Commander (or his designated representative, or the designated representative of the Commandant, as the case may be) shall promptly examine every application for the purpose of determining whether the necessity for prompt action is such as to require that the waiver be made effective by him without reference to Headquarters. In any case in which it appears to the Coast Guard officer concerned that reference of the application to Headquarters for action would not delay the sailing of the vessel or otherwise impede the orderly reconversion of the merchant marine, the application shall be so referred. In all other cases such Coast Guard officer shall give immediate consideration to the application and if he reaches the conclusion that urgency of the situation outweighs the marine hazard involved, then such waiver shall be effective in regard to such vessel to the extent and under the circumstances specified by him.

2. The Coast Guard officer making such waiver effective pursuant to paragraph 1 shall immediately prepare, in triplicate, an order setting forth the name of the vessel involved, the laws with respect to which the waiver is effective, the extent to which compliance with such laws is waived, and the period for which the waiver shall be effective. If practicable, one copy of this order shall be delivered to the master of the vessel involved before such vessel sails. In cases where the order is not delivered to the master, it shall be delivered to the owner, operator, or agent of the vessel without delay. One copy of the order shall be transmitted to Coast Guard Headquarters and the remaining copy kept on file.

3. In cases of extreme urgency the application for waiver may be made orally, and if the Coast Guard District Commander or such representative reaches the conclusion referred to in paragraph 1, the waiver shall be effective without further delay, subject to a condition subsequent that the application be reduced to writing and delivered within such period after the date of the oral request as the Coast Guard officer making the waiver effective shall specify in the order.

4. No penalty shall be imposed because of failure to comply with any provision of law the waiver of which has been made effective pursuant hereto.

5. This order shall be in effect on and after June 1, 1947. Because of the technical character of this revision of regulations, and because of the urgency of providing waiver authority in order to effectuate the orderly reconversion of the merchant marine to peacetime operations, it is found that compliance with the notice, public rule making procedure, and effective date requirements of the Administrative Procedure Act (Public Law 404, 79th Cong.; 60 Stat. 237) is impracticable and contrary to the public interest.

PROPOSED RULE MAKING

FEDERAL POWER COMMISSION

[18 CFR, Part 125]

[Docket No. R-104]

PRESERVATION OF RECORDS OF PUBLIC UTILITIES AND LICENSEES

NOTICE OF PROPOSED RULE MAKING

MAY 13, 1947.

1. Notice is hereby given of proposed rule making in the above-entitled matter.

2. In 1938 the Commission, acting pursuant to authority vested in it by the Federal Power Act, particularly section 301 (a) thereof (49 Stat. 854; 16 U. S. C. 825 (a)), adopted its Order No. 54 prescribing regulations to govern the Preservation of Records of Public Utilities and Licensees, effective August 1, 1938. These regulations or rules were served upon the affected utilities and licensees, and were published in the FEDERAL REGISTER (3 F. R. 2421-29); they were incorporated in the Code of Federal Regulations (1938 Supplement) as "Part 125—Preservation of Records of Public Utilities and Licenses," Subchapter C of Chapter I, Title 18 of the said Code (18 CFR 125.0-125.2).

3. The rules as promulgated in 1938 were developed after consultation and in collaboration with the Committee on Statistics and Accounts of the National Association of Railroad and Utilities Commissioners. In recent years the foregoing Committee, particularly members of the Commission's staff, acting on behalf of the Committee h[illegible] conferred on numerous occasions with representatives of public utilities and licensees concerning suggested revisions of the rules of the Commission relating to the preservation of records, it being urged by the utility representatives that the problem of retaining old records was becoming a very burdensome and expensive one. After the study of the matter, the Committee on Statistics and Accounts recommended to the National Association that the retention periods for certain types of records should be revised—the periods shortened in most instances. The suggested revisions were approved by the NARUC at its last convention, November 13-15, 1946, San Francisco, California.

4. It appearing that it may be appropriate and consistent with the public interest to revise the retention periods for certain types of records of the public utilities and licensees subject to the jurisdiction of the Commission, it is proposed that the Commission adopt and prescribe by rule the modified retention periods recommended and approved by the NARUC. To make effective such periods, it is proposed to amend § 125.2 "Schedule of records and periods of retention," of the aforesaid Part 125 of Title 18 of the Code of Federal Regulations, to provide for changes as follows:

CAMBRIDGE ELECTRIC LIGHT CO. AND CAMBRIDGE GAS LIGHT CO.

MEMORANDUM OPINION AND ORDER APPROVING APPLICATION AND DECLARATION AND PERMITTING THEM TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 13th day of May A. D. 1947.

Cambridge Electric Light Company ("Cambridge Electric") and Cambridge Gas Light Company ("Cambridge Gas"),

subsidiaries of New England Gas & Electric Association ("New England"), a registered holding company, have filed an application-declaration pursuant to sections 10 and 12 of the Public Utility Holding Company Act of 1935 and Rule U-43 promulgated thereunder, with respect to an intercompany sale and purchase of a parcel of land, as more fully described below.

After appropriate notice a public hearing was held and the Commission having considered the record makes the following findings:

New England, organized under the laws of Massachusetts, is solely a holding company owning investments in fourteen subsidiaries which conduct utility operations and own properties in the States of Massachusetts, New Hampshire, and Maine. It owns all of the outstanding securities of the two applicant companies both of which are organized under the laws of Massachusetts.

Cambridge Electric is engaged solely in the generation, distribution, and sale of electricity at retail in the City of Cambridge and wholesale to the Town of Belmont, both in Massachusetts.

Cambridge Gas is engaged solely in the production, distribution, and sale of gas at retail in the Cities of Cambridge and Somerville, Massachusetts.

Cambridge Electric proposes to acquire from Cambridge Gas for $154,388.75 a parcel of land upon which Cambridge Electric proposes to erect a steam generating plant. This land is presently carried on the books of Cambridge Gas at $56,467.21, which amount is stated to be based upon the average cost of the parcels comprising the gas works land. It is stated that the sale and purchase price of this land was established on the basis of an appraisal made by an independent real estate appraiser. Cambridge Gas proposes to credit its surplus with the profit on the sale of the land in the amount of $97,921.54, and Cambridge Electric proposes to debit its property, plant, and equipment account with the cost to it of $154,388.75.

The proposal before us, thus, contemplates the transfer of an asset between one entirely owned subsidiary of a holding company and another entirely owned subsidiary of the same holding company at a profit of approximately 175 percent in excess of the cost to the system. For present purposes, we consider both companies to be merely departments of New England and, viewing the system as a whole, the proposed transfer at a profit must be regarded in the nature of a write-up[1] which would be properly classified in Account 107 of the Uniform System of Accounts prescribed for electric utility companies by the Federal Power Commission and recommended by the National Association of Railroad and Utilities Commissioners. Under the circumstances and considering the potentialities of abuse present in the intrasystem profits of the nature involved here (cf. section 1 (b) of the act), we are of the opinion that the proposed transaction should be so modified as to eliminate its inflationary aspects. Accordingly, we will require, as a condition to our approval of the proposed transaction, pursuant to sections 12 and 10 of the act, that the proposed sale and acquisition be consummated only upon the basis of cost to the vendor company.

[1] Cf. United States, et al. v. New York Telephone Company, 326 U. S. 638 (1945).

It is ordered, That the said application and declaration be, and hereby are, approved and permitted to become effective forthwith, subject to the condition that the proposed sale by Cambridge Gas to Cambridge Electric be consumated only upon the basis of cost to the vendor company.

By the Commission.

SOUTHERN CALIFORNIA WATER CO.

SUPPLEMENTAL ORDER RELEASING JURISDICTION

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa., on the 13th day of May A. D. 1947.

Southern California Water Company ("Southern California"), a public utility subsidiary company of American States Utilities Corporation, a registered holding company, having filed an application and amendments thereto pursuant to section 6 (b) of the Public Utility Holding Company Act of 1935 and Rule U-50 promulgated thereunder regarding the issuance and sale at competitive bidding of $5,100,000 principal amount of First Mortgage Bonds, —% Series due May 1, 1977; and

The Commission having by order dated April 28, 1947, granted said application, as amended, subject to the condition that the proposed issuance and sale of bonds should not be consummated until the results of competitive bidding pursuant to Rule U-50 shall have been made a matter of record in this proceeding and a further order shall have been entered by the Commission in the light of the record so completed and subject further to the reservation of jurisdiction with respect to the fees and expenses in connection with the issuance and sale of the new bonds; and

Southern California having filed an amendment to its application setting forth the action taken to comply with the requirements of Rule U-50 and stating that pursuant to the invitation for competitive bids, six bids on said bonds by six groups of underwriters headed by the firms set forth below were received:

Underwriting group	Coupon rate	Price to company (percent of principal amount)	Annual cost to company
	Percent		*Percent*
Blyth & Co., Inc.	2¾	102.08	2.7727
Harris, Hall & Co., Inc.	2¾	101.886	2.7821
The First Boston Corp.	2¾	101.779	2.7874
Halsey, Stuart & Co., Inc.	2¾	101.73	2.7897
Paine, Webber, Jackson & Curtis	2¾	101.5599	2.7980
W. C. Langley & Co.	2¾	100.416	2.8542

The said amendment having stated further that Southern California has accepted the bid of the group headed by Blyth & Co. Inc., as set out above, and that the bonds will be offered for sale to the public at a price of 102.75% of the principal amount thereof, resulting in an underwriters' spread of .67% of the principal amount of said bonds; and

The Commission having examined the record herein and finding no basis for imposing terms and conditions with respect to the price to be paid to Southern California for said bonds, the interest rate thereon, the underwriters' spread and the redemption prices; and the Commission having examined the record with respect to the estimated fees and expenses in connection with said bond issue and the proposed legal fee of Messrs. Davis, Polk, Wardwell, Sunderland & Kiendl, counsel for the successful bidder; and it appearing that the record is incomplete with respect to the legal fees proposed to be paid to Drinker, Biddle & Reath and O'Melveny & Myers, and that jurisdiction should be continued as to such payments, and it further appearing that the other fees and expenses of the company and the legal fees of counsel for the successful bidder are not unreasonable and that jurisdiction with respect to such other fees and expenses should be released:

It is ordered, That the jurisdiction heretofore reserved with respect to the matters to be determined as a result of competitive bidding for said bonds under Rule U-50 be, and the same hereby is, released and that the amendment filed on May 13, 1947, to the application herein be, and hereby is, granted, subject, however, to the terms and conditions prescribed in Rule U-24; and

It is further ordered, That the jurisdiction heretofore reserved with respect to the fees and expenses in connection with the issuance and sale of the bonds, including the fees payable to counsel for the successful bidder, except the legal fees of Drinker, Biddle & Reath and O'Melveny & Myers, be, and the same hereby is, released, and that as to the legal fees of Drinker, Biddle & Reath and O'Melveny & Myers, jurisdiction be continued.

By the Commission.

PART 22—APPEALS OF PREFERENCE ELIGIBLES UNDER THE VETERANS' PREFERENCE ACT OF 1944

STATUS OF EMPLOYEE DURING PERIOD OF ADVANCE NOTICE

Section 22.2 (c) is amended to read as follows:

§ 22.2 *Notification of proposed actions; charges and opportunity for answer.* * * *

(c) *Status of employee during period of advance notice.* The advance written notice which is required when a proposed adverse action is sought by an employing agency shall be submitted to the employee at least thirty (30) days before the effective date of such proposed action, and during such thirty (30) day period the employee shall continue in an active duty status; but in cases of furlough without pay due to unforeseeable circumstances, such as sudden breakdowns in equipment, acts of God or emergencies requiring immediate curtailment of activities, advance notice shall not be necessary.

In exceptional cases where the circumstances are such that the retention of the employee in an active duty status during the thirty (30) day period may result in damage to Government property, would be otherwise detrimental to the interests of the Government, or would be injurious to the employee, his fellow workers or the general public, and the employee cannot during such period be temporarily assigned to duties in which these conditions would not exist, he shall be placed on annual leave, provided he has sufficient annual leave to his credit to cover the required period, and otherwise, suspended for such period or periods during the thirty (30) days as the circumstances warrant. The reasonableness of such exceptions, including suspensions, will be considered in connection with the entire case in the event that the employee subsequently appeals from the final adverse decision reached by the administrative officer.

sonally or by a representative. Such representative may be any person designated by the veteran, such person being hereinafter referred to as agent, or a service organization designated by him and approved by the Commission.

§ 33.2 *Agents.* Any competent person of good moral character and of good repute who is a citizen of the United States, or who has declared his intention to become a citizen of the United States, may be designated as an agent. A person claiming to act as an agent must submit a written statement from the veteran (CSC Form 307)[1] authorizing him to represent the veteran in his claim or appeal.

§ 33.3 *Recognition of service organizations.* Any service organization approved by the Commission may be recognized in the presentation of claims or appeals under the laws administered by the Commission when the proper officers thereof make application for recognition, and as a part of such application agree and certify that neither the organization nor its representatives will charge claimants or appellants any fee or compensation whatsoever for their services.

In requesting recognition, the following information must be supplied:

(a) Statement outlining the purpose of the organization and need thereof, and manner in which the veteran will be benefited by such recognition.

(b) Names, titles, and addresses of officers.

(c) Number of posts or chapters, and States in which located.

(d) Names, titles, and addresses of full-time paid employees who are qualified to act as accredited representatives.

(e) Copy of constitution or charter and by-laws of the organization.

[1] Filed with the Division of the Federal Register.

§ 33.4 *Accredited representatives of service organizations.* (a) Recognized service organizations shall file with the Commission, on the prescribed form (CSC Form 306),[1] the name of any officer whom it desires to be recognized as its accredited representative and the Commission office or offices to which recognition is to be extended in the presentation of claims or appeals. In proposing a candidate for recognition as a representative the organization, through its appropriate officer, shall certify to the following:

(1) That the applicant is a citizen of the United States, of good character and reputation, is qualified by training or experience to assist in the presentation of claims, and is a member or employee of the organization.

(2) That he is not employed in any civil or military department or agency of the United States, and is not a retired member of the Regular Army, Navy, Marine Corps, Coast Guard, or Public Health Service.

(3) Whether the applicant is a veteran, and if so, that he was honorably discharged from active service.

(b) The application (CSC Form 306)[1] may be filed with the central office of the Commission, or with the regional office where the applicant is to serve.

(c) The central office (Veterans Service Section), or Regional Director, as the case may be, will secure sufficient facts by such investigation as may be deemed necessary to justify a determination whether or not the applicant is qualified. If it is determined that the applicant is qualified, notice to that effect will be issued, the original of which shall be sent to the applicant, and a copy of which shall be sent to the organization. Where the approval is made by a regional office, two copies will be sent to the central office of the Commission, one of which will be retained in the files and the other will be sent to the organization. A record of accredited representatives will be retained in the regional offices and in the Veterans Service section of the central office. If the Regional Director's determination is adverse, or the case is one of doubtful aspect, the entire matter will be referred to the Commission's central office, Veterans Service section.

(d) Recognition may be cancelled at the request of the organization. The central office, or Regional Director may cancel or suspend any recognition for cause. When a Regional Director cancels or suspends any recognition, a report of the facts shall be made to the central office. Notice of cancellation or suspension will be supplied in the same manner as a notice of recognition.

(e) Nominations for accredited representatives of National service organizations will be accepted only if approved by the certifying officer, National headquarters, of such organization.

(f) Letters of recognition issued by the central office to National and field officers of recognized organizations will constitute authorization for their recognition in claims or appeals in any regional office within their respective assignments. Letters of recognition issued by a Regional Director will constitute authorization for the accredited representatives to present claims or appeals in any regional office within their respective assignments.

(g) When a representative has been admitted, a card will be prepared in the Veterans Service Section showing his name, address, organization, and date of admission. Copies of this card will be filed in the central office (Veterans Service Section) of the Commission and in the regional office by which he is admitted or in which he is authorized to act.

§ 33.5 *Designation of service organizations as representatives.* (a) Before a service organization may be recognized in an individual claim or appeal there must be filed a designation duly executed by the claimant or appellant, specifically conferring upon the organization the authority to represent him in the presentation of his claim or appeal, and to receive any information in connection therewith. This designation shall be on the form prescribed by the Commission (CSC Form 307),[1] and shall be presented to the office concerned, to be filed in connection with the claim or appeal. The designation must be signed by the claimant or appellant.

(b) Upon receipt and approval of the designation, the service organization named therein shall be recognized as the sole agency for the presentation of the claim or appeal covered thereby, and no other organization shall be recognized in the presentation of that claim or appeal. The designation made by the claimant may be revoked by him at any time and a subsequent designation made, naming another organization. A subsequently executed designation shall constitute a revocation of any existing designation. A designation may also be revoked by the organization named therein.

§ 33.6 *General provisions.* (a) Nothing in the regulations in this part shall be deemed to permit the unauthorized practice of law in any place or the rendering of any service save the authorized participation in agency proceedings by agents or accredited representatives who have been approved by the Commission.

(b) The regulations in this part shall not apply to adjudications of charges of political activity on the part of officers or employees in the competitive service, or of officers or employees of a State or local government, nor to adjudications of the existence of good cause for the removal of hearing examiners appointed under section 11 of the Administrative Procedure Act.

§ 33.7 *Effective date.* The regulations in this part shall be effective thirty (30) days after publication in the FEDERAL REGISTER.

JAMISON MOTORS, INC.

Jamison Motors, Inc., a corporation, 4112 Spring Grove Avenue, Cincinnati, Ohio, on or about March 10, 1947, without authorization, began and thereafter until about March 20, 1947, carried on construction of a one-story commercial building for use in repairing and servicing cars and trucks, located at 4112 Spring Grove Avenue, Cincinnati, Ohio, the estimated cost of which construction was in excess of $1,000. The beginning and carrying on of construction as aforesaid constituted a wilful violation of Veterans' Housing Program Order No. 1. This violation has diverted critical materials to uses not authorized by the Office of the Housing Expediter. In view of the foregoing, it is hereby ordered that:

§ 807.34 *Suspension Order No. S-34.* (a) Neither Jamison Motors, Inc., a corporation, its successors and assigns, nor any other person shall do any further construction on the one-story commercial building to be used in the repairing and servicing of cars and trucks, located at 4112 Spring Grove Avenue, Cincinnati, Ohio, including the putting up, completing or altering of said structure, unless hereafter specifically authorized in writing by the Office of the Housing Expediter.

(b) Jamison Motors, Inc., shall refer to this order in any application or appeal which it may file with the Office of the Housing Expediter for authorization to carry on construction.

(c) Nothing contained in this order shall be deemed to relieve Jamison Motors, Inc., its successors and assigns, from any restriction, prohibition or provision contained in any other order or regulation of the Office of the Housing Expediter, except insofar as the same may be inconsistent with the provisions hereof.

PART 807—SUSPENSION ORDERS

ALBERT WILLE

Albert Wille, 12 S. Wille Street, Mount Prospect, Illinois, is the owner of the premises at 100 Northwest Highway. On December 9, 1946 construction was begun of an addition to the structure on said premises for use as a warehouse at an estimated cost in excess of $1,000 after application for authorization of such construction had been denied. Albert Wille, in consenting to such construction with knowledge of the denial of such application and of the continued existence of VHP-1, wilfully violated said order. This violation has diverted critical materials to uses not authorized by the Office of the Housing Expediter. In view of the foregoing, it is hereby ordered that:

§ 807.35 *Suspension Order No. S-35.* (a) Neither Albert Wille, his successors or assigns, nor any other person shall do any further construction on the premises located at 100 Northwest Highway, Mount Prospect, Illinois, including completing, putting up or altering of any structure located thereon, unless specifically authorized in writing by the Office of the Housing Expediter.

(b) For a period of one month from the effective date of this order, no authorization to carry on construction shall be granted Albert Wille.

(c) Albert Wille shall refer to this order in any application or appeal which he may file with the Office of the Housing Expediter for priorities assistance or for authorization to carry on construction.

(d) Nothing contained in this order shall be deemed to relieve Albert Wille, his successor or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the Office of the Housing Expediter, except insofar as the same may be inconsistent with the provisions hereof.

PART 807—SUSPENSION ORDERS

ERNEST M. DALAND

Ernest M. Daland, who resides at 85 Homer Street, Newton Centre, Massachusetts, began construction of a house located on Governor Prince Road in Brewster, Barnstable County, Massachusetts, under authorization from the Federal Housing Administration, which authorization was based upon an application filed by Dr. Ernest M. Daland stating that the house was a year-round dwelling house for personal occupancy, to contain 1,496 square feet. The house was not intended for year-round occupancy within the meaning of HPR and the floor area properly calculated was approximately 1,700 square feet. The construction of this house constituted a violation of HPR and diverted critical materials to uses not authorized by the Office of the Housing Expediter. In view of the foregoing, it is hereby ordered that:

§ 807.36 *Suspension Order No. S-36.* (a) Neither Ernest M. Daland, his successors or assigns, nor any other person shall do any further construction on the premises located on Governor Prince Road, Brewster, Barnstable County, Massachusetts, unless hereafter specifically authorized in writing by the Office of the Housing Expediter.

(b) The provisions of paragraph (a) above shall not apply to work done under specific authorization from the Office of the Housing Expediter issued after this date for the purpose of enabling work to be done to exclude the weather and prevent deterioration.

(c) Ernest M. Daland shall refer to this order in any application or appeal which he may file with the Office of the Housing Expediter or any other federal agency for authorization to carry on construction.

(d) Nothing contained in this order shall be deemed to relieve Ernest M. Daland, his successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the Office of the Housing Expe-

TITLE 32—NATIONAL DEFENSE

Chapter VII—Sugar Rationing Administration, Department of Agriculture [1]

[Rev. Gen. RO 18,[2] Amdt. 5]

PART 705—ADMINISTRATION

DISTRIBUTION OF BASES TO CERTAIN FORMER MEMBERS OF THE ARMED FORCES

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

Revised General Ration Order 18 issued by the Office of Price Administration and amended by the Office of Temporary Controls under § 1305.217 of Title 32, Chapter XI is designated Revised General Ration Order 18, issued under § 705.4, Title 32, Chapter VII pursuant to the authority vested in the Secretary of Agriculture by the "Sugar Control Extension Act of 1947" and is amended in the following respect:

1. Section 4.2 is amended to read as follows:

SEC. 4.2 *Moving of establishment.* (a) A person who is granted a base or an adjustment in base under this order may apply in writing to the Sugar Branch Office which granted the base for permission to move his establishment. The applicant must state the city and the state (also street address, if possible) to which he wishes to move his establishment.

(b) The Sugar Branch Office which originally granted the base shall contact the Sugar Branch Office in the area into which the veteran desires to move his establishment in order that a comparable establishment in that area may be selected.

(1) If the base of the comparable establishment in the new area is the same as or greater than the veteran's base, permission to move into the new area may be granted. However, the veteran's base shall not be increased to that of the comparable establishment in the new area, nor to the maximum base established under the order if the veteran does not have the maximum base.

(2) If the base of the comparable establishment in the new area is less than the veteran's base, unless the veteran is willing to have his base reduced to that of such comparable establishment, permission to move the veteran's establishment into the new area shall be denied.

(c) The provisions of section 18.1 of Third Revised Ration Order 3 and section 12.6 of Revised General Ration Order 5 apply only to a base granted under those orders, and are not applicable to a base or an adjustment in base granted under this order.

2. Section 8.1 (e) is amended to read as follows:

(e) "District Office" means a Branch Office of the Sugar Rationing Administration, Department of Agriculture.

3. Section 8.1 is amended by adding a new paragraph (f) to read as follows:

(f) "Sugar Branch Office" means a Branch Office of the Sugar Rationing Administration, Department of Agriculture.

This amendment shall become effective May 20, 1947.

NOTE.—The reporting and record-keeping requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Report Act of 1942.

Issued this 15th day of May 1947.

CLINTON P. ANDERSON,
Secretary of Agriculture.

Rationale Accompanying Amendment No. 5 to Revised General Ration Order 18

Present regulations. The present regulations permit a veteran who has been granted a base or an adjustment in base to apply to the Branch Office for permission to move his establishment.

Proposed amendment. This amendment provides that a veteran who has been granted a base or an adjustment in base may apply in writing to the Sugar Branch Office for permission to move his establishment. The amendment also sets forth certain criteria which the Sugar Branch Office should follow in determining whether or not a veteran should be permitted to move his establishment.

This amendment defines District Office and Sugar Branch Office to mean a Branch Office of the Sugar Rationing Administration, Department of Agriculture.

Reasons for amendment. While it is generally desirable to permit a veteran to move his establishment should he wish to do so, fair dealing and administrative necessity require that certain uniform standards be employed to determine under what conditions permission to move an establishment will be granted or denied. Thus, in the case of the veteran who desires to move his establishment to an area where a comparable establishment has a higher base, permission to move will be granted but the veteran's base will not be increased to that of the comparable establishment. Nor will it be increased to the maximum permitted under the order if the veteran did not obtain the maximum for his establishment prior to moving his establishment. It is not administratively feasible to permit the constant changing of bases which would result if such upward adjustments were permitted. Furthermore, since the veteran could ascertain beforehand the amount of base or adjustment in base he would be granted for any area in which he might desire to open his establishment, he is not being treated unfairly when required to retain the base or adjusted base he obtained for an establishment in the area of his choice even though it is less than that of a comparable establishment in a new area, or less than the maximum permitted under the order.

Fair dealing requires that a veteran who has obtained a base or adjusted base for his establishment in the area of his choice and then desires to move his establishment to an area where the base of a comparable establishment is lower, not be permitted to move unless he is willing to have his base reduced to that of the comparable establishment. Otherwise, a veteran could open an establishment in an area where he could obtain a larger base than that of a comparable establishment in the area in which he actually intended to operate his establishment after obtaining such larger base. If he were then permitted to move to this area where the comparable establishment had a lower base and retain his higher base, he would gain an undeserved business advantage over the comparable establishment and the purpose of the comparable establishment test would be defeated.

This amendment also makes it clear that the moving provisions of Third Revised Ration Order 3 and Revised General Ration Order 5 do not apply to the moving of veterans' establishments.

Since former District Offices and Sugar Branch Offices of the Office of Price Administration are now designated as Branch Offices of the Sugar Rationing Administration, Department of Agriculture, this amendment redefines District Office and Sugar Branch Office to conform with the changed designation of these offices.

[Docket No. G-797]

EQUITABLE GAS CO.

NOTICE OF APPLICATION

MAY 14, 1947.

Notice is hereby given that on October 16, 1946, Equitable Gas Company (Applicant), a Pennsylvania corporation having its principal office in Pittsburgh, Pennsylvania, filed an application with the Federal Power Commission for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, authorizing Applicant to construct and operate the following described facilities subject to the jurisdiction of the Commission: [1]

A connection with meter gates and fittings on its 16-inch gas transmission pipe line for emergency use in the transportation and sale of natural gas to Waynesburg Home Gas Company, Waynesburg, Pennsylvania.

Applicant states in its application that at the present time it is operating one connection with said Waynesburg Home Gas Company which connection is not adequate to transport the gas needed for distribution. Applicant also states that said Waynesburg Company desires said additional connection as an emergency stand-by facility, and in order to prevent the pressure drops in its system which it has experienced on peak winter days. In addition, the Waynesburg Company states that the existing pipeline is normally used as a discharge line to a field compressor station which it uses to pump gas from field gathering lines connected to its own gas wells. The Waynesburg Company anticipates that withdrawals of gas from Applicant through the existing pipe line connection during periods of peak winter demand may make the pressures in the existing line so high as to retard the procurement of gas from its own wells. The said Waynesburg Company would, if authority is granted to the Applicant, construct approximately 3,150 feet of 2-inch pipe line to connect with Applicant's system at a point approximately five miles south of the present emergency connection.

Applicant further states that Waynesburg Home Gas Company is the sole distribution company for the town of Waynesburg, Pennsylvania, containing approximately 1,900 customers; that most of said customers are residential and utilize the gas for home heating; that there are some commercial customers but no industrial users in Waynesburg. Applicant estimates that the amount of gas delivered through the proposed emergency connection to the Waynesburg Company would be approximately the same amount as presently delivered through the existing connection. Applicant states that the Waynesburg Company expects some normal load growth in the next few years.

Applicant states that the total over-all cost of the proposed facility is $688, and would be financed from available company funds.

[1] On October 28, 1946, the Commission granted temporary authorization for a certificate of public convenience and necessity concerning the facilities described herein.

Any interested State commission is requested to notify the Federal Power Commission whether the applicant should be considered under the cooperative provisions of the Commission's rules of practice and procedure, and if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with the reasons for such request.

The application of Equitable Gas Company is on file with the Commission and is open to public inspection. Any person desiring to be heard or to make any protest with reference to the application shall file with the Federal Power Commission, Washington 25, D. C., not later than fifteen days from the date of publication of this notice in the FEDERAL REGISTER, a petition to intervene or protest. Such petition or protest shall conform to the requirements of the rules of practice and procedure (effective September 11, 1946), and shall set out clearly and concisely the facts from which the nature of the petitioner's or protestant's alleged right or interest can be determined.

Petitions for intervention shall state fully and completely the grounds of the proposed intervention and the contentions of the petitioner in the proceedings, so as to advise the parties and the Commission as to the specific issues of fact or law to be raised or controverted, by admitting, denying, or otherwise answering specifically and in detail, each material allegation of fact or law asserted in the proceeding.

[Docket No. G-897]

WEST TEXAS GAS CO.

NOTICE OF APPLICATION

MAY 14, 1947.

Notice is hereby given that on April 30, 1947, West Texas Gas Company (Applicant), a Delaware corporation having its principal office in Lubbock, Texas, and authorized to do business in Texas, filed an application with the Federal Power Commission for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, authorizing Applicant to construct and operate the following described facilities, subject to the jurisdiction of the Commission:

Two 300 BHP Cooper-Bessemer Type GMX-6, gas engine driven compressor units together with necessary buildings, auxiliary equipment and piping located in Section 113, Block M-7, B. S. & F. Survey, Deaf Smith County, near Hereford, Texas.

Applicant states in its application that the proposed facilities are needed in order for Applicant to supply the demands made on its system. Applicant further states that the firm requirements to be delivered out of Applicant's McSpadden-Farwell 8⅝-inch O. D. transmission line during the 1947-48 heating season are estimated at 11,317 Mcf per 24 hours at 16.4 pounds pressure base, of which 9,400 Mcf daily are the requirements of Southern Union Gas Company, nonaffiliated utility company which distributes gas in Clovis, Portales, Tucumcari, and Texico, New Mexico, as well as in Farwell, Texas. Applicant also states that in order for it to be able to deliver the estimated requirements from this line without exceeding the pressure which it regards as the maximum safe inlet pressure to the line, the proposed intermediate compression is needed. Applicant estimates that the total proposed compressor addition will have a capacity of 12,420 Mcf at 16.4 pounds daily when operating with a suction pressure of 200 pounds gauge and a discharge pressure of 400 pounds gauge.

Applicant states that a purchase contract has been executed with the Cooper-Bessemer Corporation, Mt. Vernon, Ohio, for the delivery of the proposed compressor units and that a contract has been executed with Stearns-Roger Manufacturing Company, Denver, Colorado, for the supply of material for the proposed compressor station. It is proposed to commence construction about July 1, 1947.

Applicant estimates that the total over-all capital cost of the proposed facilities is $131,432 which will be financed from funds presently available to the Applicant. Applicant states that no change in rates is contemplated by virtue of the proposed construction.

Any interested State commission is requested to notify the Federal Power Commission whether the application should be considered under the cooperative provisions of the Commission's rules of practice and procedure, and if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with the reasons for such request.

The application of West Texas Gas Company is on file with the Commission and is open to public inspection. Any person desiring to be heard or to make any protest with reference to the application shall file with the Federal Power Commission, Washington 25, D. C., not later than fifteen days from the date of publication of this notice in the FEDERAL REGISTER, a petition to intervene or protest. Such petition or protest shall conform to the requirements of the rules of practice and procedure (effective September 11, 1946), and shall set out clearly and concisely the facts from which the nature of the petitioner's or protestant's alleged right or interest can be determined.

Petitions for intervention shall state fully and completely the grounds of the proposed intervention and the contentions of the petitioner in the proceeding, so as to advise the parties and the Commission as to the specific issues of fact or law to be raised or controverted, by admitting, denying, or otherwise answering specifically and in detail, each material allegation of fact or law asserted in the proceeding.

PART 301—DOMESTIC QUARANTINE NOTICES

ADMINISTRATIVE INSTRUCTIONS MODIFYING REQUIREMENTS OF WHITE-FRINGED BEETLE QUARANTINE REGULATIONS

The purpose of this action is thus to relieve commerce in the articles exempted herein from restrictions heretofore imposed. In order to be of maximum benefit to the public, the relief from these restrictions must be made effective as soon as possible. Accordingly, compliance with the rule making procedure of section 4 (a) of the Administrative Procedure Act (Public Law 404, 79th Cong., 60 Stat. 238) is impracticable and contrary to the public interest, and compliance with the publication requirement of section 4 (c) of that act is unnecessary.

These instructions shall be effective upon publication in the FEDERAL REGISTER and shall remain in effect until further modified or revoked.

Chapter I—Civil Aeronautics Board

PART 41—CERTIFICATION AND OPERATION RULES FOR SCHEDULED AIR CARRIER OPERATIONS OUTSIDE CONTINENTAL LIMITS OF THE UNITED STATES

PART 42—NONSCHEDULED AIR CARRIER CERTIFICATION AND OPERATION RULES

PART 61—SCHEDULED AIR CARRIER RULES

COMPLIANCE WITH AIR CARRIER FIRE PREVENTION REGULATIONS

At a session of the Civil Aeronautics Board held at its office in Washington, D. C., on the 14th day of May 1947.

Civil Air Regulations Amendments 41-3, 42-2, and 61-2 (11 F. R. 11353, 11354) made effective by the Board on November 1, 1946, prescribed certain fire preventive design changes on airplanes used in passenger air carrier service. The regulations now require that all airplanes used in passenger air carrier service and which are to undergo major overhaul of fuselage or wing center section after May 1, 1947, shall be modified according to amendments 41-3, 42-2, and 61-2. However, the air carriers have notified the Board that certain equipment and parts necessary for installation in compliance with these amendments are unavailable at the present time in sufficient quantity for initial installation and replacement during service. The Administrator has also advised the Board of this condition.

The Civil Aeronautics Board finds that temporary lack of certain equipment and parts required for compliance with Civil Air Regulations amendments Numbers 41-3, 42-2, and 61-2 would force air carriers to take some of their presently operating airplanes out of passenger service after May 1, 1947; that the air carriers have endeavored to obtain all necessary equipment and parts in order to comply with the pertinent requirements; that, notwithstanding the lack of certain equipment and parts, the fire preventive measures of amendments 41-3, 42-2, and 61-2 will be complied with, except with respect to those provisions for which the air carriers have been unable to obtain equipment or parts and have notified the Administrator accordingly; that such provisions will be complied with as soon as practicable after receipt by the air carriers of the necessary equipment and parts; and that for the reasons stated compliance with the notice and procedures required by paragraphs (a) and (b) of section 4 of the Administrative Procedure Act is impracticable, and a delay in the promulgation of this special regulation would not be in the public interest.

Now, therefore: Effective May 14, 1947, compliance with the provisions in Civil Air Regulations Amendments 41-3, 42-2, and 61-2 shall not be required in those instances where the air carrier notifies the Administrator and shows that there exists a lack of equipment or parts necessary for compliance with specific provisions contained in these amendments. However, when such equipment or parts become available the air carrier shall comply with the pertinent provisions as soon thereafter as practicable. This Special Civil Air Regulation and the privileges granted thereby shall terminate November 1, 1947.

(52 Stat. 984, 1007; 49 U. S. C. 425, 551)

Secretary.

At a regular session of the Federal Trade Commission, held at its office in the City of Washington, D. C., on the 26th day of March A. D. 1947.

This proceeding having been heard by the Federal Trade Commission upon the complaint of the Commission, the answer of respondent, testimony and other evidence introduced before a trial examiner of the Commission theretofore duly designated by it, report of the trial examiner, and briefs in support of and in opposition to the complaint (oral argument not having been requested); and the Commission having made its findings as to the facts and its conclusion that respondent has violated the provisions of the Federal Trade Commission Act:

It is ordered, That the respondent, Charles A. TITLE 26—INTERNAL REVENUE

Chapter I—Bureau of Internal Revenue, Department of the Treasury

Subchapter C—Miscellaneous Excise Taxes

[T. D. 5562]

PART 101—TAXES ON ADMISSIONS, DUES, AND INITIATION FEES

In order to conform Regulations 43 (26 CFR, Part 101), relating to the taxes on admissions, dues, and initiation fees under the provisions of the Internal Revenue Code, to the Excise Tax Act of 1947 (Public Law 17, 80th Congress, 1st Session), approved March 11, 1947, such regulations are hereby amended as follows:

PARAGRAPH 1. The words appearing in parenthesis in the heading beginning "Part 101" immediately preceding "Subpart A—Introductory," as amended by Treasury Decision 5385, approved June 30, 1944, are further amended to read as follows: "(Chapter 10 of the Internal Revenue Code as Amended by the Revenue Acts of 1941 and 1942; and Chapter 9A of the Internal Revenue Code as Amended by the Revenue Act of 1943, the Public Debt Act of 1944, and the Excise Tax Act of 1947)."

PAR. 2. The first sentence of the first paragraph of § 101.0 *Scope of part*, as amended by Treasury Decision 5385, is further amended by striking out the word "'and" immediately preceding "the Public Debt Act of 1944," changing the period at the end of the sentence to a comma and adding immediately thereafter the following: "and the Excise Tax Act of 1947."

PAR. 3. Immediately following the quotation of section 1655 inserted by Treasury Decision 5349, approved March 17, 1944, under "Definitions" in "Subpart B—General Provisions" there is inserted the following:

SEC. 3. EXCISE TAX ACT OF 1947.
Sections * * * 1655 (definition of "date of the termination of hostilities in the present war") of such Code are hereby repealed.

PAR. 4. Section 101.1, *Effective period*, as amended by Treasury Decision 5385, is further amended as follows:

(A) By changing the third sentence of the second paragraph to read as follows: "The amendments made by the Revenue Act of 1941, and all subsequent amendments relative to these taxes including, by reason of sections 2 and 3 of the Excise Tax Act of 1947, the amendments made by the Revenue Act of 1943, as amended by the Public Debt Act of 1944, apply indefinitely."

(B) By changing the first sentence of the third paragraph to read as follows: "The effective date of the amendments made by the Revenue Act of 1943, and of the amendments of these regulations pursuant to the Revenue Act of 1943, is April 1, 1944."

PAR. 5. Immediately preceding each of the following sections, i. e., § 101.2, § 101.7, § 101.9, § 101.13, and § 101.22, there is inserted the following:

SEC. 2. EXCISE TAX ACT OF 1947.
Section 1650 of the Internal Revenue Code (war tax rates of certain miscellaneous taxes) is hereby amended by striking out "and ending on the first day of the first month which begins six months or more after the date of the termination of hostilities in the present war".

(Sec. 3791 of the Internal Revenue Code (53 Stat. 467; 26 U. S. C. 3791))

Because of the technical nature of the amendments made herein, it is found that it is unnecessary to issue this Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4 (c) of said act.

Approved: May 16, 1947.

This order shall become effective May 15, 1947.

Issued this 15th day of May 1947.

[SEAL] CLINTON P. ANDERSON, *Secretary of Agriculture.*

Statement of the Considerations Involved in the Issuance of General Order 4

By the Sugar Control Extension Act of 1947 and Executive Order 9841 there were transferred to the Secretary of Agriculture all functions with respect to price control and rationing and allocation of sugar, and price control on rice, effective March 31, 1947, and May 4, 1947, respectively. The Secretary of Agriculture has delegated his functions in regard to these matters to the Sugar Rationing Administration in the Department of Agriculture. The Sugar Control Extension Act and the Executive Order also continued in effect all orders, directives, rules or regulations relating to the transferred functions, which were issued by any officer, department or agency heretofore performing such functions and which were in force on the effective dates of the transfers of functions. In many of these regulations, orders and other documents, reference is made, or authority is delegated to designated officials or offices of the Office of Price Administration or the Office of Temporary Controls.

It is not administratively feasible at this time to individually amend or reissue each such document to reflect the transfers of these functions. Accordingly, it is deemed appropriate to issue this General Order provicing that all such regulations and orders, insofar as they relate to the powers, functions or duties with respect to price control of sugar and rice and with respect to rationing or allocation of sugar, should now be construed to refer to the appropriate officials or offices of the Department of Agriculture and the Sugar Rationing Administration.

PART 707—RATIONING OF SUGAR

SUGAR

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

Third Revised Ration Order 3 is amended in the following respects:

1. A new Article XXIV is added to read as follows:

ARTICLE XXIV—REVOCATION OF BASE PROCEDURE

Sec. 24.1 *Procedure to be followed before a base may be revoked.* (a) A Sugar Branch Office, after giving a notice and a hearing, or an opportunity for a hearing, as provided in this section, may revoke the base of any person under the provisions of section 1.6 of Revised General Ration Order 18 or section 3.2 of General Ration Order 19.

(b) Before issuing an order under the provisions of this section, the Sugar Branch Office shall comply with the following procedure:

(1) The Sugar Branch Office shall give notice of a hearing to the person (hereinafter called the respondent) against whom the proceedings are instituted at least 3 days before the date set for the hearing.

(2) The notice shall set forth the date, time, place and purpose of the hearing and a specification of the facts on which the proposed revocation is based.

(3) The hearing shall be conducted by the Sugar Branch Office Director as Presiding Officer or by such other officer or employee of the Sugar Rationing Administration as may be designated by the Sugar Branch Office Director as Presiding Officer. The respondent shall have the right to be represented by his own counsel; the rules of evidence prevailing in courts of law or equity shall not be controlling; and a stenographic report of the hearing shall be taken. The stenographic report of the hearing need not be transcribed unless it is requested by one of the parties to the proceeding.

Rationale Accompanying Amendment No. 47 to Third Revised Ration Order 3 and Amendment No. 6 to Revised General Ration Order 18

Proposed amendments. These amendments set up a procedure which must be followed before an order revoking the base of any person under the provisions of section 1.6 of Revised General Ration Order 18 or section 3.2 of General Ration Order 19 may be issued. The provisions outlining the procedure under which a notice and a hearing, or an opportunity for a hearing, must be given to a user before his base may be revoked are incorporated in the amendment to Third Revised Ration Order 3 and a cross-reference to such procedure is contained in the amendment to Revised General Ration Order 18.

Reason for amendments. These amendments are being issued in order to insure that a uniform procedure is followed in all cases before an order revoking the base of any person is issued. The procedure adopted in the amendment to Third Revised Ration Order 3 adequately protects the rights of any user by affording such user a hearing, or an opportunity for a hearing, on the issues involved before his base is revoked.

TITLE 34—NAVY

Chapter I—Department of the Navy

PART 26—ORGANIZATION AND FUNCTIONS OF THE NAVAL ESTABLISHMENT

PART 27—PROCEDURES OF THE NAVAL ESTABLISHMENT

MISCELLANEOUS AMENDMENTS

The following changes are authorized to amend the regulations relating to the organization and functions of the Naval Establishment (11 F. R. 177A-159):

1. Amend § 26.1 (c) to read as follows:

§ 26.1 *Creation and authority.* • • •

(c) The present organization and distribution of functions within the Naval Establishment is derived generally from Executive Order No. 9635 dated September 29, 1945 (10 F. R. 12419). The organization and distribution of functions is further outlined in General Order No. 247 dated February 10, 1947, entitled "Policies and Principles Governing the Distribution of Authority and Responsibility for the Administration of the Naval Establishment." Copies of General Orders are available for inspection at the Navy Department, Washington, D. C., and at the offices of each of the naval districts.

2. Delete §§ 26.2, 26.3 and 26.4 and substitute the following:

§ 26.2 *The Naval Establishment.* The Naval Establishment consists of three principal parts:

(a) The Operating Forces are the several fleets, seagoing forces, sea frontier forces, district forces, and such of the shore establishment of the Navy and other forces and activities as may be assigned to the operating forces by the President or Secretary of the Navy.

(b) The Navy Department, the executive part of the Naval Establishment located at the seat of the government, which comprises the bureaus, boards and offices of the Navy Department; the Headquaters of the Marine Corps; and the Headquarters of the Coast Guard (when assigned to the Navy).

(c) The Shore Establishment, which comprises all other activities of the Naval Establishment including all shore activities not assigned to the Operating Forces. [General Order 247, February 10, 1947]

§ 26.3 *The Navy Department.* The executive part of the Naval Establishment, the Navy Department, is organized in terms of its functions which are best understood by reference to the statement of fundamental naval policy: "To maintain the Navy as a thoroughly integrated entity in sufficient strength on the sea and in the air to uphold, in conjunction with our other Armed Forces, our national policies and interests, to support our commerce and our international obligations, and to guard the United States including its overseas possessions and dependencies" (General Order No. 247 dated February 10, 1947). From this fundamental policy evolve four basic tasks or functions, the responsibility for which has been distributed within the Navy Department. These tasks or functions are policy control, naval command, logistics administration and control, and business administration.

(a) *The Secretary.* The Naval Establishment is subject to the direction and control of the President of the United States as Commander-in-Chief. The immediate direction and control, however, are exercised by the Secretary of the Navy, acting as the representative of the President. The Secretary retains the general responsibility for supervision of all naval affairs while delegating certain responsibilities to his naval and civilian executive assistants. The Secretary retains direct control of policy and communicates directly with all principal officials and officers of the Naval Establishment, as necessary or desirable, remaining available for direct consultation by such officials and officers. In the formulation and administration of naval policies, the Secretary avails himself of the advice and assistance of his principal executive assistants: (1) The Civilian Executive Assistants; (2) the Naval Command Assistant; and (3) the Naval Technical Assistants.

(b) *The Naval Command Assistant.* (1) The second of the four basic tasks or functions of the Navy Department is that of Naval Command, which has been assigned to the Naval Command Assistant, whose official title is The Chief of Naval Operations, and who acts as the principal adviser to the President and to the Secretary of the Navy on the conduct of war, and the principal naval adviser and naval executive to the Secretary of the Navy on the conduct of the activities of the Naval Establishment, all as provided in Executive Order No. 9635 dated September 29, 1945 (10 F. R. 12419). Naval Command includes command of the Operating Forces and the maintenance of such Forces in a state of readiness to conduct war. In the accomplishment of the foregoing, the Chief of Naval Operations is responsible under the Secretary of the Navy for the command and administration of the Operating Forces, for the preparation, readiness and logistics support of such Forces, and for the coordination and direction of efforts of the bureaus and offices of the Navy Department with respect to the foregoing. In the discharge of these responsibilities, the Chief of Naval Operations promulgates to the Naval Establishment directives embracing matters of operations, security, intelligence, communications, naval personnel discipline and similar matters affecting the naval maintenance and protection of the Naval Establishment.

(2) The third task in implementing fundamental naval policy, namely, that of Logistics Administration and Control, involves two distinct elements, the logistics of consumption, i. e., the planning, forecasting, determining and distributing of the requirements of the Operating Forces, and the logistics of production, i. e., the development, procurement, and production of the material and personnel required to meet the requirements of the Operating Forces. Although the two elements are interrelated and represent a continuous "cause and effect" relationship, it has been necessary, in the interest of efficient, orderly administration, to divide the responsibility for Logistics Administration and Control between the Chief of Naval Operations and the Civilian Executive Assistants aided by the Naval Technical Assistants. Accordingly, there has been delegated to the Chief of Naval Operations responsibility over the following:

(i) Planning and forecasting the needs of the Operating Forces for finished material, trained personnel and supporting services.

(ii) Issuing statements of these requirements—in terms of what is needed, when it is needed and where it is needed—to the bureaus and offices of the Navy Department, and, through them, to the Shore Establishment. This responsibility encompasses the determination of naval characteristics for material to be procured or developed, and the determination of the training and instruction required to fit naval personnel and commands for service with the Operating Forces.

(iii) Reviewing and evaluating the progress of the bureaus and offices and of the Shore Establishment in fulfilling these requirements, and issuing such instructions as may be required to assure the requirements are met.

(iv) Collaborating with the Civilian Executive Assistants in expediting fulfillment of these requirements, in evaluating and strengthening the policies and procedures governing the determination of stock levels and replenishment requirements, and in the administration of inventory control systems.

(c) *The Civilian Executive Assistants.* The fourth task or function of the Navy Department, Business Administration, and that portion of logistics administration and control not assigned to the Naval Command Assistant are delegated to the Civilian Executive Assistants to the Secretary. These Civilian Executive Assistants are the Under Secretary, the Assistant Secretary, the Assistant Secretary for Air, and the Administrative Assistant to the Secretary.

(1) *The Under Secretary.* The Under Secretary, who is appointed by the President by and with the advice and consent of the Senate and who under present law (54 Stat. 494; 5 U. S. C. 421b) serves during a national emergency only, has been delegated the responsibility in accordance with law and executive orders for: The responsibility for Military Personnel Boards; legislative and legal matters of the Naval Establishment, except such matters as are assigned to the Assistant Secretary; and immediate supervision of the activities of the Executive Office of the Secretary listed under § 26.4 (c).

(2) *The Assistant Secretary.* The Assistant Secretary, appointed by the President by and with the advice and consent of the Senate (26 Stat. 254; 5 U. S. C. 420) has been delegated the responsibility, in accordance with law and executive orders, for that part of the Logistics Administration and Control of the Naval Establishment which relates to the promulgation of policies and general procedures and legal determinations governing (i) the procurement, production and utilization of matériel and facilities; the procurement, administration and utilization of civilian personnel; and (ii) the determination of stock levels and replenishment requirements in collaboration with the Chief of Naval Operations, and the administration of inventory control systems; and immediate supervision of the activities of the Executive Office of the Secretary listed under § 26.4 (d). The Assistant Secretary also is responsible for the presentation of the Navy's procurement requirements to other governmental agencies controlling the availability of products, materials and facilities.

(3) *The Assistant Secretary for Air.* The Assistant Secretary for Air, appointed by the President by and with the advice and consent of the Senate (44 Stat. 767; 5 U. S. C. 421a) has been delegated the responsibility, in accordance with law and Executive orders, for all matters of the Naval Establishment relating to aeronautics (except as otherwise assigned to the Under Secretary and the Assistant Secretary), including the coordination of naval aeronautics with other governmental agencies; the correlation and programming of matériel research, experimental, test and development activities. In this connection, he supervises the Navy's participation on the Aeronautical Board and the Air Coordinating Committee (under § 26.4 (e) (1) and § 26.4 (e) (2)).

(4) *The Administrative Assistant to the Secretary of the Navy.* The Administrative Assistant to the Secretary of the Navy, appointed by the Secretary, has been delegated the responsibility in accordance with law and Executive orders for the following part of the business administration of the Naval Establishment: Responsibility for general supervision of the accounts relating to the fiscal affairs of the Naval Establishment, including the expenditure and budgeting of funds; and the responsibility for matters of organization, staffing, administrative procedures, and the utilization of personnel in the Executive Office of the Secretary; and immediate supervision of the activities of the Executive Office of the Secretary listed under § 26.4 (f).

(d) *Naval Technical Assistants.* The Naval Technical Assistants are the chiefs of bureaus, the Chief of Naval Research, the Chief of the Material Division, the Judge Advocate General, and the Commandant of the Marine Corps, and the Commandant of the Coast Guard (when assigned to the Navy) who are directly responsible for the discharge of all the duties assigned to their respective organizations, in accordance with the orders and directives of the Secretary, the Civilian Executive Assistants, and the Chief of Naval Operations; and are the technical advisers and assistants, in their special fields, to the Secretary, the Civilian Executive Assistants and the Chief of Naval Operations. In pursuance of the foregoing, the Naval Technical Assistants are immediately responsible, within the limits of their respective cognizance, for:

(1) The research in, and the development, procurement, production, utilization, and distribution of, material and facilities.

(2) The procurement, training, and administration, and assignment of personnel.

(3) The operation of all activities under their cognizance.

(4) The sound and legal expenditure of funds appropriated for the performance of their work, including the preparation of estimates for funds required to carry out approved plans and directives.

The Naval Technical Assistants perform these responsibilities through the organization of their respective bureaus and offices, which are described in detail in § 26.6 through § 26.13b, inclusive.

NOTE: The discussion above has outlined in general terms the over-all organization of the Naval Establishment. A more detailed presentation of certain of its component parts is presented below.

§ 26.4 *Executive Office of the Secretary.* (a) To assist the Secretary and the Civilian Executive Assistants in the discharge of their functions and responsibilities, various Offices, Committees, Boards and Divisions have been created, which are directly responsible to and which act for the Secretary and his Assistants and which collectively constitute the Executive Office of the Secretary. Such Boards, Offices, Committees and Divisions generally assist the Secretary and such Assistants in the formulation of policy and in administration, and discharge for the Secretary and such Assistants specific functions as are from time to time assigned.

(b) *Boards, offices and committees under the direct supervision of the Secretary—(1) General Board of the Navy.* The General Board was established March 13, 1900. It acts in an advisory capacity to the Secretary of the Navy. Its composition and duties are set forth in the U. S. Navy Regulations, 1920, Art. 393, par. 4, and Arts. 400-404, inclusive.

(2) *Joint Army and Navy Board (Navy participation).* The Joint Board, which was organized July 17, 1903, is composed of ranking officers of both War and Navy Departments. Any matters which, to either the War Department or the Navy Department, seem to require cooperation between the two services, may be referred by that Department to the Joint Board. It may also originate such consideration of subjects as, in its judgment, is necessary. The Board confers upon, discusses, and reaches such common conclusions as may be practicable. Since the beginning of World War II, most of the functions of the Joint Board have been performed by the Joint Chiefs of Staff.

(3) *Joint Economy Board (Navy participation).* The Joint Economy Board, organized May 13, 1935, is charged with the responsibility of investigating and reporting on economies which can be effected from time to time, without loss of efficiency, by eliminating duplication and simplifying functions in those activities of the War and Navy Departments concerned with joint operations

of the two services or which have approximately parallel functions.

(4) *Joint Chiefs of Staff (Navy participation).* The Joint Chiefs of Staff came into being as a result of the organization of the Combined Chiefs of Staff (British and United States Chiefs of Staff), on February 9, 1942. The Chief of Staff to the Commander in Chief of the Army and Navy; the Chief of Naval Operations; the Chief of Staff, U. S. Army; and the Commanding General, Army Air Forces, comprise the Joint Chiefs of Staff. Under the direction of the President the Joint Chiefs of Staff consult together on matters of joint concern to the armed forces, advise the President as to their use, take appropriate action to implement his plans and policies as Commander in Chief of the Army and Navy, and coordinate the military efforts of the Army and the Navy.

(5) *Office of Public Relations.* The mission of the Office of Public Relations is to keep the public informed of the activities of the Navy as an instrument of national security. Its functions are to advise the Secretary of the Navy on policies relative to public relations and the dissemination of information; to initiate, coordinate and develop channels between the Navy and the public for the accomplishment of its mission; to stimulate public interest in naval activities by liaison with civilian organizations, and to coordinate and prepare for posterity historical accounts of the activities of the Navy and Marine Corps.

The Office of Public Relations is comprised of:

Public Information Division.
Civil Relations Division.
Naval History Division.

(6) *The Patent Royalty Revision Board.* (i) The Royalty Adjustment Act of 1942 (35 U. S. C. 89–96) provides that whenever an invention, whether patented or unpatented, is manufactured, used, sold, or otherwise disposed of for the United States (in this case, the Navy Department) under the conditions set forth in the act, and the license under which this is done includes provisions for the payment of royalties, the rates or amounts of which are believed to be unreasonable or excessive by the Secretary of the Navy or his duly authorized delegate, the Secretary or such delegate shall give written notice of such facts to the licensor and the licensee. The act further provides that within a reasonable time after the effective date of the notice, in no event less than ten days, the Secretary of the Navy or his authorized delegate by order shall fix and specify such rates or amounts of royalties, if any, as he shall determine are fair and just, taking into account the conditions of wartime production, and shall authorize the payment thereof by the licensee to the licensor on account of such manufacture, use, sale, or other disposition. Either the licensor or the licensee is privileged, if he so requests within ten days from the effective date of the notice, to present within 30 days from the date of his request, in writing or in person, any facts or circumstances which may, in his opinion, have a bearing upon the rates or amounts of royalties, if any, to be determined, fixed and specified as aforesaid and the order fixing such rates and amounts of royalties shall be issued within a reasonable time after such presentation. The written notice shall be mailed to the last known address of the licensor and the licensee and shall be effective upon receipt, or five days after the mailing thereof, whichever date is earlier. The licensee is forbidden after the effective date of the notice to pay to the licensor or to charge directly or indirectly to the United States, a royalty in excess of that specified in the order. Certain provisions of the act grant an aggrieved licensor remedies which, in general, limit him to a claim against the United States in a suit in the Court of Claims, or in certain instances to a suit brought in a District Court of the United States.

(ii) Pursuant to the provisions of this act the Secretary of the Navy by letter dated March 1, 1943, as amended by letter dated January 2, 1946, established in the Navy Department a Patent Royalty Revision Board which is composed of a chairman and seven members selected and appointed by the Secretary of the Navy to serve for such terms as the Secretary shall designate. Any three members designated by the chairman may act in any matters as and for the entire Board.

(iii) The following powers were delegated to the Board by the Secretary of the Navy:

(*a*) To receive and hear such facts or circumstances as may be presented in writing or in person at a hearing held pursuant to section 1 of the act.

(*b*) To fix and specify by the order, in accordance with Section 1 of the Act, fair and just rates or amounts of royalties and to authorize the payment thereof by the licensee to the licensor. To supplement, modify, or revoke any order heretofore or hereafter issued. Such order, or any supplement, modification, or revocation of any such order may be executed on behalf of the Board by the Chairman or by a member of the Board designated by the Chairman.

(iv) In addition, the Secretary of the Navy delegated the following powers to the Chairman of the Board or to any member of the Board designated by the Chairman:

(*a*) To execute and issue written notice to licensor and licensee pursuant to the provisions of section 1 of the act, and to withdraw any notice heretofore or hereafter issued under said section.

(*b*) To enter into and execute agreements with the owners or licensors of inventions or with contractors and subcontractors by the terms of which unreasonable or excessive rates or amounts are reduced to reasonable or unexcessive rates or amounts.

(*c*) To enter into and execute an agreement before suit against the United States has been instituted with the owner or licensor of an invention in full settlement and compromise of any claim against the United States accruing to such owner or licensor by reason of the manufacture, use, sale, or other disposition referred to in the act and for compensation to be paid such owner or licensor based upon future manufacture, use, sale, or other disposition of such invention.

(*d*) To supplement, modify, or revoke any order, heretofore or hereafter issued, as a term of an agreement entered into under § 26.4 (b) (6) (iv) (*b*) or (*c*).

(v) In directing that bureau assistance be given, the Secretary of the Navy accorded to the Chief of each Bureau or the Commandant of the Marine Corps the right to conduct voluntary negotiations where it had been determined, after investigations, that excessive rates or amounts of royalties were being paid and empowered such officers to enter into and sign agreements of settlement and compromise embodying the terms of such negotiations, subject, however, to the approval of such agreements by the Secretary of the Navy. Should such officers fail to successfully conclude negotiations within a reasonable time, or should they desire not to conduct such negotiations, then they should transmit promptly to the Patents & Inventions Division, of the Office of Naval Research written reports reciting the facts and circumstances surrounding an alleged unreasonable or excessive royalty.

(vi) Any question of unreasonable or excessive royalty coming before the Price Adjustment Board should be referred to the Patent Royalty Revision Board for determination and all findings of the latter Board as to the reasonableness of royalties shall be binding on the Price Adjustment Board.

(7) *War Contracts Relief Board*—(i) *Jurisdiction.* The War Contracts Relief Board was established on April 3, 1947, directly under the Secretary of the Navy with jurisdiction, under the provisions of the act of August 7, 1946 (60 Stat. 902) and Executive Order No. 9786 of October 5, 1946 to consider, adjust and settle equitable claims of contractors, including subcontractors and materialmen performing work or furnishing supplies or services to the contractor or another subcontractor, for losses (not including diminution of anticipated profits) incurred between September 16, 1940 and August 14, 1945 under contracts or subcontracts of any department or agency of the Government, without fault or negligence on their part in the performance of such contracts or subcontracts.

As constituted, the Board is the designated central authority within the Navy Department, with power to consider, adjust and settle such claims and to make or approve the settlement of any such claim in each case in which the Navy Department is the war agency considering the claim pursuant to the Executive order. The Board also has the authority to grant in whole or in part, or to withhold, for the Navy Department, approval of that part of any proposed settlement by any other agency considering a claim which relates to contracts or subcontracts of the Navy Department and to make any and all determinations and findings for the Navy Department required by the act and the Executive order with respect to each claim filed thereunder.

Except for any reconsideration which the Board may in its discretion grant, any approval, finding, determination or settlement by the Board shall be final

subject only to the provisions of section 6 of the act.

(ii) *Organization.* The Navy Department War Contracts Relief Board consists of three part-time members, appointed from time to time by the Secretary of the Navy. The Chairman of the Board is appointed to such capacity by the Secretary of the Navy. A majority of the members of the Board may at any time constitute a quorum thereof for the transaction of business. The Board shall be assisted by a recorder who shall attend all meetings of the Board and prepare and maintain an official minute record of its activities. The Board shall be further assisted by a staff of analysts, headed by a chief analyst to be appointed by the Board from among personnel of the Material Division, Office of the Assistant Secretary of the Navy.

The Board shall refer all questions of interpretation in respect to either the act or the Executive order to the Office of the General Counsel for the Navy Department, which office shall provide the Board with all necessary legal advice and assistance.

The rules and regulations pertaining to the claims for relief by contractors which formerly appeared under Part 29 (12 F. R. 409) are cancelled and superseded by § 27.19 of this chapter which will appear in the FEDERAL REGISTER of May 23, 1947.

(c) *Boards, offices, committees and divisions under the direct supervision of the Under Secretary*—(1) *Office of the Judge Advocate General.* The Office of the Judge Advocate General is under the direct supervision of the Under Secretary of the Navy. Members of the Board make frequent inspections of naval prisons, detention barracks, and brigs, and recommendations upon the organization and conduct of such activities are submitted.

(3) *State - War - Navy Coordinating Committee (Navy participation).* The State-War-Navy Coordinating Committee, organized February 10, 1945, is charged with coordinating the view of the three departments on politico-military matters in which all have a common interest. Particular attention is paid to correlation of national policy with foreign policy.

(5) *Naval Retiring Board.* The Naval Retiring Board, organized pursuant to the act of August 3, 1861, as amended (34 U. S. C. 381, et. seq.), conducts the examinations of such officers of the line and staff corps of the U. S. Navy, Naval Reserve, Marine Corps, and Marine Corps Reserve as may be ordered to appear before it, or whose case may be referred to it by the Secretary of the Navy, to determine their physical fitness to perform all of the duties appropriate to their respective ranks or grades (commonly referred to as examinations for physical incapacity retirements).

(6) *Naval Retiring Review Board.* The Naval Retiring Review Board, organized September 6, 1944, pursuant to section 302 (a) of the Servicemen's Readjustment Act of 1944 (58 Stat. 287; 38 U. S. The Board's authority extends only to those individuals who request review within time limits specified in the act.

(7) *Navy Medical Survey Review Board.* The Navy Medical Survey Review Board was established on February 4, 1946, by the Secretary of the Navy in compliance with section 302 (a) of the Servicemen's Readjustment Act of 1944, as amended by section 4 of Public Law 268, 79th Congress. The Executive Committee consists of the Civilian Executive Chairman, a general officer of the Army, and a flag officer of the Navy, with a secretariat and a staff made up of representatives from each service. In matters of major policy, the Board is advised by a Policy Committee made up of top echelon military representatives of the War and Navy Departments.

The functions of the Board include formulating plans and policies for industrial mobilization in an emergency and coordinating such plans between the Services; coordinating the work of the War and Navy Departments with regard to industrial matters, including procurement plans for the services; supervising such joint bodies as are or may be created to consider any subject falling within the scope of the Board's responsibility; and formulating and expressing the military interest of the War and Navy Departments with respect to our foreign trade.

The Board, in its capacity as representative of the Secretaries of War and Navy, has from time to time been assigned specific duties and functions by statute. Orders of the Board are construed as emanating from the Secretary of the Navy.

(3) *Material Division.* The Material Division is under the direct supervision of the Assistant Secretary. The organization and functions of this Office are described under § 26.13a.

(4) *Office of the General Counsel.* The office of the General Counsel provides all legal services for the Navy Department in connection with procurement, contract termination, property disposition, renegotiation and related matters. The Office of the General Counsel has additional legal duties as assigned from time to time by the Secretary and his Civilian Executive Assistants. At the head of the Office of the General Counsel is the General Counsel for the Department of the Navy, under whom are two Assistant General Counsel. A branch office designated the Office of Counsel, exists in each of the contracting bureaus, the Office of Naval Research, the Navy Price Adjustment Board, the Material Division of the Office of the Assistant Secretary, and the Office of the Fiscal Director. At the head of each branch office is a Counsel who reports directly to the Chief of the bureau or the Director of the office concerned, and to the Assistant Secretary of the Navy through the General Counsel. In addition to the foregoing, branch offices have been established in the field at the following activities: Aviation Supply Office, Philadelphia, NMR&DA, New York; Navy Purchasing Office, New York; Army-Navy Medical Procurement Office, New York; and at Ships Store, New York. All such branch offices are available for consultation on the day-to-day legal problems and participate in the day-to-day activities of the bureaus and offices in which they are located, thereby providing direct, on-the-spot legal services and representation, subject to the general supervision and overall coordination of the General Counsel.

(5) *Requirements Review Board.* The Requirements Review Board is responsible for assuring that balance is maintained within and between Navy matériel and personnel procurement programs and for keeping procurement levels consistent with actual needs. It is responsible for coordinating the Department's over-all personnel program so that uniform standards are maintained throughout. Procedures under which this Office operates and compilation of the laws and policies governing its actions are contained in the Navy Civilian Personnel Instructions.

(7) *Industrial Survey Division.* The Industrial Survey Division, organized June 20, 1944, acts to keep the Under Secretary of the Navy informed as to the efficiency of operation and utilization of manpower of the industrial activities of the shore establishments of the Naval Establishment, including the effective use of personnel engaged in industrial work.

The Secretary of the Navy by letter dated May 22, 1946 assigned Admiral Ben Morcell on temporary duty as such Deputy Coal Mines Administrator and authorized him in the performance of his duties to utilize to the extent necessary or appropriate naval officers, enlisted or civilian personnel. The description of the organization, functions and procedures of such Administration will be found in the material relating to the Department of the Interior.

The Board is further charged with recommending whatever action it considers essential to establish sufficiency and efficiency of cooperation and coordination of effort between the Army and Navy as to aviation.

(2) *Air Coordinating Committee (Navy participation).* This Committee, established by action of the heads of the Departments concerned on April 19, 1945, includes representatives of the State, War, Navy, Commerce and Post Office Departments and the Civil Aeronautics Board. The Bureau of the Budget has a non-voting representative on this committee. Its purpose is to enable and foster consultation and coordinated action by the departments and agencies of the Federal Government charged with responsibilities in the aviation field. Its functions are to examine international and domestic aviation problems and developments affecting more than one department or agency, to coordinate activities of the interested departments or agencies and to recommend integrated policies and action.

The design of medals and the definition of policies come within the Board's purview. This Board should be distinguished from the Board to Review Recommendations for Awards of Decorations and Medals, established by precept dated December 18, 1945.

(6) *Joint Army and Navy Committee on Welfare and Recreation (Navy participation).* The Joint Army and Navy Committee on Welfare and Recreation, organized January 27, 1944, is responsible for the coordination of policies and programs for the welfare, education, and recreation of service personnel. (2) *Office of the Fiscal Director (Office of Budgets and Reports).* This office, organized December 2, 1944, formulates, establishes, supervises and coordinates all policies and procedures affecting the finance, budgeting, accounting and auditing activities of the Navy Department. With the exception of the Finance Division, the functions of this office relate solely to the internal management of the Navy.

On July 17, 1946, the Office of Budget and Reports was made a part of the Office of Fiscal Director. The Office of Budget and Reports has charge of the preparation and execution of the Navy Department's budget, and analyzes the estimates of the individual bureaus and offices and correlates them into a well-balanced program. After funds have been appropriated by Congress, the office revises the budgetary program to conform to specific funds and follows up the execution of that program.

On December 22, 1945, the Finance Division was placed under the cognizance of the Office of Fiscal Director. The directive bringing about this change delegated the following authorities to the Fiscal Director with power on his part to redelegate the same:

(i) All authority and discretion of the Secretary of the Navy under Executive Order No. 9112 (7 F. R. 2367);

(ii) All authority and discretion of the Secretary of the Navy under Executive Order No. 9001 (6 F. R. 6787) with respect to advance and progress payments;

(iv) All authority for the establishment, supervision and coordination of policies and procedures with respect to advance and progress payments under Navy contracts.

(3) *Office of the Management Engineer.* The Office of the Management Engineer, formerly a branch of the Industrial Survey Division, was organized as a separate entity on May 29, 1946. This office advises and assists in the discharge of responsibilities with respect to "business administration". It reviews, plans, coordinates, integrates and evaluates on a continuing basis, management planning and control throughout the Navy Department and Shore Establishments; assists the heads of major activities in developing, training and establishing programs for their work, and develops criteria and techniques for appraising performance.

3. Delete § 26.5 (b) and (c) and substitute the following:

§ 26.5 *The Bureaus.* • • •

(b) Collectively, the Chiefs of the Bureaus, together with the Judge Advocate General, the Chief of Naval Research, the Chief of the Material Division, the Commandant of the Marine Corps, and the Commandant of the Coast Guard (when assigned to the Navy) constitute the Secretary's Naval Technical Assistants whose functions are described in § 26.3 (d).

(c) The organization and functions of the Bureaus of the Navy Department, the Marine Corps, the Office of the Judge Advocate General, the Office of Naval Research and the Material Division are described in detail in other sections in this part.

4. Add the following paragraphs after § 26.13:

§ 26.13a *Material Division.* The Chief of the Material Division is charged with the coordination, formulation of policy with respect to, and in certain cases the administration of all the material and procurement activities of the Naval Establishment, including contract termination and property redistribution and disposal, and the performance of such other duties as the Secretary of the Navy may direct. The orders of the Material Division are considered as emanating from the Secretary of the Navy and have full force and effect as such.

The Chief is assisted by the Vice Chief of the Material Division, and by the Deputy Chiefs for Procurement Policy, Production Policy, Field Operations and Material Control Policy, who head respectively the four main branches of the Material Division.

To perform the functions for which the Chief of the Division is responsible, the Material Division is organized and its functions distributed, as follows:

(a) *Procurement Policy Branch.* This Branch formulates and promulgates policies and general procedures governing the activities of the Naval Establishment with respect to: (1) The procurement of material and facilities, including the negotiation of contracts, (2) the allocation of responsibility for procurement of common items among the various bureaus; (3) performance and payment bonds and insurance, (4) contract terminations, and related matters of interminations, and related matters of industrial readjustment. (See § 27.3 *Termination and settlement of war contracts.*) This Branch further reviews and evaluates compliance with such policies and procedures and issues such orders as may be required to assure compliance.

(b) *Production Policy Branch.* This Branch formulates and promulgates policies and general procedures governing the activities of the Naval Establishment with respect to the production of material. This Branch also reviews and evaluates compliance with such policies and procedures and issues such orders as may be required to assure compliance.

(c) *Field Operations Branch.* This Branch formulates and promulgates policies and general procedures governing the material inspection activities of the Navy. This Branch further reviews and evaluates compliance with such policies and procedures and issues such orders as may be required to assure compliance. This Branch also exercises direct control of Supervising Inspectors of Naval Material and Inspectors of Naval Material and coordinate the activities of the foregoing and Bureau of Aeronautics General Representatives, Representatives, and Resident Representatives; Naval Inspectors of Ordnance; Supervisors and Assistant Supervisors of Shipbuilding, Inspectors and Assistant Inspectors of Machinery; Officers in Charge of Construction, Public Works and Public Utilities; and Marine Corps Inspectors. The foregoing Representatives, Inspectors and Supervisors are located in the field and at the

plants of Navy contractors and constitute the Navy Department's immediate point of contact with such contractors and their vendors.

This Branch also exercises administrative control over those functions which are assigned to the Navy Department as an owning agency by the Surplus Property Act of 1944 (58 Stat. 765; 50 U. S. C. 1611) and regulations issued pursuant thereto, regarding the redistribution, disposal and custody of surplus property which originated as contractor inventory or facilities property. The primary responsibilities involve clearance of war contractors' plants, including the disposition of scrap, salvage, waste material and small lots of contractor inventory, and the declaration of usable surplus property to the appropriate disposal agency. This function was formerly performed by the Navy Material Redistribution and Disposal Administration (NMR & DA), located at the New York Naval Shipyard, Brooklyn 1, New York, and its field representatives known as Material Redistribution and Disposal Offices (MRDO). The senior administrative officer (formerly Director, Navy Material Redistribution and Disposal Administration, NMR & DA), is now the Officer-in-Charge of the Property Disposal Unit of the Contract Termination Section, in this Branch (AstSecNav, Mat. Div. (FOB), Washington 25, D. C.). Each field office (formerly Material Redistribution and Disposal Office, MRDO), is now a division of the cognizant Supervising Inspector of Naval Material, known as the Property Disposal Division.

(d) *Material Control ,Policy Branch.* (1) This Branch formulates and promulgates the policies and general procedures governing the activities of the Naval Establishment with respect to facilities, inventory control, and property redistribution and disposal. This Branch also reviews and evaluates compliance with such policies and procedures and issues such orders as may be required to assure compliance.

(2) The Navy Vessel Disposal Office has been designated as the agency within the Navy Department to carry out, under the supervision of the Material Division, those functions regarding the disposal of surplus vessels which are assigned to the Navy Department as an owning agency by the Surplus Property Act of 1944 (58 Stat. 765, 50 U. S. C. 1611) and regulations issued pursuant thereto. The NVDO's primary responsibility includes the conduct or authorization for sale or disposal where permitted by existing statutes and regulations, of (i) combatant vessels, (ii) non-combatant vessels surveyed and recommended to be abandoned or disposed of as scrap, or salvage (including those vessels returned by disposal agencies with scrap certificates). The NVDO is located at the New York Naval Shipyard, Brooklyn 1, New York.

The disposition of surplus property by the Navy as an owning agency is also participated in by other authorized selling activities of the Naval Establishment which are listed in § 27.5 (a) (7) of this chapter, dealing with the procedures for disposition of Navy Surplus Property.

The following two Boards, Navy Price Adjustment Board and Navy Department Board of Contract Appeals, are part of the Material Division for administrative purposes but exercise authority delegated to them by the Secretary of the Navy directly.

(e) *Navy Price Adjustment Board.* This Board renegotiates war contracts and subcontracts of contractors if and only when assigned to it by the War Contracts Price Adjustment Board under the Renegotiation Act (56 Stat. 245, 982; 58 Stat. 78; 50 U. S. C. 1191 et seq.). Organization functions and procedures of the Navy Price Adjustment Board are more fully described in the Renegotiation Regulations of the War Contracts Price Adjustment Board which have been published from time to time in the FEDERAL REGISTER (10 F. R. 963, 2026, 3236, 6107, 8661, 11515, 13640, 16037; 11 F. R. 3090, 4732, 8032). The Navy Board acts under authority which the War Contracts Price Adjustment Board has delegated to the Secretary of the Navy (10 F. R. 11515). The Secretary of the Navy has redelegated to the Chairman of the Navy Price Adjustment Board final authority with respect to certain matters as set forth in the following directive:

S. Maritime Commission for return to the former owners on the conditions stated in such law).

PART 26—ORGANIZATION AND FUNCTIONS OF THE NAVAL ESTABLISHMENT

PART 27—PROCEDURES OF THE NAVAL ESTABLISHMENT

PART 29—CLAIMS FOR RELIEF BY CONTRACTORS

MISCELLANEOUS AMENDMENTS

The following changes are authorized to amend the regulations relating to the organization and functions of the Naval Establishment (11 F. R. 177A-159):

1. Add the following sentence to § 26.13 (b) (3) (i): "For information on admiralty claims, see § 27.8 (b) of this chapter."

2. Delete §§ 26.13 (b) (3) (ii) and (iii) and renumber §§ 26.13 (b) (3) (iv), (v), (vi), and (vii) to read §§ 26.13 (b) (3) (ii), (iii), (iv), and (v).

3. Add the following sentence to § 26.13 (b) (3) (ii): "For information on claims, see § 27.8 (a) of this chapter."

4. Delete § 26.13 (b) (3) (iii) and substitute the following:

§ 26.13 *The Office of the Judge Advocate General.* * * *

(b) * * *

(3) *General Law Division III.* * * *

(iii) *International Law.* Advises and maintains liaison with offices of Navy Department affected by international law problems; advises on legal questions incident to operation of Foreign Claims Commissions, Guam Land and Claims Commissions, leased base agreements, military government of occupied areas, prisoners of war and jurisdiction of foreign civil authorities over naval personnel; maintains liaison with State and War Departments. For information on foreign claims and Guam claims, see §§ 27.8 (c) and (d) of this chapter.

5. Amend § 27.8 by changing the title to read as follows:

§ 27.8 *Claims*—(a) *Navy Personnel Claims Regulations and Navy General Claims Regulations.*

6. Add § 27.8 (b), (c) and (d) as follows:

(b) *Admiralty claims*—(1) *Delegation of final authority.* (i) Final authority for the settlement, where the amount paid does not exceed $1,000,000 and where the matter is not in litigation, and direct payment of claims for damage caused by naval vessels and for towage or salvage services rendered to naval vessels are vested in the Secretary of the Navy (58 Stat. 726; 46 U. S. C. 797).

(ii) Final authority for settlement is vested in the Secretary of the Navy, where the matter is not in litigation and where the amount collected does not exceed $1,000,000, of claims of an Admiralty nature or for damage caused by a vessel or floating object to property of the United States, which is under the jurisdiction of the Navy Department or to property for which the Navy Department by contract or otherwise may have assumed responsibility (Act of December 5, 1945, Public Law 246, 79th Congress, 1st Session).

(iii) The Secretary of the Navy is authorized to delegate final authority to such persons as he may designate to settle claims, not exceeding payment or collection of one thousand dollars under the aforesaid statutes. (Public Laws 595 and 598, respectively, 79th Congress.)

(iv) The final authority to settle said claims, not exceeding payment or collection of one thousand dollars under the above statutes, has been delegated by the Secretary of the Navy to the Judge Advocate General, Assistant Judge Advocate General, and the Chief Admiralty Officer.

(2) *Limitation of settlement.* The authority of the Secretary of the Navy to effect settlement of claims under this act is subject to the same limitation as the Public Vessels Act (Act of March 3, 1925, c. 428, 43 Stat. 1112; 46 U. S. C. 781 et seq.), that is, a two-year period from the date of the origin of the cause of action. Settlement must be authorized by the Secretary and accepted by the claimant prior to the expiration of such two-year period; otherwise, thereafter the cause of action ceases to exist and the Secretary has no authority to effect settlement administratively. The "filing" of a claim, or its consideration by the Navy Department or correspondence or negotiation does not waive or extend the two-year limitation. Where damages have not been liquidated, settlements on the issue of liability can be effected during the two-year period, leaving the question of the extent of damage for later determination. A settlement within the two-year period in effect constitutes a contract upon which suit could be maintained in the Court of Claims, subject to its six-year limitation. Payment does not need be accomplished within the two-year period.

The requisite is an agreement between the Navy Department and the claimant prior to the expiration of the period when a suit under the Public Vessels Act would be barred, that is, the two-year period.

This limitation applies to all claims, both of a non-admiralty nature, such as damage to land structures, and to admiralty claims, which are settled under the act of July 3, 1944.

(3) *Public information.* Information as to the status of admiralty claims may be obtained upon application to the Chief Admiralty Officer, Office of the Judge Advocate General, Navy Department, Washington 25, D. C., or upon application to the Admiralty Officer or Legal Officer in the naval district where the matter may have arisen.

(c) *Foreign, non-combat claims.* Foreign, non-combat claims may be allowed by a commission appointed by the Commanding Officer of the area of not more than one member when the amount is not greater than $500.00, and three members when the amount is between $500.00 and $2,500.00. Such commissions have final authority (not subject to review) to approve payments up to $2,500.00 in settlement of claims. Claims between $2,500.00 and $5,000.00 may be paid when the Commanding Officer has approved the award. Awards in excess of $5,000.00 are reviewed by the Judge Advocate General and after appropriate administrative action are reported to the Congress for consideration.

Information relative to claims may be procured by communicating with the Judge Advocate General, Navy Department, Washington 25, D. C.

(d) *Guam claims (Public Law 224, 79th Cong.).* Combat and noncombat claims of permanent residents of Guam for damage to real and personal property may be allowed by the Guam Land and Claims Commission up to $2,500.00 and with approval of the Governor of Guam, up to $5,000.00. Claims for damage to real and personal property in excess of $5,000.00, and all death and injury claims are reviewed by the Judge Advocate General and after appropriate administrative action are reported to the Congress for consideration.

(e) *Claims for relief by contractors.* The rules and regulations in this part pertaining to the claims for relief by contractors which formerly appeared under Part 29 (12 F. R. 409) are cancelled and superseded by § 27.19 which will appear in the FEDERAL REGISTER of May 23, 1947. For statement on the organization of the War Contracts Relief Board which handles this type of claims, see § 26.4 (b) (7) of this chapter.

7. The rules and regulations in this part pertaining to the claims for relief by contractors which formerly appeared under Part 29 (12 F. R. 409) are cancelled and superseded by § 27.19 which will appear in the FEDERAL REGISTER of May 23, 1947.

PART 21—INTERNATIONAL POSTAL SERVICE

PACKING

In Subpart A, General Provisions, § 21.75 (39 CFR, Part 21), make the following changes:

1. Amend paragraphs (a) and (b) to read as follows:

§ 21.75 *Packing.* (a) Every parcel shall be securely and substantially packed, regard being had to the nature of the contents and climatic conditions, the length of the journey, and the numerous handlings and risks of concussion to which parcels for foreign destinations are unavoidably subjected en route. Packages should be packed in canvas or similar material, double-faced corrugated cardboard boxes, solid fiber boxes or cases, thick cardboard boxes, or strong wooden boxes made of material at least a half inch thick. Ordinary pasteboard containers are wholly inadequate. While it is permissible to use heavy wrapping paper or waterproof paper as the outside covering, for instance, of a carton, it may not be used as the only covering of the contents. Boxes with lids screwed or nailed on and bags closed by means of sewing may be used provided they conform to other conditions prescribed. (See country items (Subpart B) regarding special packing requirements to certain countries.)

(b) Articles of china, crockery, or glass, and hats, radios, or other articles of a fragile or easily breakable nature should be packed in a strong (preferably wooden) box, strong double-faced corrugated cardboard boxes enclosed in strong wooden crates are also preferred, especially in the case of overseas destinations. There should be a space of at least 1½ inches between the article and the top, bottom, and sides of the box. This space may be utilized with excelsior or other effective cushioning material, or, with air-cushioned corrugated riders.

2. Amend paragraph (d) (1) to read as follows:

(d) (1) All mailable liquids and substances which easily liquefy must be packed in two receptacles. Between the first (bottle, flask, etc.) and the second (box of metal, strong wood, strong corrugated cardboard, strong fiberboard, or receptacle of equal strength) there shall be left a space to be filled with sawdust, bran, or other absorbent material in sufficient quantity to absorb all the liquid contents in the case of breakage. It is not considered that excelsior possesses the necessary absorbent quality to meet the special requirements cited for internal packing. In the case of Great Britain and Northern Ireland and those countries receiving parcels via Great Britain, Eire, Leeward Islands, Malaya, and Windward Islands, the outer receptacle should be of strong wood or metal.

3. Subparagraphs (2) and (3) of paragraph (d) are rescinded.

4. Subparagraph (4) of paragraph (d) is renumbered subparagraph (2) of paragraph (d).

5. In subparagraph (3) of paragraph (f) delete "and forwarded to Miami or Tampa, Fla., for onward transmission to Cuba" in last sentence.

Dimensions. Greatest combined length and girth, 6 feet. Greatest length, 3½ feet, except that parcels may measure up to 4 feet in length, on condition that parcels over 42 and not over 44 inches in length do not exceed 24 inches in girth, parcels over 44 and not over 46 inches in length do not exceed 20 inches in girth, and parcels over 46 inches and up to 4 feet in length do not exceed 16 inches in girth.

Observations. Packages not properly wrapped when presented for mailing will be refused until they are wrapped or packed in such manner as it is thought will assure their delivery at destination intact. The Warsaw office requests the use of boxes enveloped in cloth or canvas.

Used clothing, underwear, table linen, and bedding, of wool, half-wool, cotton, artificial silk, linen, and other fabrics of vegetable origin (which may be padded but not fur-trimmed), used leather footwear (other than patent leather, alligator-skin, snake-skin, chamois-skin, leather with ornamental designs or other fancy leathers), as well as footwear of rubber, felt, or cloth (except brocade), may be exempted from customs duty if sent as gifts to indigent persons for their own use.

If the sender desires that such articles be exempted from duty, he should enclose in the parcel a list of the articles prepared and certified by himself, with indication of the name and address of the addressee, and attesting that the articles are sent as gifts. The list must also be visaed by a consulate of the Polish Republic.

Addressees desiring exemption from duty must submit, at the time of customs examination, a certificate of indigence. However, if such certificate of indigence has been sent to the mailer it should likewise be submitted to a Polish consulate for visa, after which both the approved certificate of indigence and list of articles being sent may be enclosed in the parcel. The wrappers of such parcels are to be marked to indicate that the approved certificate and list are enclosed.

If the certificate of indigence has not been sent to the mailer, parcels containing used clothing, etc., intended for indigent persons may be accepted only upon a definite understanding with the mailer that the addressee will submit the certificate of indigence to the Polish customs authorities at the time the parcel is examined by them. The wrappers of such parcels must be marked by the sender to show that the certificate of indigence will be submitted by the addressee.

Parcels containing both new and used articles may be accepted for mailing only on condition that they are endorsed by the senders to indicate that the customs duties will be paid by the addressee.

Postmasters will see to it that parcels for Poland are invariably marked by the senders to show the alternative disposition to be made by them in the event they prove to be undeliverable for any reason. In those cases where the nature or value of the contents is such that the senders would not be willing to pay return charges if a parcel is undeliverable they should be instructed to check section "(B) Abandon" on the alternative-disposition sticker and on the customs declarations, and to strike out sections (A) and (C).

The customs may refuse to exempt articles which, due to their quantity or nature, do not correspond to the family condition of the addressee, or if there is reason to believe that such articles are not sent as gifts.

Polish consuls are located in the following cities:

Chicago, Ill.; Pittsburgh, Pa.; New York, N. Y.; and Detroit, Mich.

Import permits are required for all parcels addressed for delivery in Poland which contain articles subject to import restrictions. Persons in Poland desiring to receive merchandise which is subject to import restrictions must obtain from the Ministry of Industry and Commerce of that country an import permit, which permit should be forwarded to the mailers for inclusion in the parcel. The wrappers of such parcels should be marked to indicate that the import permit is enclosed.

The Postal Administration of Poland has advised that while inclusion of the import permit in the parcels greatly simplifies clearance through the Polish customs, there will be no objection to the acceptance of parcels, at the risk of the senders, when they are presented for mailing without the import permits being enclosed, as the addressees are allowed 28 days in which to produce the required documents. Detention of the parcels pending the production of the permit, of course, gives rise to payment of storage charges by the addressee, or by the senders in case the parcels prove to be undeliverable and are returned to origin.

Postmasters are directed to accept for mailing to Poland parcels subject to import restrictions, which are presented without the required import permit being enclosed, only with a definite understanding that if the parcels are returned in consequence of failure of the addressees to obtain the required permit within the 28-day period allowed by Poland, the senders will be expected to pay the return charges due on the parcels.

It is understood that the following are not subject to import restrictions in Poland and do not therefore, require import permits:

1. Outer and inner wrappings usually employed in commerce.
2. Samples of merchandise and models, not intended for sale and not suitable for other use.
3. Small noncommercial shipments (up to 500 grams) of merchandise other than luxury articles.
4. U. N. R. R. A. shipments.
5. Gift parcels.
6. Advertising printed matter.

Prohibitions; For reasons of public safety. Military arms and war material, as well as parts and accessories.

Arms not having a military character imported for industry and commerce are admitted under permit from the provincial government.

Arms not having a military character imported for personal use are admitted under permit from the administrative authorities of the district in which the addressee resides.

For sanitary reasons. Substitutes for saffron.

Wallpaper, printed papers, fabrics, and other articles dyed with colors based on arsenic.

Colors based on aniline containing arsenic (fuchsine and other names), in lumps, powder, or paste (not in crystals).

Beans of the Phaseolus lunatus and Rangoon species, as well as all species of poisonous beans.

Admissible medicines published in special lists by the Ministry of Finance may be imported on presentation of a certificate issued by the provincial government.

Medicines not mentioned in the said lists (preparations of galena, combinations employed in medicine and put up in doses, as well as mixtures of combinations employed in medicine) may be imported under a permit issued separately for each shipment by the Ministry of Finance and a certificate issued by the provincial government.

Medicines, whether or not they appear in the said lists, intended for personal use, may be imported in very small quantities under permit from the Ministry of Finance, without the certificate of the provincial government.

Such permit is issued on presentation of a doctor's prescription attesting the need for using the medicine in question and the impossibility of replacing it by a medicine produced locally. Medicines of this kind which do not exceed the weight of 300 grams may be cleared by first-class customs offices without special authorization. Those offices are also authorized to clear all kinds of medicines and specifics imported in very small quantities for purposes of study by schools, as well as by State and municipal hospitals and by social insurance establishments. Clearance is effected on presentation of a certificate issued by the rector, the dean, or the chief of the clinic, hospital, etc.

Serums and vaccines employed in medicine are admitted under a permit issued separately for each shipment by the Ministry of Health, under the conditions set forth in that permit.

White lead, sulphate of lead, and other products containing lead combinations are admitted under a permit issued jointly by the Ministry of Finance, the Ministry of Health, and the Ministry of Industry. This restriction does not apply to the importation of completely prepared artists' colors.

Serums and vaccines for study may be cleared in the same manner as medicines imported for that purpose.

For the protection of animals. Fish, crawfish, bodies and parts of animals, animal products, used harness, used bee-keeping utensils, forage, bedding, all kinds of articles bearing traces of blood or pus coming from animal excrements or secretions, serums and vaccines for veterinary purposes, as well as biological preparations for the diagnosis of infectious diseases of animals, may be imported under a permit issued by the Ministry of Agriculture, under the conditions set forth in that permit, if the international veterinary conventions signed by Poland do not provide otherwise. The permits may be individual or collective.

For the protection of plants. All varieties of potatoes, including seed potatoes, are admitted under a permit issued jointly by the Ministry of Finance and the Ministry of Agriculture, through the customs offices authorized to that end. They must be enclosed in new (unused) packing and lead-sealed by the sender, who shall attach to each shipment two copies of a certificate issued by the official phytopathological service or by a plant-protection institution of the country of origin. That certificate shall attest that the potatoes and all articles employed for their packing are free from the following diseases and parasites, as well as their eggs and larvae: Synchytrium endobioticum (potato wart disease), Spongospora subterranea (powdery scab), Leptinotarsa decemlineata (Colorado potato beetle), (Phthorimaea) Gnorimoschema operculella (potato tuber worm), and Heterodera Schachtii rostochiensis (potato nematodes); and that such potatoes come from a region free from all the diseases and parasites above mentioned and at least 20 kilometers distant from the nearest focus of Synchytrium endobioticum (potato wart disease) and 50 kilometers from the nearest focus of Leptinotarsa decemlineata (Colorado potato beetle).

The following plant materials may be imported through the authorized customs office, on condition that the shipment is accompanied by two copies of a certificate issued by the official phytopathological service or by a plant-protection institution of the country of origin: (a) Trees, shrubs, layers, and grafts of all kinds; (b) rooted ornamental plants and their seedlings or stocks (bulbs rhizomes, roots); (c) fresh fruits (apples, pears, plums, peaches, and cherries); (d) fresh vegetables of all kinds, as well as their parts growing above and below ground, except seeds and potatoes (see preceding paragraph); (e) seeds of peas, kidney beans, lentils, vetch, Pisum arvense, navy beans, and horsebeans. The certificate of phytopathological inspection must show that the contents of the shipment and all the articles used for its packing have been inspected, that they are not infected by diseases or infested by parasites, as well as their eggs and larvae, and that the plant materials above enumerated come from an establishment or plantation free from such diseases and parasites. In case of importation of trees, shrubs, and rooted plants, as well as all kinds of live plants with their roots or underground parts (bulbs, rhizomes, etc.) with earth or placed in a container filled with earth, the certificate must also show that the plants have been grown in a place free from Synchytrium endobioticum (potato wart disease) and that the earth contained in the shipment does not come from a region infected with that disease.

Potatoes and other plant materials which are not accompanied by a phytopathological inspection certificate can be admitted only upon presentation by the addressee of a certificate issued by a plant-protection institution in Poland showing that the shipment is free of any dangerous disease or injurious pest.

Seeds of clover, lucerne (alfalfa), lupuline (yellow trefoil), sweetclover (bird's-foot trefoil), and timothy must be accompanied by two copies of a certificate, issued by an official seed-examining establishment of the country of origin; stating that they are entirely free from Cuscuta (dodder); otherwise the necessary certificate must be issued by a competent similar establishment in Poland; in any case, the seeds may be subjected to analysis by the Polish authorities, and if found to contain dodder will be rejected. Such seeds, on importation into Poland, must be colored by the customs offices authorized to clear them, following the procedure laid down by the Ministry of Finance and the Ministry of Agriculture jointly, as follows: There is injected into a sack of seeds a solution of 0.9 percent of eosin in denatured alcohol (160 cubic centimeters of solution to 100 kilograms of seed). The expenses of such coloring are charged to the importer. The foregoing restrictions do not apply to samples of seeds not exceeding 100 grams in weight, or to shipments imported by universities or agricultural institutions for scientific purposes.

Beans, other than Phaseolus lunatus and Rangoon, as well as poisonous beans, whose importation is entirely prohibited, may be

imported if accompanied by certificates of origin issued by the State authorities or by agricultural associations of the country of origin. The certificate of origin must indicate the species of bean (botanical name), and show that no poisonous elements are included. That certificate may be replaced by an attestation issued in Poland for the State food-analysis establishment, after examining samples sent to it by the customs office under official seal. The expenses of transmitting and examining the samples are charged to the person authorized to receive the merchandise.

State monopolies, etc. Articles coming under the State monopolies may be imported only by the monopoly Administrations. Private individuals must obtain a permit from the Ministry of Finance, which fixes the conditions for customs clearance. An exception is made for tobacco products intended for personal use not exceeding the weight of one kilogram.

Gold, in the form of coins which are legal tender in any country, or of coins which are not valid in any country, ingots, worked gold or articles not having the character of products ready for use, as well as in the raw state in any form, may not be imported without the authorization of the Currency Commission at Warsaw.

The importation of Polish or foreign negotiable securities and dividend-paying securities, of dividend coupons of such securities, of Polish paper money, and of Czecho-Slovak currency, without the permission of the said Commission, is likewise prohibited.

Persons in Poland violating these provisions are liable to the measures contemplated by article 16 of the decree of the President of the Polish Republic dated April 26, 1936, concerning monetary transactions with foreign countries, as well as the movement of Polish and foreign securities.

For other reasons. Fishberries (Berries of Cocculus [Anamirta] indicus).

Leaves, peelings, and waste of potatoes.

Tokens, counters, and other articles in imitation of Polish or foreign coins. Counterfeit Polish or foreign paper money or securities, as well as articles ornamented with such counterfeits, with the exception of literary or scientific publications.

Single playing cards.

All kinds of labels, caps, corks, empty containers, etc., bearing the firm name of foreign producers, imported without the goods.

Artificial sweetening substances, as well as chemical compounds capable of being transformed by simple chemical processes into saccharine or similar substances, may be imported only by factories or wholesale drug stores under special permits issued in accordance with the domestic regulations.

Collect-on-delivery service. (a) Registered parcel-post packages, printed matter, 8-ounce packages of merchandise, and small packets may be sent collect-on-delivery from any money-order post office in the United States.

(b) Collect-on-delivery shipments shall in all cases be registered and based upon bona-fide orders for the contents of the parcel or in conformity with agreement between the senders and addressees. It is not permissible to use the c. o. d. service as a collection agency.

(c) The amount to be collected on parcels sent to Mexico must be shown on the parcels in pesos and centavos, the centavos to be in even centavos—for instance, 2 pesos 50 centavos, not 2 pesos 49 centavos. "Pesos" and "centavos" must be written out in full. On parcels received from Mexico the c. o. d. amount will be shown in dollars and cents.

(d) The c. o. d. fees (which cover registration) are as follows:

	Cents
For collection of a maximum of 50 pesos and an indemnity (loss only) up to $10	30
For collection of a maximum of 250 pesos and an indemnity (loss only) up to $50	45
For collection of a maximum of 500 pesos and an indemnity (loss only) up to $100	60

(e) While postal employees may acquaint the public upon request with the information published by the Department from time to time regarding the rate of conversion of the Mexican peso, it should be made clear to the public that due to the frequent fluctuations in the conversion rate no responsibility will be assumed by the Postal Service for any quotations furnished and that the fluctuations in the rate of conversion should be taken into consideration by the senders when computing the c. o. d. charges to be collected on delivery so as to insure the receipt of the full amount desired. It should also be made clear that the responsibility of properly indorsing on registered c. o. d. parcels to Mexico the amount in pesos and centavos to be collected rests with the sender and that no indemnity is payable to cover any shortage in the remittance received when such remittance represents the equivalent of the pesos and centavos indorsed on the parcel by the sender. The question of the shortage is then one for adjustment between the sender and the addressee of the c. o. d. parcel involved.

(f) Form 3818 or a letter indicating the nature of any alteration or cancellation of the c. o. d. charges requested by the sender on c. o. d. parcels sent to Mexico shall be sent direct to the postmaster at the United States exchange office from which the parcel concerned was due to be dispatched in a direct mail to Mexico.

(g) If the United States exchange office of dispatch is not definitely known to the postmaster at the office of mailing, the Form 3818 or letter, in order not to delay the matter, should be sent to the postmaster at Laredo or El Paso, Tex., according to whichever of these two offices can be reached more quickly from the office of mailing. In general, El Paso is reached more quickly from places in western United States and Laredo from other places.

(h) Requests for alteration or cancellation of c. o. d. charges in connection with c. o. d. parcels sent from Mexico to this country will be sent by the proper Mexican exchange office to one of the United States exchange offices listed in paragraph (j) below, which in turn will transmit the request to the United States office of destination. Postmasters receiving requests from one of the United States exchange offices referred to for changes in or cancellation of the amounts of c. o. d. charges on c. o. d. articles mailed in Mexico will promptly comply with such requests. (The requests should be filed at the office of destination as a record.) However, such requests which may be erroneously sent from any Mexican post office direct to the office of destination in this country should be sent to the Deputy Second Assistant Postmaster General, International Postal Transport, Washington 25, D. C., to have them verified. The c. o. d. parcels involved should in the meantime be held for further instructions from the Deputy Second Assistant Postmaster General.

(i) The postmarking stamp of the office of mailing must appear at all breaks (cut or torn ends) of the gummed-paper strips employed in the sealing of registered c. o. d. parcel-post packages.

(j) There is shown below a complete list of all the offices in this country and Mexico through which c. o. d. articles may now be exchanged:

(k) Sanders' return receipts will not be furnished for collect-on-delivery parcels for Mexico.

(l) For further information concerning collect-on-delivery service see §§ 21.108, 21.114.

Observations. Packages, except packages of moving-picture films, automobile tires, and packages of newspapers from news dealers especially marked to go as "outside pieces," will not be accepted for transmission to Mexico when their bulk will prevent their inclosure in mail sacks at the United States exchange post office of dispatch. Automobile tires, up to a weight limit of 44 pounds each, may be accepted for places in Mexico reached by railroad from the United States. The Mexico office will not accept responsibility for any damage that may occur to packages of automobile tires when their transmission is outside of mail sacks. Packages such as herein described will be accepted outside of mail sacks when they originate in Mexico and are destined for the United States.

The Postal Administration of Mexico has requested that it be recommended to senders of parcels destined for that country which are directed to the ultimate addressee through the intermediary of a first addressee (bank or other organization) that the names and addresses of both addresses be indicated on the wrappers of the parcels as well as on the customs declarations.

The Mexican Administration has established a system of advising the second addressee of the arrival of such a parcel at the office of destination. This advice of arrival, which bears a notation that the parcel will not be delivered except upon written authorization from the first addressee, is sent only once. It is sent at the same time as the advice is sent to the first addressee. The Mexican Administration states that, in practice, it has been found that banking institutions are sometimes negligent in advising their client (a second addressee) of the arrival of his merchandise, and that the sending of an advice of arrival to the second addressee serves to notify him that the parcel is on hand.

These instructions contemplate that both addresses appearing on a parcel shall be addressed to a single office. Therefore, parcels should not be accepted for mailing if directed to a first addressee at a certain office and to a second addressee at another office.

For information concerning customs duties on advertising matter, yearbooks, and directories, see "Regular mails."

The Mexican domestic rate of postage will be charged on each parcel-post package which is forwarded from one office to another office in that country when it bears an indication that the mailer desires it tendered for delivery at an alternative address. In the event the parcel can not be delivered at the alternative address indicated, it will be returned to origin rated for the collection of the above-mentioned forwarding charges. These charges, in addition to others which may have accrued on the parcel, will be collected from the mailer at time of return.

Mail should be dispatched according to special instructions issued to cover designated post offices in a particular State. At United States Exchange post offices concerned parcel-post packages for Mexico will not be inclosed in the same sacks with regular mail articles. New York is not the exchange office for Mexico (overland).

Insecticides, fungicides, and germicides shall be prepared for mailing to Mexico as follows:

Each receptacle shall be plainly marked with the word "Poison" and the label or printed name of the manufacturer.

The inner boxes or tubes containing the materials must be of metal, wood, glass, or fiber, and the outer container must be of metal or fiberboard, securely fastened and sealed.

For liquids, an inner container must not only be surrounded by sufficient absorbent material, but must also be enveloped in padding material. Wood shavings cannot be considered as absorbent. The inner packing for insecticides, fungicides and germicides in solid or powder form must likewise be surrounded by packing material.

Prohibitions, for sanitary reasons. Pacifiers for the amusement of babies. For medicines, cosmetics, and toilet articles, see "Regular mails." The customs service requires, from persons receiving by mail from abroad, in small quantities, products of animal origin contained in tin cans, a certificate of sanitary inspection issued by the Department of Agriculture and Fomento. However, with a view to avoiding annoyance and difficulty for importers of such small shipments, the Secretariat of Communications and Public Works, at the request of the said customs service, advises that the products in question may be exempted from the above-mentioned inspection certificate when their weight is less than 5 kilograms (11 pounds); but that shipments of a greater weight will be inspected by a representative of the competent Secretariat, at the request of the interested parties in each case.

For the protection of animals and plants. Cottonseed must be fumigated or certified by the sanitary authorities of the country of origin.

The following are admitted only with special authorization from the Minister of Agriculture and Fomento: Coffee plants and parts thereof (roots, stems, flowers, and fruits) intended for study; rice seed and paddy rice; banana plants and parts thereof; citrus trees and parts thereof (there is no restriction on the fruit); potatoes; fruits and fruit plants intended for study; sugarcane shoots intended for study.

A special permit from the Minister of Agriculture and Fomento is required for corn and other agricultural products from the States of Michigan, Ohio, Pennsylvania, New York, New Hampshire, Massachusetts, Maine, Rhode Island, Connecticut, Vermont, New Jersey, West Virginia, and Indiana.

Live plants, seeds, and herbs in general require sanitary inspection.

Peach, nectarine, almond and chabacano (apricot), trees, as well as their roots, stems, branches, cuttings, shoots, and grafts from the United States, being subject to partial quarantine, require a permit from the Federal Office of Agricultural Defense for importation.

Parasites and predators of injurious insects, unless intended for the control of those insects and exchanged between officially recognized institutions.

Arms, etc. Arms require the special permission of the Secretariat of War and Navy. The importation by mail of pistols, hunting and target arms, is subject to the following conditions: For such importation there is required, in addition to the authorization from the Secretariat of War and Navy, a certificate from the Mexican Consul at the place of shipment establishing that the articles destined for importation into the country are indeed of the authorized kind; this document shall be submitted to the Mexican customs office of entry, which will not permit the importation without it. Moreover, the Secretariat of Finance and Public Credit calls attention to the fact that the absence of the above certificate constitutes a violation of the customs law, and that the prescribed fines will consequently be levied; the customs can permit the forwarding and withdrawal of the arms only after the fine has been paid; pistols and other instruments for the projection of tear gas.

For other reasons. Works violating the Mexican copyright laws.

Banknotes, except those of the Bank of Mexico, coins of all kinds, with the exception of gold coins, and values payable to bearer (checks, etc.) are prohibited admission. As an exception, the Bank of Mexico and the banks associated therewith are authorized to import bank notes exclusively for the purpose of exchange. However, the Secretariat of the Treasury and Public Credit of Mexico may prohibit the Bank of Mexico and its associated banks from importing banknotes into the country when, in the judgment of the National Banking Commission, the importation is excessive, or when the said commission deems it prejudicial to the economics of that country. Prohibited banknotes and coins and values payable to the bearer received in Mexico will be returned only when the Mexican Administration is satisfied that the articles do not have an illegal character. In case the articles are found to have an illegal character they will be confiscated. See regular mail prohibitions concerning the mailing of coins and banknotes in registered letters.

Uncanceled postage stamps are accepted only under registration.

Eggs, except eggs for hatching addressed to places served directly by railroad, are prohibited.
